

2003 Product Guide

Quality 
Without
Compromise.

TURNER
SUSPENSION BICYCLES, INC.

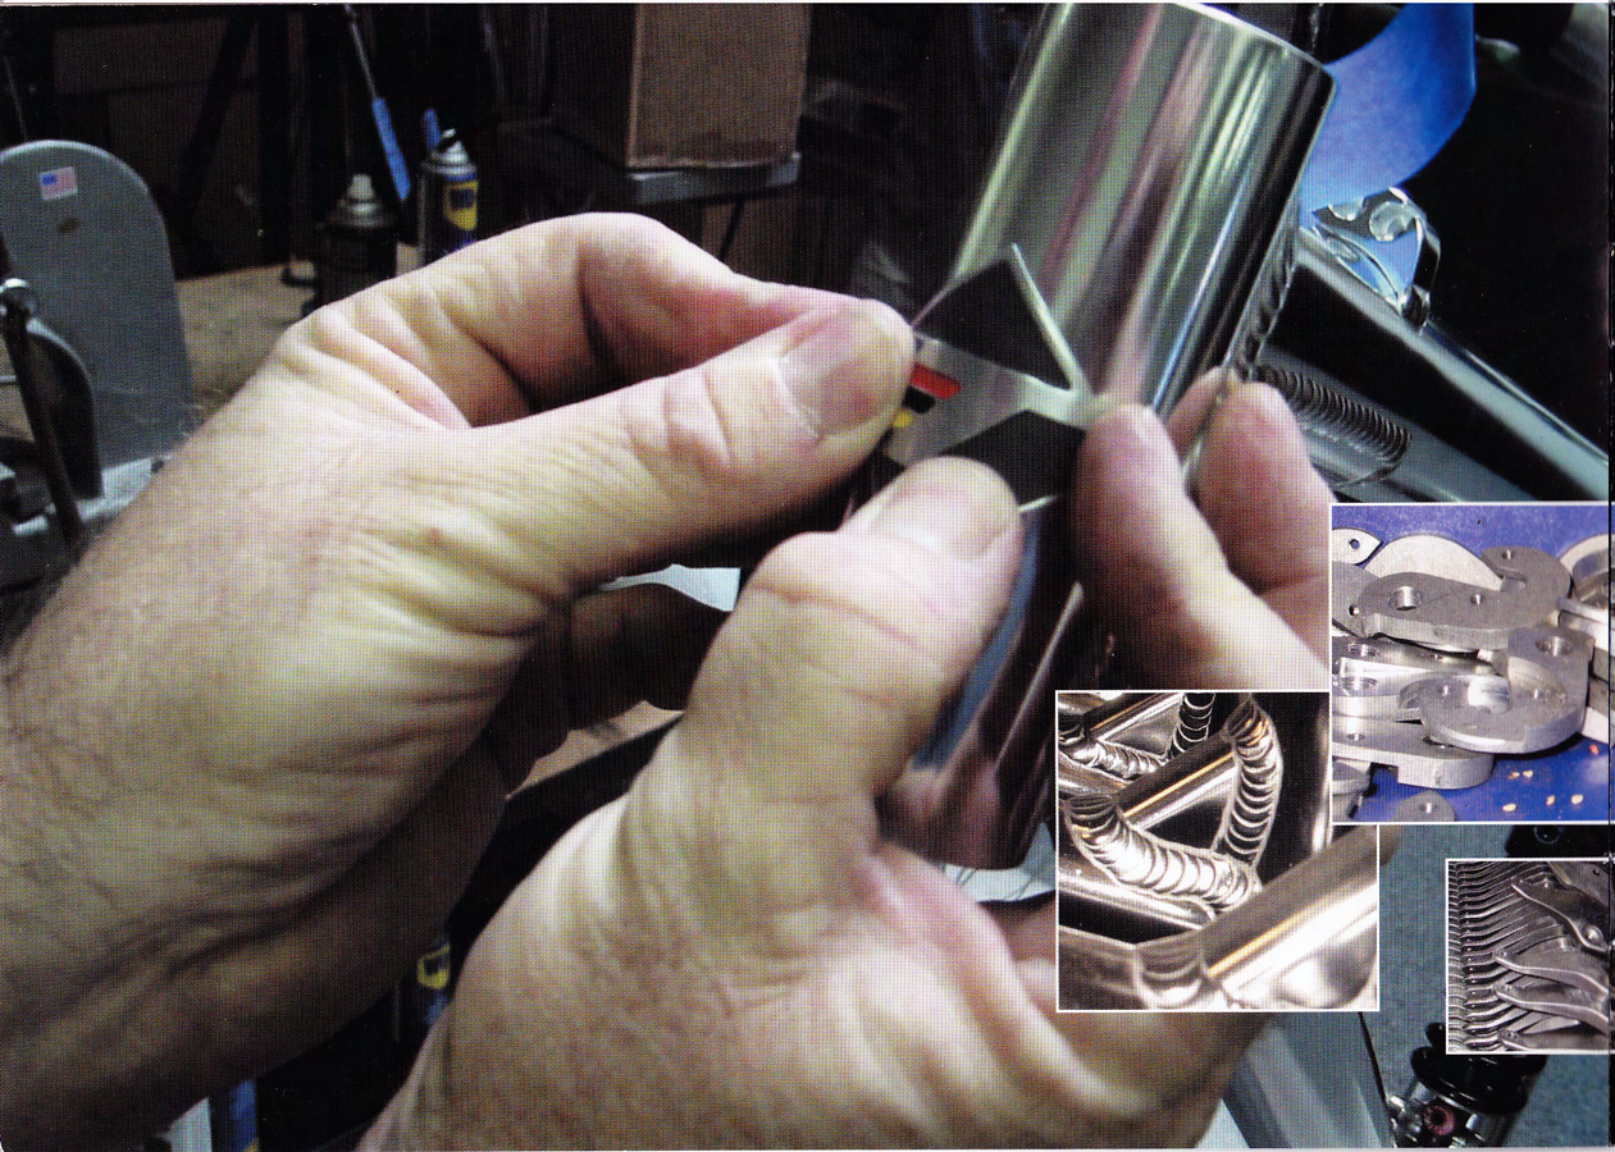

Handcrafted.

Quality Without Compromise is our mission at Turner Suspension Bicycles, Inc. We listen to riders from all over the world explain where and how they ride their mountain bikes. Our insatiable pursuit of the best riding suspension bikes leaves nothing overlooked in creating the right frame for you.

"Good enough" is not in the Turner philosophy. Not for design, not for materials and workmanship, and certainly not for customer service. We use only the best quality, U.S. made components for assembling our frames. Our frames are the benchmark for quality and performance in full suspension frames and we analyze every part to insure we maintain that position.

The results are National Title and Consumer Choice Winning designs refined over 9 years and frames backed by one of the best service commitments in the industry. When you buy a frame from Turner Suspension Bicycles, Inc., it is "Truly A Better Ride."

From the serious racers to enthusiasts, the Turner line revolves around designing frames to meet your specific riding style and the terrain you frequent.

**Quality

Compromise.**

Meet the Rocker Family.

Do you ever look back on a climb and wonder, "where are those guys?" Or do they say that about you?

Do you stand up and sprint to catch your buddy at the top of a climb, then try not to breath too loud?

Are you the lead dog on those long descents? Want to be?

If this is you, we've got your new best riding partner. The Burner and Five Spot are the bikes built to get you up and down the trail faster than imitation brands. We built the first, and we build the best rocker bike around. Our bikes have been replicated in concept, but in truth, it's our experience that sets Turner Suspension Bicycles, Inc. apart from the rest.

Cross country racers, riders and you can all realize the benefits of our rocker bike designs.

We use custom double-buttet tubing on the top and down tubes, and custom drawn seat tube and stays for maximum rigidity and low weight.

Our pivots are load-bearing bushings, designed for the rocking motion of suspension, not the spinning of a skateboard wheel. Zerk fittings and custom rubber seals keep your pivots running silky smooth for years.

All this attention to detail means we don't compromise on our bikes. Neither should you.

Medium	23"	31	4"	5' 7" - 5' 10"
Large	23.9"	32	5"	5' 11" - 6' 2"
Extra Large	24.8"	33	6"	6' 3" +

5 Spot

5 Spot Specifications

A	B	C	D	Recommended Height
Small	22.2"	30	4"	- 5' 6"
Medium	23"	31	4"	5' 7" - 5' 10"
Large	23.9"	32	5"	5' 11" - 6' 2"
Extra Large	24.8"	33	6"	6' 3" +

Meet the Sleds.

What's your level of commitment?
Works DHR and Rail, choose your weapon.

Specifically for downhill riding/racing/dirt hucking these frames are tough enough for your sickest urges.
Frame is extra stiff and has a low center of gravity for railing the turns.
It also features a low stand over to "keep things intact." 1.5 standard head tube allows for larger bearing headset to reduce bearing stress on huge drops.

The Sleds are for the committed, racer, urban rider or hucker, this bike will take you over the edge without hesitation, land and be ready for the next big hit.

Just like any Turner, these Sleds are designed to resist pedal induced bob.
Made in the USA, tested worldwide, just look at the success to date, multiple National and World Cup wins have proven our commitment, are you ready to prove yours?

Quality Without Compromise is what we strive for.

The best meld of climbing performance and rough terrain absorption combined with geometries tuned to the way you use the bike. No matter how many frames we build, our commitment to quality and service will never change.

A replaceable derailleur hanger is standard on all models.

For 2003, our frames are available in four color choices:

Gloss Black, Metallic Silver, Metallic Blue, and Metallic Red.

The rears are always polished and the rockers and linkages are always black.

If you're looking for a no holds barred high performance bike regardless of style, look to the frame designed around how you ride.

Specifications and availability subject to change without notice.

Our frames are covered by a 1 year limited manufacturers warranty.

Choose the right frame and you will have years of trouble free riding.
