

FujiTM

Edition No. 17

There's a Fuji to fit you...

COME ALONG FOR THE RIDE!

To some manufacturers, how a bicycle looks is the most important factor in bike design. And to some, the price at which it sells is the most important. But at Fuji, what's of greatest importance is how the bike fits and rides. At Fuji, our meticulous attention to detail, exceptionally fine finish and trendsetting technical features are really only by-products of how our bikes are designed and built.

To begin with, different people have different needs and wants. So the first thing we do is define the bike's purpose.

- Who will use it? — Children? Adults?
- How will it be used? — For playing? As daily transportation? For light exercise? Serious recreation? Long-distance travel? Competition?
- Where will it be used? — On the street or road? Off the road? On a track?
- What is the user's skill level? — Beginner? Experienced? Expert?

Not only does each of these factors influence what an individual needs and wants in a bicycle; so does that individual's budget. And that is why this catalog shows 33 distinct models of Fuji bicycles... models that are different from each other as well as from their competition, and different in substance, not just in cosmetics.

Secondly, bicycle manufacturers really only *make* the bike frame, and put on it components made by a handful of specialist component makers. In fact, some bike "manufacturers" don't build their own frames. They buy both frames and components made by others, assemble them, and put on their own brand name.

Because all bicycle manufacturers have access to the same components, the difference between the performance of one maker's bike and another's can come *only* from how the frame is designed and built, and how well the selected components work with it.

Third, we build only Fuji brand frames and bikes. We do not supply our products to others to sell under their own name. Because of that, our engineers and production people have only one set of standards and only one loyalty: to the excellence of the Fuji brand. The highest levels of production integrity and complete consistency of materials, component specifications and production quality standards are possible *only* if one's own engineers, technicians, materials buyers and quality controllers are in absolute command of each single step of the design and building of the bike. And this control is your best assurance that the Fuji you buy is much more than just "good enough."

Fourth, we design *down*, not *up*. We start with the top of the line for each use category, and when we've built that model as closely to the ultimate as we can, we modify the design, through the use of less expensive components or less exotic materials, to create the models for less experienced, less wealthy or less demanding riders.

Only the components' quality of finish, not their functional quality, is compromised to achieve the less expensive bike, and Fuji never has a feature that is there just for show or to make a model seem to be something that it is not.

Fuji is made *by* people who know bikes, *for* people who know bikes. That's why owners, dealers and bicycle mechanics agree that Fuji bikes give maximum performance, dependability and sheer riding pleasure. Whatever you're looking for in a bicycle, whatever your needs, there's a Fuji to fit you!

INTRODUCING YOUR FUJI DEALER

A new bike is a considerable investment, so *where* you buy it is as important as *what* you decide to buy.

A Fuji dealer and his staff are professionals who take pride in using their technical and mechanical skills, their bicycling experience, their product knowledge and their judgment to help you get the most from your investment. Their high level of competence and dependability can increase your long-term enjoyment of bicycling.

Using his expertise to help you make the choices that best fit your needs, your authorized Fuji dealer will help you make sure that the bike you choose is the correct size for maximum performance and safety, that it has the features that fit the kind of riding you plan to do, that you select those accessories that will give you the greatest utility and enjoyment, and that your purchase fits your budget.

Once the bike and accessories have been selected, the Fuji dealer will make sure that it is assembled and fine-tuned to the very high standards of performance which Fuji America demands and of which the bike is capable.

And a Fuji dealer's involvement with your bicycling pleasure doesn't stop when you roll your new Fuji out the door. He and his staff want to make sure that your Fuji is properly maintained and kept in peak operating condition. And should you ever need his help, you can depend on your Fuji dealer to be there. He's an independent businessman who has committed substantial capital, energy and knowledge to your continued enjoyment of cycling. You can count on your Fuji dealer to make sure the Fuji you buy is the best bicycle *for your needs*.

Titanium

All three models are 100% titanium for corrosion-resistance and the best strength-to-weight ratio of any material available. Each features an oversized top tube and down tube, and is matched with world-class components for superb performance.

Glory Blue

Roubaix

The Roubaix is constructed of Fuji's exclusive quad-butted VALite channeled tubing. With its SCCR 700 x 19c CTX tires, oval spokes, and Shimano's 105 components, this is the perfect bike for the cyclist who wants performance at an affordable price.

Tiara

The combination of the Tiara's quad-butted, channeled VALite frame and SunTour's AccuShift derailleur system make this the ideal machine for the intermediate racer or triathlete. Available in dynamic Lightning or distinctive Cherry Web, the Tiara's looks are as racy as its performance.

Dawn Blue

Tivoli

Constructed of Fuji's double-butted Cro-Mo tubing, equipped with a host of high-performance components including Shimano's light-action SIS derailleurs, and such extras as two water bottle bosses and a pump peg, the Tivoli is perfect for the novice racer or triathlete.

450 RE

To enable the smaller racing cyclist to maintain a correct position on the bike, the 450 RE has a proportionate frame geometry, and also features channeled, quad-buttressed VALite tubing, SunTour's AccuShift derailleur system, and a distinctive, high-tech fade color scheme.

Frame Size	465mm
Frame	FUJI Quad-Butted VALite "Si 45" tubing with Racing Geometry
Fork	FUJI VALite tubing with sloping crown

Wine Silver

Palisade

Looking for the most features a tight budget can buy? Consider this: A quad-butted VALite "Si 45" frame, SunTour's AccuShift system, alloy quick-release wheels, water bottle braze-ons, and Fuji's exclusive SCCR tires.

450 SE

Designed to fit the smaller adult or demanding adolescent cyclist, the 450 SE offers a correctly sized top tube/seat tube combination, with the control and gearing advantages of a 27-inch rear wheel. Add Fuji's quad-buttressed VALite "Si 45" frame, SunTour's AccuShift system, and SCCR tires, and have the feel of a custom-made bicycle without the price!

Spokes	14g Unichrome
Tires	SCCR 1000 27 x 1 1/4, SCCR 400 24 x 1 1/4
Saddle	VISCOUNT 2827
Seat Pillar	Alloy with Allen seat pin
Accessories	Water bottle/cage, saddle cover, spoke disc reflectors
Braze-ons	Water bottle bosses, shifter bosses, cable guides
Colors	Agua, Silver Dew
Special Features	Proportionately sized frame, color-coordinated saddle cover, clear coating, SIS system, "Si 45" channelled tubing
Weight Approx.	25.7 lb.

Flair

Designed to offer a light, responsive ride, the Fuji Flair features double-buttressed Cro-Mo tubing, SunTour's AccuShift derailleur system, stainless steel spokes, all with color-coordinated styling.

Frame Sizes	19, 21, 23, 25; Mixte 19 1/2 in.
Frame	FUJI Double-Buttressed Chrome Molybdenum tubing, forged dropouts
Fork	FUJI Hi-Ten tubing with sloping crown
Handlebar	Racing alloy
Stem	DELTA alloy
Wrap	Foam grips
Brakes	DIA COMPE 500N with dual levers & Q/R
Cranks	SUGINO VP110 40 x 52T 170mm alloy
Derailleur	Front: SUNTOUR Alpha 3000 GT Rear: SUNTOUR Alpha 3000 GX
Shifters	SUNTOUR Alpha 3000 Stem AccuShift
Cluster	SUNTOUR Perfect 14-30T 6-speed silver
Chain	DID Lanner silver/blue

Pedals	VP-382 quill type
Rims	ARAYA SP-30 27 x 1 1/2 alloy
Hubs	Alloy with Q/R sealed system
Spokes	14g stainless
Tires	SCCR 850 27 x 1 1/2 gumwall
Saddle	VISCOUNT Pigskin
Seat Pillar	Alloy 220mm with Allen seat pin
Accessories	Water bottle/cage, saddle cover, spoke disc reflectors
Braze-ons	Water bottle bosses, cable guides
Colors	Brazil, Glacier White
Special Features	Two-tone head panel, matching saddle cover, water bottle/cage, clear coating, sealed systems, fitted components, AccuShift system
Weight Approx.	28.6 lb., 29.7 lb. (Mixte)

Glacier White

Absolute

If it's a value-packed recreational bike you're looking for, consider the Fuji Absolute: light alloy quick-release wheels, SCCR tires, foam handlebar grips, water bottle braze-ons. Available in four men's and two women's frame sizes and a variety of exciting color choices.

Frame Sizes	19, 21, 23, 25 in.
Frame	FUJI CroMoly tubing
Fork	FUJI Hi-Ten tubing
Handlebar	Racing with alloy center
Stem	DELTA alloy
Wrap	Foam grips
Brakes	DIA. COMPE 500N with dual levers & Q/R
Cranks	SR CTC 532 40 x 52T 170mm alloy; ladies': 40 x 50T 165mm alloy
Derailleur	Front: SUNTOUR GE Rear: SUNTOUR 7GT
Shifters	SUNTOUR UBN-10 stem
Cluster	SUNTOUR Perfect 14-28T 6-speed
Chain	KMC black
Pedals	VP 378 double-sided
Rims	ARAYA SP-20 27 x 1 1/4 alloy

Hubs	Alloy with Q/R sealed system
Spokes	14g Unichrome
Tires	SCCR 850 27 x 1 1/4 gumwall
Saddle	VISCOOUNT Pigskin
Seat Pillar	Steel
Accessories	Water bottle/cage, saddle cover, spoke disc reflectors
Braze-ons	Water bottle bosses, cable guides
Colors	Hana Blue, Lightning, Nautical Blue; Ladies': Lightning, Hana Blue
Special Features	Two-tone head panel, color-coordinated saddle cover, water bottle/cage, clear coating, sealed systems, fitted component sizing
Weight	29.0 lb.
Approx.	29.7 lb. (Ladies')

Nautical Blue

Frame Size	27 in. only
Frame	FUJI VALite 414 tubing
Fork	FUJI Hi-Ten tubing
Handlebar	KUSUKI with alloy center
Stem	KUSUKI alloy
Wrap	Foam grips
Brakes	DIA COMPE 500N with dual levers & Q/R
Cranks	SUGINO DZFA 42 x 52T 170mm alloy
Derailleur	Front: SUNTOUR GE Rear: SUNTOUR Seven
Shifters	SUNTOUR UBN-10 stem
Cluster	SUNTOUR Perfect 14-28T 5-speed
Chain	DID Sports
Pedals	MKS Rt-7
Rims	UKAI 27 x 1 1/8 alloy
Hubs	SANSIN Q/R front, rear bolt-on
Spokes	14g Unichrome
Tires	SCCR 1000 27 x 1 1/8 gumwall
Saddle	VISCOUNT 2827
Seat Pillar	Satin finish
Accessories	Water bottle/cage, saddle cover, spoke disc reflectors
Braze-ons	Water bottle bosses, cable guides
Color	Nero
Special Features	Color-coordinated saddle cover, water bottle/cage, clear coating, fitted component sizing
Weight Approx.	30.1 lb.

685

An ideal choice for the taller cyclist who wants both performance and value, the 685 is available *only* in a 27-inch (685cm) frame size, and features Fuji VALite tubing, SunTour components, and color-coordinated styling.

Pulsar

Featuring alloy wheels with front quick-release, SCCR tires, and color-coordinated styling, the Pulsar is the perfect choice for the recreational cyclist on a tight budget.

Frame Sizes	19, 21, 23, 25, 18½ with 26" wheel; ladies' — 17 (D), 20(D), 17(N), 20(N) in.
Frame	FUJI Hi-Ten tubing
Fork	FUJI steel
Handlebar	Racing steel
Stem	DELTA alloy
Wrap	Foam grip
Brakes	DIA COMPE 500N with dual levers & Q/R
Cranks	SR CTC 532 40 × 52T 170mm alloy; ladies' — 40 × 50T 165mm alloy
Derailleur	Front: SHIMANO AX50 Rear: SHIMANO SL10 Skylark III
Shifters	SHIMANO QS-10 stem
Cluster	SHIMANO 14-28T 5-speed
Chain	KMC black
Pedals	VP-378 double-sided
Rims	ARAYA SP-20 27 × 1½ alloy

Hubs	Steel front Q/R rear bolt
Spokes	14g Unichrome
Tires	SCCR 850 27 × 1½ gumwall 85PSI
Saddle	VISCOUNT Pigskin
Seat Pillar	Steel
Accessories	Water bottle/cage, kickstand, spoke disc reflectors
Braze-ons	Water bottle bosses, cable guides
Colors	Sprint Blue, Winner Red, Dawn Blue, Peach
Special Features	Two-tone head panel, fitted component sizing
Weight	29.7 lb., 29.3 lb. (26")
Approx.	29.7 lb. (D), 30.8 lb. (N)

Fuji Junior

The same thoughtful engineering and component selection that go into our full-sized bicycles are available to the younger set in this top-quality 24-inch-wheeled ten-speed, in boys' and girls' frames.

Frame Sizes	Boys and Girls 17 in.
Frame	FUJI Hi-Ten tubing
Fork	FUJI steel
Handlebar	Racing steel
Stem	DELTA alloy
Wrap	Foam grip
Brakes	DIA COMPE 500N with dual levers
Cranks	SR CTC 40 x 48T 152mm alloy
Derailleur	Front: SHIMANO AX50 Rear: SHIMANO SL10 Skylark III
Shifters	SHIMANO QS-10 stem
Cluster	SHIMANO Z 14-26T 5-speed
Chain	KMC black
Pedals	VP-378 double-sided
Rims	Steel 24 x 1 1/2
Hubs	Steel bolt-on

Spokes	14g Unichrome
Tires	24 x 1 1/2 gumwall 85PSI
Saddle	VISCOUNT Pigskin
Seat Pillar	Steel
Accessories	Water bottle/cage, kickstand, spoke disc reflectors
Braze-ons	Water bottle bosses, cable guides
Colors	Sprint Blue, Winner Red
Special Features	Color-coordinated water bottle/cage
Weight	29.9 lb.
Approx.	29.7 lb. (Girls')

Sundance

The ultimate value in an all-terrain bicycle for the demanding cyclist: An oversized double-butted Cro-Mo frame with a competitive frame geometry, SunTour AccuShift derailleurs, quick-release wheels and Fuji's new SCCR 1.95 tires.

Frame Sizes	44, 48, 52, 56 cm
Frame	FUJI Oversized Double-Butted CroMoly lugless tubing
Fork	FUJI Oversized CroMoly tubing Unicrown
Handlebar	KUSUKI alloy B111 style
Stem	KUSUKI alloy XC style painted
Wrap	Rubber grips
Brakes	DIA COMPE front 983D, rear 990 with XC levers
Cranks	SR SXC 350 28 x 38 x 48T 175mm alloy oval chain rings
Derailleur	Front: SUNTOUR XC Sport 7000 Rear: SUNTOUR XC Sport 7000
Shifters	SUNTOUR XC Sport AccuShift on brake
Cluster	SUNTOUR Perfect 13-30T 6-speed silver
Chain	DID Lanner silver/black
Pedals	MKS MR-1000 sealed system
Rims	ARAYA MP-22 alloy 26 x 1.5
Hubs	SANSIN ET Q/R sealed system
Spokes	14g stainless
Tires	SCCR 300 26 x 1.95
Saddle	VISCOUNT Mountain
Seat Pillar	SR MTE 300mm with Q/R binder bolt
Accessories	Water bottle/cage, spoke disc reflectors
Braze-ons	Two water bottle bosses stacked, cable guides
Colors	Slate, Lightning
Special Features	Color-coordinated water bottle/cage, sealed systems, clear coating, AccuShift system
Weight Approx.	28.9 lb.

Slate

Suncrest

The Suncrest features a frame constructed of oversized Cro-Mo tubing, combined with Shimano's state-of-the-art components, SIS shifting and sealed componentry.

Frame Sizes	44, 48, 52, 56, 44L, 48L cm
Frame	FUJI Oversized CroMoly lugless tubing
Fork	FUJI Oversized Hi-Ten tubing Unicrown
Handlebar	MTB-5 alloy
Stem	Alloy XC style painted
Wrap	Rubber grips
Brakes	SHIMANO front AT50, rear MT61 with MT60 levers Deore series
Cranks	SR SXC 310 26 x 36 x 46T 175mm alloy; Ladies' — 165mm alloy
Derailleur	Front: SHIMANO MT60 Deore Rear: SHIMANO MT60 Deore
Shifters	SHIMANO MT60 Deore SIS
Cluster	SHIMANO Z 14-30T 6-speed
Chain	SHIMANO Uniglide

Pedals	VP-777 rattrap with CroMo axle
Rims	ARAYA MP-22 alloy 26 x 1.5
Hubs	SANSIN ET Q/R sealed system
Spokes	14g Unichrome
Tires	SCCR 300 26 x 1.95
Saddle	VISCOUNT Mountain
Seat Pillar	SR MTE 300mm with Q/R binder bolt
Accessories	Water bottle/cage, spoke disc reflectors
Braze-ons	Two water bottle bosses stacked, cable guides
Colors	Agua, Nero
Special Features	Color-coordinated water bottle/cage, sealed systems, clear coating, SIS system
Weight Approx.	29.6 lb. 29.9 lb. (Ladies')

Cadenza

Cadenza 24

The Cadenza features a Cro-Mo frame with oversized tubing, Shimano's light-action derailleur system, and a quick-release front wheel.

The Cadenza 24 has all the same high-quality features as the Cadenza, with a smaller 24" front wheel to fit the needs of smaller cyclists.

Frame Sizes	44, 48, 52, 56, 44L, 48L cm
Frame	FUJI Oversized CroMoly lugless tubing
Fork	FUJI Oversized Hi-Ten tubing Unicrown
Handlebar	MTB-5 chrome-plated steel
Stem	MTS-108 alloy upright
Wrap	Rubber grips
Brakes	Alloy mountain cantilever with mountain levers
Crank	SR SXC 310 26 x 36 x 46T 175mm alloy; ladies' — 165mm alloy
Derailleur	Front: SHIMANO AX 55 Rear: SHIMANO M5 31
Shifters	SHIMANO MS 40 SiS
Cluster	SHIMANO Z 14-30T 6-speed
Chain	SHIMANO Uniglide
Pedals	VP-777 alloy bear trap
Rims	ARAYA MP-22 alloy 26 x 1.75

Hubs	Alloy with front Q/R sealed system
Spokes	14g Unichrome
Tires	SCCR 300 26 x 1.95
Saddle	VISCOUNT Mountain
Seat Pillar	Alloy 300mm with Q/R binder bolt
Accessories	Water bottle/cage, spoke disc reflectors
Braze-ons	Two water bottle bosses stacked, cable guides
Colors	Sprint Blue, Kelly Green
Special Features	Color-coordinated water bottle/cage, clear coating, sealed system, SiS system
Weight Approx.	29.9 lb. (Cadenza) 29.3 lb. (Cadenza 24)

Tahoe

The Tahoe offers plenty of top-quality features for the cyclist on a tight budget: Fuji oversized lugless tubing, 15-speed gearing, SCCR 1.50 tires, and color-coordinated styling.

Frame Sizes	44, 48, 52, 56, 44L, 48L cm
Frame	FUJI Oversized Hi-Ten lugless tubing
Fork	FUJI Oversized Hi-Ten tubing Unicrown
Handlebar	MTB-5 painted
Stem	Alloy upright
Wrap	Rubber grip
Brakes	Alloy mountain cantilever with mountain levers
Cranks	SR SXC 310 26 x 36 x 46T 175mm alloy
Derailleur	Front: SUNTOUR Alpha 3000 Rear: SUNTOUR Seven GT
Shifters	SUNTOUR PLG Thumbshifter
Cluster	SUNTOUR Perfect 14-28T 5-speed
Chain	Black/silver
Pedals	VP767 bear trap black
Rims	ARAYA MP-22 26 x 1.75 alloy

Hubs	Front alloy with Q/R, rear bolt-on S/S
Spokes	14g Unichrome
Tires	SCCR 250 26 x 1.5
Saddle	VISCOUNT 2218 Pigskin
Seat Pillar	Chrome-plated steel
Accessories	Water bottle/cage, spoke disc reflectors
Braze-ons	Water bottle bosses, cable guides
Colors	Forest Blue, Winner Red, Nero; ladies' — Blush, Forest Blue
Special Features	Color-coordinated water bottle/cage, sealed systems
Weight	30.8 lb.
Approx.	30.6 lb. (Ladies')

Odessa

Impressive features *and* an impressive price . . . that's what the Odessa has to offer! Its rugged off-road design, SCCR tires, Shimano derailleurs and cantilever brakes make this bike the perfect choice for the recreational cyclist.

Frame Sizes	44, 48, 52, 56, 44L, 48L cm
Frame	FUJII Oversized Hi-Ten lugless tubing
Fork	FUJII Oversized Hi-Ten tubing Unicrown
Handlebar	B808 style steel
Stem	Alloy upright
Wrap	Rubber grip
Brakes	Alloy mountain cantilever with mountain levers
Cranks	Alloy 170mm 40 x 52T
Derailleur	Front: SHIMANO AX 50 Rear: SHIMANO SL 10 Skylark II
Shifters	SHIMANO MT 34 Thumbshifter
Cluster	SHIMANO Z 14-28T 5-speed
Chain	Black/silver
Pedals	VP767 bear trap black with Cromoly axle

Rims	26 x 1.75 chrome-plated steel reinforced
Hubs	Small-flange steel bolt-on
Spokes	14g Unichrome
Tires	SCCR 250 26 x 1.5
Saddle	VISCOUNT Wide Padded
Seat Pillar	Chrome-plated steel
Accessories	Kickstand, spoke disc reflectors
Braze-ons	Water bottle bosses, cable guides
Colors	Electric Blue, Wine Silver
Special Features	Unicrown fork, extra-small frame size
Weight	35.9 lb.
Approx.	35.7 lb. (Ladies')

Frame Sizes	44, 48, 52 cm
Frame	FUJI steel tubing
Fork	FUJI steel tubing
Handlebar	Northroad type steel
Stem	Upright steel
Wrap	Plastic grip
Brakes	Front alloy 730, rear coaster
Crank	48T steel with 165mm crank arms
Shifter	SHIMANO 3-speed shifter
Chain	1/2" x 1/8"
Pedals	VP 363 rubber
Rims	26 x 1.5 chrome-plated steel
Hubs	Front steel bolt, rear SHIMANO 3-speed coaster
Spokes	14g Unichrome
Tires	SCCR 100 26 x 1.5 gumwall
Saddle	Wide padded
Seat Pillar	Chrome-plated steel
Accessories	Kickstand, chain cover, fenders, reflectors
Braze-ons	Water bottle bosses, cable guides
Colors	Nautical Blue, Blush
Special Features	26 x 1.5 wheels, three sizes, fashion colors & graphics
Weight Approx.	34.8 lb.

Nautical Blue

Avalon

In a choice of three ladies' frame sizes, with Shimano's internal three-speed coaster gearing, this is the ideal choice for the woman or girl who demands elegance and simplicity from a bicycle.

Bedford

The Bedford's upright handlebars, combined with Shimano's three-speed gearing and 26 x 1.5 wheels with Fuji's new SCCR tires, ensure a comfortable ride for the leisure cyclist who wants a high-quality, uncomplicated bike.

Frame Sizes	48, 52, 56 cm
Frame	FUJI steel tubing
Fork	FUJI steel tubing
Handlebar	Northroad type steel
Stem	Upright steel
Wrap	Plastic grip
Brakes	Alloy sidepull 810 with touring levers
Crank	48T steel with 165mm crank arms
Shifter	SHIMANO 3-speed
Chain	1/2" x 1/8"
Pedals	VP 363 rubber
Rims	26 x 1.5 chrome-plated steel
Hubs	Front steel bolt-on, rear SHIMANO 3-speed
Spokes	14g Unichrome
Tires	SCCR 100 26 x 1.5 gumwall
Saddle	Wide padded
Seat Pillar	Chrome-plated steel
Accessories	Kickstand, chain cover, fenders, reflectors
Braze-ons	Water bottle bosses, cable guides
Colors	Nautical Blue, Marble Red
Special Features	26 x 1.5 wheels, three sizes, fashion colors & graphics
Weight Approx.	35.2 lb.

Les Cruze 1

Available in four sizes, the Fuji Les Cruze 1 is an ideal recreational bicycle for flat terrain, with an extra-wide saddle and tires, and exciting fashion colors and graphics.

Frame Sizes	20", 21", 17L, 19L in.
Frame	FUJI steel tubing
Fork	FUJI steel tubing Unicrown
Handlebars	Cruiser type steel
Stem	Upright double-clamp alloy 200mm
Wrap	Foam grips full length
Brakes	Coaster
Cranks	46T steel with 165mm crank arms
Chain	1/2" x 1/8"
Pedals	Rubber #791
Rims	26 x 1.75 chrome-plated steel-reinforced
Hubs	Front bolt-on, rear SHIMANO coaster
Spokes	14g Unichrome
Tires	SCCR 150 26 x 2.125 skinwall

Saddle	VISCOUNT extra-wide cruiser
Seat Pillar	Chrome-plated steel with alloy seat clamp
Accessories	Kickstand, reflectors, chain cover
Braze-ons	Water bottle bosses
Colors	Turquoise, Glacier White, Orange Kist
Special Features	Fashion colors and graphics, extra-wide saddle and tires
Weight	38.5 lb.
Approx.	37.4 lb. (Ladies')

Orange Kist

Lil' Fuji/Lil' Cruizie

Training wheels and a removable top bar that converts the Lil' Fuji to a girl's or boy's frame are just a few of the features that guarantee years of dependable family use.

With its 10-inch diamond frame and the same features as the Cruizie, the Lil' Cruizie is a bicycle parents can choose with complete confidence for younger children.

Lil' Fuji

Frame	11" convertible Steel
Fork	Steel
Handlebar	Semi-hi-rise steel bar with steel stem and plastic grips
Crank	32T steel with 89mm crank arms
Chain	1/2" x 1/8"
Pedals	Rubber
Rims	16 x 1.75 steel, c.p.
Spokes	14g
Tires	16 x 1.75 black with pinstripe
Saddle	Color-coordinated polo seat
Accessories	Fenders, training wheels
Colors	Red, Pink Cloud
Weight	25.3 lb.

Lil' Fuji Red

Lil' Cruizie

Frame	10 in. diamond Steel
Fork	Steel
Handlebar	Cruiser style steel with double-clamp, painted stem
Wrap	Foam
Crank	36T steel, one piece 4 1/2"
Chain	1/2" x 1/8"
Pedals	Rubber
Rims	16 x 1.75 steel, c.p.
Spokes	14g
Tires	16 x 2.125 cruiser black
Saddle	Black vinyl anatomical
Accessories	Chain guard, training wheels
Colors	Lilac, Glacier White
Weight	25.3 lb.

Glacier White

Funflower/Cruizie

The Funflower's bright colors are a little girl's dream come true. And its quality, dependability, value, and style ensure that her pleasure will last for years.

The Cruizie's 11-inch frame offers maximum growth potential. In Lilac or Glacier White, backed by Fuji's tradition of quality, this bike is an ideal choice for younger children.

Funflower

Frame	14 in. Steel tubing
Fork	Steel
Handlebar	Semi-hi-rise steel bar with steel stem and plastic grips
Crank	40T steel with 140mm crank arms
Chain	1/2" x 1/8"
Pedals	Rubber
Rims	20 x 1.75 steel c.p.
Hubs	Front small-flange steel, rear SHIMANO coaster hub brake
Spokes	14g
Tires	20 x 1.75 black with pinstripe
Saddle	Color-coordinated polo seat
Accessories	Fenders, kickstand
Colors	Powder Blue, Pink Cloud
Weight	28.6 lb.

Pink Cloud

Cruizie

Frame	11 in. Steel tubing
Fork	Steel
Handlebar	Cruiser style steel
Stem	Double-clamp, painted
Wrap	Foam
Crank	40T steel, one piece 5 1/2"
Chain	1/2" x 1/8"
Pedals	Rubber
Rims	20 x 1.75 steel, c.p.
Spokes	14g
Tires	20 x 2.125 cruiser gum
Saddle	Black vinyl anatomical
Accessories	Chain guard, bell
Colors	Lilac, Glacier White
Weight	31.2 lb., 31.0 lb. (Girls')

Glacier White

There's a **Fuji** to fit...

FUJI FRAMES

The frame is the skeleton of the bicycle. It must position the rider for maximum performance, comfort and safety.

It must position the components precisely so that they work in perfect harmony with the rider and with each other. It must provide the structural stiffness needed to maintain perfect alignment under stress, with a degree of controlled resiliency that gives the whole bike a sense of responsiveness and unity with the rider.

Two key elements are responsible for how well a frame carries out these functions: the material from which it is made, and the geometry to which it is constructed. Even a subtle change in geometry or materials will have a direct effect on the feel and handling.

The material from which the frame tubing is made affects the weight, stiffness, and strength of the bicycle. Most Fuji adult bicycles are brazed of chrome molybdenum, Fuji VALite, or Fuji Feather tubing. Both Fuji VALite and Fuji Feather tubing were developed jointly by Fuji and one of the world's foremost bicycle tubing manufacturers.

FRAME MATERIALS

VALite Tubing

Fuji's exclusive VALite tubing composition combines vanadium, aluminum, and manganese in a tubing with fatigue limitation far greater than that of standard bicycle tubing. The higher brazing temperature affords greater strength retention during frame

assembly, resulting in an economical tubing with the same properties as far more expensive tubings.

Feather Tubing

Fuji is another step closer to its goal of producing the optimum bicycle tubing. Fuji Feather tubing, a combination of chromium, manganese, and molybdenum, assures superior strength-to-weight stiffness properties. Because of its unique composition, Fuji Feather tubing can be used in an oversized, thin-walled tube with lugless construction.

Oversized Feather tubing, with its thinner wall and larger joint-surface area, yields a lighter, stiffer frame without sacrificing strength. And lugless construction means there is no need to add significant frame weight to join two tubes. Fuji craftsmen carefully hand-miter, braze, and file each tube to create a perfectly sculptured joint, and their meticulous attention to the frame's alignment and finish results in a handcrafted frame that is dramatically lighter and stiffer than other frames in its class.

Titanium Tubing

The tubing of the future is here! Fuji engineers, under the direction of Dr. Shoichiro Sugihara, have been working jointly with our titanium tubing manufacturer to develop this space-age bicycle frame material.

In 1987, Fuji offers three titanium models, with characteristics overshadowing other racing machines of comparable value.

Among the benefits of titanium tubing are:

- **Strength-to-weight ratio** — Titanium has a yield strength three to four times stronger than steel, yet is over 40% lighter.
- **Corrosion-resistance** — In its natural polished form, Fuji Titanium tubing is corrosion-proof. Standing water or perspiration won't faze our tubing at all!
- **Endurance (strength) limit** — This is the level of stress a tube is able to tolerate. The endurance limit of Fuji Titanium tubing is at least *double* that of any other tubing available today!

BUTTED AND CHANELED TUBING

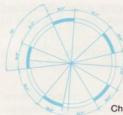

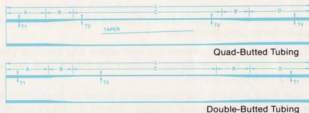

Butted Tubing

Wall thickness of bicycle tubing greatly affects the weight, stiffness, and strength of a frame. In double-butted tubing, the ends of the tube are thicker than the middle, reducing weight while retaining strength and stiffness. Fuji's quad-butted tubing varies for the *ultimate* strength-to-weight ratio, thereby addressing the complexity of varying stresses throughout the frame.

Channeled Tubing

Both Fuji VALite and Feather Tubing are now available with a unique new design feature. Precision-drawn channels are formed into both ends of the inner walls of the main tubes of the frame. The resulting channeled tube weighs less, but retains all its original strength and stiffness.

This combination of our exclusive tubings and technical innovations *clearly* establishes Fuji as a frontrunner in bicycle technology.

Channeled Tubing

FRAME GEOMETRY

The geometry of the bicycle frame is established by eight critical dimensions which, when matched to the engineering characteristics of the tubing material used, determine the handling characteristics of a bike. These eight critical dimensions and how they most directly affect the bike are:

a. Seat Tube Length governs the size of the frame and influences the other critical dimensions. Seat tube length, bottom bracket drop and wheel diameter together determine the overall size of the bike. Generally, you should select the *smallest* frame size you can ride comfortably, and in no case should you select a bike that you cannot straddle with both feet flat on the ground.

b. Top Tube Length influences riding position and wheelbase. Its minimum dimension is restricted by the need for clearance between the front wheel and the pedals.

c. Chainstay Length positions the rear wheel and controls clearance for fenders or clearance between the rider's heel and the panniers on a touring bike.

d. Seat Tube Angle is the determining factor in positioning the rider's center of gravity, and thereby controls the bike's center of gravity and the riding position. To some degree, it also affects road shock absorption, in that a shallower angle allows the tube to absorb more road shock.

e. Head Tube Angle influences steering response and handling characteristics and front wheel road shock absorption, and affects some of the other critical dimensions.

f. Fork Rake or Offset works with the head tube angle to determine steering characteristics and responsiveness to directional change.

g. Bottom Bracket Drop is the distance between the wheel center-line and the center of the bottom bracket. It determines center of gravity height and road clearance.

h. Wheelbase influences the bike's ride characteristics. A long wheelbase tends to be more comfortable and have better straight running characteristics. A short wheelbase tends to make a stiffer bike with quicker response to directional change.

Design Series

Fuji's flawlessly handcrafted framesets are available in either the competition-proven Road-Racing Series or the Mark Gorski Signature Series Track Model.

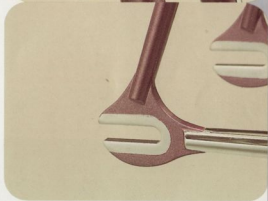

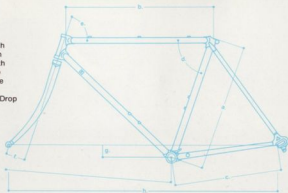

The Design Series Framesets are constructed with Ishiwata's prestigious 019E Quadruple Butted Chrome Molybdenum tubing, SunTour Superbe dropouts and an Investment Cast fork crown and bottom bracket shell. Our Fuji craftsmen hand-braze, miter and file each and every frame with uncompromising attention to detail. Each frameset goes through a five-coat finishing process, including a clear final coat, for a unique two-tone color scheme.

Experience the ultimate Fuji class today; enjoy the feeling forever.

Fuji

Accessories

A fine bicycle is only part of the enjoyment of cycling. Fuji America searches the world for outstanding comfort, convenience and performance accessories to help increase your cycling pleasure. Many of these accessories are only available through your authorized Fuji dealer. All have been thoroughly tested to assure you of the highest standards of performance, dependability and value. On these pages we illustrate just a few. Look for the blue, yellow and gray Fuji Assurance of Quality label on many of these products.

Fuji staff shirts, T-shirts, sweatshirts and our coach's chair.

Cycling gloves, in leather or washable Lycra, add comfort to every ride, while cycling caps add that extra bit of dash.

Etto helmets, available in children's and adult models, offer superior head protection while riding.

Look right in shorts, tights and jerseys in official Fuji team colors.

Handy Fuji saddlebags come in two styles and five colors.

Super Lube and Tri-Flow lubricants keep your bicycle's moving parts running smoothly.

The SCCR line of high-performance, all-weather tires gives maximum performance, handling, safety and value.

The Technomic "Long Neck" handlebar stem is made with an extra-long shank for maximum height adjustability, in eight extension lengths.

There's a Fuji water bottle in a color that's right for your bike.

The vinyl-coated Fuji C.O.P. lock has a hardened steel shackle for ultimate security.

The Fuji name on the box assures the best quality tire tube.

Fuji has selected the versatile Thule System as the best roof carrier for your bikes, skis, or other sports gear.

Mark Gorski, 1984 Olympic Cycling Gold Medalist, has chosen Fuji bicycles for his racing, training, and recreation.
