

NOVARA
Now is a great time to ride

2010

A man wearing a red shirt, black shorts, a black helmet, and sunglasses is riding a green bicycle on a city street. He has a yellow pannier bag attached to the rear rack. The background shows a brick building with large windows and a street with parked cars and other people.

Somehow the world always seems different when you hop on a bike.

Your focus shifts. Worries fade. Air feels crisper. Details are more vivid.

You see, hear and smell everything around you. That's the

simple joy of riding. And sharing that joy is the reason

we make Novara bikes.

Ride one and see how it feels.

Cruising on a bike

is somewhere between pedaling and coasting.

You'll know you're a pro at cruising when you notice the gull
on the dock, not the gear you're in.

JAUNT

With new Best Foot Forward geometry, this comfort bike lets you put your feet down or pedal with some pop. It also lets you ride up a hill for an epic sunset view — without getting dropped off the back.

KEY FEATURES

- Light, strong 6061 aluminum frame features confidence-inspiring Best Foot Forward geometry and a comfortably laid-back ride
- RST suspension fork with 50mm of travel handles bumps and cuts fatigue
- SRAM 24-speed drivetrain with chainguard offers a smooth, clean ride

JAUNT XX

Identical to our Jaunt, above, but shaped with a skirt-friendly frame. And, like all our "xx" bikes, it features fully female DNA, with frame geometries and components calibrated for the feminine physique.

KEY FEATURES

- Light, strong 6061 aluminum frame features confidence-inspiring Best Foot Forward geometry and a comfortably laid-back ride
- RST suspension fork with 50mm of travel handles bumps and cuts fatigue
- SRAM 24-speed drivetrain with chainguard offers a smooth, clean ride

CORSA

Feeling like an upright citizen? You'll love how it feels on a ride to the park. If the road gets rough, Corsa's suspension fork and cushy comfort saddle smooth the way.

KEY FEATURES

- Rugged, lightweight 6061 aluminum frame with comfort geometry responds well
- Suspension fork and seatpost smooth out bumps in the road
- 24 speeds are intuitively simple to use thanks to twist shifters

FORZA

Civilized enough for the town and gritty enough for the campground, this is a comfort bike with some zip. It's also got a smooth suspension fork for when you need to ride over a little rough stuff.

KEY FEATURES

- Responsive 6061 aluminum frame with fast-comfort geometry
- RST Neon suspension fork with 63mm of travel handles bumps in the road; lock it out when a firm ride up front makes more sense
- SRAM drivetrain provides 24 smooth-shifting gears

MIA

Our comfortably upright women's town bike comes with a classic step-through frame. If you need to glide over a little gravel, its suspension fork and plush saddle keep you comfortably in control.

KEY FEATURES

- Responsive, lightweight 6061 aluminum frame features comfort geometry and a confidence-inspiring step-through frame
- Suspension fork and seatpost smooth out bumps in the road
- 24 speeds are intuitively simple to use thanks to twist shifters

FIONA

Equal parts comfort bike and road bike, you can ride it in a bike lane or a campground loop. Step-through frame and road-comfort geometry make the Fiona feel good standing still or speeding along.

KEY FEATURES

- Responsive 6061 aluminum frame with fast-comfort geometry
- RST Neon suspension fork with 63mm of travel handles bumps in the road; lock it out when a firm ride up front makes more sense
- SRAM drivetrain provides 24 smooth-shifting gears

EXPRESS

Novara's opening roadster act has a sport geometry and a flat bar to give you a comfortable ride. It's also got the range to handle anything from a community ride to a century.

KEY FEATURES

- Light, strong 6061 aluminum frame accelerates quickly
- Kinesis carbon-fiber fork damps road vibrations, reducing fatigue
- Triple chainring provide 27 speeds to tackle hills and headwinds; SRAM X7 derailleurs and X5 shifters perform smoothly and reliably

EXPRESS XX

Like our unisex Express, but fit for females: Top tube, stem and crank arms are shorter; the handlebar is narrower; and the wider, shorter saddle is contoured to fit a woman's anatomy.

KEY FEATURES

- Light, strong 6061 aluminum frame accelerates quickly
- Kinesis carbon-fiber fork damps road vibrations, reducing fatigue
- Triple chainring provide 27 speeds to tackle hills and headwinds; SRAM X7 derailleurs and X5 shifters perform smoothly and reliably

DIVANO

Divano is a drop-bar bike you can use for training or a triple-digit tour. It cuts a sleek slipstream but features a more comfortable sport geometry, so you won't suffer from nose-to-the-pavement fatigue.

KEY FEATURES

- Strong, light 6061 aluminum frame with comfortable sport geometry
- Kinesis carbon-fiber fork damps road vibrations, reducing fatigue
- Triple chainring provide 27 speeds to tackle hills and headwinds; Shimano Sora shifters and derailleurs are light, responsive and reliable
- Long-reach brakes make it easy to mount fenders (sold separately)

CAREMA

Carema is a great fit if you're a woman who's serious about your mileage and your efficiency. Its sport geometry counters drop-bar fatigue, too, so you can finish a century with a smile on your face.

KEY FEATURES

- Strong, light 6061 aluminum frame with comfortable sport geometry
- Kinesis carbon-fiber fork damps road vibrations, reducing fatigue
- Triple chainring provide 27 speeds to tackle hills and headwinds; Shimano Sora shifters and derailleurs are light, responsive and reliable
- Long-reach brakes make it easy to mount fenders (sold separately)

An open stretch of road has a way of picking up your pace.

When wheels narrow and bars drop, bikes get swifter.

How fast you go, though, will always be up to you.

The beauty of a light, lively machine

is often found on the scenic route
instead of the fast lane.

STRADA

You won't need to shave your legs to ride this sport-touring/training torpedo, but you can if you want. We gave Strada our speediest components coupled with relaxed sport geometry for comfort on high-mileage days.

KEY FEATURES

- 6061 aluminum frame lets you attack hills efficiently; sport geometry offers comfort on long days; the carbon-fiber fork damps vibration
- Premium Shimano 105 derailleurs offer 30 speeds, and integrated shifter/brake levers keep you in control without taking hands off the bars
- Long-reach brakes make it easy to mount fenders (sold separately)

CAREMA PRO

Our women's "Tour de Blur" is built for both speed and stability. The Pro offers you responsive components, relaxed geometry and rack/fender compatibility.

KEY FEATURES

- 6061 aluminum frame lets you attack hills efficiently; sport geometry offers comfort on long days; the carbon-fiber fork damps vibration
- Premium Shimano 105 derailleurs offer 30 speeds, and integrated shifter/brake levers keep you in control without taking hands off the bars
- Long-reach brakes make it easy to mount fenders (sold separately)

C

Cycle commuting isn't merely transportation

it's transformative: healthier for both you and the planet. We've got the bikes, the gear and a heapin' helping of encouragement to get you there and back.

FLYBY SHUTTLE

When the trek from your bus to your business is a long one, the perfect answer is a folder. Ride it anywhere, then fold 'n' stash. Fits neatly into a condo closet or the storage bay on a transit train.

KEY FEATURES

- Features a dependable and easy-to-use design—handlebar folds in, pedals pop up, frame folds in half (a magnet holds it together) and seatpost drops
- Internal hub keeps greasy chain marks off clothes, skin and car interiors
- Nexus 7-speed drivetrain and twist shifters offer smooth gear changes

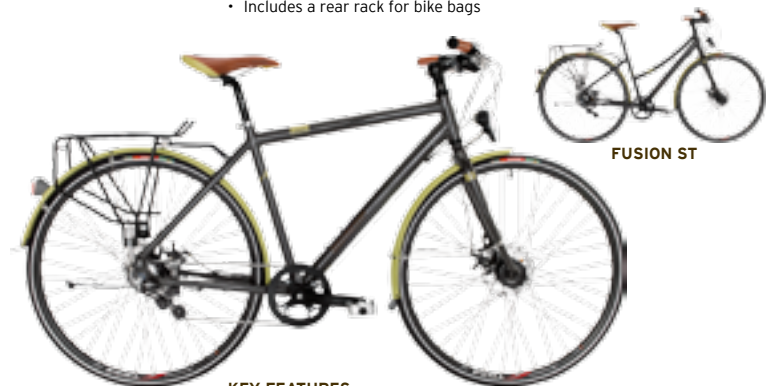

TRANSFER

Our past winner of *Bicycling* magazine's editors' choice award comes loaded with commute-ready accessories for the car-free life. You'll love its no-fuss internal gearing and hub-powered front lighting.

KEY FEATURES

- Sturdy chromoly frame can handle heavy loads and rough roads
- Internal rear hub minimizes maintenance and has 7 smooth-shifting gears
- Basta headlight is powered by a hub dynamo; battery-powered taillight provides rear visibility and is motion- and photo-sensitive
- Includes a rear rack for bike bags

FUSION ST

FUSION

Decked out with commuter accessories, a silky smooth Shimano internal drivetrain and a light, strong aluminum frame. The ST model offers a confidence-inspiring, office-wear-friendly, step-through frame.

KEY FEATURES

- Rugged, light 6061 aluminum frame has comfortable upright geometry
- Internal rear hub minimizes maintenance and offers 8 speeds
- Other goodies: hub dynamo-powered, high-/low-beam headlight; motion- and photo-sensitive taillight; sure-stopping disc brakes; fenders; rear rack

You can explore the forbidden city—

All you need is a sturdy bike and your eyes wide open.

BUZZ V

The bomber chromoly frame and fork are nice when you confuse curbs with speed-bumps. This sweetly priced rig also has burly tires and a dependable drivetrain.

KEY FEATURES

- Stout 4130 chromoly frame with geometry that offers a heads-up ride
- 24-speed SRAM grip-shift drivetrain lets you tackle hills and headwinds
- Other goodies: puncture-resistant Kenda Urban tires; fenders that keep crud off your clothes

BIG BUZZ

Nimble enough to tame traffic and tough enough to go where road crews have yet to tread. Flat bar with twist shifters lets you scan the street and go with the flow. Sure-stopping disc brakes help keep you out of jams.

KEY FEATURES

- Strong, nimble 6061 aluminum frame with straight-blade alloy fork
- Wide-ranging 18 speeds with twist shifters and quick-view gear indicator
- Other goodies: all-conditions disc brakes; puncture-resistant tires and double-wall rims with 14-gauge spokes to handle a pothole or two

BUZZ ROAD

Our revved-up Buzz has fast wheels, quick shifters and drop-bar efficiency. With puncture-resistant tires and disc brakes, though, it's still rugged enough to roll over a few rough patches.

KEY FEATURES

- Strong, lightweight 6061 aluminum frame with a sturdy alloy pinpoint fork
- Quick, precise and reliable 18-speed Shimano Tiagra drivetrain
- Other goodies: all-weather disc brakes with quick-action levers; grippy, puncture-resistant tires; WTB Drop bar with lots of usable hand positions

SAFARI

Why should bike touring be limited to the asphalt? Made for adventurous itineraries, this mountain-bike/touring-cycle hybrid can handle dirt roads and heavy loads. Sizes S and M have 26" wheels, while sizes L and XL have 700c wheels.

KEY FEATURES

- 6061 aluminum frame provides an off-road-worthy platform;
- 4130 chromoly front fork offers solid steering under heavy loads
- 27-speed drivetrain's wide gear range handles long days, changing terrain
- Mechanical disc brakes offer ample stopping power
- Alex rims/Vittoria Randonneur tires perform well over sketchy terrain

Your world on a bike

When you roll with the stuff you truly need, you're free to explore wherever you go.

RANDONEE

The original Novara was a Randonnee touring bike. We've given this thoroughly modern one a sturdy chromoly frame, 27-speed drivetrain and steady wheelbase, but the idea is the same: the epic ride.

KEY FEATURES

- Double-buttet Reynolds 520 chromoly frame can handle heavy loads
- Long wheelbase and low center of gravity optimize stability and handling
- Shimano touring drivetrain easily adjusts to changes in wind and terrain
- Cantilever brakes control speed and provide ample clearance for fenders

PORTAL

Take it to the streets—or forest service roads. With a comfort saddle, upright ride and front suspension, it's the perfect ride when you want to meander off the beaten path for a little exploring.

KEY FEATURES

- Sturdy 6061 aluminum frame sports a comfy upright riding position
- RST suspension fork delivers 100mm of travel to smooth out bumps
- SRAM X3 derailleurs give smooth, reliable performance
- WTB Comfort V Comp saddle provides a soft feel and comfortable ride

BONANZA

Tackle terrain, bound over berms and roll on. Bonanza's snappy shifting and powerful brakes will get you up the trail and down the singletrack with confidence.

KEY FEATURES

- Rugged 6061 aluminum frame will take you to the limit and beyond
- RockShox 100mm suspension fork gobbles up the rough stuff
- SRAM X5 27-speed drivetrain offers crisp shifting
- Tektro IO mechanical disc brakes are sure-stopping and silky smooth

Head for the hills

Dirt is good for your soul

(especially if you've got the wheels for it)

PIKA

Transitions beautifully from civilized to mildly wild environs. The Pika offers a woman-specific, versatile ride that lets you mix it up yet stay comfortable through it all.

KEY FEATURES

- Sturdy 6061 aluminum frame sports a comfy upright riding position
- RST suspension fork delivers 80mm of travel to smooth out bumps
- SRAM 3.0/X3 derailleurs give smooth, reliable performance
- WTB Comfort V Comp saddle provides a soft feel and comfortable ride

BONITA

Performance-level components at a sweet price. Like all our women's mountain bikes, we equip it with an 80mm suspension fork, so you get the shock absorption you need at exactly the right stand-over height.

KEY FEATURES

- Rugged 6061 aluminum frame will take you to the limit and beyond
- RockShox suspension fork's 80mm of travel gobbles up the rough stuff
- SRAM X5 27-speed drivetrain offers crisp shifting
- Tektro IO mechanical disc brakes are sure-stopping and silky smooth

Knobby is nice

Tires, terrain, knees.

PONDEROSA

Butted 6061 aluminum frame and a sweet component set—100mm fork, SRAM X7 drivetrain, Avid BB5 disc brakes and FR-5 levers—combine to inject unbridled fun into even the nastiest singletrack.

KEY FEATURES

- 6061 aluminum frame is lightweight and responsive
- RockShox Dart 2 100mm fork can be locked out for a firmer ride
- Lightweight SRAM X7 drivetrain offers crisp shifting
- Tenacious Kenda Nevegal 26" x 2.1" tires; Avid mechanical disc brakes

PONDEROSA 29

With mondo 29" tires to roll over logs, a suspension fork with 80mm of travel and responsive gearing, this turns the local washboard into your personal playground.

KEY FEATURES

- 6061 aluminum frame has a sturdy butted downtube
- RockShox Dart 3 80mm fork can be locked out for a firmer ride
- Lightweight SRAM X7 drivetrain offers crisp shifting
- Tenacious Kenda Nevegal SL tires; Avid mechanical disc brakes

NEW NOVARA N-FIT MAKES BIKE SIZING SIMPLE

Our revolutionary new size system is Novara N-Fit. Instead of measuring inseam lengths, consulting geometry charts and calculating standover height, all you need to know is your height.

N-FIT SIZE IS THE SAME FOR ANY BIKE

N-Fit offers riders consistent sizing. If you're a size M in a road bike, you're also a size M in an urban bike and a size M in a mountain bike. The Novara design team crunched the numbers to ensure the fit is right, no matter what type of bike you plan to ride.

NOVARA 2010 N-FIT SIZES

XS	S	M	L	XL	Dual-size unisex bikes:	Dual-size women's bikes:
5'0"–5'3"	5'3"–5'6"	5'6"–5'9"	5'9"–6'0"	6'0"–6'3"	S/M = 5'3"–5'9" L/XL = 5'9"–6'3"	XS/S = 5'0"–5'5" S/M = 5'5"–5'10"

N-FIT IS ADJUSTABLE

"Tweeners" heights can go up or down a size, depending on your riding preference and riding style. And Novara bikes' adjustable steering components mean our master techs can fine-tune fit if you fall between sizes or have an unusual "human geometry," like long or short legs.

N-FIT IS GENDER-SPECIFIC

Novara women's bike frames are shaped to fit females, and components are spec'd with women in mind. That's why we have different N-Fit size stickers for each gender. N-Fit keeps things simple, though, by using the same height ranges for unisex and women's S, M and L sizes.

Go ride your bike. Then go share the love.

Novara is all about sharing the love of riding. We build bikes for all types of riders, help them keep those cycles in tip-top shape in REI bike shops, and offer friendly advice along the way. We also make gear and accessories that make riding more fun, as well as a full line of bikes and accessories for kids.

Last year Novara and REI shared the love by giving \$588,000 to 69 different programs nationwide—it's part of our master plan to promote cycling and preserve outdoor places to enjoy on your bike. That included Bicycle Friendly Community Grants for five U.S. cities, a program co-supported by Bikes Belong and the League of American Bicyclists. Novara and REI joyfully support these and other bike-centric efforts.

Wanna join the fun? We partnered with Volunteer Match to help you find bike-related service projects in your neighborhood. Go to www.rei.com/volunteer to find out more. Also, check out www.imba.com.
