REYNOLDS '531'

'High-carbon content'
lightweight tubing

A top class frame designed for super performance

HAND BUILT WITH '531' AND PRUGNAT LUGS

Responsive and lively to ride, the 72° parallel design has been found to give greater stability than any other. Carefully balanced chain stay length, fork rake and bracket height combine to give positive handling at all speeds. Brazed-on pump-pegs, lamp boss, cable eyes.

FITTED with polished seat pin and good quality British bearings at head and bracket.

FINISH. Any colour Flamboyant, Lustre or Enamel to choice, with contrast bands to head and seat tube or lugs lined. Metal Headplate and full set of transfers.

Italian Styled

TORINO

Road Frame

'531' Butted Tubing Throughout

Hand built with neatly finished long spearpoint Italian lugs, this frame follows the modern trend. The $\frac{9}{16}$ " seat stays are fully wrapped over with long chamfer at the seat cluster and combine with Campagnolo forged drop-outs in $17\frac{1}{2}$ " chain stays to give an extremely rigid rear triangle. Nicely tapered fork blades are mounted in the classic sloping Italian crown and Campag. front ends. Designed for use with multiple gears combined with maximum stability and road-holding characteristics. The usual gear and brake cable eyes are fitted, together with down tube lever stop but NO lamp boss or pump-pegs are provided.

FINISH ANY COLOUR

Flamboyant, Lustre or Enamel to choice. Head tube in contrasting colour to match single or split panel on seat tube. Top-eyes, crown and lug profiles carefully picked out by hand. Metal head-plate, transfer crest, name and the model transfers complete a well-finished frame.

EX-WORKS
