When Bob Haro built the first freestyle bike ever, back in 1980, we knew we were onto something big... A bike designed to rage on any and all terrain, vert or flat. A bike that was so versatile it would go on to launch a whole new sport... Freestyle BMX. Since then, Haro Freestylers have been the overwhelming choice of hard core riders worldwide. In fact, they've been ridden by just about every top rider in the sport. To just about every possible title, championship, world record, you name it. For 1992 Haro continues the tradition. The Master. The Sport. The Shredder. The Edge. Four Freestylers designed to go wherever your riding may lead you... from street to ramp and everything in between. Haro Freestylers... The First Name in Freestyle and the last word when it comes to high performance freestyling.
