

CLAUD BUTLER
THE · BIKE · FOR · LIFE

THE · ULTIMATE · TOURING · BICYCLE

We call it the bike for life – specifically designed for comfortable touring due to its responsiveness. Whether you are the serious tourist with long hours in the saddle in mind or the more leisurely type who just want to have a little exercise and take the fresh air whilst seeing the countryside.

A Claud Butler will handle well due to its excellence of design, its correct geometry and fork rake and the correct attention to component quality control. Combining the very latest high technology and the individual skill of our craftsmen creates a bicycle of outstanding construction and quality.

All Claud Butler frames and forks are made in our West Midlands factory from the finest tubing which is fully mitred to ensure a perfect fit, the frame is brazed by low

controlled temperature method, hand finished and bonderised against rust before being stoved enamelled in one of the most up to date paint plants in the country. The frame is finally given a coat of fine quality lacquer to give the superb quality look synonymous with the name Claud Butler, the most famous marque in British lightweight

bicycles for over 50 years and today the acknowledged leader in touring cycle design and development.

Wherever you see cyclists you will see Claud Butler, a legend in cycles and we are proud to offer the latest range which cater for every need of rider.

• CANYON •

With top of the line componentry and 15 speed Sun Tour gears the Canyon has been specifically designed for all terrain riding with maximum braking power – the Canyon simply bustles with features and must be seen to fully appreciate the sheer quality and design technology.

Bars, Tape, Stem: G.B. Avanti, Sponge, Alloy

Mud Guards: Poker Plastic

Pedals: Silvan Alloy

Carrier Fittings: Allez Alloy Silvalite

Colour: Black Gold Duotone

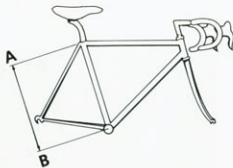

HOW TO CHOOSE THE RIGHT SIZE OF BICYCLE

First measure your inside leg from the very top of the crotch right down to the ground when you're in stocking feet.

On a man's bicycle, there should be at least 1" of clearance between the top of the crotch and the top tube.

On a lady's cycle, there should be a similar clearance between the top of the crotch and the seat lug.

The frame size is measured from the top of the seat lug to the centre of the bottom bracket axle (A-B see illustration).

Frame Size	Inside Leg
19.0	29.0
20.0	30.0
21.0	31.0
22.0	32.0
23.0	33.0
23.5	34.0
24.5	35.0
25.0	36.0
25.5	37.0
26.0	38.0

This Chart is intended only as a rough guide - consult your dealer for expert advice.

CLAUD BUTLER GUARANTEE

The Holdsworth Co. Ltd. will replace parts for your cycle free of charge if proof of a manufacturing fault can be established by the original purchaser.

PARTS - We will supply to your Holdsworth appointed dealer new parts in exchange for faulty parts, except for tyres and tubes, for one year after original purchase.

FRAMESETS - We will supply to your dealer a new fork or frameset in exchange for a defective fork or frameset during the life of the cycle.

A receipt or other proof of original consumer purchase is necessary for this warranty to be honoured.

This Guarantee covers normal consumer use and excludes problems which may arise from alteration, abuse, neglect, misuse, accident, incorrect assembly, maintenance or commercial use. If you have a problem, contact your nearest appointed dealer.

This guarantee does not seek to diminish any consumer statutory rights.

AUTHORISED DEALER
