

The only thing that really matters when you get right down to it is how much fun we have riding bikes. That's what motivated Bob Haro to create the company more than 30 years ago and that's what Haro bikes is all about today.

As one of the first rider-owned companies and most respected names in BMX we've never strayed far from our roots. Our product development labs are the streets, parks, trails, and race tracks; the same spots you ride.

Since our beginning in 1978 we've always worked with the best riders on earth to make the best bikes on earth; guys like Hoffman, McCoy, Loncarevich, and Mirra all played roles in making us who we are today. Fast forward and its guys like Ryan Nyquist, Colin MacKay, Dennis Enarson, Cory Nastazio, Ben Hucke and Khaleen Young continuing to shape who we are and what we bring to the table.

It doesn't stop there; our bikes are designed for riders, by riders, not by some random corporate monkeys. The brand and bike designs are driven by Product Development Manager and long-time test rider Chris Raceles, AA Pro Racer Derek Betcher, and decorated BMX medalist Allan Cooke. Together along with our athletes they form a team that lives BMX every day of the week.

We know we are only as good as our last bike, and that's why we never forget where we've been and never lose sight of where we are going. Whether it's flowing your favorite trails, sessioning the local parks and street spots, or doing gates at the track, it's all just riding. The fact that it's sweeter on a Haro is what we are most proud of.

There are a ton of reasons to ride Haro; performance, quality, innovation, and value just to name a few, but what matters most to us is probably the same thing that matters most to you; how much fun it is. Enjoy.

The Forum Lite series is about two things; simplicity and style. You want a ride that's light, spec'd with dialed parts, looks 100% legit, and yet won't send you to the poor house. Pick any one of the Forum Lite models and that's exactly what you get. Every model comes correct with 8" rise bars, 36-spoke wheels, 25/9 gearing, plastic pedals and slim seats. If you want to go brakeless, the Pro Lite and the Counterpart Lite are built around our aftermarket Convert frame (short for convertible), so you can lose the brake mounts without voiding the frame's warranty (no need for a hacksaw here). Best of all, Haro team riders Dennis Enarson, Colin MacKay and Cory Nastazio all ride Forums so you know the geometry's dialed.

If you've got nothing but love for the straight cable, don't ride pegs, and think a detangler's just another thing to fix, the Forum Lite series is what you want to check out.

Forum Pro Lite

100% crmo 21" TT Convert frame

Convert is short for "convertible" meaning riders can remove unwanted frame hardware and save weight, ride brakeless, and have a clean, minimalist look

100% crmo fork and 8" bars

Provide better control while keeping weight down and maintaining strength

Odyssey Aitken tires and Team grips

No need to pay extra for these name brand upgrades when they come on the bike stock right out of the box

Pivotal Slim seat with Pivotal Stump post

Easy to adjust and are very light weight with a stylish look

25/9 micro-drive with alloy sprocket and sealed one-piece driver

Helps keep the overall weight of the bike down while adding to its pro-level appearance

36-spoke wheels with sealed alloy hubs and Alienation Black Sheep rims

Sealed bearings offer the smoothest performance. 36 hole wheel set is light weight yet very strong for hard landings

acid bath

Forum Counterpart Lite

100% crmo 21" TT Convert frame

Convert is short for "convertible" meaning riders can remove unwanted frame hardware and save weight, ride brakeless, and have a clean, minimalist look

100% crmo Fork and 8" bars

Provide better control while keeping weight down and maintaining strength

175mm 3-Piece crmo cranks with sealed mid BB

Chromoly cranks are very strong and light weight. Sealed mid BB bearings keep weight low while providing smooth action and durability

Sealed Internal headset

Keeps bearings neatly tucked inside the head tube providing a clean look and reducing weight by eliminating the need for headset cups

Odyssey Aitken tires and Team grips

No need to pay extra for these name brand upgrades when they come on the bike stock right out of the box

VP plastic pedals

Plastic pedal body is very light weight and the crmo spindle increases strength

neon red

pea soup

battle blue

Forum Lite

Forum Lite frame with 20.5 top tube and 3-tubes crmo

The 19mm seat/chain stays plus micro-dropouts help keep the weight down while the crmo mainframe provides a greater strength-to-weight ratio over hi-tensile steel

Odyssey Aitken tires and Team grips

No need to pay extra for these name brand upgrades when they come on the bike stock right out of the box

100% crmo Fork and 8" bars

Provide better control while keeping weight down and maintaining strength

990-Style U-brakes

Are neatly tucked beneath the seat stays for increased chain clearance

Haro Slim seat with micro-adjust post

Trims unwanted weight and provides easy and precise adjustments to your seat angle

25/9 micro-drive gearing, cassette rear, with 14mm axle

Helps reduce overall weight, maintains strength, and is reliable and easy to service

X Series

So you're just starting to learn new tricks like barspins and grinds where you need a detangler and a set of pegs, but you don't want your ride to feel like a tank? The X series was designed just for you. From 16" wheels all the way up to 24", each model opens up a world of tricks that can be done on the street, dirt jumps, park, or anywhere else you choose to shred.

X4:

100% chromoly X series frame has a 20.8" top tube, mid BB and internal head tube

The 100% 4130 chromoly frame combined with gussets on the top/down tubes, plus wish-bone chain stay increases frame strength while small dropouts help keep the weight down

175mm 3-piece tubular chromoly cranks with sealed mid BB

Chromoly cranks are very strong and light weight. Sealed mid BB bearings keep weight low while providing smooth action and durability

100% chromoly fork and 8" bars

Provide better control while keeping weight down and maintaining strength

Internal headset

Keeps bearings neatly tucked inside the head tube providing a clean look and reducing weight by eliminating the need for headset cups

25/9 micro-drive with alloy sprocket and sealed cassette rear hub

Helps reduce overall weight, maintains strength, and is reliable and easy to service

Odyssey Path and Dirt Path tires

Fully legit for dirt, street, or park surfaces

dark burgundy

X3:**X Series frame has a 20.8" top tube, crmo down tube, mid BB and internal head tube**

The crmo down tube combined with gussets on the top/down tubes, plus a wishbone chain stay increases frame strength while small dropouts help keep the weight down

1-1/8" fork with crmo steerer tube

Has a substantially greater strength-to-weight ratio than a high-tensile steerer tube

25/9 micro-drive with alloy cassette rear hub

Reduces weight, maintains proper gear ratio, and cassette is reliable and easy to service

Haro Recycled plastic pedals

Plastic pedal body is very light weight and the crmo spindle increases strength

36-spoke wheels with alloy rims and 14mm rear axle

Light weight, durable and rust resistant, plus the 14mm axle provides additional rear wheel strength where it's typically needed

Cable detangler and one set of pegs

For multiple bar spins, tail whips and grinding

ZX Series

If you are ready to make the jump off the neighborhood sidewalk and on to some dirt jumps or test the water in the bowls at your local park without breaking the bank, then the ZX is the affordable answer. Everything you need and nothing you don't; and if it's been a few years since you've ridden and you are ready to get back on a BMX bike but are a little unsure about 20" wheels, the ZX24 is just what you've been looking for. All the stability that a 24" wheel provides yet with a look that will make your kid's friends think you spent hundreds more.

faded red

matte black

ZX:**20.3" top tube X series frame with 19mm seat/chain stays**

The same design found on our more expensive X1 model. 20.3" top tube fits a broad range of riders while the redesigned seat/chain stays, and dropouts remove unwanted weight

36 Spoke alloy rims

Light weight, durable and rust resistant

990-style U-brakes

Are neatly tucked beneath the seat stays for increased chain clearance

Haro Joe Dirt/MS4 tires

Provide a multi-surfaced tread pattern ideal for dirt or street

Forged 175mm 3-piece cranks

Durable and easy to service

1-1/8 threadless headset

Spreads the load over a large diameter bearing for added durability

gloss white

ZX24:**21.7" top tube X series frame with 19mm seat/chain stays**

The same design found on our more expensive X series bikes. ZX24 has a longer top tube and slightly larger seat/chain stays to support larger riders

990-style U-brakes

Are neatly tucked beneath the seat stays for increased chain clearance

Forged 175mm 3-piece cranks

Durable and easy to service

Haro Small Block plastic pedals

Plastic pedal is light weight and durable

36 Spoke 24" wheels with alloy rims

Light weight, durable and rust resistant

F Series

The theme for the F-Series bikes is “bang for your buck” and these value packed machines come with all the bells and whistles a rider could ever need, just like the bike that legendary Haro team rider Ryan Nyquist rides. With front and rear brakes, four pegs, and a detangler, there isn't a trick on the planet that can't be done on any of the F-series bikes.

F4

100% crmo F series frame has a 20.75" top tube, mid BB and internal head tube

The 100% 4130 crmo frame combined with gussets on the top/down tubes increase frame strength while small dropouts help keep the weight down

25/9 micro-drive with alloy cassette rear hub

Reduces weight, maintains proper gear ratio, and cassette is reliable and easy to service

48-spoke wheels with double-wall alloy rims and 14mm rear axle

Provides the highest level of wheel strength and durability

100% crmo fork and 8" bars

Z Series:

The Z series is all about fun and imagination. Exclusively designed for young and growing riders the Z series sports smaller diameter tubing and dropouts in order to make them the lightest bikes possible and low profile frames for plenty of stand over height. All new step-thru models available on the Z16 and up allow the girls to get in on the action and the Z10 and Z12 with their universal frame design get toddlers on a Haro at a very early age. The best years deserve the best bikes, Haro Z series.

Z20/Z20 Girls:

Hi-tensile steel Z series lo-profile frame

Provides plenty of extra stand over height for young riders buying their first 20" wheel bicycle

1-1/8 threadless headset

Spreads the load over a large diameter bearing for effortless steering and added durability

Sure-stop coaster brake and linear pull V-brake with adjustable lever

Coaster brake offers sure-footed stopping power and the V-brake adds additional braking power while teaching young riders hand brake functionality

36-spoke alloy wheels

Light weight, durable and rust resistant

Now available in a step-thru for girls

Lower top tube height has greater stand over clearance than the boys version

Full pad set

Standard

Haro Race:

Some people tend to forget that our race heritage is as deep as our freestyle roots. We're 25 years deep in the race scene and each year the bikes continue to evolve. For 2010, you're looking at the top of the food chain; the absolute fastest bikes we've ever made, from our Micro Mini all the way up to our Team Issue. Ridiculously light, crazy strong, and meant to do one thing; get to the finish line fast. Current ABA National #1 Pro, Khalen Young, rides a 2010 Pro XL. Current UCI Silver Medalist, Steven Cisar, rides a 2010 Team Issue. Newly crowned US National Champion, Jason Rogers, rides a Pro XL Plus; Want a one way ticket to the top of the Podium? Ride with us.

Team Issue:

6061 T-6 alloy frame with a 21" top tube and 3D drop outs with chain tensioners

Light weight and stiff. Integrated chain tensioners provide slip-free rear hub positioning

Intense Micro Knobby tires

Provide great acceleration for the straights and plenty of traction in the turns

Sinz Stealth alloy 1-1/8 threadless fork

Lighter than crmo without a sacrifice in strength so you can be confident in all BMX race conditions

175mm 2-piece alloy cranks with external cartridge sealed bearings

Stiff and light weight. Sealed bearings provide smooth action with minimal resistance

Sinz Sticky Grips

Soft and durable for excellent control

Sealed flip flop hub with 36 spoke alloy rims

Light weight and durable. Sealed bearings offer minimal rolling resistance. Flip-flop feature allows for quick and easy gearing changes

matte grey

CONVERT FRAME

Convert is short for convertible, which is exactly what this frame is; removable brake mounts and gyro tabs let you customize your set up, and the assortment of sizes means we have one for midgets and giants alike. The generation 2 version (pictured) features the new graphics and colors, but still comes complete with BB, headset, and seat post clamp included. Boo-yah!

- Full 4130 Chromoly Frame w/13.75" rear (on both 20.8" and 21").
- Double Butted Down Tube
- Removable Brake mounts.
- Removable Rotor Tabs.
- Removable Cable Stop.
- 5.2lbs. (with BB, Headset & Clamp)

20.5" BlueIllusion
20.8" Met. Black
21" Concrete
21.5" Matte Black

TEAM ISSUE RACE FRAME

- 6061 Aluminum
- 3 sizes: 20.75", 21", 21.25"
- Comes with headset, chain tensioners, seat clamp
- 14.75 rear center.
- 11.5 bb height
- 74 head tube.
- 27.2 seat tube.

SUB-C 3PC CRMO CRANKSETS

- 100% 4130 tubular tapered crmo arms
- 4130 crmo 8 spline spindle
- One piece head / pinch bolts design
- Sealed bearing standard B.B. set
- Left side drive compatible in 175 & 180mm
- Colors: Purple, Orange, White & Black

FORUM LITE FORKS

- 4130 Chromoly
- 3/8" drop outs
- Welded in preload nut
- Colors: Purple, Orange, White & Black

FORUM LITE STEM

- Colors: Purple, Orange, White & Black
