

GT *all terra*

TEAM GT: TOBY HENDERSON, HANSJÖRG REY,
DAVE WONDERLY.

In the wake of all-terrain cycling's massive popularity, trails and race courses have been flooded with the bicycle clones of manufacturers too afraid to deviate from conventional designs and trends.

Not GT. Our American designers and engineers have forged their reputation as leaders in off-road innovation for over a decade. Last year alone, GT's All-Terra bicycles, *Triple Triangle Design*™ frames, and explosive graphic and paint schemes were praised by the cycling press as among the most outstanding new concepts to be offered in the sport. *Mountain Bike Action* magazine proclaimed the 1988 GT Karakoram one of the Ten Best Bike Designs of the year.

As a highlight to our very successful 1988 debut, the GT All-Terra Racing Team did battle on the toughest proving grounds of them all — the Swatch World Mountain Bike Championships in Mammoth Mountain, California. The results? Overwhelming. Our four-man wrecking crew earned two silvers and one gold — and logged some of the fastest course times in the process. When the dust had settled, GT stood proud as the new world-class contender in competitive all-terrain cycling.

For 1989, GT riders, designers, and engineers strived to create an even better line of competition-inspired All-Terra bicycles. This commitment to excellence shows in every model — from the exotic new Xizang racer to the affordable GT Outpost. On spirited mountain descents, their responsive frame geometries and quality components guarantee you the highest level of performance. The sleek lines and custom paint finishes will delight your senses. And when the mood strikes you, any one of these advanced machines is capable of taking home the gold. Just ask the competition.

The GT Triple Triangle Design™ — and Why it's Better

The heart and soul of every great bicycle lies in the design and quality of its frame. No bike builder understands this better than GT. Before you take one of our bikes on its first voyage, our designers and race team subject numerous prototypes to months of field testing, refining, and

abusive race evaluation. By adhering to these tough standards, we've engineered strengthening features, internal reinforcements, and special handling characteristics into our *Triple Triangle Design*™ frames you won't find on conventional ATBs.

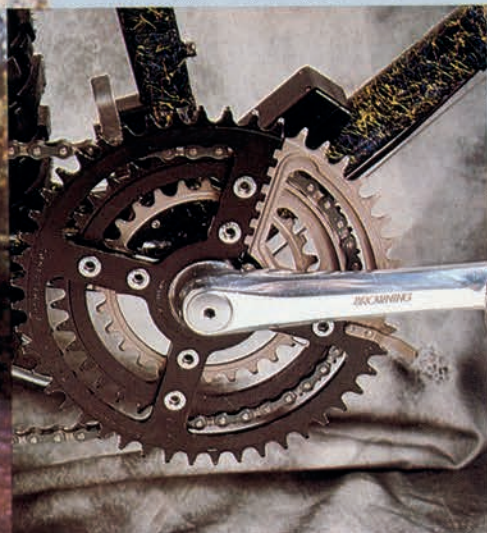

Under virtually any riding conditions, you'll recognize and appreciate the stiff, responsive performance of our competition series bicycles. From the Xizang to the Tequesta, GT's exclusive features elevate each model to the top of their class.

On every competition series GT *Triple Triangle Design*™ frame, the top tube is ovalized then pierced by the seatmast to increase the frame's strength and create our distinctive GT look. The headtube is machined, leaving reinforcement collars on both ends to provide a tight fit between it and the headset cups. Our double-tapered oversized 19mm seatstays eliminate frame flex and provide a solid position for mounting U-Brakes.

To eliminate power-robbing bottom bracket flex, GT ovalizes the lower portion of the seat tube where it joins the bottom bracket. An internal reinforcement collar is built into the seatmast at the top tube juncture for added durability in this high-stress area. For added function and a cleaner look, a rear brake cable guide tube is hand brazed on the inside of the top tube. Before connecting to the rear brake, the U-Brake straddle cable is routed around the seat tube by GT's fiber reinforced plastic cable guide. This patented device increases braking power by applying more even pulling force on the arms of the U-Brake.

Few of these advanced features are available on conventional ATBs, but many of them can still be found on the more affordable GT Timberline and Outpost. The Timberline's GT *Triple Triangle Design*™ frame features a pierced top tube, a reinforced head tube and seatmast, and an ovalized seat tube at the bottom bracket for added strength. Even the economical Outpost boasts special features no other bicycle in its price range can match. The pierced top tube on its unique diamond shape frame is externally butted to fortify the bike in this critical area. Like every GT All-Terra bike, the Outpost features machined head tube reinforcement collars that increase the frame's lifespan and insure a perfect headset fit.

For GT's engineers and product development team, the task of building mountain bikes better than the competition wasn't easy. Through hard work, we have achieved that goal. Our *Triple Triangle Design*™ frame is proof. The quality, handling, and sophistication offered by our All-Terra bicycles makes us the leader in off-road technology — one ride and you'll be convinced.

In ancient tongues, Xizang was the name of the mysterious mountain region known today as Tibet. Regarded as the top of the world, its majesty was the inspiration for our finest competition model, the Xizang.

Awe over this exceptional racing bicycle is inspired by its competition series *GT Triple Triangle Design™* frame. Hand crafted with Tange Prestige and MTB tubing, each joint is fillet brazed and polished for a sculpted, one-piece appearance. Tange Prestige forks with 1 1/8-inch tapered blades and forged dropouts, and GT's exclusive Spider Webbing three-phase paint finish complete this very sophisticated all-terrain competitor.

The Xizang's list of credentials continue with some very impressive off-road componentry. Tioga's Prestige II handlebars and carbon fiber seatpost. A SunTour XC-9010 rear derailleur with AccuShift and The BEAST, SunTour's Browning Electronic AccuShift Transmission. Tioga Farmer John series off-road tires and Araya New RM-20 light alloy rims.

There are no mysteries surrounding this package — the Xizang offers the stuff of which legends are made.

XTRANCE

The 1989 Team Avalanche is designed for hardcore off-road riders. Its competition series *Triple Triangle Design™* frame is constructed with Tange's finest Prestige and MTB tubing, and features a Tange Prestige fork.

The Team Avalanche boasts race-proven competition geometry and top-of-the-line componentry. Shimano's Deore XT II groupo with high-performance Biopace chainrings, 21-speed HyperGlide shifting, and SLR braking deliver uncompromised power and control.

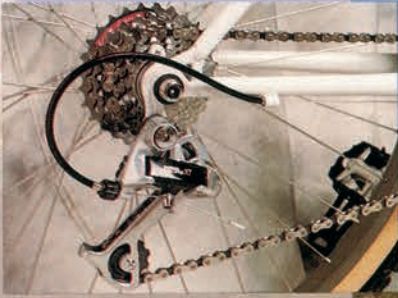

Araya new RM-20 light alloy rims and Tioga Farmer John series tires transfer all power to the ground. The Avalanche's light weight is aided by a Tioga Prestige II handlebar and carbon fiber seatpost, and our Snowstorm three-phase custom paint finish lends visual sophistication to this savage off-road performer.

Only one avalanche can be ridden up one side of the mountain and down the other — the GT All-Terra Avalanche. Shimano Deore II componentry with 21-speed HyperGlide, high-performance Biopace chainrings, and SLR braking, Tioga Prestige II handlebars, and Araya new RM-20 light alloy rims are assembled on the same frame as our Team model to create this aggressive off-road machine. The Avalanche is as exciting to look at as it is to ride, thanks to our custom Snow Storm and Arctic Storm three-phase paint finishes.

team **AVALANCHE**

AVALANCHE

K2 is the tallest peak in the Himalaya's Karakoram mountain range. What better name exists for the newest version of our most celebrated bike? The Karakoram K2's competition series frame benefits from double-buttressed Tange MTB tubing. Its responsive mountain bike geometry answers your every command. Sun-Tour's all-new XC-9000 and 9010 derailleurs with AccuShift and a seven-speed cassette freewheel provide 21 earth-churning gears. SR's best FX cold-forged crankarms with oval inner chainrings and round outer chainring transfer all pedaling forces into fast-forward acceleration. Dia-Compe's new two-finger Advantage II brake levers with 984 front cantilevers and 994 rear U-brake put a stop to the high-speed excitement. In either shocking Violet Thunder or purely professional Pearl Grey, the Karakoram K2 will conquer you in a single glance.

The Karakoram's competition series *Triple Triangle Design*™ frame is constructed of triple-buttressed Tange MTB tubing. Its full chromoly fork features tapered 1 1/8-inch blades and forged dropouts. "Dialed in" was how *Mountain Bike Action* and *Bicycling* magazine described the Karakoram's aggressive geometry.

The rugged nature of the Karakoram is made evident by Shimano's Mountain LX group with 21-speed HyperGlide, high-performance Biopace chainrings, and SLR braking. Grey anodized Araya RX-7 alloy rims, stainless steel spokes, and sealed mechanism hubs provide long life with less maintenance. GT All-Terra toe clips and straps, a GT GelCel™ saddle, and two custom paint finishes – Granite or high-gloss red – round out the impressive package the Karakoram presents for eager off-road enthusiasts.

KARAKORAM K2

KARAKOFORM

The GT Tequesta underwent substantial refinements for 1989, and still retained its superior quality and value. With its new competition series *Triple Triangle Design*[™] frame, the Tequesta features our Karakoram's celebrated geometry and handles like a true off-road champion. Triple-buttressed Tange MTB tubing and a tapered full chromoly fork are features that provide the quality and responsiveness you demand. The Tequesta's SunTour XCD-6000 derailleurs with 21-speed AccuShift, grey anodized Araya RX-7 alloy rims, stainless steel spokes, GT All-Terra stem with internal cable routing, and Dia-Compe XCE brakes with BRS cables withstand any obstacle modern mountain bikers run across. Its custom Hot Pink Smoke finish is our most striking creation yet, and the Tequesta is also available with a classy high-gloss black finish for understated elegance.

TEQUESTA

TIMBERLINE

Reaching the high country is easy on the GT Timberline. Its *Triple Triangle Design*™ frame with chromoly main tubes and a chromoly fork provide exceptional handling on all terrains. Shimano Exage Trail SIS derailleurs, Araya alloy rims, a chromoly GT All-Terra II stem, and Shimano's Exage Mountain U-Brake will provide years of off-road reliability. The Timberline's GT GelCel™ saddle and GT/A'ME anatomical grips offer unrivaled comfort and control. The 1989 Timberline features Black/White Cracked, or two other durable, high gloss finishes — Pearl Aqua or Electric Blue.

Timberline
Ladies Model

OUTPOST

Quality doesn't take a back seat to affordability on the GT Outpost. Its unique GT diamond frame is complemented by a tapered fork with 1 1/8-inch blades and Shimano's Exage Country component group. The Outpost's Araya alloy rims and studded all-terrain tires hint at its sporting nature. Its light weight and comfortable ride is further enhanced by a GT GelCel™ anatomical saddle. The Outpost is available in two popular GT paint finishes, high-gloss Red or White.

The Ricochet has a chromoly frame and fork, special GT Trials tires, and sealed bearing hubs for strength, traction, and smoothness. With either its 150mm chromoly or forged alloy Power Series cranks, the Ricochet has what it takes to climb over any obstacles you put it up against.

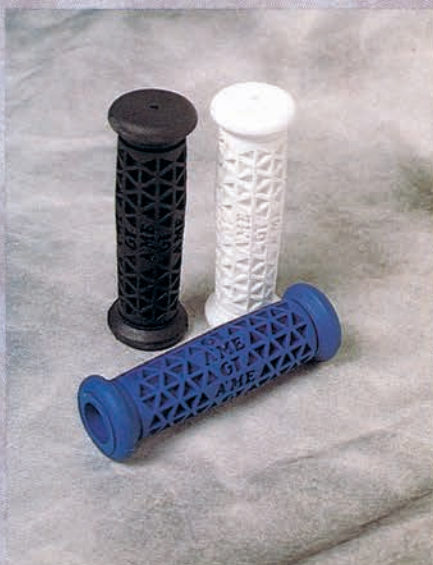

RICCOCHET

Berm-bashing BMX prowess and rugged all-terrain sophistication is what you'll find in the GT Hybrid. In 20- or 24-inch sizes, the Hybrid's SunTour derailleur with AccuShift, *Triple Triangle Design*™ frame, and forged alloy GT BMX stem deliver high-performance for riders of all ages. Custom Hot Pink Smoke and White Smoke paint finishes are new for '89.

limited warranty

GT BICYCLES, INC. warrants the replacement of original components of GT All Terra bicycles due to defects in material and/or workmanship according to the following conditions and limitations:

The frame and fork are warranted to the original purchaser for as long as he or she owns the bicycle.

The components, other than frame and fork, are warranted for one year.

Labor and transportation charges are not included.

This warranty is listed to the original retail purchaser ONLY.

Proof of purchase is required to validate protection under this limited warranty.

Normal wear, accident, abuse, neglect, improper assembly, improper maintenance by other than an authorized dealer or use of parts or devices not consistent with the use originally intended for the bicycle as sold are not covered by this warranty.

Claims must be made through an authorized dealer. For information regarding the nearest dealer, write or call this company.

This warranty is limited to replacing the defective part without charge and the company shall in no event be responsible for consequential or special damages.

This bicycle is not intended for use in stunt riding, ramp jumping or similar activities and this warranty is void where the bicycle has been used in any of these ways. Likewise, the bicycle is not designed or intended to be used with a motor.

This warranty is expressly in lieu of any other warranties. Any implied warranty, including any warranty of merchantability of fitness, shall be limited in duration to the duration the express warranty set forth herein.

NOTICE: The user assumes the risk of any personal injuries, damage to or failure of the bicycles and any other losses if the GT bicycle is used in any competitive event, including bicycle racing, or in dirt biking or similar events.

The return of the warranty registration form within 30 days of purchase is a condition precedent to coverage as provided herein.

This warranty gives you specific legal rights and you may also have other rights which vary from state to state.
