B.M.X. PRODUCTS, INC. T.M.

COMPANY STORY

Founded September 1974 by President Skip Hess, B.M.X. Products, Inc., has since grown to be the largest manufacturer of competition motocross bicycles in the world.

The Motomag Wheel was our first product, designed by Skip when he saw the need for a strong, light wheel for motocross racing. The now famous "Mongoose" Bicycle was introduced in late 1975, equipped with Motomag Wheels, and has now developed into the standard of the industry.

A complete selection of motocross parts and accessories, from manufacturers such as Red Line, Shimano, Ashtabula and others, has been added to make B.M.X. Products, Inc., the number one distributor in the United States for BMX racing equipment.

Our staff of 46 is well equipped to handle all phases of operation from purchasing to shipping. General Manager Rick Twomey, Sales Department Sue Clark and Pat DeWit, Purchasing Director Bruce Smith and Sales Administrator Mike Hodson work together to provide the best service possible.

New products are continuously being developed, such as the "Gold Stem" and "Roger De Coster Fork". New for 1978 are the Team Mongoose Bicycle and the Mitygoose Bicycle, both designed to stay ahead of the competition in price and quality.

1978 promises to be the biggest year ever for Bicycle Motocross, with plans for B.M.X. Products, Inc., to move again to larger, more modern facilities.

Our goal is to stay out in front in 1978, and continue to offer the best service, products and quality in the industry.

Tom "The Mongoose" McEwen campaigns his Corvette funny car, bearing the logo from B.M.X. Products, Inc. The winning "Mongoose" trademark is seen by hundreds of thousands of spectators each year at drag racing events across the United States.

BMX COMPETITION FRAMES

2 RACING MODELS

REGULAR MONGOOSE
AND
LONG MONGOOSE

B.M.X. Products proudly introduces the MONGOOSE BMX Competition Frame. Built with the same precision workmanship and highest quality materials that you would expect from the makers of MOTOMAG.™

B.M.X. sets the pace again. This time giving the dealer two frame sizes to work with. There's the Regular MONGOOSE, which should accommodate most of your customers, plus a Long MONGOOSE for the hard to fit long racer.

- 3 MAIN TUBES CHROME MOLY
- Race proven geometry and precision balanced.
- Aircraft quality heliarc welded, plus double head gussets for maximum reliability.
- Both models available in either nickel plate finish or three "new" colors of red, yellow and blue.
- Accepts all standard hardware — cups, bearings, forks and cranks.
- Included with frame is heavy wall, plated seat post.
- Ground clearance to accept long cranks.
- Brake arm bracket is integral with frame for convenience.
- Frame is complete with rear bridge for caliper brakes.
