

97

Here it is. Everything you need to know about the '97 Haro product line. This is more than just another pretty catalog, it's also an important sales tool that tells you what Haro is all about, why we're different, who every bike we make is designed for and how to sell it.

Haro was founded in 1978 in Carlsbad, CA, the state where BMX, Freestyle and ATBs were born. We were there when BMX took off and we literally invented freestyle. And believe it or not, we've been making mountain bikes since 1986. We've built a reputation for producing innovative and radical products that set trends rather than follow them.

We've more than doubled in size over the past three years. You can find Haro worldwide in over 50 countries and on every continent except Antarctica. We're reaching an international market with innovative performance products that continue to strengthen the strong foundation on which this company was built.

Population statistics show that we're entering a time when more young consumers will enter the marketplace than at any time in the recent past. And our promotions target those young, athletic, male consumers specifically. Generation X, the MTV generation, active, affluent and intent on finding an alternative to boring conventional bikes.

Face it. From ten feet you can't tell one brand of bike from another, with very few exceptions. Sure, there are some far fetched stories about special paint, secret geometries, sloping toptubes and oversize tubing that supposedly "differentiate" one brand from another but who's kidding who? To the untrained eye, one is as boring as the next.

Haro. We produce bikes that are visibly different from our competition. We're talking in-your-face blatantly obvious frame designs that cannot be confused with other brands. Frames like our patented V-Bar design, the often copied Megatube and our new high-zoot Monocoque BMX frame. As 'Bicycling' magazine put it, "You can pick out a Haro in a crowded bike shop or race pack faster than a faceplant."

To stand out in a market saturated with product, you've got to stand for something. If it's bikes for the masses you're after you won't find 'em here. What you will find are bikes that deviate from the norm and attract attention when compared to the mass-produced bikes offered by our competition. We want to make waves, rock the boat and create something that prompts your customers to do a double take and then to ask questions when they see a Haro...which they will.

THE PAST

THE PRESENT

THE FUTURE

THE PROBLEM

THE SOLUTION

THE CONCLUSION

ATB

BMX

The V-Bar toptube design is featured on every ATB and BMX frame we produce. The trademark toptube bend creates a frame with an obvious and striking visual difference from "normal" bikes. What you may not see are the benefits that come from increased standover height, a lower center of gravity and the "feel" of a smaller bike. As a Haro dealer, what you'll really appreciate is the ease in sizing your customers and the reduced inventory that fewer frame sizes provide.

Aside from the visual distinction offered by the V-Bar toptube bend, the design also facilitates proper bike fit. Unlike conventional frames that require up to five frame sizes to fit most customers, the V-Bar accomplishes the same thing with a 15.5", 17.5", 19.5" and on two models a 21.5" frame to accommodate especially tall riders. With the V-Bar bend, a 15.5" frame fits the same consumer who would

need a conventional 14" frame. Conversely, a 19.5"

V-Bar frame has the equivalent standover height of a 17" conventional frame yet has a 23.25" toptube length (23.75" on Escape and Extreme) that would be typical of a 21" or larger frame. The bottom line is that standover height is usually not a factor in sizing a V-Bar frame, so you can concentrate solely on proper toptube length. It's simple. And

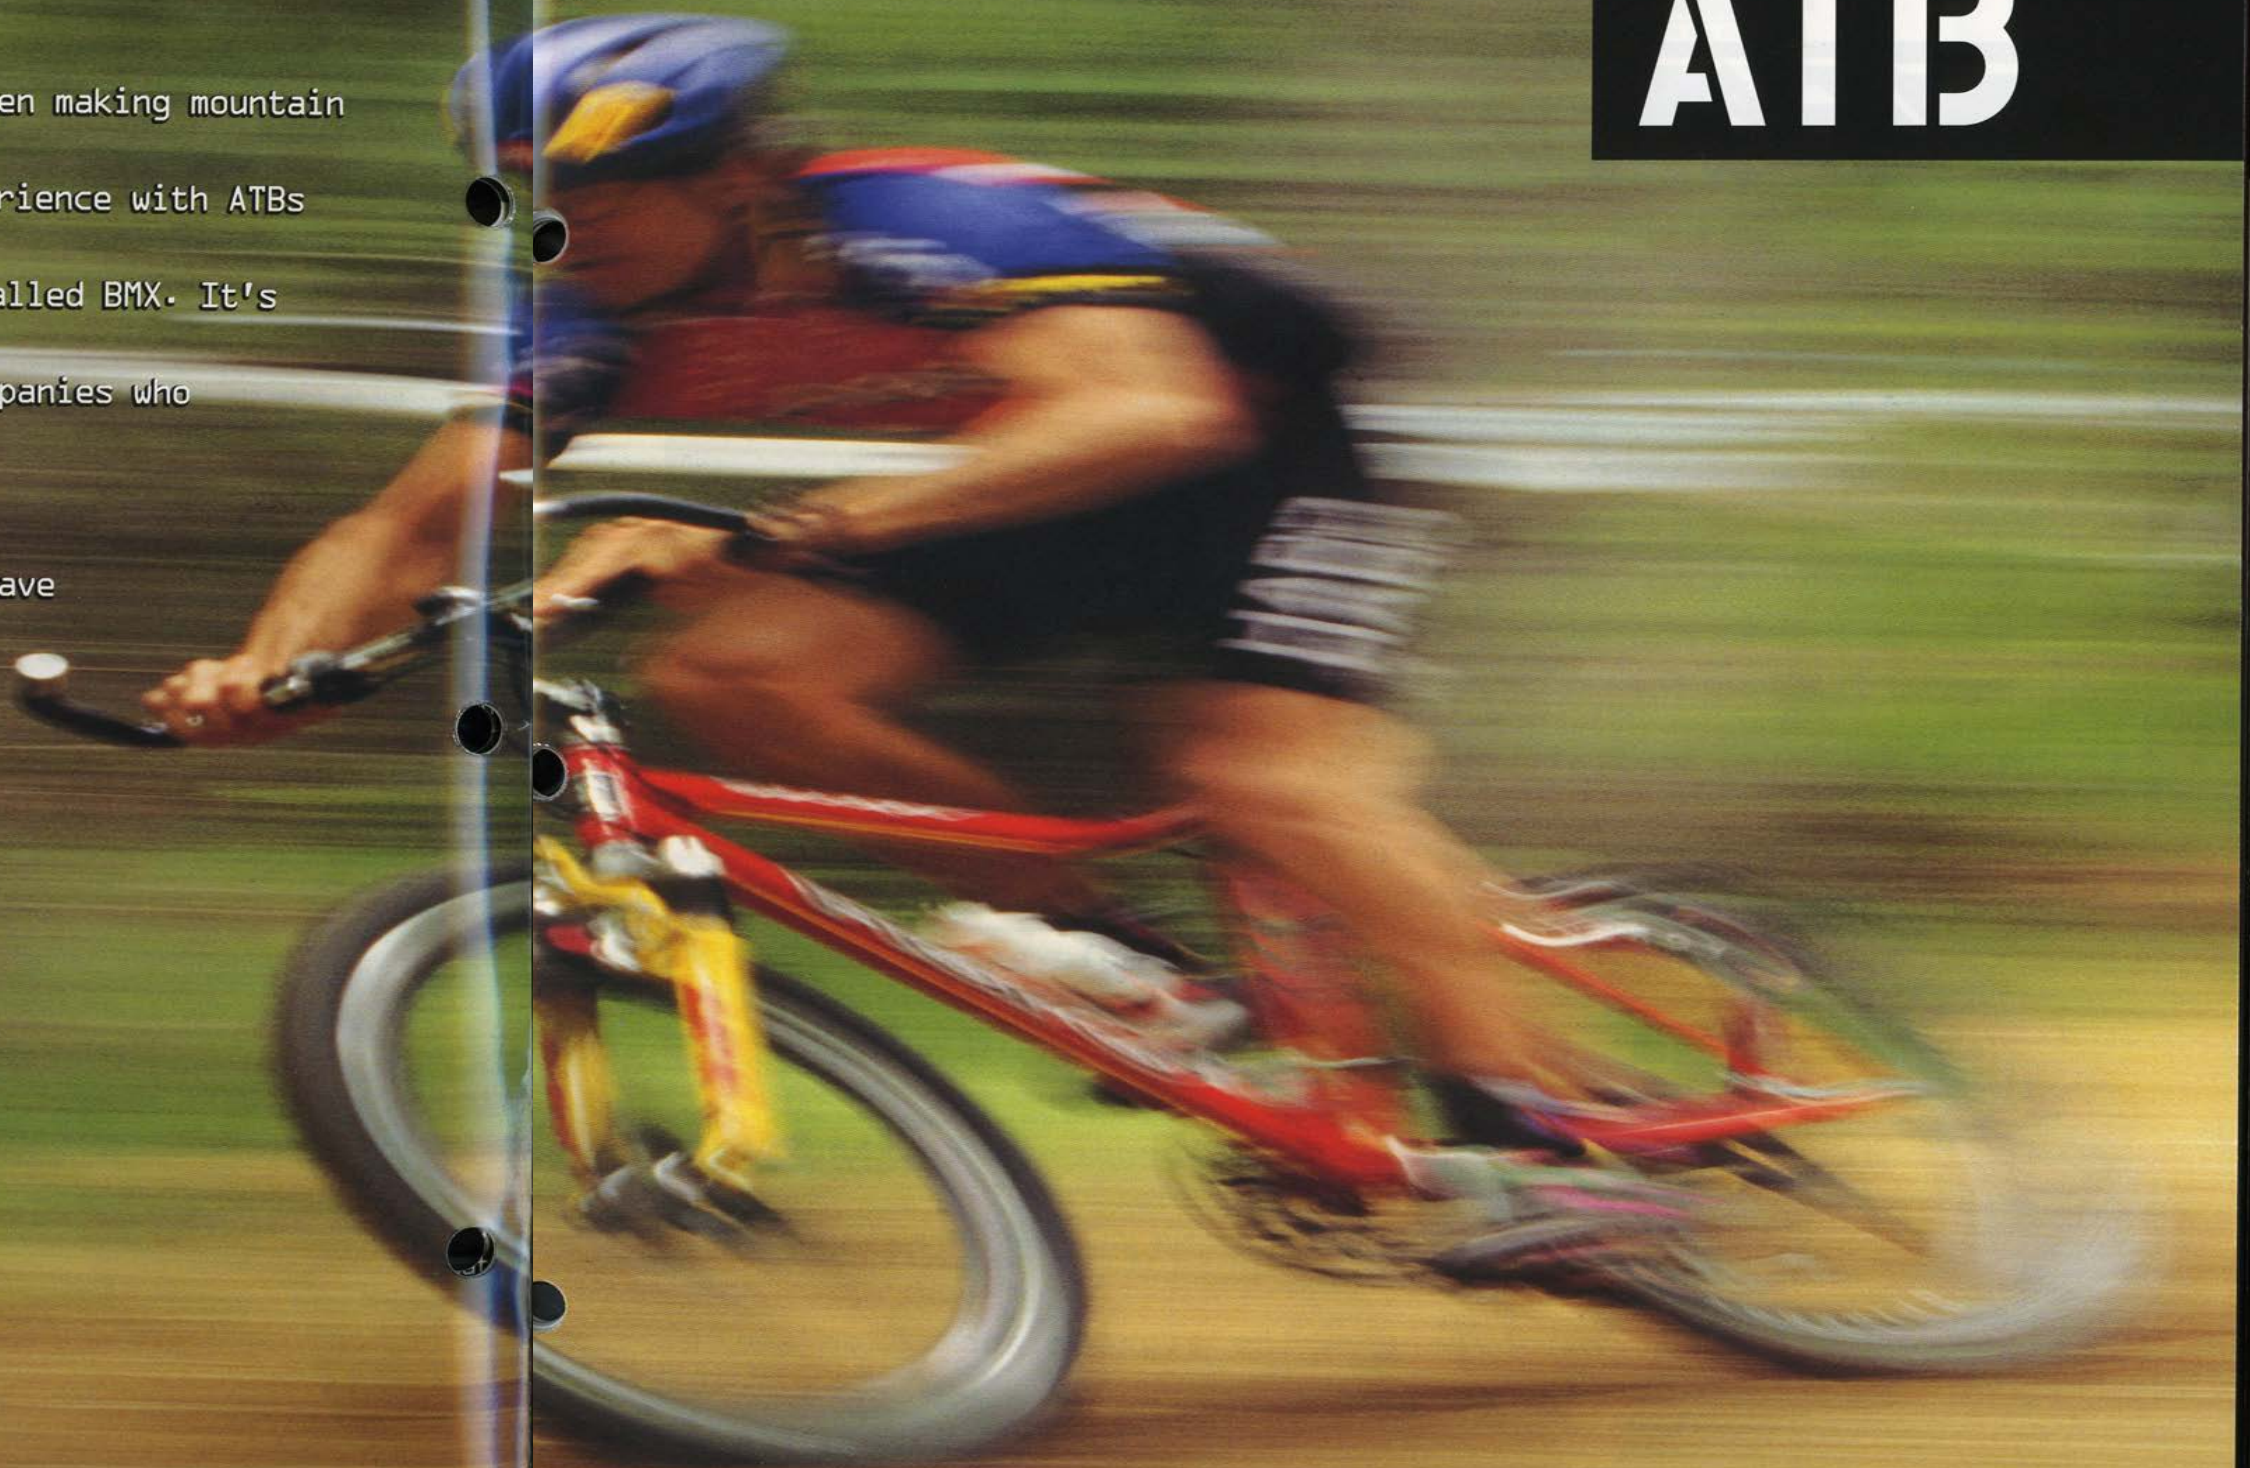

best of all, it means less of an inventory investment to satisfy the majority of your customers.

97

ATB

Even though we've been making mountain bikes since 1986, our experience with ATBs goes back even further. It's called BMX. It's funny how those mountain bike companies who used to look down on BMX are now scrambling to offer BMX bikes. And have you noticed how BMX racers are kickin' butt on the NORBA circuit? We're proud of an off-road tradition that goes way back, even though there's certainly nothing traditional about our V-Bar bikes.

EXTREME

<EX2: RockShox Super Deluxe Rear Shock>

<Extremes: TRAC Swingarm/1" pivot>

<EX2: Shimano LX 4-arm crankset>

Full-Suspension doesn't have to be a complex mathematical formula of rising rates and linkages. The Haro Extreme series turns a complex formula into a simple equation: 2+2. 2 parts to the pivot: a bushing and a 1" pivot. To make the function foolproof, a RockShox rear coil-over shock is standard. The new TRAC swingarm is 2 lbs lighter and super stiff. Two models are available with retail prices between \$1000 and \$1700.

EXTREME EX2

- >Haro Oversize 7000 Series Aluminum Frame/Triangulated Box Tube Aluminum
- Rear SwingArm >RockShox Indy SL Fork
- >RockShox Super Deluxe Frame Shock
- >Shimano Deore XT Drivetrain Components >Shimano LX V-Brakes >Ritchey SCX/OCR Suspension Specific Rims

RIDER PROFILE

Speed freaks and downhill racers who appreciate the benefits of full suspension without the complications.

EXTREME EX1

- >Haro Oversize 7000 Series Aluminum Frame/Triangulated Box Tube Aluminum
- Rear SwingArm >RockShox Quadra Fork
- >RockShox Deluxe Frame Shock >Shimano STX Drivetrain Components >Dia-Compe V-Brakes >Ritchey SCX/OCR Suspension Specific Rims

RIDER PROFILE

Experienced riders who crave full suspension but refuse to spend an arm and leg for the privilege of having it.

ESCAPE

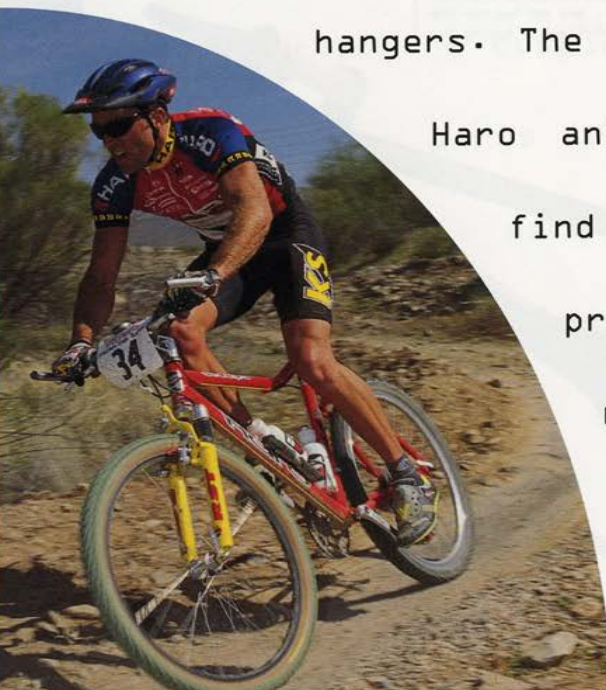

<Escapes: Replaceable derailleur hanger>

<A3-A4: WTB SST seat>

<A4: RockShox Judy SL/XTR V-Brake>

The ultralight Escape series has been completely revamped for '97. All Escape frames feature forged replaceable derailleur hangers. The A2, A3, and A4 have custom mounts for a Haro anti-chainsuck plate. Taller riders will find that our 19.5" fits better due to the prop-ortionally sized headtubes that are now standard on all frame sizes. Retail prices start at \$580 for the A0 and top out with the \$3000 XTR equipped A4.

ESCAPE A4 FRAME

- >Easton Elite tubes >Integrated Mounts For Haro Anti-Chainsuck Plate
- >Replaceable Forged Derailleur Hanger
- >3.6lbs >Monostay Produces Shorter Seatstays Reducing Flex Imposed By Braking >15.5", 17.5", 19.5" and 21.5" sizes

RIDER PROFILE

Aggressive riders who appreciate the luxury of 24 speeds, a lightweight aluminum frame and Rock Shox performance.

OPTION

ESCAPE A0

>Haro Oversize 7005 Aluminum V-Bar Frame w/Replaceable Dropout >RST 171 Fork >Shimano STX 7-Speed Derailleur >Shimano Acera-X Brakes >Shimano Acera-X Hubs >Ritchey Vantage Sport Rims >Ritchey OmegaBite/Z-Max Tires >Bar Ends (Included But Not Shown)

RIDER PROFILE

Experienced riders ready to graduate from steel to aluminum and looking for inexpensive front suspension performance.

OPTION

VECTOR

<Vectors: Slimline rear dropout>

<V3/V2: Alivio brake lever/STX shifter>

<Vectors: Selle Comfort seat>

The Vector series features a refined V-Bar frame for '97.

Slimline rear dropouts on the Vector frames help reduce

weight. CRM0 1.5" downtubes increase strength without

adding weight. Complete 21-speed Shimano shifting

systems are found on the V0 through the V3,

which has the addition of front suspension.

Vector retail prices range from \$240 to

\$400.

VECTOR V3

- >Haro Oversize CRM0 Mainframe V-Bar

>Haro V-Bar Frame >Alloy VP20 36h Alloy Rims >Haro Holeshoot Tires >GripShift MRX170 6-Speed Shifter >Shimano TY30 Rear Derailleur >Rear Derailleur Guard

RIDER PROFILE

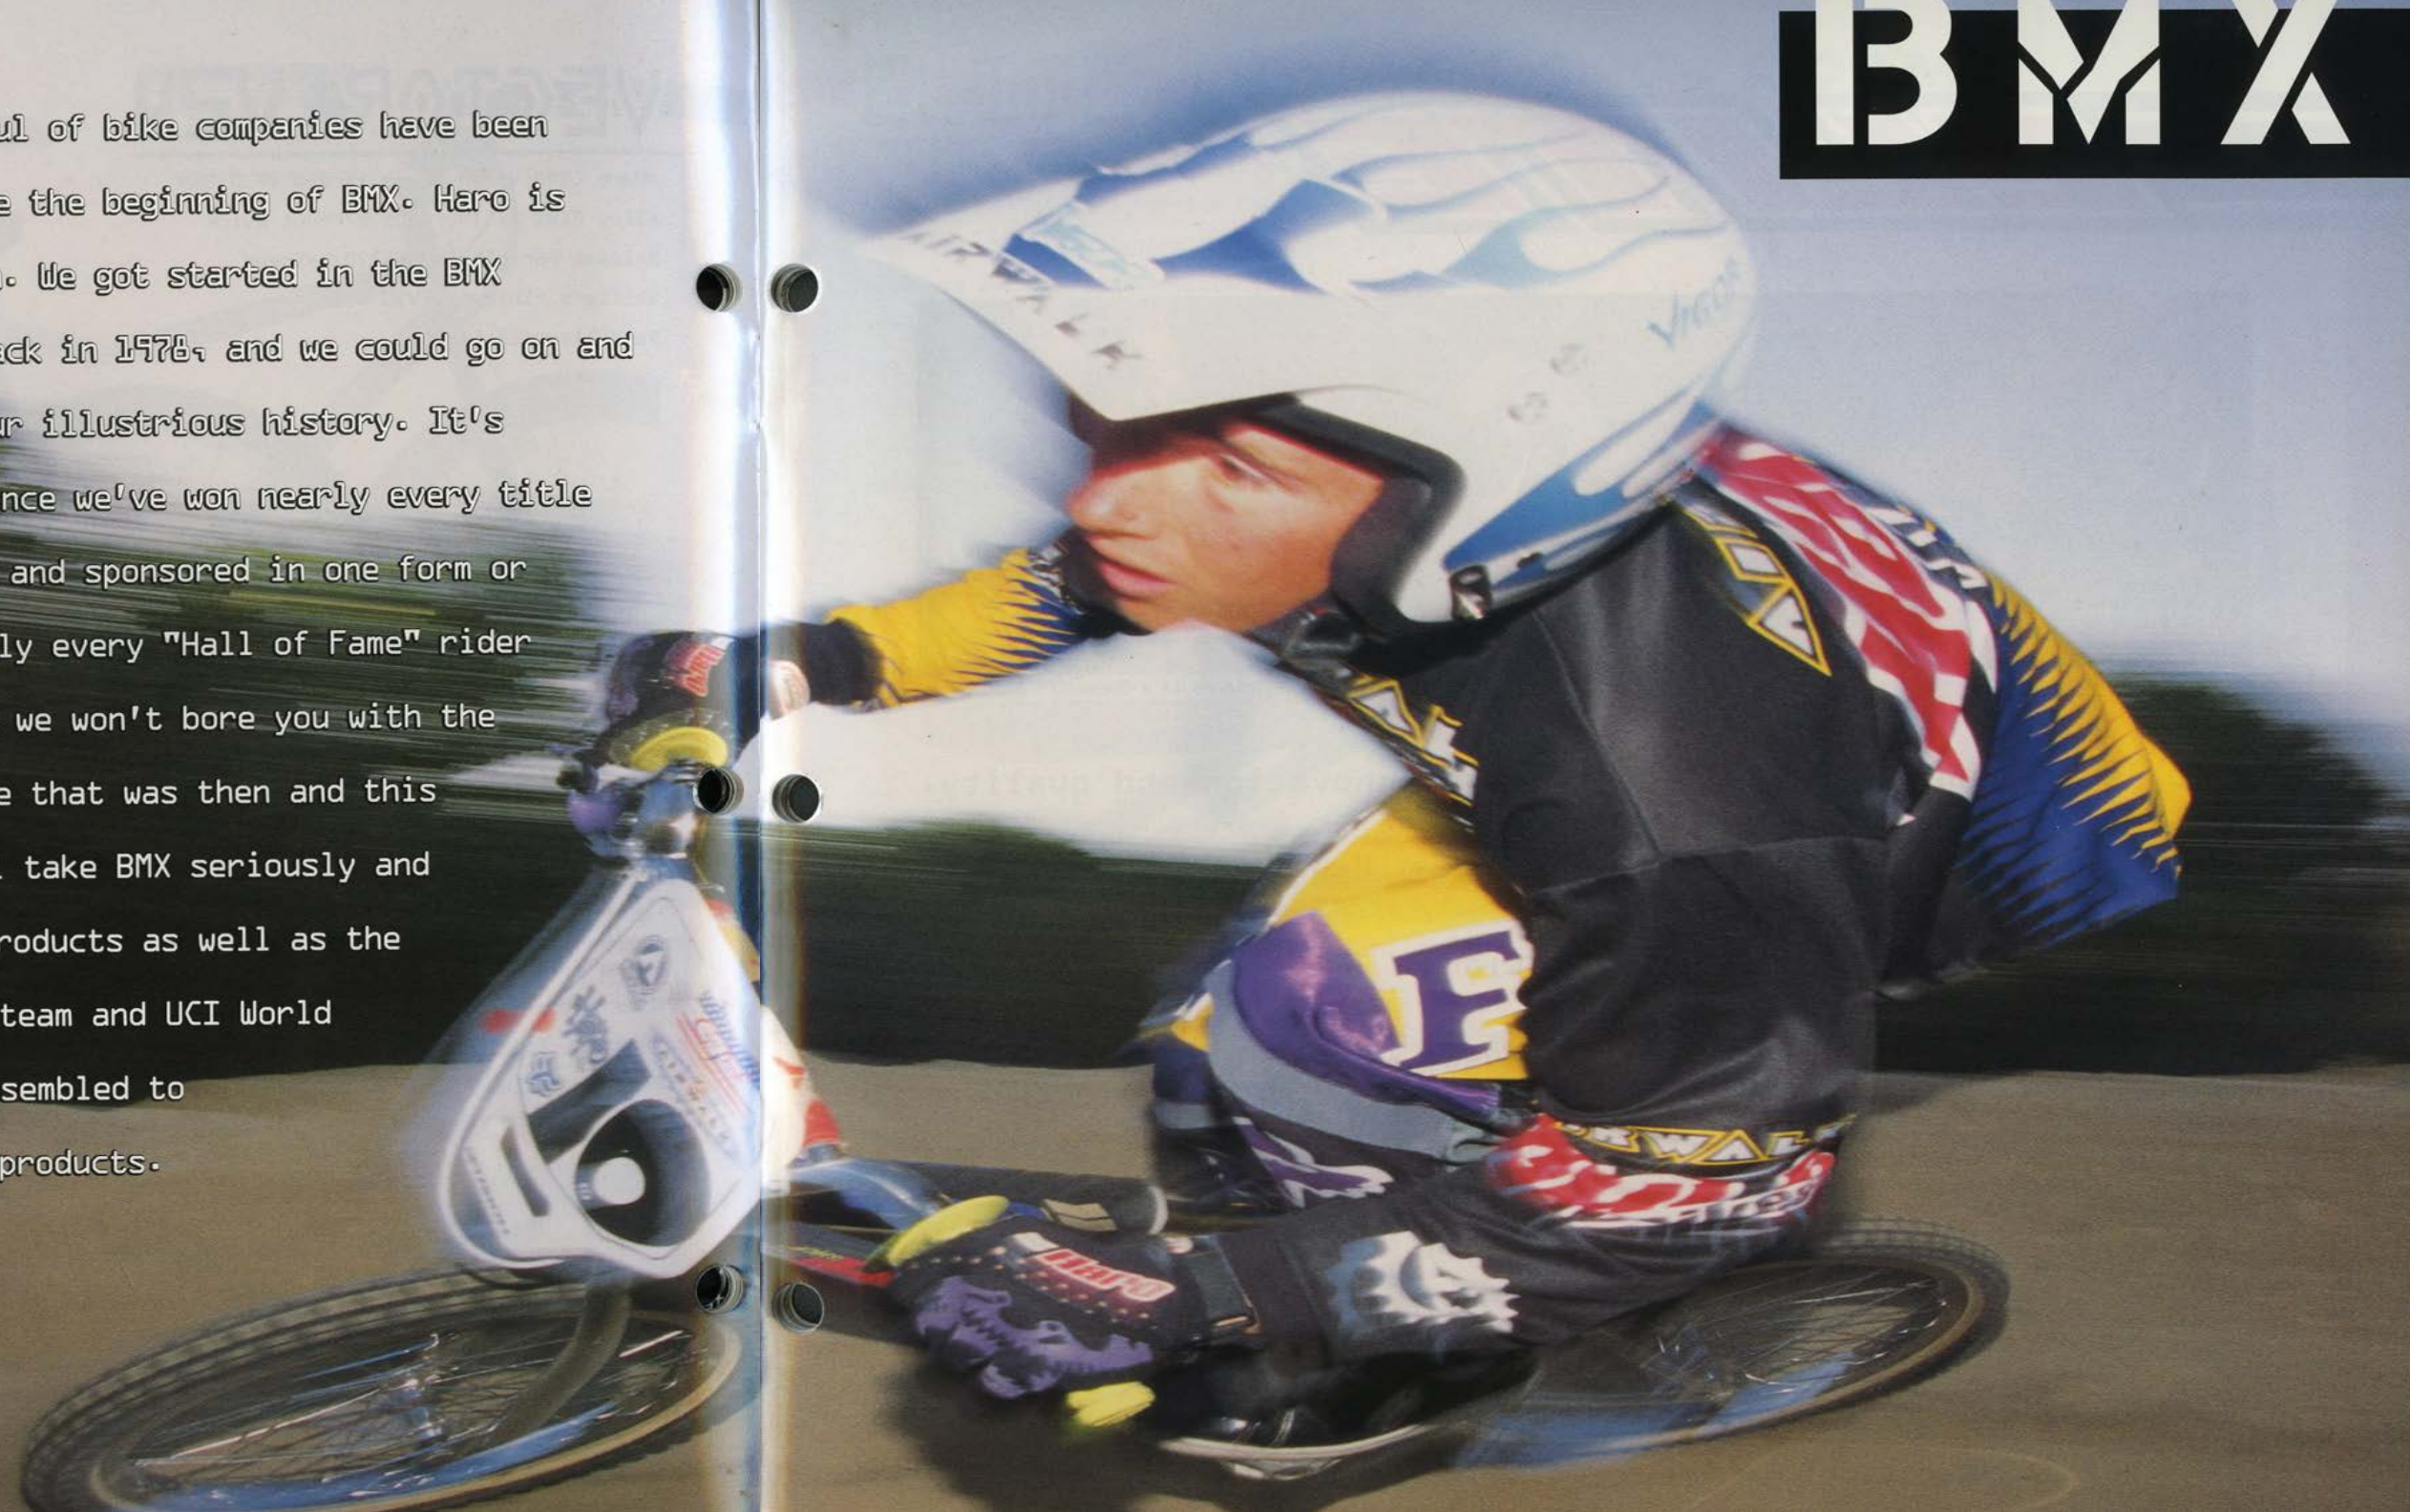

Joe Average's little kid. Wants an ATB like dad and probably already knows Haro makes cool bikes.

BMX

Only a handful of bike companies have been around since the beginning of BMX. Haro is one of them. We got started in the BMX business back in 1978, and we could go on and on about our illustrious history. It's tempting since we've won nearly every title you can win and sponsored in one form or another nearly every "Hall of Fame" rider there is. But we won't bore you with the details because that was then and this is now. We still take BMX seriously and it shows in our products as well as the powerhouse amateur team and UCI World Champion pro we've assembled to promote and test those products.

ELITE

<Moto-X style dropout saver/adjuster>

<Jr-Tardy: Fusion forged alloy stem>

<Pro/24: Shimano DX V-Brake/SPD DX pedal>

Haro is a brand from which you expect innovation and quality. The Elite Series of BMX racing bikes however will surpass even your wildest expectations. No corners were cut here. No compromises were made. We simply made the best BMX bikes possible in terms of looks, features, and quality, regardless of price. These are the same bikes currently raced by the Factory Haro BMX team.

ELITE MONOCOQUE FRAME

- >USA MADE >Monocoque Construction w/Depressed Sidewalls Eliminates Torsion Flex >CNC Machined Chainstay Yoke And Custom Haro Moto-X Style Dropouts w/Integrated Dropout Saver
- >Removeable Brake Cable Hanger Allows Use Of Cantilever Or V-Brakes
- >Internal Cable Routing
- >4.2lbs >Yellow or Ball-Burnished

<Internal cable routing/cable hanger>

<CNC chainstay yoke>

<Moto-X style dropout saver/adjuster>

ELITE FRAMES

>Series 7000 Custom Drawn Tubing W/Gusset At Headtube Produces A Combination Of Strength And Light Weight >Square/Oval Seat And Chainstays Resist Torque-Induced Flex >Integrated Dropout Saver/Adjuster >Same Frame As Raced By Factory Haro BMX Team

ELITE PRO XL

When it comes to freestyle, no one else even comes close. Haro developed and sold the very first freestyle bike ever and we've never let up. We've been there from the first AFA contests to the "X" games broadcast on ESPN. And we're still winning. We do it because freestyle is part of the heart and soul of Haro, not because it's popular again. It's in our blood and our commitment shows in the most comprehensive line of freestyle bikes we've ever offered.

FREESTYLE

FREESTYLE

<SST 0ryg cable detangler>

<Ultra: GroundRound alloy axle pegs>

<Blammo/Ultra: ABS (Aerial Braking System)>

Nobody does freestyle better than Haro. We created the first freestyle bike ever and we continue to produce the most respected and diverse product line available. We continue to innovate the sport with products like our extremely popular Super Blammo and for this year our totally redesigned Ultra. Our heritage is rock solid and so are the bikes we produce to withstand cycling's most radical mutation. Go.
