PASSION AND PERFORMANCE SINCE 1993

Jeff Steber
Owner / Creator

ARE YOU IN? **INTENSE FOR LIFE.**

HAND
CRAFTED

Your first bike – As a kid, you probably dreamt about it, asked for it for your birthday, saved up your allowance for it. For many of us, it was our first taste of freedom: A way to get where we wanted to go on our own, without relying on our parents.

It was more than just a bike. It was a companion that taught us the exhilaration of independence and the thrill of exploring new territory. It helped us gain confidence and self-assurance, and for many of us, it introduced us to what would become a life-long passion and a lifestyle that today finds us seeking the same thrill of discovery that we did as kids.

And now, the training wheels are off – and the neighborhood has been replaced with singletracks, race courses and bike parks. Your commitment to cycling demands a bike as dedicated to excellence as you are.

Intense passion, Intense commitment, Intense for life.

BUILDING HIGH PERFORMANCE
ART SINCE 1993.

20 years
OF EVOLUTION

From the original mountain bike frame made on his kitchen table in Lake Elsinore, CA to those being produced today, Intense Cycles founder/designer/president, Jeff Steber has taken his artform seriously. It is his personal mission to design and refine each model to achieve the highest possible level of performance and craftsmanship. Steber has spent over 20 years developing this art. He works closely with industry leaders and professional racers to utilize the latest technology in order to produce a product unmatched by any competitor.

INTENSE TECHNOLOGY

VPP SUSPENSION

VPP SUSPENSION balances different forces to eliminate unwanted compression without limiting bump absorption. The downward force on the pedals pushes most full suspension bikes down, resulting in unwanted suspension compression. VPP bikes use a patented link configuration and axle path to apply some of the pulling force from the chain to counteract the motion caused by pedaling.

Because the forces are balanced, VPP bikes remain able to absorb bumps when pedaling, unlike other designs that effectively lock out the rear suspension by applying too much chain-pulling force. The result is plush travel with no pedal-induced compression or lock-out, and no need for manual lockouts or other compromises.

ALL OUR ALUMINUM FRAMES ARE MADE IN THE USA IN OUR FACTORY IN TEMECULA, CA.

If we don't do it ourselves we use all local vendors , stimulating local economy. Carbon Fiber Frames are designed, all hardware links & assembly in USA in our factory.

ATTENTION TO DETAIL COMES STANDARD

G3 Replaceable / Adjustable dropout system offers options for QR 135mm / QR 135 x 12 / QR 142 x 12 / QR 150 x 12, as well as Geometry adjust for Chainstay / Wheelbase Bottom Bracket Height and Head Angle.

Fox Factory CTD trail adjust Kashima rear shocks are STANDARD on most of our frames.

G-1 Replaceable drop out system offers upgraded technology and options including QR 135mm, 142 x 12, Carbine 27.5" and single speed for Hard Eddie and if something new comes along we got you covered.

Collet Bolt / Angular contact Bearings with replaceable grease ports for easy Maintenance and long bearing life.

Adjustable Travel Shock Links, all our frames feature two travel setting that give each model a dual personality, set it up tight and light or super plush – the choice is yours.

Intense proprietary hydroformed tubing and monoque mainframes are a signature design that adds strength, reduces weight and creates a unique appearance to all our frames produced in our factory.

AN ATTITUDE OF ADVENTURE

Andrew Van Zuyen/Intense Regional Sales Mgr

SPIDER 29 COMP

DUAL PERSONALITY

SPIDER 29 COMP

29" TRAIL / XC

The choice of two travel settings puts YOU in control. The Spider 29 Comp's adjustable travel, modern trail geometry and patented VPP suspension are the magical ingredients for this remarkable trail bike.

SPIDER29 COMP

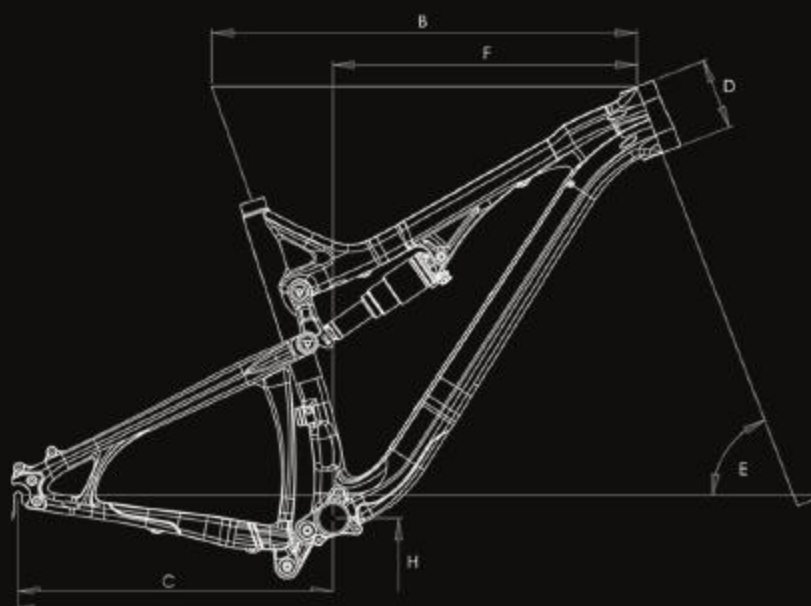

The Spider29 Comp features all the key elements that Intense is known for: Adjustable Travel (4.5 - 5"), G1 dropout system, proven ride quality and exceptional esthetics. But it also has some new tricks up its sleeve like internal cable routing, tapered head tube, special internal cable routing for the Rock Shox Reverb, stealth dropper post and comes stock with the Fox Float CTD Kashima coat rear shock. Two travel settings allow the bike to really take on a dual personality. Use the 4.5" mode for a solid pedaling platform or the longer 5" position to gobble up rocks, roots and chatter.

KEY FEATURES

- Intended use: XC, Trail, Enduro
- Adjustable Travel: 4.5" to 5"
- G1 Replaceable Drop Out System QR 135, 142 x 12
- Patented VPP Suspension
- 5.5lbs Frame Weight (Medium Naked)
- Fox Factory Float CTD Kashima
- ISCG 05 Mounts
- Internal Cable Routing
- Routing for Rock Shox Reverb Stealth
- H2O Bottle Fitment
- FLK - GRD Downtube and Chain Stay Protection
- Tapered Head Tube
- Direct Mount Front Derailleur
- Angular Contact/Collet Bearing System with replaceable grease Zirks

STUNNING CURB APPEAL

HARD EDDIE 29" HARD TAIL / XC

The first-ever hard tail from Intense. A new standard in a cross-country bike that combines amazing looks & incredible performance. Super-light carbon fiber and responsive geometry. Meet Hard Eddie: race-ready with a laid-back attitude.

HARD EDDIE

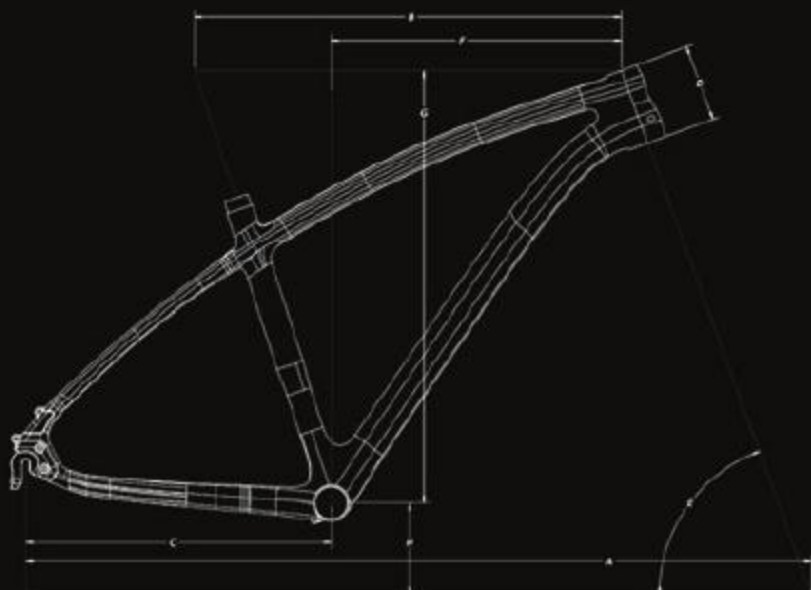

Weighing in at just over 2 lbs 7 oz, Eddie delivers an exceptional ride and stunning curb appeal. Available drop out options are 135MM, 142MM and single speed. The ride quality comes from the refined Intense geometry and high modulus carbon fiber construction of the frame. Created in cooperation with SEED Engineering, the results are spectacular.

KEY FEATURES

- Intended use: XC / LT Trail
- Tapered Head Tube 1.5 / 1.125"
- Internal Cable Routing
- G1 Replaceable Dropout System, QR 135, QR 142 x 12, Single Speed

TRACER 275

MOVING FORWARD

CARBINE 275

27.5" ENDURO / TRAIL

Our best-selling carbon fiber trail bike has been updated for 2014 with internal cable routing, direct-mount front derailleur, and a bold new look. Replaceable G-1 dropouts make it compatible for 26" wheels.

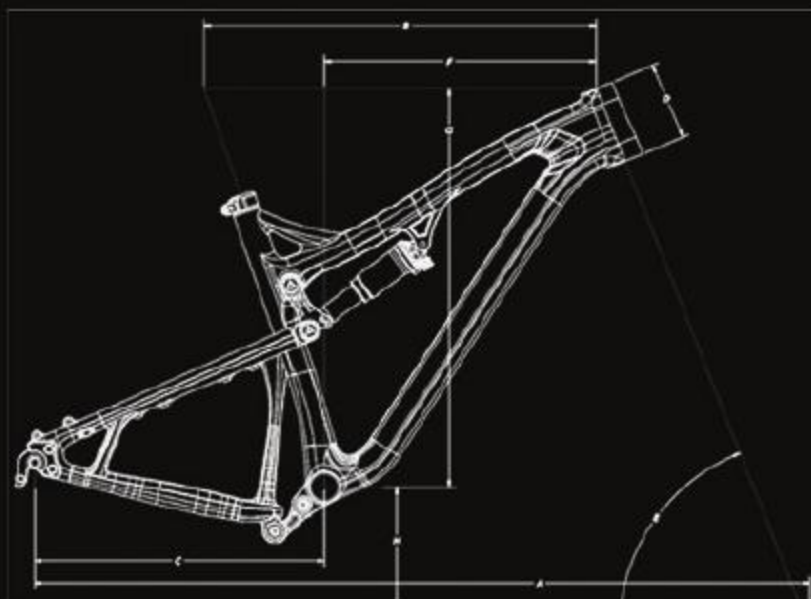

CARBINE275

From the beginning, Intense has been synonymous with innovation and ingenuity, so it was no surprise when we quickly embraced the 27.5" wheel size. What some see as a fleeting trend, we recognize as the future of our sport. Over a year of testing has proven the benefits of the bigger wheel - faster, smoother, better. Not to mention... Way more fun. The Carbine 275 offers adjustable travel and patented VPP suspension... and 26" riders delight - a replaceable G1 dropout that allows for a 26" version.

KEY FEATURES

- Intended use: Trail / AM / Enduro
- 27.5 (650B) Wheel Size
- Available in 26" configuration
- Adjustable Travel: 5.5" to 6"
- Patented VPP Suspension
- Fox Factory Float CTD Kashima
- Tapered Head Tube 1.5" / 1.125"
- Composite BB92 Bottom Bracket
- Replaceable G1 Drop Out System (QR 135, QR 142 x 12 and QR 142 x 12 x 27.5)
- Dropper Post Cable Routing
- Direct Mount Front Derailleur
- Intense "FLK - GRD" Downtube & Chain Stay Protectors
- Angular Contact Bearing, 15MM Collet Axle System with replaceable grease Zirks

MADE IN THE USA

TRACER 275

27.5" ENDURO / TRAIL

Based on the proven platform of the original Tracer, but featuring re-worked geometry specifically calculated for the 27.5" wheelsize. Available in custom colors. Made in the USA.

TRACER275

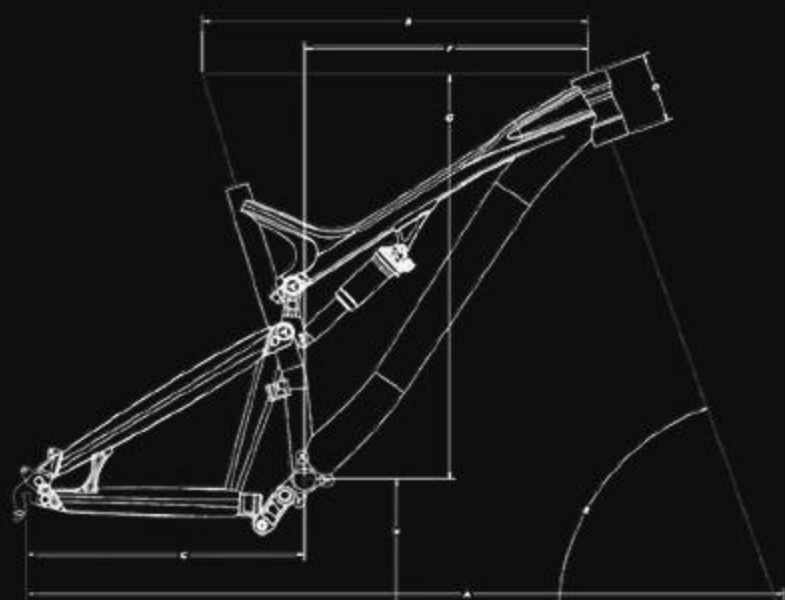

Made in our factory in Southern California, the Tracer 275 is the foundation of our lineup of 27.5" frames and complete bikes. It combines the best qualities of both 26 & 29 inch wheels., offering the precision and efficiency of 26" wheel, along with the added power and stability offered by 29ers. With 5.5-6 inches of adjustable travel, 17" chainstays and 67.5 degree head angle, the Tracer 275 delivers a solid, confidence-inspiring ride.

KEY FEATURES

- New 27.5 /650B Wheel Size
- Intended Use: Trail / AM / Enduro
- Adjustable Travel: 5.5" to 6"
- Patented VPP Suspension
- Fox Factory Kashima Float CTD
- Tapered Head Tube
- G1 Replaceable Drop Out System QR 135MM and QR 142 X 12MM

RAISING THE BAR

Mike Dettmers / Intense Sales Mgr

CARBINE 29

A NEW BREED OF ALL MOUNTAIN

CARBINE 29

29" ENDURO / TRAIL

The Carbine 29 raises the bar on performance, technology and beauty, offering aggressive geometry, patented VPP suspension, all the design benefits of 2nd generation INTENSE carbon fiber, and a look only possible from INTENSE.

CARBINE29

Designed to allow riders to descend the roughest enduro tracks with confidence, the bike boasts 5.5 inches (140mm) of rear wheel travel, 160mm of travel up front, and a 67 degree head tube angle.

The slacker head angle and 51mm 29-specific fork offset on the Carbine 29 work together to create a bike that delivers added agility and improved handling.

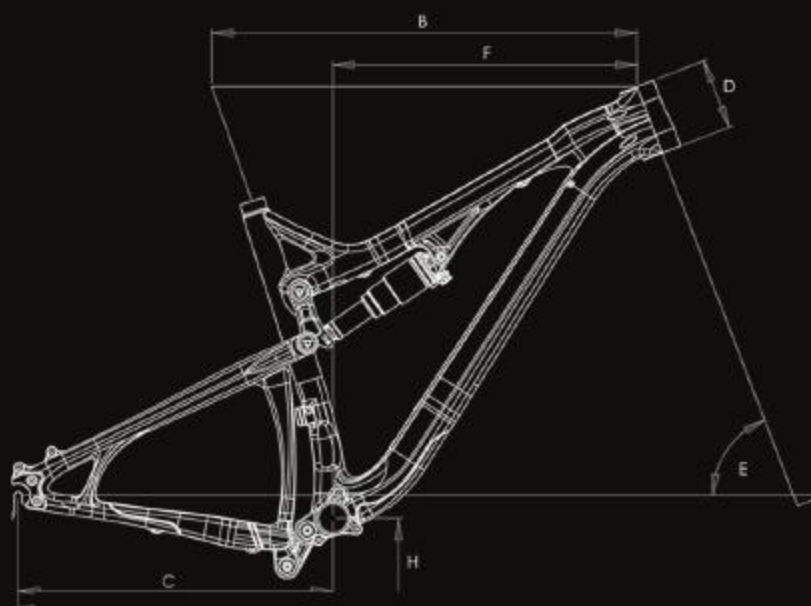

Fast, gnarly rock sections never felt so secure. Cornering was never as quick on a 29er. Let go of the brakes and take the rough line to the bottom. The Carbine 29 will allow you to ride hard, and ride fast.

The bike offers cutting-edge technology like internal cable routing, Reverb Stealth seat post routing and ISCG 05 chain guide tabs. It will be offered as both a complete bike or frame-only.

KEY FEATURES

- Intended use: Aggressive Trail, Enduro , All Mountain 29er
- Adjustable Travel: 5" or 5.5"
- Patented VPP Suspension
- 5.8 lbs Complete Frame Weight
- Fox Factory Float Kashima CTD Rear Shock
- ISCG 05 Mounts
- Internal Cable Routing
- Quick Release Seat Clamp
- Routing for Rock Shox Reverb Stealth

WEAPON OF CHOICE

UZZI

26" ALL MOUNTAIN

The weapon of choice for the most die-hard big-mountain riders, the Uzzi delivers all the fundamental elements to make climbs less grueling and descents more rewarding.

UZZI

Think shuttle runs are for sissies? Chairlifts are for cowards? The Uzzi is your bike. The weapon of choice for the most unrelenting riders, the Uzzi serves up all the critical ingredients for a big-mountain bike. It features 6.5" to 7" of adjustable travel, adjustable G3 dropout, ISCG 05 and direct mount front derailleur. The VPP suspension and frame rigidity retain climbing efficiency while the aggressive geometry and longer travel make it a forceful downhill.

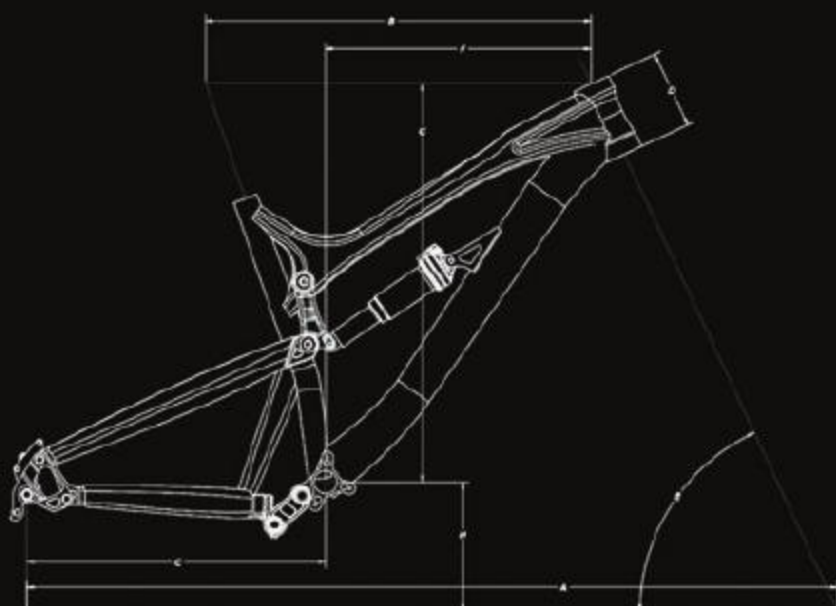

If you own one, the only other things you need are your sense of adventure and a few power bars.

KEY FEATURES

- Intended use: All Mountain / Free Ride
- Patented VPP Suspension
- Fox Van RC Rear Shock
- Adjustable Travel 6.5" or 7"
- Full 1.5" Headtube for Angle Set Compatability
- Dropper Seat Post Cable Routing
- G3 Replaceable / Adjustable Dropout System
- Direct Mount Front FD
- Quick Release Seat Clamp
- Angular Contact Bearing / Collet 15mm Axle System with Replaceable grease Zirks

SOME FOLLOW THE TRAIL, OTHERS MAKE THEIR OWN

Chris Kovarik / Pro Team Rider

M9 FRO

WHEN SECONDS COUNT

Downhill races are won – or lost – by seconds. Our long heritage of building winning race bikes continues by utilizing the larger 27.5 wheel size for a faster, more efficient race run.

951 EVO

27.5" DOWNHILL

951 EVO

Made in the USA with aggressive geometry and eight and a half inches of travel, the 951 Evo offers advanced features, patented VPP suspension, and has been designed from the ground up to utilize 27.5 wheels.

The slacker 62.5 degree head tube angle inspires confidence at high speeds, through steep and on gnarly rock sections. The short chainstay keeps the bike stable at high speeds, yet nimble while cornering, and top tube lengths have been increased throughout all sizes to allow for additional room in the cockpit of the bike.

The 951 Evo has been rigorously tested and consistently delivers a faster, more efficient race run.

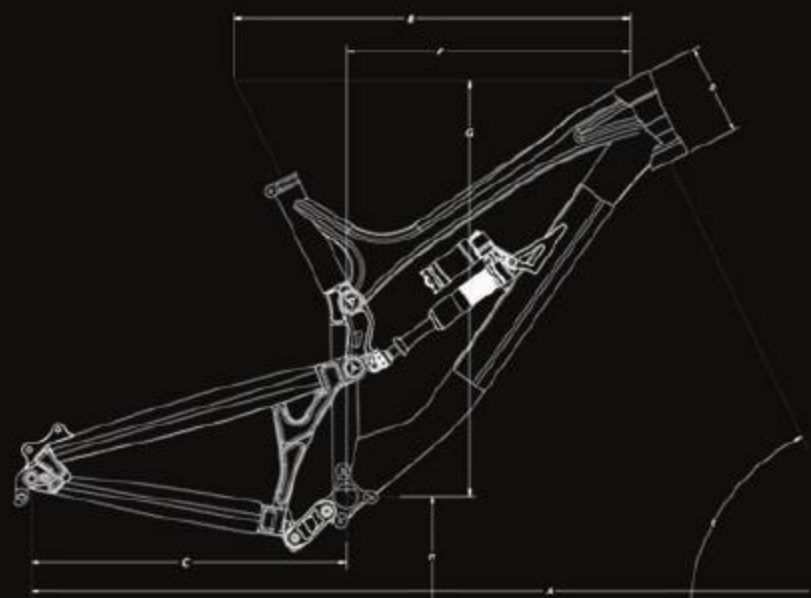

Comes standard with a highly-tunable Cane Creek Double Barrel coil shock.

KEY FEATURES

- Bottom Bracket Width: 83MM
- Headset: Full 1.5"
- Seatpost Size: 31.6MM
- Amount of Travel: 8.5" / 216MM
- Rear Wheel Spacing: 150MM
- Shock Size: 9.5 x 3.0" / 241 x 76
- Shock Spacers: 33.02 x 8MM / 29.9 x 8MM
- SAG %: 30 -35 %
- Type of Frame Material: Aluminum 6061 T6

ICONIC, LEGENDARY, PROVEN

M9

PRO CALIBER DOWNHILL

The M9 is the legacy of our brand. It exemplifies our company and represents our heritage. It shows us who we are and how far we've come.

M9

It's early predecessor, the M-1, was ridden to silver medal victory at the World Championships in 1996 by Shaun Palmer at one of his first competitive events on a bicycle, making history for both Palmer & Intense. The dynamic combination of Palmer and the M-1 set the stage for Intense Cycles and changed the face of DH forever.

Since then, the M-series downhill chassis has achieved iconic standing as the choice of the world's fastest racers.

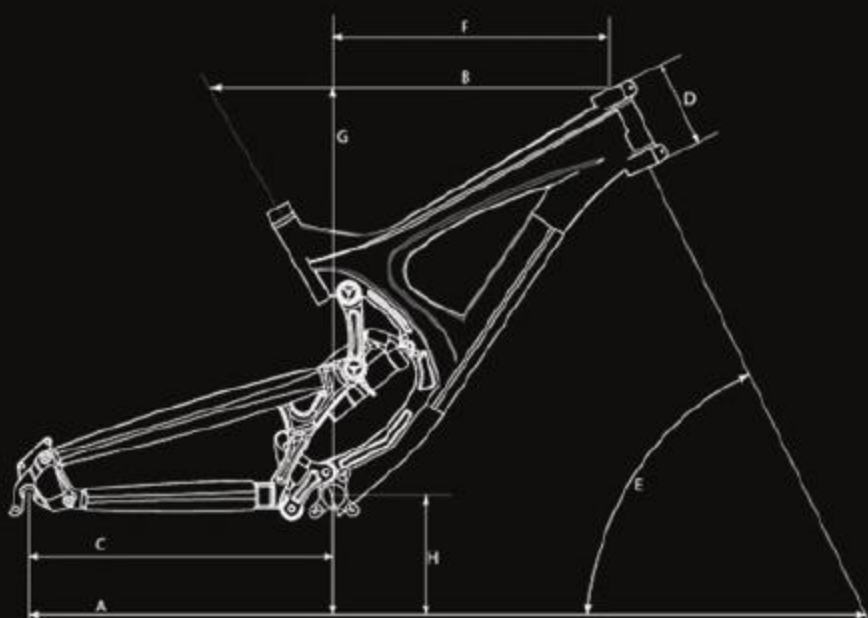

The M9 is the latest edition in the series and is the culmination of over 15 years of racer feedback, R&D and evolution in technology. The M9 has held true to its original DNA in being the first downhill specific race frame that can be tweaked and tuned to tame any track, it will make you a faster, smoother, more confident rider. Period.

The bike that has defined us for so many years just keeps getting better.

KEY FEATURES

- Intended Use: Pro Level Downhill Racing
- Adjustable Travel: 8.5", 9", 9.5"
- Adjustable Shock Rate
- Adjustable Geometry, Head Angle, BB Height & Wheelbase VIA G3 System
- G3, Adjustable / Replaceable Dropout System
- Full 1.5" Pinch Bolt Head Tube for Angle Set Compatibility
- ISCG 05 Mounts
- Cane Creek Double Barrel Coil Rear Shock standard
- 15MM Collet Bolt with Angular Contact Bearing System with Replaceable Grease Zirks
- Made in USA in our Factory in California
- Formed Mono Shell Main Triangle & Butted / Hydroformed Tubing
