MERLIN METALWORKS

USA

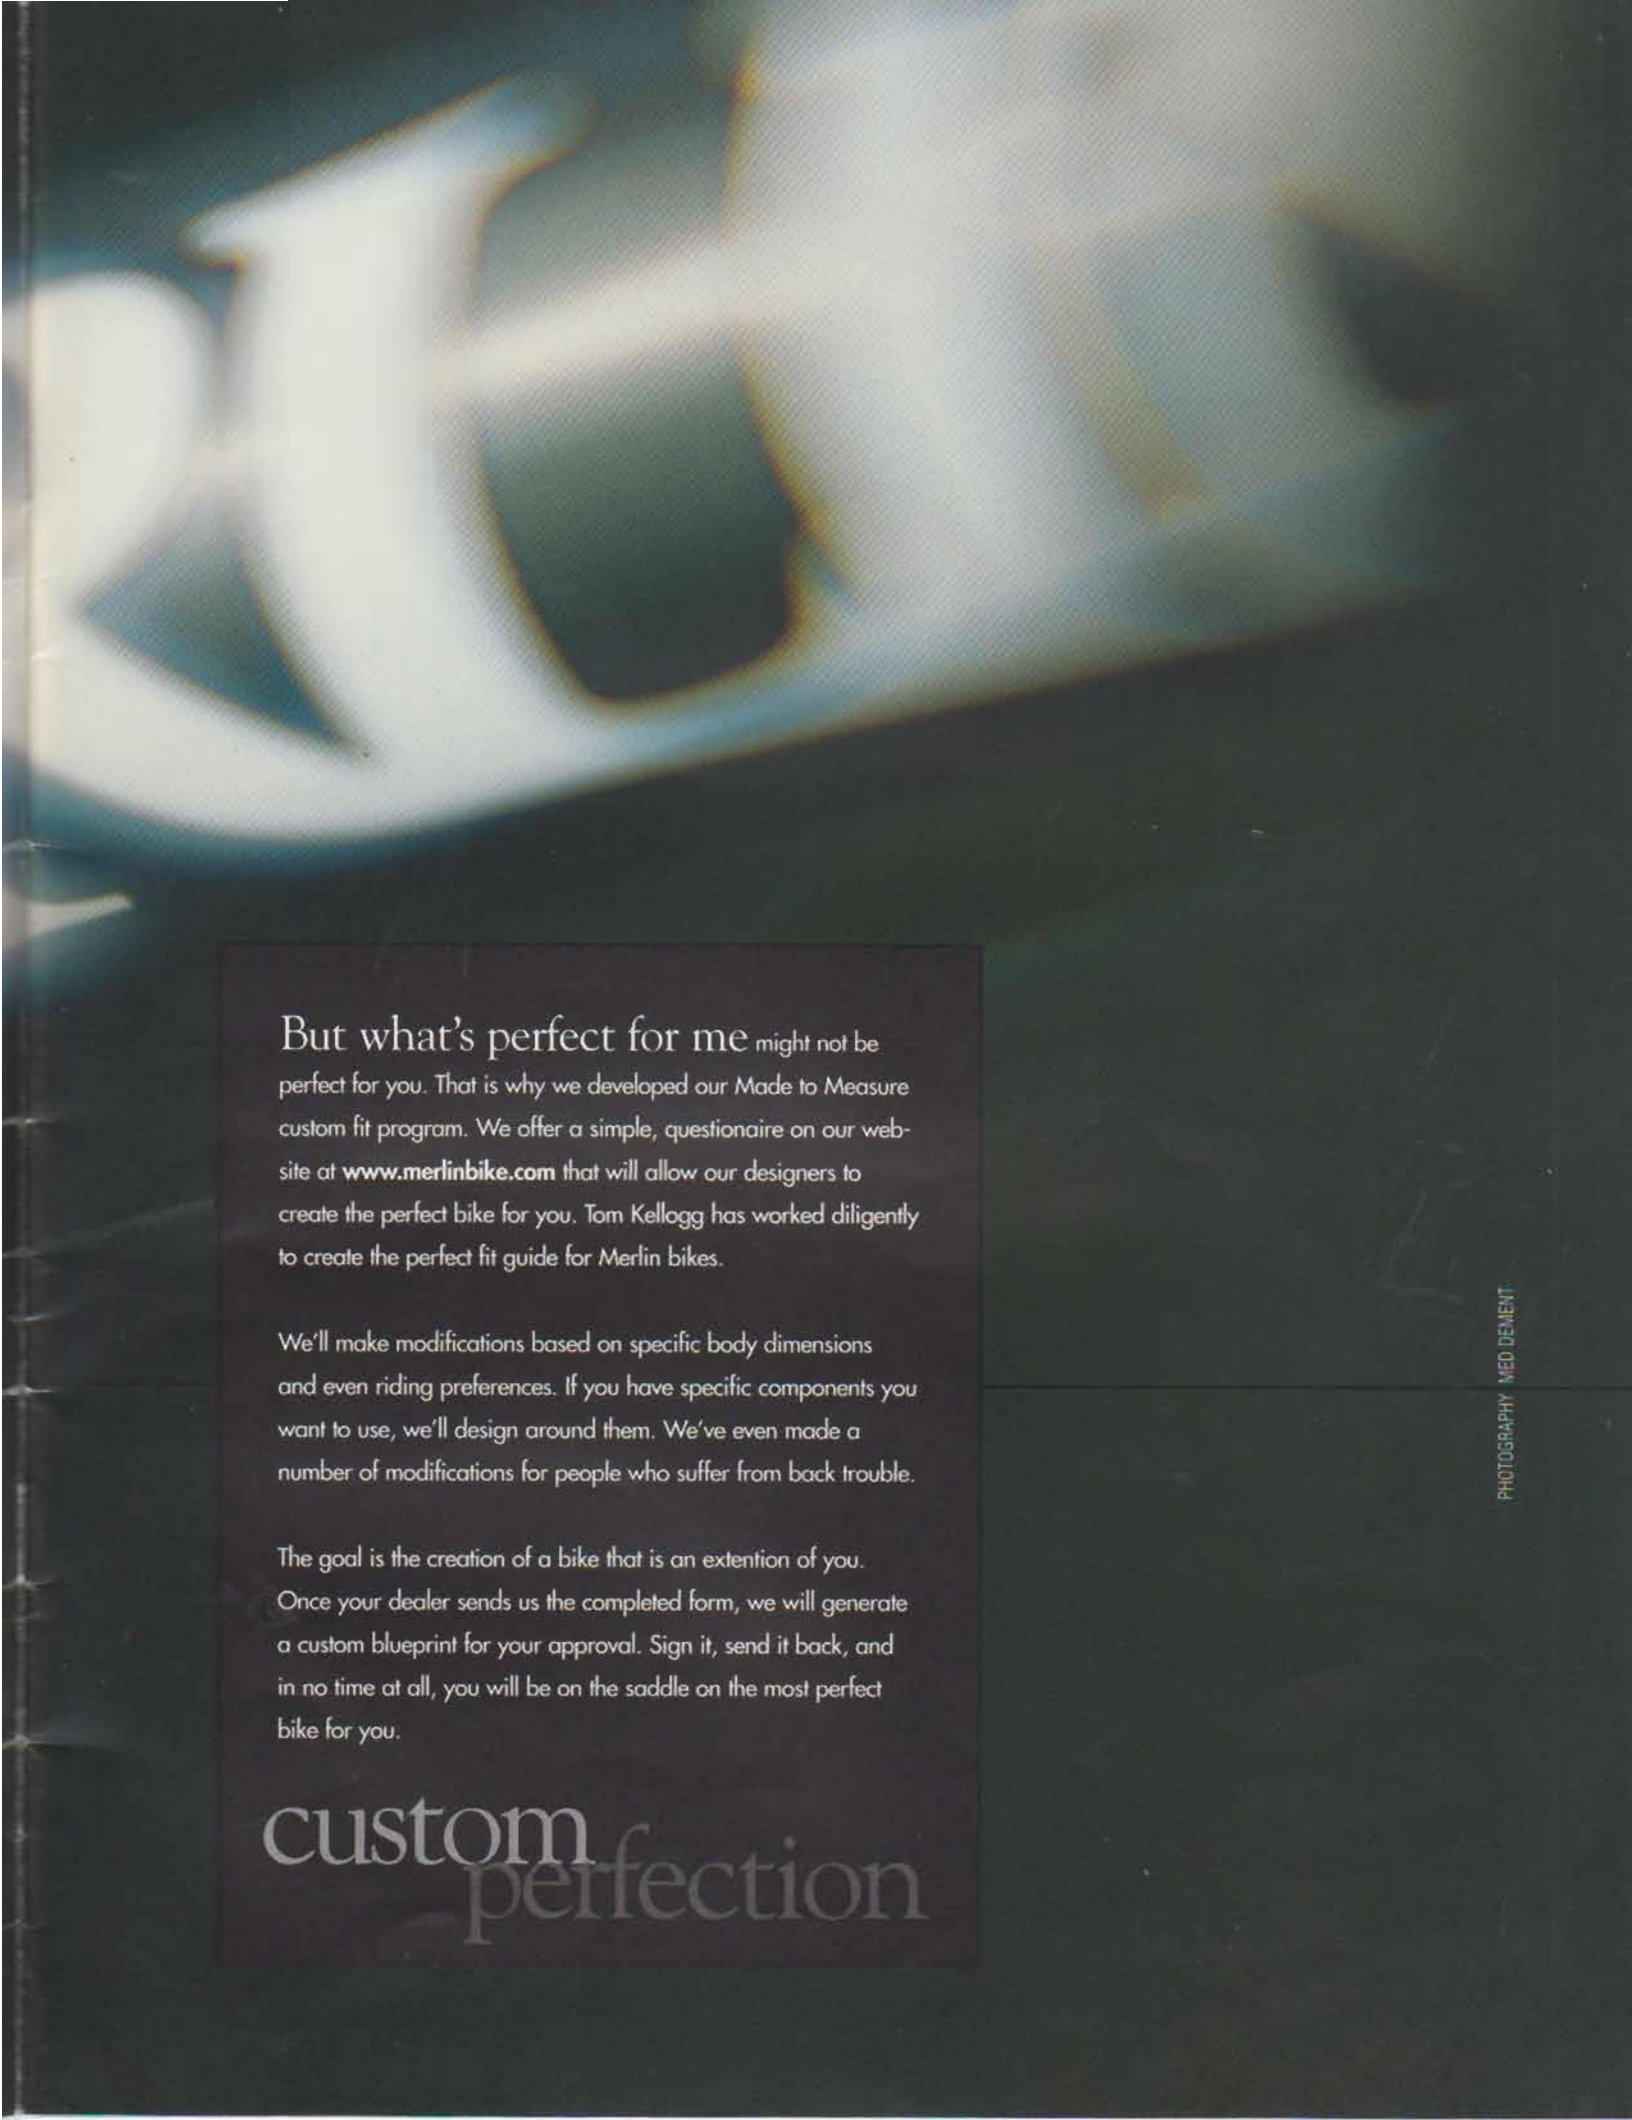

A man with glasses and a mustache, wearing a dark t-shirt, is shown in profile, focused on working on a bicycle frame. He is holding a section of the frame with both hands. The background is dark and out of focus, with some light reflecting off the frame's surface.

Tom Kellogg
Chief Frame Designer
MERLIN

Merlin

Everyone has had an experience that they would call perfect. The perfect day to be outside, the perfect tool for the job, the perfect place for to live. Once you've had a glimpse of perfection, it becomes an addiction and nothing else will do. Following that philosophy, our mission at Merlin is to make the perfect bicycle. We start with the perfect frame building material: titanium. But, it's not enough that titanium has inherent legendary strength-to-weight performance and corrosion resistance. Merlin tubing is custom drawn to our exclusive MTS 3/2.5 (Merlin Tube Specification) standards that actually exceed aerospace standards for precision and uniformity. The frame is then hand assembled by artisans who proudly add their signatures to the meticulous record that accompanies each stage of creation.

Is all this attention to the smallest detail necessary to build a good bicycle?
Maybe not. But, remember, our goal is not merely good... it is **perfect**.

But what's perfect for me might not be perfect for you. That is why we developed our Made to Measure custom fit program. We offer a simple, questionnaire on our web-site at www.merlinbike.com that will allow our designers to create the perfect bike for you. Tom Kellogg has worked diligently to create the perfect fit guide for Merlin bikes.

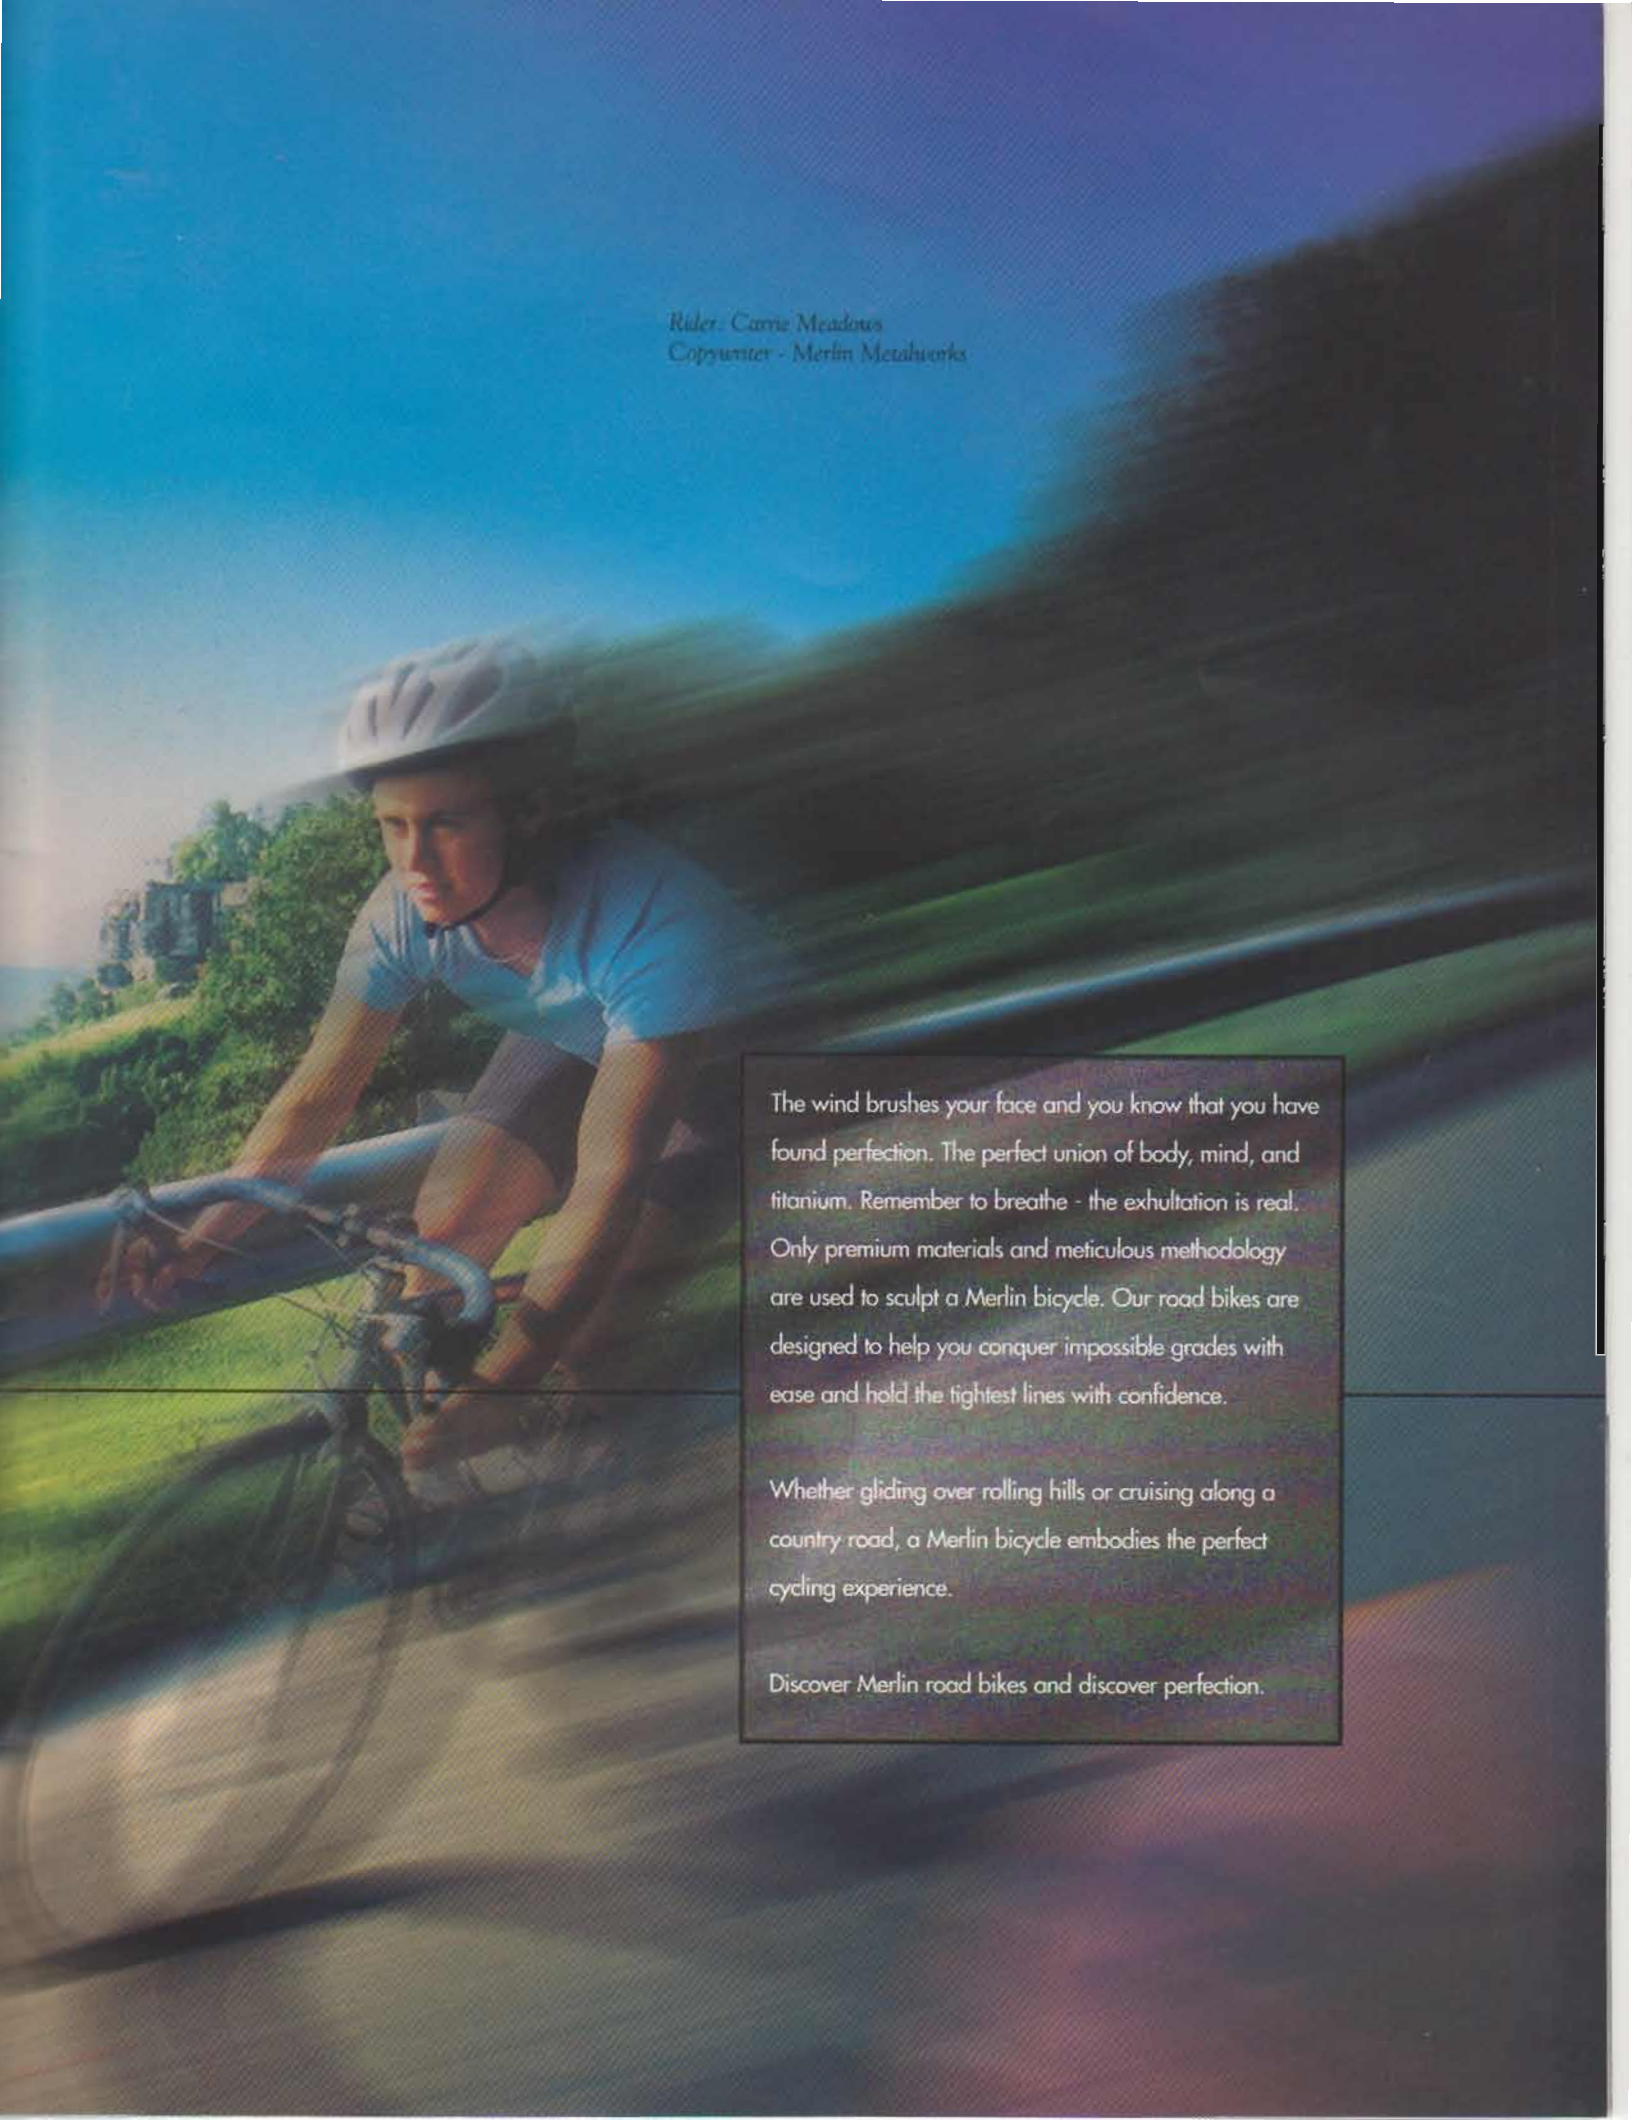

We'll make modifications based on specific body dimensions and even riding preferences. If you have specific components you want to use, we'll design around them. We've even made a number of modifications for people who suffer from back trouble.

The goal is the creation of a bike that is an extension of you. Once your dealer sends us the completed form, we will generate a custom blueprint for your approval. Sign it, send it back, and in no time at all, you will be on the saddle on the most perfect bike for you.

road bikes

merlin

A woman wearing a white helmet and a light blue t-shirt is riding a road bike on a winding road. The background shows rolling green hills and a clear blue sky. The image has a motion blur effect, suggesting speed.

*Rider: Carrie Meadows
Copywriter: Merlin Metalworks*

The wind brushes your face and you know that you have found perfection. The perfect union of body, mind, and titanium. Remember to breathe - the exultation is real. Only premium materials and meticulous methodology are used to sculpt a Merlin bicycle. Our road bikes are designed to help you conquer impossible grades with ease and hold the tightest lines with confidence.

Whether gliding over rolling hills or cruising along a country road, a Merlin bicycle embodies the perfect cycling experience.

Discover Merlin road bikes and discover perfection.

extralight merlin

Benefits

Merlin MT5 uses special 941-2.5V double-butted tubing provides an incredibly lightweight and smoothly strong high-performance frame. Vertical compliance and rider comfort are enhanced by the sculpted hourglass seatstays. Merlin's new 1.125" long and 1.125" wide frame tubes allow for easy maintenance. Sam Hillig designed the Extralight with sophisticated angles for superb all-around performance and classic styling. We also offer short and long handlebar options for your preference. Merlin's "Made-to-Order" program offers a custom fit. For complete lifetime warranty information, go to www.merlincycle.com

This Extralight is pictured with optional equipment.

From its conception in 1992, the Merlin Extralight continues to be the industry's yardstick for performance, weight, quality, and craftsmanship. Created for cycling purists by cycling purists, this frame blends comfort and performance. It was designed for the perfect ride. Whether you are setting the pace for the criterium, or just out on an evening cruise, this bike is truly a pleasure to behold and to pedal.

xl compact merlin

Benefits

The XLCompact is new for 2002 | The super-light weight of this compact design is shaved even more by using Merlin MTS size-specific 3Al-2.5V double-buttad tubing | Merlin's 1 1/4" longrad hatched design allows for easy maintenance | Drivetrain power transfer is enhanced by large diameter 7/8" butted V-bend chainstays | Lightweight and strong longrad seatstays counter the stiffness of the compact design and absorb rear shock for riding comfort | For complete lifetime warranty information, go to www.bikebible.com

This XLCompact is pictured with optional equipment.

By definition, a compact frame provides for greater stiffness to weight ratio, and thus, increased stroke response and acceleration. This bike was designed to blast over climbs like a rocket and dart through the peloton like a hummingbird. Whether you are a dedicated racer or a more casual cyclist, you will appreciate the strength and agility of this frame.

like a hummingbird

The innovation and craftsmanship that are hallmarks of Merlin are epitomized in the XLCCompact.

Pick a road. Any road – the road less traveled, the road to glory, the yellow brick road – any road.

We have designed the perfect bike for it. It is simply called the Merlin Cyrene. Using race proven geometry and size-specific tubing technology, we have created an all-around bike that can cruise forever or blast ahead of the peloton. Just pick a road. Any road.

Tom Kellogg created this frame with one thing in mind
- performance. Nimble, aggressive performance. The
kind of performance that makes you feel like you are
flying. Just climb aboard this compact frame and take
your first downstroke. You'll understand that the Agilis
is designed to get you anywhere you want to go and
get you there fast.

merlin

We know what beckons the mountain biker.
It's the challenge of the trail and the primal urge
that calls you over the next hill.

It's the lure of the mountain.

We know and we *understand*, because we have
heard that same call. It's the call that drives us
to build our bikes using the toughest materials
known to man. Merlin titanium, in addition to
being ultra-light, is unbelievably strong and
resilient. Our geometry is specifically designed
to soak up even the most ghastly punishment.

So, go ahead, follow your instincts...see what's
over the next hill.

xlm

merlin

Benefits

Merlin MTS size-specific 3Al-2.5V double-buttet tubing is specifically designed for performance | The large-diameter 7/8" butted S-bend chainstays provide superlative drivetrain stiffness | Merlin's center mounted brake boss design enhances braking power with less twist and flex to Merlin center-mounted brake boss design | Disc-compatible dropouts allow for broader choice of brake systems | Optional Custom geometry through Merlin's "Made-to-Measure" program | For complete lifetime warranty information, go to www.merlinbike.com

If you were to apply the words 'elegant' and 'rugged' to a mountain bike, it would be the Merlin Mountain. We have taken the classic mountain frame design, and created a work of art. But, make no mistake, this beauty has the soul of a predator. It attacks the terrain like a cougar taking down a meal. No contest. Climb on a Mountain, and you'll find an aggressive hardtail with classic lines and all the subtle refinements and superb craftsmanship that you can only get from a Merlin.

Limited Edition

The standard Newsboy package includes 2 sets of Shimano XT Disc hubs, one with Mavic 317 mountain rims and one with Mavic Open Pro road rims. It also includes a Newsboy hat, t-shirt, and 2 custom wheelbags.

This Newsboy is pictured with optional equipment.

If Webster had owned a Merlin newsboy, he would have put its picture next to the definition of "cool". The gorgeous sweeping lines of this frame harken back to the days of malt shops and vinyl records. Yet, this elegant bike is the most technically advanced cruiser you'll find. Disc brakes, internal cable routing, bombproof 3Al-2.5V titanium frame... ..cool.

And, the Newsboy is just as happy on the pavement as it is on the dirt. With a simple change to the 700c road wheels that also come with the bike, you can leave the trails and cruise the streets. The adjustable front suspension soaks up the most grueling geography with ease whether it is covered with rocks or speed bumps. Be the first kid on your block to own a Newsboy and be instantly cool.

Components and options are subject to change.

TITANIUM JERSEY This high quality Giordana™ jersey has generous length and deep pockets. Exclusive Michron™ performance fabric offers superb heat/moisture dispersion and breathability. Available in sizes S-XL.

apparel

TITANIUM SHORT Functional and comfortable to the extreme, these Giordana Sumatra™ shorts feature a CoolMax™ by DuPont™ pad that will take the sting out of those long rides. Available in sizes S-XL.

RETRO JERSEY The same high quality and performance as our Titanium Jersey but with a classic look. Available in sizes S-XL.

RETRO SHORT

With the same features as our Titanium Shorts, but designed to accompany the Retro Jersey. Available in sizes S-XL.

MERLIN MEDALLION T-SHIRT

This Hanes™ Beefy-T is featured in silver blue with the Merlin Medallion logo. Sizes from S to XXL.
