GAZELLE FRAMESETS 1989

Gazelle, the leading Dutch manufacturer have introduced several new designs for 1989 plus changes to existing models with modified race geometry, closer clearances and revised frame components.

New 'top of the range' is the Champion Mondial AA-653 which has a number of unique features including Silva Skema dropouts and new style concealed rear brake cable. Constructed in Reynolds 653 tubing, Gazelle rate this the 'perfect' all round road racing frameset.

The popular Champion Mondial AB race-frame has been updated with several modifications which include braze-on front mech.-boss, NCO fork blades, micro fusion aero fork crown and engraved bottom bracket.

Another major development is the completely new Formula range featuring Reynolds 501 double butted Chromium Molybdenum tubing. There are 5 models, Race, Trim (with mudguard eyes), Cross, Triathlon (with dropped top tube), and Randonneur (touring). All are handbuilt to Gazelle's usual exacting standards with high quality frame components including microfusion aero fork crown, NCO fork blades and Cinelli brake bridge. Race, Trim and Triathlon models have a concealed rear brake cable.

The range of Gazelle finishes has been further extended with new designs and new colours including fluorescents.

Gazelle remain among Europe's top two or three frame builders producing over 8,000 handbuilt framesets per annum in their own highly specialized race department. Their versatile range includes every type of race frameset, plus touring and ATB. Also special geometry extra large and small frames and custom building where necessary.

New catalogue is available from U.K. distributors:-
