

 **GT**
all terra

It's amazing what you get when you give the best riders in the world what they want.

Nineteen Ninety Three GT All-Terra. A complete line of bikes that can satisfy the likes of Team GT, yet realize that not everyone is out to become a world champion.

To successfully create a line of bikes of this spectrum, we combined the talents of our Research & Development department and Team GT with the world's best componentry and material manufacturers. It's this team effort that makes every GT, from the championship race bikes to our casual cross series, live up to the high standards that we've set for them.

Our engineers and designers have spent countless hours innovating and perfecting concepts like our Triple Triangle Design® frame, Groove Tube™ top tube cable routing, replaceable alloy derailleur hanger, and triple-buttressed chromoly "Bologna Lite" fork. Concepts created from a passion for perfection. Created to make cycling more enjoyable for all levels of riders.

Then we turned our attention to suspension, and created the patent-pending Rocker Tuned Suspension™ system. The RTS-1 suspension system is 100% made in the USA and combines the benefits of a rigid frame with the performance of full suspension.

As you page through this catalog, you'll see the efforts of the best designers and riders in the world. Every bike meticulously designed and equipped for its intended rider. So picture yourself on your favorite GT, then imagine riding down that perfect trail.

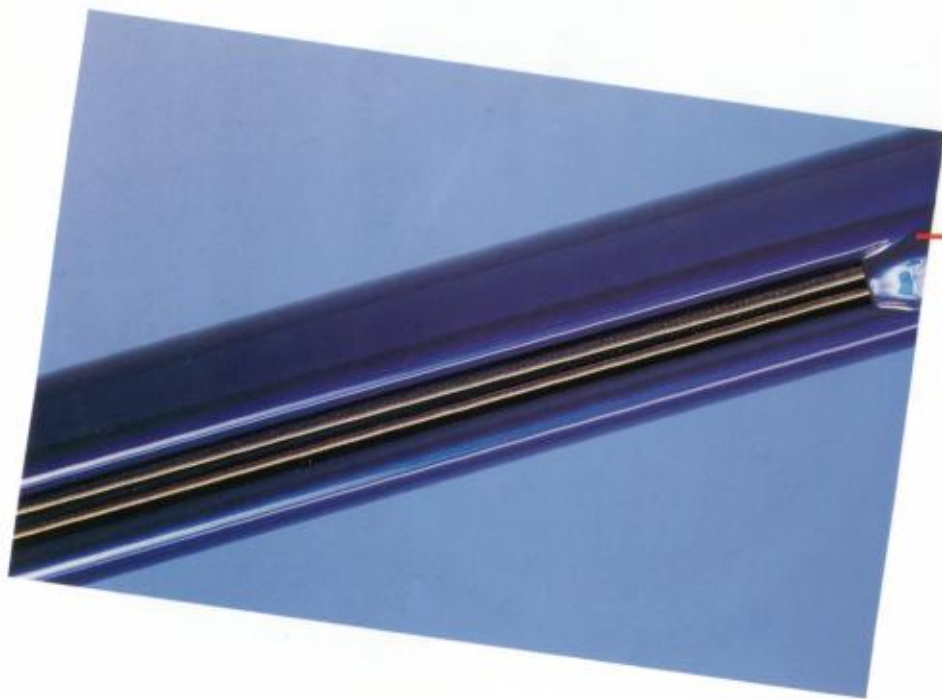

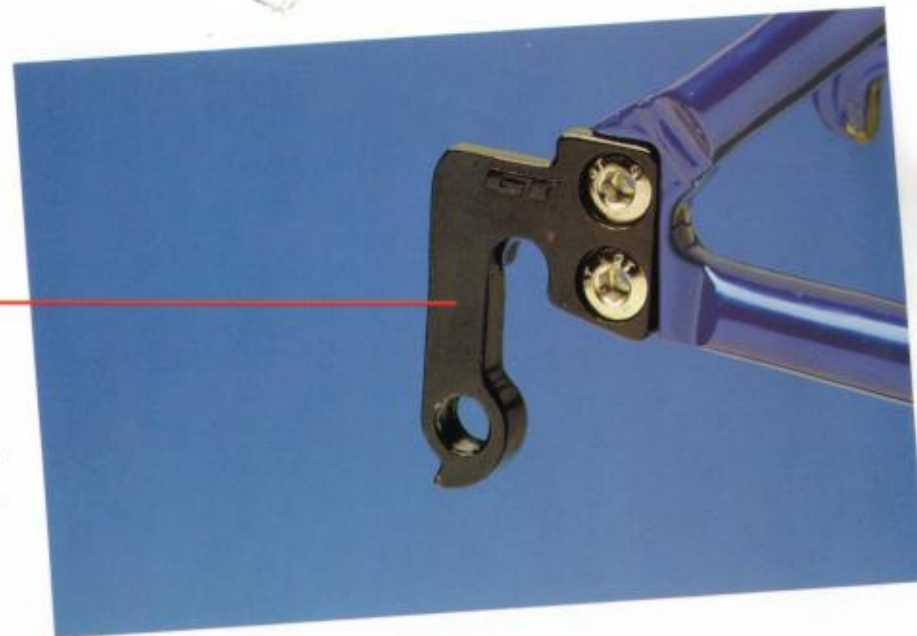

The Beginning, Middle, and End of Performance.

The frame. This is where it all starts, and ends. Where it takes more than great marketing and hype to succeed. Our R&D department, together with Team GT, have taken the GT Triple Triangle Design® frame and made it the mark to which all other frames will be measured.

Replaceable Alloy Deraillieur Hanger

The GT replaceable alloy deraillieur hanger is designed to bend when it strikes an object, before any permanent damage is done to the deraillieur or dropout. The outward offset seat stay tabs allow for added chain and freewheel clearance.

GT Triple Triangle Design® Frame

The GT Triple Triangle Design® frame provides structural strength superior to that of a conventional diamond frame. By utilizing three triangles instead of two, the Triple Triangle Design® frame helps eliminate frame flex for improved climbing and rapid acceleration.

For over a decade GT has been handcrafting framesets in the USA. Our hands-on philosophy to frame building ensures that every element incorporated into our Triple Triangle Design® frame meets our exacting standards.

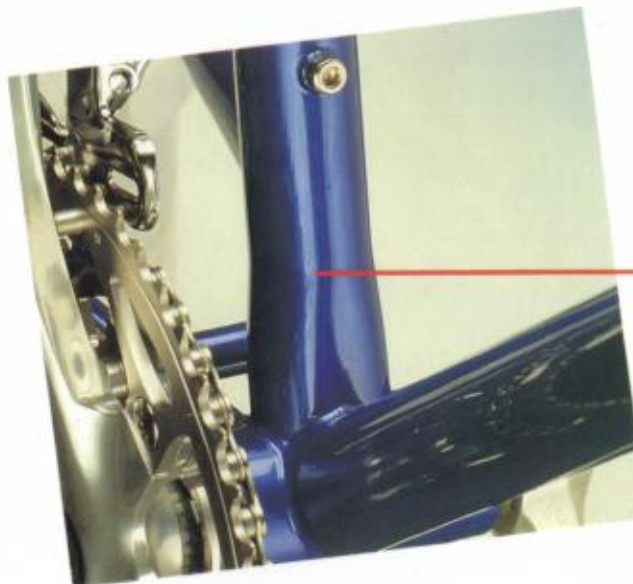

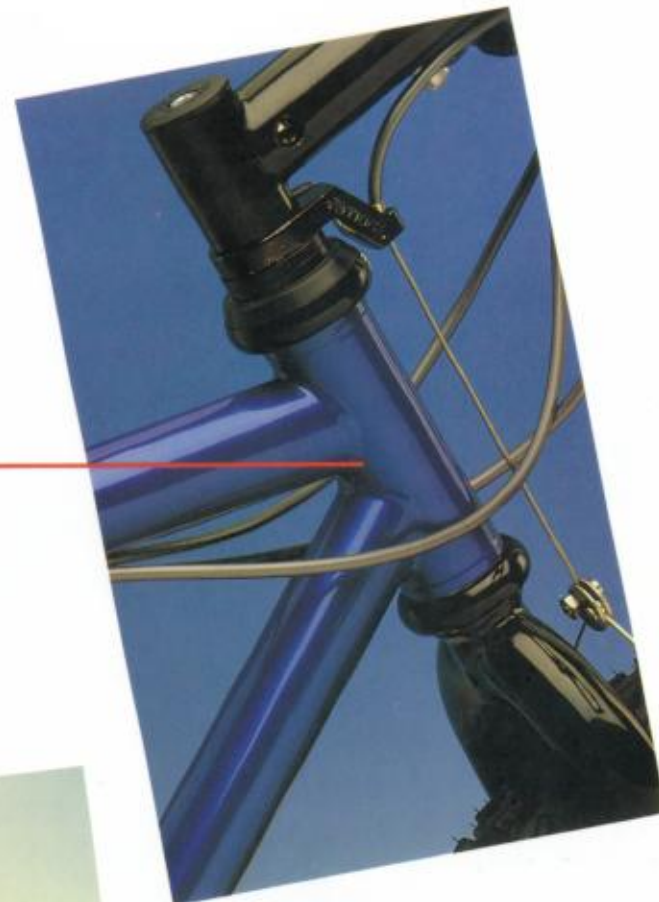

Groove Tube™ top tube cable routing

A joint effort between GT and True Temper, the Groove Tube™ is a quantum leap forward in bicycle and tube forming technology. This exclusive design puts all cables up and out of the way for cleaner, safer top tube cable routing.

GT Flip Flop III Stem and "Aheadset" System

Specially designed to work with the "Aheadset" system, the new Flip Flop III stem is constructed from thin wall, heat treated chromoly tubing. Shaving 8oz. off the overall weight, the Flip Flop/"Aheadset" combination also gives the rider the choice of two riding positions.

Working in unison with the stem, the "Aheadset" system eliminates the need for any special headset or stem tools. The new design "Aheadset" is held firmly in place by the stem which clamps directly to the steer tube, so the weight of the stem quill, bolt and expander wedge are all eliminated.

Ovalized Seat Tube

The ovalized seat tube at the bottom bracket allows for increased side-to-side strength.

D

esigned to Win.

GT Tech Shop products are engineered to satisfy the most hardcore enthusiasts. All made in the USA, the RTS-1, Xizang, Zaskar LE and Psyclone are each the result of Team GT's years of racing experience.

GT Seat Post Clamp

Extremely lightweight, cold forged alloy clamp with titanium bolt for super clean, super light set-up.

RTS-1

The GT RTS-1 (Rocker Tuned Suspension - patent pending) frameset is the ultimate in full suspension performance. Ridden by Team GT cross country pro, Gerhard Zadrobilek, and downhill specialist, Jimmy Kight, the GT RTS-1 is a true all-around suspension bike. Handcrafted in the USA, the RTS-1 features a 6061 T-6 heat treated aluminum front triangle, and True Temper GTX heat treated chromoly rear triangle. The oil dampened, fully adjustable Noleen coil-over-shock can be easily adjusted to fit any rider's style, weight and handling preferences. These three components are each connected to the heart of this design, a CNC machined aluminum rocker. It's this rocker based design that puts the RTS-1 ahead of the pack.

GT Titanium Skewers with Aluminum QR levers

Made in the USA. Precision machined. Lightweight.

GT Alloy Stem

New for 1993, GT's butted 6061 aluminum stem is designed for use with the "Aheadset" system, and allows the rider a choice of two riding positions.

Xizang LE

Race tested and proven by Team GT's Rishi Grewal, Chantal Daucourt, Susan DiBiase and 1992 NORBA National Champion Juli Furtado, the Xizang LE has strength and power to spare. The Xizang LE, handbuilt in the USA from 3/2.5 titanium, is extremely light, responsive, and comfortable.

Zaskar LE

This frame is the perfect combination of phenomenal strength and light-weight performance. Just ask Hans Rey, Team GT's Trials and Extreme riding specialist. The USA made Zaskar LE's powerful construction and looks include 6061 T-6 heat treated aluminum tubing, reinforcing head tube gussets and ball burnished finish.

Psyclone

The Psyclone is GT's premiere fillet brazed chromoly frame. Ridden by Team GT's Jimi Killen, the Psyclone is handcrafted from True Temper GTX Ultra-III heat treated chromoly. Featuring beautiful fillet brazed welds and lustrous DuPont Imron® paint finishes.

GT Sealed Bearing, Titanium Axle Bottom Bracket

This made in the USA light weight bottom bracket features U.S. made sealed bearings and radically reduces weight, while maintaining crucial strength to this all important component.

GT Precision Machined Aluminum Cranks

Precision machined in the USA, GT's cranks are CNC machined from a single billet of 7075 aluminum, and feature a removeable spider and mirror finish.

"Without a doubt the most powerful mountain bike team in the world."

Mountain Bike Action - March, 1992

Cross-Country, Downhill, Dual Slalom, or Trials, no other team goes to the podium as often as Team GT.

And when they talk, our engineers listen. Because an idea that looks great on paper might not cut it on the professional race circuit. And if it doesn't survive Team GT, you'll never see it. So the next time you're at the races, look for Team GT. They'll be the ones up front.

Jimi Killen

Winner of 2 NORBA National Series
One of top two rated 1992 Experts

Jimmy Kight

Winner of 4 World Cup Dual Slaloms
1992 U.S./North American National Slalom Champion
Member U.S. National Team

Gerhard Zadrobilek

Winner of 1 World Cup
1992 Austrian National Cross-Country &
Downhill Champion

Winner of 2 World Cups
3rd Overall 1992 World Cup Series
Member 1992 Swiss National Team

Team GT

RTS-1. Now Only the Pedals Will Get Hammered.

A well thought out and brutally tested idea. **RTS-1.** Would you ride anything else?

- Handcrafted in the USA
- 6061 T-6 Heat Treated Aluminum Front Triangle, True Temper Heat Treated Even-Walled/Tapered Chromoly Rear Triangle
- RockShox Mag21 Suspension Fork
- Tioga Alloy "Aheadset"
- Shimano 24-speed XTR Component Groupo w/RapidFire Plus Shifters
- Mavic M-231 Double-Walled Alloy Rims with Eyelets and DT Double-Butted Spokes
- Panaracer New Ultra-Light Dart (front), Smoke (rear) Tires w/Kevlar Bead.
- GT "Superlite" Alloy Bars w/Onza Alloy Bar Ends

RTS-1. Rocker Tuned Suspension

The RTS-1 gives you all the benefits of a rigid frame combined with the performance benefits of full suspension. All made possible by a CNC machined aluminum rocker. It's this rocker arm configuration that creates the RTS-1's three advantages called Anti-Squat, Anti-Dive, and Adjustability.

The RTS-1's Anti-Squat design causes the rear end to get stiffer in direct proportion to the pressure being applied to the pedals. So when you're hammering a climb or sprinting for the finish, the RTS-1 gives you optimum power transfer to the rear wheel. When the rear tire strikes an object with greater force than that on the chain, the suspension is activated and the terrain absorbed.

The trouble with most designs today, rigid and suspension, is that they have trouble maintaining rear wheel traction when braking hard. This is often referred to as "diving". The Anti-Dive feature of the RTS-1 allows the wheelbase to "flatten-out", and transfers the rider's weight to the rear tire when braking and cornering for a more controlled, faster ride. No rider was created equal. The RTS-1's USA made Noleen coil-over-shock suspension unit is fully adjustable to fit any riders style, weight and handling preferences. By adjusting the length of the shock, the bike's head angle, seat angle, and bottom bracket height can be fine tuned to fit the individual rider, or terrain.

Rockwell Tuned Suspension

The Gnarliest Bike on Earth.

Ball burnished and bad to the bone, the **Zaskar LE** is the only bike on the planet that can stand up to the punishment Hans Rey dishes out.

- Made in the USA
- 6061 T-6 Heat Treated Aluminum Tubing
- Ball Burnished Finish
- GT "Bologna Lite" Triple Butted Chromoly Fork
or **RockShox Mag21** Suspension Fork
- Tioga Alloy "Aheadset"
- Shimano 24-speed XTR Component Groupo w/Rapidfire Plus Shifters
- Mavic M-231 Alloy Double-Walled Rims with Eyelets/DT Double-Butted Spokes
- GT "Superlite" Alloy Bars with Alloy Onza Bar Ends
- Panaracer New Ultra-Light Dart (front), New Smoke (rear) Tires with Kevlar Bead

1993 Zaskar LE also available with SunTour XC-Pro
24-Speed Micro-Drive Componentry.

The "E" Ticket.

The made in the USA **Team Avalanche**, with its light weight and dialed race geometry, is the ultimate in fine tuned performance.

- True Temper GTX Ultra-III Heat Treated Double-Butted Chromoly Tubing

- GT "Bologna Lite" Triple Butted Chromoly Fork

- or **RockShox Mag 21** Suspension Fork

- Tioga Alloy "Aheadset"

- Shimano 24-speed XTR Component Groupo w/Rapidfire Plus Shifters

- Mavic M-231 Alloy Double-Walled Rims with Eyelets/DT Double-Butted Spokes

- GT Lightweight Alloy Seat Post

- GT "Superlite" Alloy Bars with Onza Alloy Bar Ends

- GT Lightweight Alloy Seat Post Clamp with Titanium Bolt

- Team Avalanche available in Blue Imron (shown).

Strength, Beauty, Raw Power.

Bold welds and strong head tube gussets give the **Zaskar** the aggressive look it deserves. While the 6061 T-6 heat treated aluminum tubing and ball burnished finish make the Zaskar one-of-a-kind.

- Made in the USA of 6061 T-6 Heat Treated Aluminum Tubing
- GT "Bologna Lite" Triple-Butted Chromoly Fork or **RockShox Mag21** Suspension Fork
- Shimano Deore XT Component Groupo w/Rapidfire Plus Shifters
- Mavic M-231 Alloy Double-Walled Rims with Eyelets/DT Double-Butted Spokes
- Panaracer New Ultra-Light Dart (front), New Smoke (rear) Tires with Kevlar Bead
- GT Flip Flop III Heat Treated Chromoly Stem
- Shimano Clipless Pedals
- Tioga Alloy "Aheadset"
- Ball Burnished Finish

Only You Can Push Yourself.

Climbing pacemaker hill in the middle chainring, mastering the granite staircase, cresting five dollar hill. Whatever the challenge, you've got to make it happen.

And when you accept the challenge head on, you have to have confidence in your equipment. Equipment that enhances, not hinders, your performance.

GT All Terra Performance Series bicycles are designed to meet the challenge. Every bike is created to take you to the top, and then let you blast back down. And each one features quality components like Shimano, Onza, and RockShox.

Grab a GT, and accept the challenge.

The Only Beating You'll Feel Is Your Heart.

Engineered to take the beating out of a hard ride, the **RTS-2** takes suspension bike performance to a higher ground. Its powerful frame utilizes the same unique rocker arm suspension and coil-over-shock system as the RTS-1, allowing the RTS-2 to climb as well as it descends.

- 7005 Aluminum Main Triangle, Tange Chromoly Rear Triangle
- RockShox Quadra Suspension Fork
- Shimano New Deore LX Groupo w/Rapidfire Plus Shifters
- Tioga "Aheadset"
- Ritchey Z-Max Tires
- Mavic M-231 Double-Walled Alloy Rims with Eyelets
- GT Flip Flop III Heat Treated Chromoly Stem
- GT Toe Clips and Straps
- RTS-2 available in Titanium/Black (shown).

USA Made Oil Dampened
Coil-Over Shock

If You're Looking For a Quiet Day of Riding, Look For a Different Bike.

When it comes to intimidating the competition, the **Bravado LE** is the ticket. This aggressive bike delivers performance to all who ride it.

- True Temper GTX Ultra-III Heat Treated Double-Butted Chromoly Tubing
- GT "Bologna Lite" Triple-Butted Chromoly Fork
or **RockShox Mag21** Suspension Fork 
- Shimano Deore XT Component Groupo w/Rapidfire Plus Shifters and Servo-Wave Braking
- Tioga Alloy "Aheadset"
- Mavic M-231 Double-Walled Alloy Rims with Eyelets
- Panaracer Dart (front), New Smoke (rear) Tires with Kevlar Bead
- GT Flip Flop III Heat Treated Chromoly Stem
- GT New Superlight 350mm Alloy Seat Post
- GT Racing Saddle with Hollow Chromoly Rails
- Bravado LE available in Team Scream.

They'll be Shakin' in Their Spandex.

The ground will start to rumble as you ride up to the start line. With a RockShox Quadra fork, the **Richter 8.0** thrives on the rough stuff.

- Tange Prestige and True Temper GTX Heat Treated Double Butted Chromoly Tubing
- RockShox Quadra Suspension Fork
- Tioga "Aheadset"
- Shimano Deore XT Derailleurs w/Rapidfire Plus Shifters
- Double-Butted Stainless Steel Spokes
- GT Alloy Bars w/Onza Alloy Bar Ends
- GT Superlight Alloy 350mm Seat Post
- GT Racing Saddle w/Hollow Chromoly Rails
- GT Toe Clips and Straps
- Richter 8.0 available in Ferrari Red (shown).

The Competition Will be Running for Their Lives.

As powerful as its name, the **Avalanche AL** will take the competition by landslide. The strong aluminum frame, race geometry and performance componentry makes the Avalanche AL a force to be reckoned with.

- 7005 Heat Treated Aluminum Tubing with Replaceable Alloy Derailleur Hanger
- GT "Bologna Lite" Triple-Butted Chromoly Fork
or **RockShox Mag21** Suspension Fork
- Shimano Deore XT Derailleurs w/Rapidfire Plus Shifters and Servo-Wave Braking
- Tioga "Aheadset"
- Ritchey Z-Max Tires
- Mavic M-231 Double-Butted 32H Alloy Rims with Eyelets
- GT Alloy Bars w/Onza Alloy Bar Ends
- GT Flip Flop III Heat Treated Chromoly Stem
- Avalanche AL available in Titanium (shown).

An Unstoppable Force.

Once you set the **Corrado** in motion, your adrenaline will start to flow. Power the hills and attack the corners, as you pick off the competition one by one.

- True Temper GTX Heat Treated Double-Butted Chromoly Tubing
- GT "Bologna Lite" Triple-Butted Chromoly Fork or **RockShox Quadra** Suspension Fork

- Shimano Deore XT Derailleurs w/Rapidfire Plus Shifters
- Shimano Deore LX Brakes w/Multi-Condition Performance
- Araya TM-18 Alloy Double-Walled 32H Rims w/Stainless Steel Spokes
- Tioga "Aheadset"
- Ritchey Z-Max Tires
- GT Flip Flop III Heat Treated Chromoly Stem
- Corrado Available in Gloss Black (shown).

The name Corrado may change in certain countries due to copyrights.

The Center of Attention.

The first time you show up at your favorite trail on your **GT AL**, people will notice. The first time you blast by your friends, people will be amazed.

- 7005 Heat Treated Aluminum Tubing with Replaceable Alloy Derailleur Hanger
- GT "Bologna Lite" Triple-Butted Chromoly Fork or **RockShox Quadra** Suspension Fork **ROCK SHOX**
- Tioga "Aheadset"
- Shimano Exage ES Derailleurs w/Rapidfire Plus Shifters
- Araya TM-18 Alloy Double-Walled 32H Rims w/Stainless Steel Spokes
- GT Flip Flop III Chromoly Stem
- **GT AL** available in Silver Mist, and Baja Blue (shown).

Pantera

Attack From Every Angle.

Hammer the singletrack, rail the corners and fly down the straights like never before.

The **Ricochet** is like no other bike you've ever ridden.

- Tange MTB Double-Butted Chromoly Tubing
- RockShox Quadra Suspension Fork
- Tioga "Aheadset"
- Shimano Exage LT/Altus w/Rapidfire Plus Shifters
- Araya TM-18 Double-Walled Alloy 32H Rims w/Stainless Steel Spokes
- Onza Porcupine II Tires
- GT Alloy "Ergo" One-Piece Handlebar/Bar Ends with GT Long Kraton Grips
- Ricochet available in Tequila Sunrise, and Pearl Slate (shown).

Adrenalin by the Buckets Full.

It makes your imagination run wild, and the blood race through your veins. The **Karakoram** takes you to the limits.

- Tange MTB Double-Butted Chromoly Tubing
- GT "Bologna Lite" Triple-Butted Chromoly Fork
- Tioga "Aheadset"
- Shimano Deore LX Component Groupo w/Rapidfire Plus Shifters
- GT Alloy "Ergo" One-Piece Handlebar/Bar Ends with GT Long Kraton Grips
- GT Flip Flop III Heat Treated Chromoly Stem
- GT Toe Clips and Straps
- Karakoram available in Ferrari Red and Black Light (shown).

Set Your Sights, and Ride.

The perfect ride is forever a goal. The right amount of speed, comfort and agility.
The 24-speed **Borrego** makes reaching your goals as easy as setting them.

- Tange MTB Double-Butted Chromoly Tubing
- GT "Bologna Lite" Triple-Butted Chromoly Fork
- Tioga "Aheadset"
- SunTour **24-speed** XC-Expert Micro-Drive Component Groupo
- Araya TM-18 Double-Walled Alloy 32H Rims w/Stainless Steel Spokes
- Ritchey Z-Max Tires
- GT Flip Flop III Heat Treated Chromoly Stem
- Borrego available in Evergreen.

Every Journey Has a Beginning.

Whether it's in the mountains or down the coast, it's time.

Grab your **Tequesta** for a brand new beginning.

- Tange MTB Double-Butted Chromoly Tubing
- GT Chromoly Oversize Fork with Chisel Cut
- Shimano Exage LT Component Groupo w/RapidFire Plus Shifters
- Stainless Steel Spokes
- GT "Ergo" One-Piece Handlebar/Bar Ends w/GT Long Kraton Grips
- GT Gel Lite Saddle
- Tequesta available in Gloss Black, and Sapphire Blue (shown).

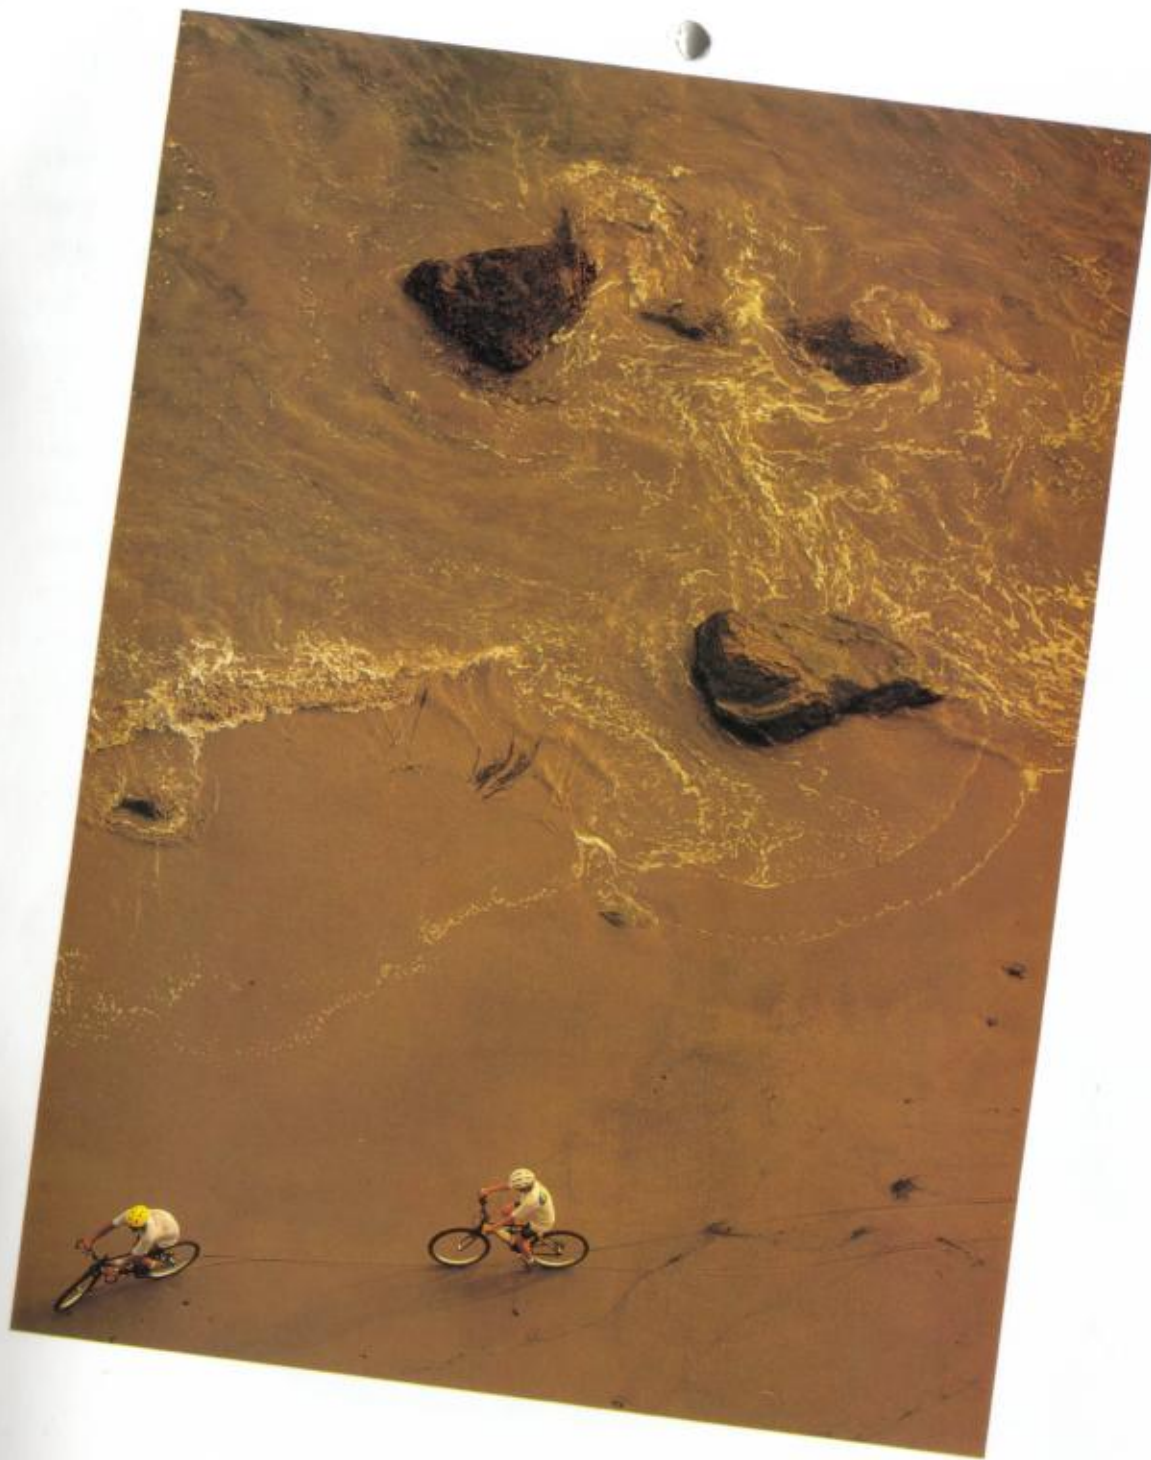

It's Time You Discovered What's Over The Horizon.

You see it everyday. You've even heard stories about what's on the other side. But you've never seen it for yourself. It's time.

GT All-Terra's Recreational line of mountain bikes are just the vehicles to get you there. Exquisite craftsmanship, and sensible componentry join to create bikes that are dependable, fast and fun.

The time has come to see if the stories are true. GT Recreational Series mountain bikes will get you there and back.

Choose Your Path.

From casual jaunts to fun races with your friends, the **Timberline** is ready. Just choose the path and let your Timberline lead the way.

- Tange Chromoly Main Tubes
- GT Oversize Chromoly Fork
- Shimano Altus A10/A20 Groupo w/RapidFire Plus Shifters and Multi-Condition Braking
- Shimano Cartridge Bottom Bracket
- Araya AP-21 Alloy Rims and Stainless Steel Spokes
- GT Gel Lite Saddle
- Micro-Adjust Alloy Seat Post
- Timberline available in Pearl Mist, and Rainforest Green (shown).

Explore the Horizons.

You've always wanted to see what's over the next rise, around that next bend.

The **Talera** will satisfy the adventurer in anyone.

- Tange Chromoly Main Tubes
- GT Oversize Chromoly Fork
- Shimano Altus A20 Derailleurs w/RapidFire Plus Style Shifters
- Shimano Cartridge Bottom Bracket
- Araya AP-21 Alloy Rims and Stainless Steel Spokes
- GT Gel Lite Saddle
- Micro-Adjust Alloy Seat Post
- Available in Ladies model
- Talera available in Pearl Teal, and Blue Marble (shown).

Discover Adventure.

Ride down a trail that leads where you've never been, splash through a creek,
then on the way home jump a few curbs.

Outpost. Riding a bike was never so much fun.

- Tange Chromoly Main Tubes
- Shimano **21-speed** Component Groupo w/Rapidfire Plus Style Shifters with Gear Indicator
- Multi-Condition Brake Shoes
- Shimano Cartridge Bottom Bracket
- Araya AP-21 Alloy Rims w/Stainless Steel Spokes
- GT Hi-Rise Stem
- GT SuperSoft Saddle
- Available in Mens, Ladies, and 24" Wheel Boys & Girls
- Men's Outpost available in Gloss Black, Shown in Red Marble
- Ladies Outpost available in Gloss Black, Red Marble, and Pearl Rose (shown).

They Might Just Show You How It's Done.

Show them a trail and off they go. Over hills and through valleys, kids love to ride and they're always up for the next adventure.

- 6-Speed SIS Shifting
- Low-Profile Alloy Front Cantilevers
- Durable Alloy Hubs and Chrome-Plated Rims
- Rear Derailleur Guard
- GT Jr. ATB Saddle
- Outbound available in Gloss Black.

(Shown) Red Marble

- Little Timber available in Aqua.

(Shown) Purple Marble.

24" Wheel Outpost available in Boys & Girls models.

Little Timber

There's Only One Earth.

We can't trade it in, or find another one.

Think about it. We have to protect what we have, and leave something for future generations to enjoy.

How can you help? By riding on marked trails and in approved areas. And by treading lightly when riding so as not to tear up the trails or harm plant life. There are people who think of cyclists as disrespectful to nature and to other outdoor enthusiasts. We need to show them this isn't true. When approaching horses or hikers, slow down and let them know you're there. Whenever you ride, ride safe*. Pitch in with trail maintenance. Nothing helps more than having others see mountain bikers improving nature, instead of tearing it up.

So the next time you hear of a trail maintenance party, grab a shovel and help out. There are a lot more generations coming, and they deserve a chance to enjoy what we have.

For more information on how to ride responsibly contact:
I.M.B.A. (International Mountain Bike Assoc.) 819/762-2301
N.O.R.B.A. (National Off-Road Bicycle Assoc.) 719/578-4717

* Always wear a helmet, and inspect your bike thoroughly before every ride. Be sure to check quick releases, brakes, tires, etc.

Rrealize the Adventure of Your Lifetime.

It's the weekend. The weather's perfect. Now all you have to do is ride.

GT Cross Series bikes make weekends worth waiting for. With bikes like the Cirque, Vantara, and Passage, the only thing you have to worry about is where to ride. On the road, cruising the bike path, or down that fire road through the valley? GT Cross Series bikes make anything possible. Finely crafted bicycles made from the best materials, using the latest technology.

The weekend's here. Grab your GT and go for it. It's that simple.

Get Out and Ride.

The city, the mountains, the beach. Wherever you care to go, the **Cirque** will get you there. Via the road, the bike path, or the dirt, you know the Cirque can handle it. So get out and ride.

- Tange MTB Double-Butted Chromoly Tubing
- GT Tapered Chromoly Fork
- DiaCompe "Aheadset"
- Shimano 400CX Components w/Rapidfire Plus Shifters
- Araya PX-45 Alloy Rims and Stainless Steel Spokes
- GT "Ergo" Multi-Hand Position Handlebar with Comfortable Kraton Tape
- GT Flip Flop III Heat Treated Chromoly Stem
- GT Gel Lite Saddle
- Available in Pearl Slate.

The Best of Both Worlds.

Designed to take to the streets as well as the trail. The **Vantara** always feels at home.

- Tange Chromoly Main Tubes
- Shimano Altus A10 Derailleurs with A10 50/40/30 Chainrings
- Araya Alloy Rims and Stainless Steel Spokes with 700x41C Tires
- GT "Ergo" Multi-Hand Position Handlebar with Comfortable Kraton Tape
- GT Gel Lite Saddle
- Vantara available in Pearl Teal. (Shown) Gloss Black.

It's Just You and the Open Road.

Hot summer nights, cool spring mornings. Throw a leg over the **Passage** and set the pedals in motion. Then wipe that grin off your face.

- Tange Chromoly Main Tubes
- GT Aero Blade Fork
- Shimano **21-speed** CT-15 RapidFire Plus Style Shifters w/Gear Indicator
- Sugino Alloy Cranks with 50/40/30 Chainrings
- Araya Alloy Rims and Stainless Steel Spokes
- GT Hi-Rise Stem
- GT Gel Lite Saddle
- Passage available in Red Wine.

(Shown) Evergreen.
