1984

Move to The Head of The Class **MIYATA**

1984 EDITION

WORLD-CLASS BICYCLES

The First Japanese-made bicycle produced by MIYATA in 1890.

MIYATA World-Class Bicycles

MIYATA . . . a name known for fine craftsmanship and state of the art technology throughout the world.

Bicycle frames and components vary considerably. MIYATA tests theirs in competition. The Tour de France; the Paris Roubaix, the Gran Prix de Frankfort, all races that demand the absolute best from the rider . . . and from the bicycle.

It is this "road testing" that gives us the insight needed to improve our product. And we are constantly improving the MIYATA line of bicycles, not only by road testing but through the use of better production techniques, a constant search for new materials and by learning from you, the consumer. Our heritage of almost one century of bicycle manufacturing and our dedication to produce a quality line of bicycles is evident in every MIYATA bicycle.

Importance of The Frame

Whether you are an experienced bicyclist or just starting, you probably have heard that the frame is the single most important part of the bicycle. It's true, the frame is the heart of the bicycle.

A Frame Material for Every Purpose

Aluminium alloys and plastics have recently been tried in frame construction. However, steel is the most durable and reliable.

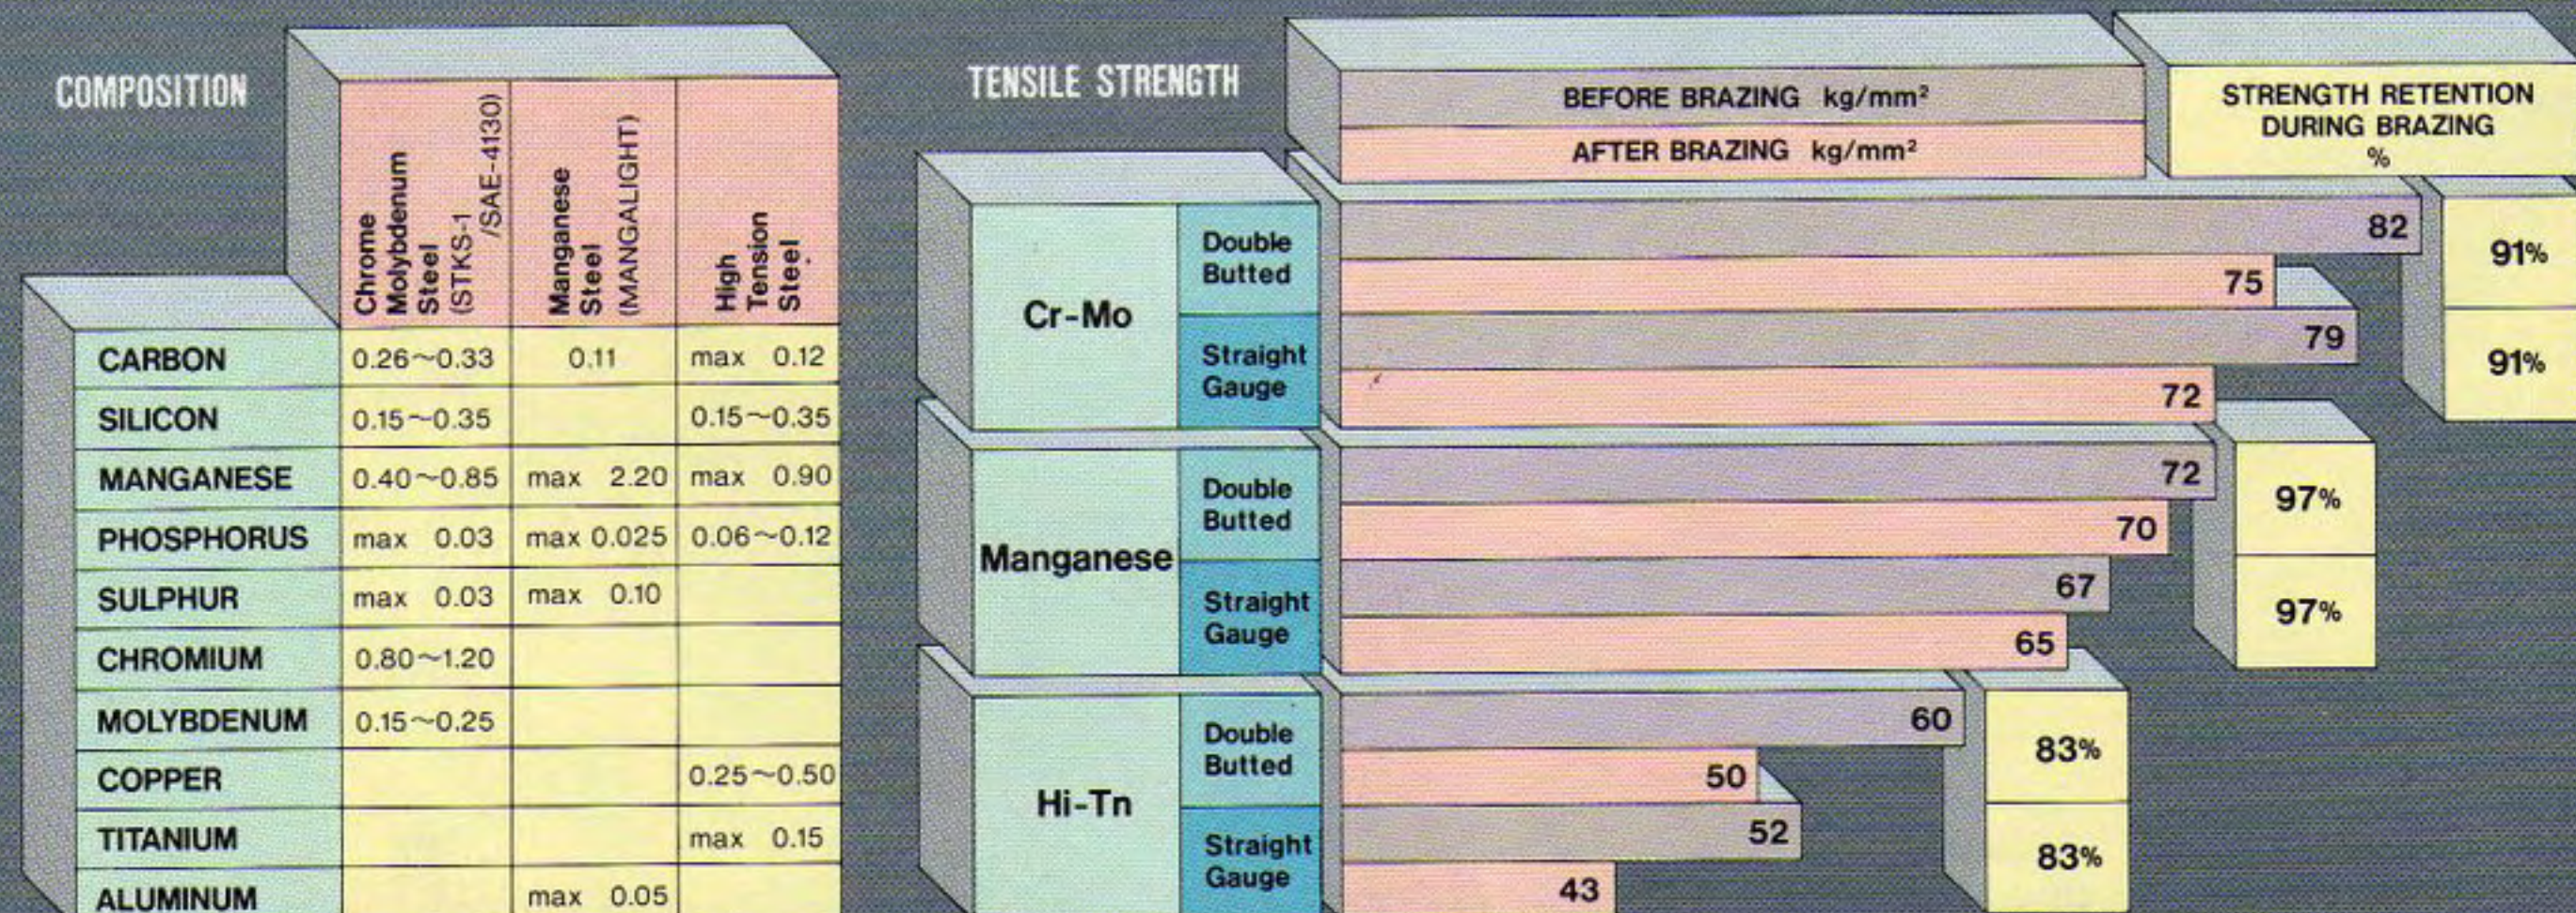

Low carbon steel, high tension steel, manganese steel, manganese molybdenum steel and chrome molybdenum steel are the major materials used for brazed frames.

Chrome molybdenum steel (we call it Cr-Mo), provide the strongest tubing. Its post brazing characteristics are reflected in the lightest frame with the thinnest tubing wall. Most MIYATA bicycles use high quality MIYATA Cr-Mo tubing and are assembled using sophisticated quality controlled systems.

Manganese steel (MIYATA MANGALIGHT), retains an extremely high percentage of its original strength after brazing. Its strength retention rate is 97%, higher than that of any other steel used in bicycle frame construction.

Manganese steel or high tension steel is used for the frames of certain Sports series and Commuter models.

The intended purpose of the bicycle determines materials used in the construction of its frame.

MIYATA is The Only Bicycle Manufacturer in The World to Machine Its Own Double Butted Tubing.

Stress is not evenly distributed over the tubing during all kinds of riding. More stress occurs at the ends than at the mid section. The double butted tubing (DB tubing), is the answer to this stress application. The wall of a DB tube is thicker at the ends than in the mid section.

The excellent performance of MIYATA bicycles is due to DB tubing automatically drawn by a technique perfected and used exclusively by MIYATA.

All other bicycle makers buy their DB tubing from the other five DB tubing manufacturers, thus losing the benefit of consistency and in house quality control.

Advanced Frame-building Technology

High quality frames cannot be continuously produced by a skilled worker with a hand burner.

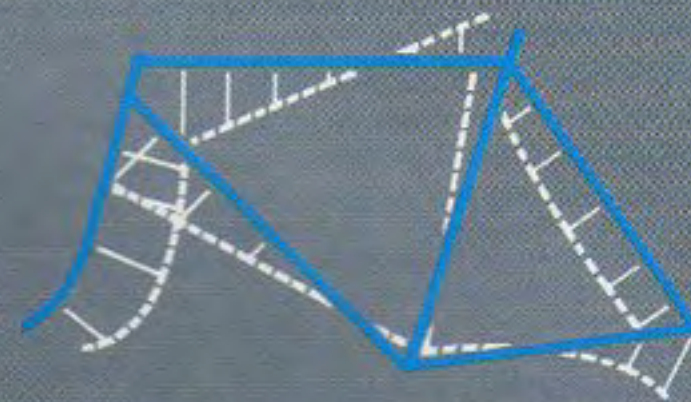

The Cr-Mo tubing requires a stringent temperature control. Overheating or rapid cooling hardens the material and makes it brittle.

MIYATA has created a computer controlled brazing system to ensure accurate temperature control for stable and quality Cr-Mo frame production, eliminating human errors.

Frames made of selected quality materials are assembled to precise design specifications by brazing techniques of Miyata's skilled craftsmen. Years of manufacturing experience contribute to the quality evident in the final product.

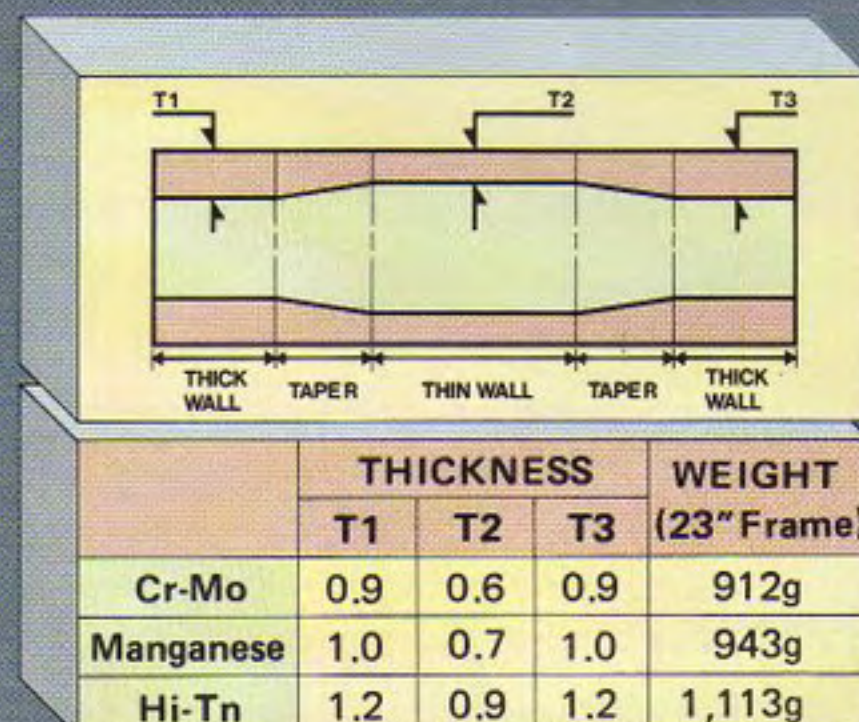

DISTRIBUTION FIGURES OF STRESS

The area between the blue line (skeleton of the frame) and the dotted line illustrates the degree of stress distribution.

DOUBLE-BUTTED TUBING

Superbe Finishing Techniques

After construction, the frame undergoes a six step finishing process to obtain unblemished beauty. After polishing, each frame is subjected to a zinc phosphate treatment to improve paint adhesion and eliminate rusting. The frame is then painted using the latest electrostatic techniques, from undercoat to coats of paint to finishing laquer. To provide long term finish durability, each frame is subjected to repeated baking.

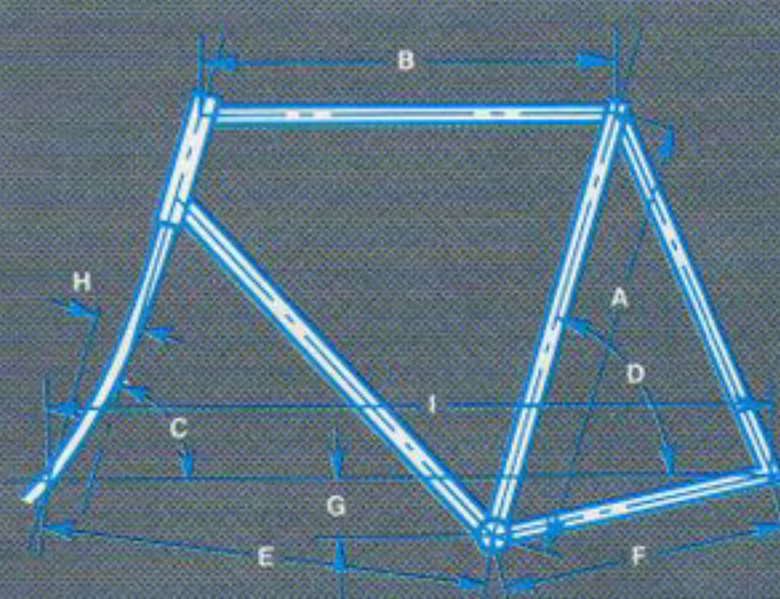

Frame Geometry Changes with Intended Use

The heart of bicycle is the frame. The frame design is responsible for the performance and dictates the material and engineering techniques. Racers require a more upright seat tube, head tube and a shorter wheelbase than touring cycles. This assures stability and maneuverability at high speed riding.

A reverse concept is applied to the frame geometry for touring cycles which require comfort and baggage carrying characteristics. Every different MIYATA model is built with a frame geometry designed for a specific use.

Quality Components for Performance

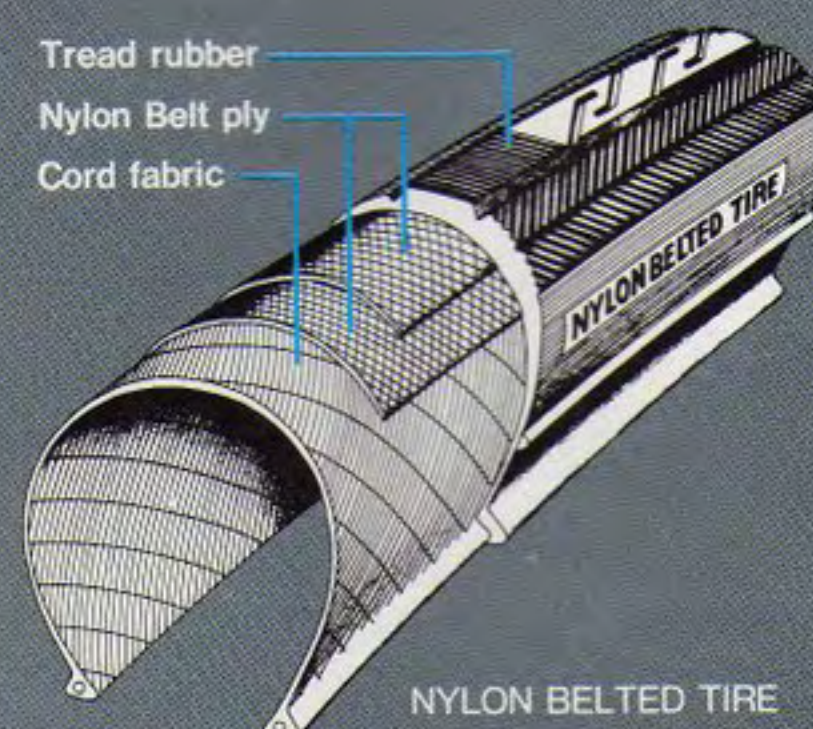

Compatibility of components with the bicycle as well as with each other, is as important as the quality of the components themselves. Miyata's experts match each component to intended use as well as innovate improvements to existing parts. One example is the QUICK CENTERING device on brakes found on a number of MIYATA bicycles. This device allows for easy brake adjustment to assure equal pressure on both sides of the rim at all times.

Tires are perfectly matched to the needs of each model. The MIYATA NYLON BELTED TIRE is puncture resistant for miles of trouble free riding.

Strict Quality Inspection

MIYATA bicycles must meet the stringent demands of their own testing facilities, as well as the challenges of the European professional racing circuit. No Japanese bicycle had met the standards of European racing until MIYATA.

MIYATA bicycles have been used exclusively by the CAPRI-SÖNNE KOGA MIYATA team, winner of the prestigious 1981 World Cup.

The test in checking durability of frames by stress is made by our automatic testing machine.

Specific Models for Specific Needs

Racing, triathlon, touring, commuting, off road riding or just for pleasure, people ride bicycles for many different reasons. MIYATA bicycles are available in all categories to meet the needs of all bicyclists.

PROFESSIONAL RACING SERIES

Miyata, a name known for quality and excellence on the racing circuits throughout Europe, The Far East, Australia and the U.S. Nowhere is the Miyata state-of-the-art technology more evident than in our professional racing series. The careful attention to minute details and high quality components are the hallmark of Miyata bicycles.

MAKE YOUR MOVE TO THE HEAD OF THE CLASS

TEAM-MIYATA-SL

Chromoly double-buttressed tubing, Campagnolo Super Record components, Selle Italia Turbo saddle. Brazed-on cable guides, shifter basement and bottle basement. Vittoria Corsa tires. These are just a few of the features on this top-of-the-line Miyata racing bicycle.

Color : Bright Blue

Size : 50,52,54,56,58,60,63cm

12-speed

PROFESSIONAL RACING SERIES

TEAM-MIYATA

The bike most respected by competitors on the racing circuits on four continents. Chromoly frame and fork. Shimano Dura-Ace components. The complete racing machine for the dedicated racer.

Color: Bright Blue

Size: 50, 52, 54, 56, 58, 60, 63 cm
12-speed

PRO-MIYATA

You'll find many of the features of the Team Miyata SL on this model. Chromoly tubing and fork, brazed-on fittings. Nitto Technomic handlebar. Heavy gauge tapered seat stays. The Pro Miyata is ideally suited for Triathlon competition.

Color: Bright Blue

Size: 50, 54, 57, 60, 63 cm
12-speed

SEMI-PRO SERIES

Got that competitive spirit but also budget conscious? The semi-pro series is designed for both competition and street riding. Double-buttressed chromoly is used for all main tubing. This marriage of lightweight materials and Miyata manufacturing techniques creates the ideal bicycle to withstand the stresses of racing and the rigors of street riding.

MAKE YOUR MOVE TO THE HEAD OF THE CLASS

310

This is as close as one can get to an all purpose bike. A frame stiff enough for responsive high speed riding, yet comfortable for hours of pleasure riding. The 310 features most of the brazed-on fittings of the Team Miyata SL. Other outstanding components include SR alloy crankset, Shimano UG cluster and side pull brakes, Selle Italia saddle.

Color: Metallic Burgundy

Color: Zodiac Blue

Color: Starlite Silver
Size: 19½", 21", 23", 25"
12-speed

SEMI-PRO SERIES

912

Miyata designed the Chromoly fork of the 912 to accommodate either 700C or tubular rims for racing or for street use. Other features that make the 912 our finest semi-pro model are the new Shimano 600EX components, chromoly double-buttressed tubing and a Selle Italia saddle. The serious triathlon competitor should consider the 912 for their race needs.

Color : Metallic Black
Size : 50,54,57,60,63 cm
12-speed

Color : Olympic Silver

710

Chromoly double-buttressed tubing with MANGALIGHT fork. Melt-forged cotterless crankset. Dia-Compe side pull quick release brakes. Like the Pro model and the 912, this 12-speed makes an ideal bicycle for the triathlon enthusiast.

Color : Sunrise Red
Size : 50,54,58,63 cm
12-speed

Color : Sand stone

GRAND TOURING SERIES

A quiet country road in autumn. Southern magnolias in springtime. Wherever you live, bicycle touring can be a source of enjoyment that's hard to beat. Miyata has designed the touring series with your comfort in mind. A longer wheelbase for a smoother ride. Quality components. Miyata technology for frame integrity. These are all-important considerations when selecting a touring bicycle.

MAKE YOUR MOVE TO THE HEAD OF THE CLASS

1000

Everything you could ask for in a grand touring bicycle. Chromoly frame and fork. Sugino triple crankset. Brazed-on fittings include 3 water bottle mounts. A water bottle, rear black anodized carrier, sealed bearing hubs and a 40 hole rear wheel are standard equipment on the 1000.

Color : Mountain Blue

Color : Dark Platinum
Size : 50,54,57,60,63cm
15-speed

GRAND TOURING SERIES

610

Miyata designed the 610 for the person who wants both touring and sports characteristics in one bicycle. A slightly stiffer ride and quicker steering makes this model the "best of both worlds". Miyata quality is evident in the 610 . . . double-buttressed chromoly tubing, brazed-on fittings, Sun Tour derailleurs, sealed bearing hubs and Sugino alloy crankset. Rear Carrier standard equipment.

Color: Sherwood Green

Color: Artesian Blue
Size: 19½", 21", 23", 25"
15-speed

GRAND TOURING SERIES

210

An economical version of the 610 available in both men's and women's models. Chromoly frame and careful selection of components are combined to give you years of trouble-free bicycling. Rear Carrier is standard equipment.

Color : Zodiac Blue
Size : 19½", 21", 23", 25"
15-speed

Color : Forest Green

Color : Metallic Burgundy

210M

Miyata hasn't forgotten the ladies either. The 210 Mixte shares all the features of the 210. Chromoly frame, brazed-on fittings and a 15-speed SunTour gear system. Specially designed Selle Italia saddle and two frame sizes (19½" and 22") makes the 210M an excellent bicycle for the active woman. Rear carrier standard equipment.

Color : Metallic Burgundy
Size : 19½", 22"
15-speed

Color : Zodiac Blue

ALL TERRAIN SERIES

The bicycles for all reasons. Equally at home in the concrete canyons of Manhattan or the natural canyons of the Southwest. Miyata all terrain bicycles are designed to withstand the tough off-the-road conditions and street pot holes as well. Chromoly tubing, heavy-duty brakes and 18-gears helps Miyata flatten mountains and the streets of San Francisco with ease.

MAKE YOUR MOVE TO THE HEAD OF THE CLASS

RIDGE-RUNNER

This is our top of the line all terrain bicycle. It has features you would expect to find on a bicycle costing hundreds of dollars more. Miyata's frame integrity expertise was never so important as it is in a mountain bike. Chromoly double butted frame and a chromoly fork means less twisting and bending. Dia-Compe mountain style cantilever brakes, loads of brazed-on fittings, sealed head set, sealed hubs and a Selle Italia saddle are just a few of the Ridge Runner features.

Light Alloy Rear Carrier is available as an optional accessory.

Color: Mountain Blue
Size: 17½", 19½", 21", 23"
18-speed

ALL TERRAIN SERIES

TERRA-RUNNER

Country cousin to the Ridge Runner. Chromoly frame, equally at home commuting and off road riding. Rear carrier standard equipment.

Color: Starlite Silver
Size: 19½", 21", 23"
18-speed

STREET-RUNNER

A combination street/mountain bicycle for the budget-conscious bicyclist. Chromoly frame and quality components including Dia-Compe mountain cantilever brakes, makes the Street Runner an exceptional value in its price range.

Color: Morocco Red
Size: 17½", 19½", 21", 23"
12-speed

THE ALL-ROUND SPORTS SERIES

If you or a member of your family are just entering the exciting world of bicycling, Miyata has a bicycle for you in the all-round sports series. Many of the features found on our other bicycles have been retained on the all-round series. And world-famous Miyata manufacturing assures you a quality product regardless of price.

MAKE YOUR MOVE TO THE HEAD OF THE CLASS

110

Chromoly tubing for strength and light weight. Brazed-on fittings. New Shimano derailleurs and brakes. Features like these make the 110 one of the most popular bicycles in the Miyata line.

Color : Ocean Blue

Color : Regent Red

Color : Silver Frost
Size : 19 1/2", 21", 23", 25", 27",
18 1/2" (26" wheel)
12-speed

THE ALL-ROUND SPORTS SERIES

100/100M

The frame of this 12-speed bicycle is made of chromoly tubing, a feature, normally found only in higher-priced bicycles. The 100 also features alloy cotterless cranks, Dia-Compe brakes, SunTour derailleurs and ultra wide ratio gears.

Color : Ocean Blue
Size : 19½", 21", 23", 25"
12-speed

Color : Red

COMMUTER SERIES

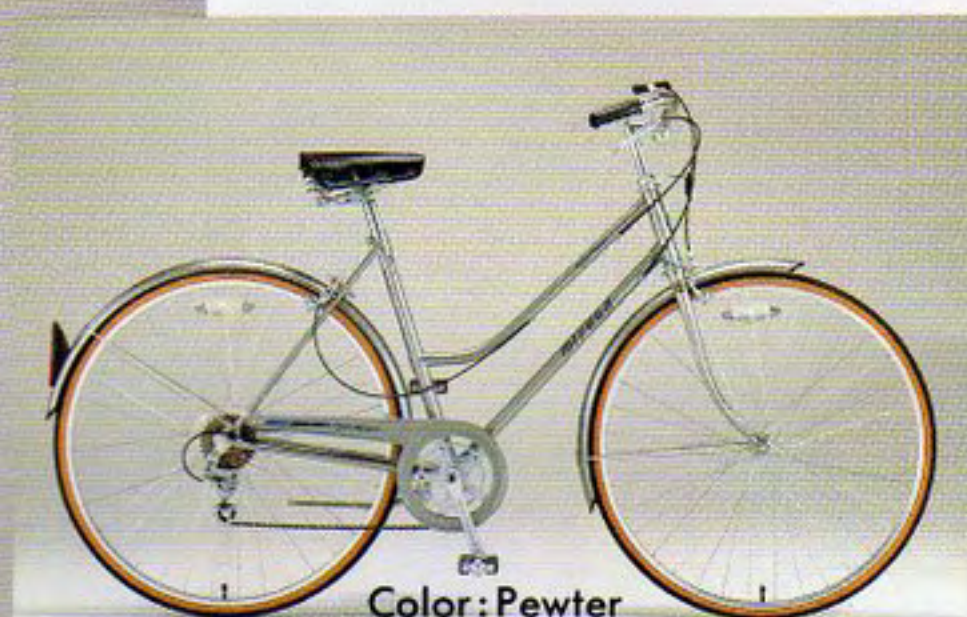

Leave the car at home. Travel to the station or office on a Miyata commuter bicycle. Great way to keep physically fit and save gas money at the same time. Quality components and Miyata manufacturing make the Commuter series a real value for the money.

MAKE YOUR MOVE TO THE HEAD OF THE CLASS

FIFTH-AVENUE

Color: Pewter
Size: 19½", 21", 23"
5-speed

Color: Pewter
Size: 19½"

A quality 5-speed for commuting or cruising. Features include alloy rims, cotterless cranks, chain cover and a kick stand. Keep physically fit bicycling to the station or office on a Miyata. Ladies model has same Sun Tour and Dia-Compe components as the men's model.

PARK-AVENUE

Color: Nightwatch Blue
Size: 19½" / 3-speed

Color: Nightwatch Blue
Size: 19½", 21", 23"

For the commuter who prefers a 3-speed bicycle. Hi-tension steel frame, Shimano gears. Miyata quality. The Park Avenue is truly a star among the 3-speed galaxy. Men's available in three frame sizes. Like the men's model, the ladies style comes equipped with cotterless cranks, chain cover and a kick stand.

BMX SERIES

Manufacturing a competition bicycle requires a complete understanding of stress and race course punishment. Miyata knows and understands this because competition racing is a Miyata heritage.

BMX racing is no exception. By carefully selecting quality components and combining them with world-famous Miyata technology, we can provide any rider with that competitive edge.

MAKE YOUR MOVE TO THE HEAD OF THE CLASS

Size : 29cm

BMX-5000

Strong, lightweight chromoly where it counts. Oval frame tubing, front fork and one piece crank. On the track, any bike takes a beating, but chromoly steel is unbeatable. Dia-Compe brakes, alloy rims, Shimano hubs and Takagi chromoly cranks give the Miyata rider the competitive edge.

Size : 29cm

BMX-3000

Hi-tension steel oval tubings, Sugino crank and Shimano brakes combine to make the 3000 a leader in the moderate-priced field. Whatever price range you choose, you can be sure that a bicycle with the Miyata name on it stands for quality craftsmanship.

Kiki&Lala

Even the name implies "fun". And what little girl won't have fun on this bicycle. The 20" is equipped with a front basket and handlebar bell. The 16" has training wheels, rear carrier and buzzer type horn. Both have a full chain guard for safety.

16" equipped with a coated wire basket and travel case, rear carrier, buzzer-type horn and training wheels.

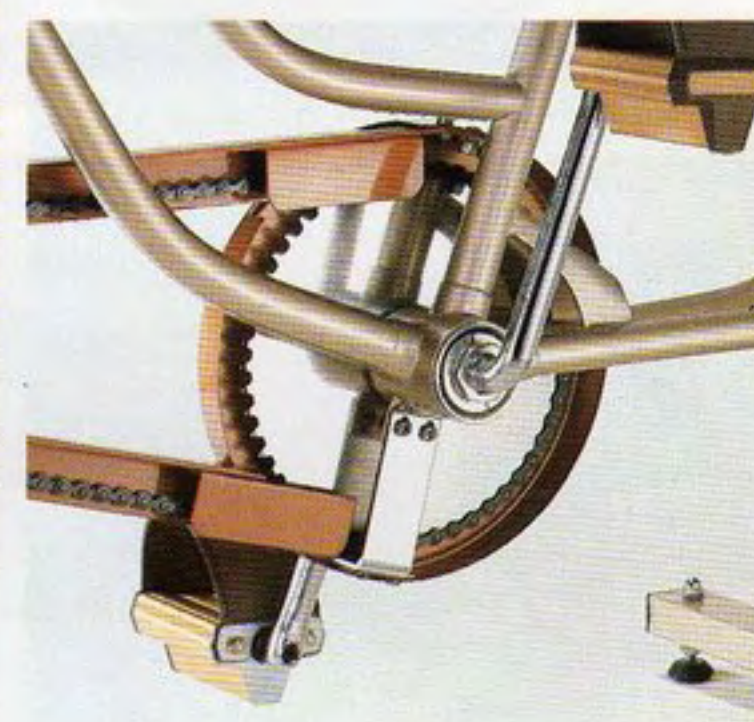

20" equipped with front coated wire basket, travel case and handlebar bell.

EXERCISER

Stay in shape at home. The same fine quality you find in every Miyata bicycle is evident in our exerciser. The wide padded saddle means more comfort while cycling. The easy-to-read speedometer and timer lets you regulate your exercising precisely. Also features a full chain case for complete safety.

UNICYCLES

Ready for a new cycling experience? Take a test ride on a Miyata unicycle. The Flamingo model is available in three frame sizes. Color is blue. The Flamingo DX features a Alloy cotterless cranks, Ariake nylon saddle and tough BMX Alloy rim. The Flamingo DX is available in one frame size. Color is chrome plated.

FRAME SETS

If you are a person who likes to "build from the ground up" you won't go wrong starting with a Miyata frame. Every Miyata frame shown here is Cr-Mo tubing. Not just the frame tubing, but the front fork as well. Since the frame is the heart of the bicycle, you should consider the best there is, Miyata.

Whether your interests are racing, touring, off-the-road BMX or sport, Miyata has a frame for you. And your Miyata dealer can help you choose the components best suited to your individual needs.

MIYATA BICYCLE LIMITED WARRANTY

- 1) Warrantee: This warranty warrants only to the original retail purchaser of the bicycle and is not transferable.
- 2) Miyata bicycle frames are warranted to be free from defects in materials and workmanship under normal use of the bicycle for lifetime of the bicycle.
- 3) Defective parts: All original parts, except tires, tubes & cables are warranted for one year from the date of purchase. During the warranty period, all original parts as determined by MIYATA found to be defective in workmanship or material will be repaired or replaced free of charge except for shipping and dealer labor charge.
- 4) How to claim warranty: All claims under this warranty must be made through an authorized MIYATA dealer during the relevant warranty period. To obtain warranty service, the owner must return the defective bicycle to an authorized MIYATA dealer for inspection with purchase receipt or other evidence showing the date of purchase.
- 5) If the original dealer is no longer available or is inconveniently located, the name of an authorized dealer nearest to you can be obtained from MIYATA whose address is stated below.
- 6) Warranty exclusions: This warranty does not cover failure due to accident, abuse, neglect, normal wear, improper assembly, improper fit, maintenance by any other than an authorized MIYATA dealer, or use of unauthorized replacement parts. This warranty does not cover any body injuries, damage or failure of the bicycle if used in any competitive event, including bicycle racing, motocross, stunt, or similar activities or when in training for same. Motors or other accessories inconsistent with the use intended by MIYATA will negate this warranty.
- 7) This warranty is expressly in lieu of any other express warranty and any implied warranty including any warranty of merchantability or fitness is limited in duration to the duration of this express warranty. (Some states do not allow limitation on how long implied warranty lasts, so the above limitation may not apply to you.).
- 8) We shall not be responsible for consequential or special damages nor for transportation charges or dealer labor charge except as set forth above.
- 9) This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.
