

NISHIKI / 1987

The road unwinds beneath your wheels in an unbroken ribbon of mottled grey. The miles dissolve into a blur of colors, shapes and unfocused impressions. The only sounds you hear are the measured hum of the chain on the sprocket and the steady cadence of your breathing. You've found the rhythm, a pace, a personal level of accomplishment that until today has eluded you. NISHIKI — Building bicycles that enhance the experience.

'I was always told that it was the biker, not the bike that wins races. Ever since I got my Nishiki Carbon, I don't think that's true anymore. I was faster the first time I rode the Carbon. I can't really say anyone can win on a Carbon, but I can tell you from experience it's easier to win with one than without one.'

Linda Buchanon—Winner World Triathlon Championship, Nice, France

- 7 layer Carbon/Kevlar Italian hand crafted frame
- Shimano Dura-Ace SIS Indexing
- Assos alloy Aero Tubular wheels
- Vetta Nuvola racing saddle

CARBON/KEVLAR

The Carbon/Kevlar is Nishiki's ultimate definition of what a serious racing bike should be — light, strong and efficient. It is built with tubes made of seven layers of space-age Carbon Fiber laminated with Kevlar®. The resulting flyweight frame and aluminum fork weigh less than four pounds, yet are stronger

and more durable than steel. The Carbon/Kevlar composite material is also superior in absorbing shock and in transferring energy with unsurpassed efficiency. Premium components such as the Shimano Dura-Ace SIS System further enhance the Carbon/Kevlar's exceptional race-winning potential.

*Kevlar is a registered trademark of DuPont Corporation

At Nishiki, we know that the difference between a good bicycle and a great bicycle is simply attention to detail. Every bicycle in the world starts with a few lengths of tubing and a collection of components. Yet bicycles that are similar in specifications and price can vary dramatically in performance and quality. Why? Because of the attention to detail, and the care and precision with which the bicycles were built.

No one perfects the details better than Nishiki, and that explains why we have built consistently great bicycles for over 20 years.

BETTER BICYCLES BY DEFINITION

Before any tubing is cut, any component

shock and make the bike comfortable to ride for hours on end. On a mountain bike, chainstay length is critical as it greatly influences balance and traction. And so on. These are not revolutionary concepts. The difference among bicycle brands lies in the precision with which the geometry is adhered to during assembly. Nishiki frames feature perfect alignment and precise geometry. The result is optimum performance.

THE MATTER OF MATERIAL

Premium quality double butted tubing was formerly the single finest material available for bicycle frames. It still is for many applications. However, there are now new

meeting these challenges in innovative ways. Take the recent introduction of aluminum frames, for example: Nishiki did not introduce the first aluminum frame, but we now offer the *best* aluminum frame bicycles. Why? Because we took the time to do it right. For example, steel axles riding directly against an aluminum dropout will quickly wear down the aluminum. This can weaken the dropout significantly and cause poor wheel alignment.

Nishiki has developed a patented reinforcing process using stainless steel plates which are riveted into position, then ground and polished for a smooth, true surface. This is only one of a long list of innovative Nishiki features.

APPEARANCES ARE NOT DECEIVING

Every Nishiki bicycle features two primer coats and multiple color coats, each baked-on for outstanding durability. Attention to detail is everywhere. Our Carbon Kevlar bike uses precision cast alloy lugs. Our aluminum bikes feature a cast aluminum rear brake bridge. Nishiki mountain bikes use slotted cable stops for easy cleaning and over-size ATB brake cables. Even our highly-affordable Olympic 12 is hand finished and painted. Nishiki, turning technology into art.

If you think all bicycles look the same, look again.

specified, a Nishiki bicycle is *defined*. What type of bicycle will it be? How and

where will it be ridden? Who will be riding the bike? The answers to these and other questions actually define the bicycle design, determine the frame materials, and dictate the component selection.

RIDING AT THE RIGHT ANGLE

A racing bike has sharp frame angles and short wheelbase for optimum response and agility. The longer wheelbase and more gentle angles of the touring bike absorb road

materials which are superior for specific types of riding.

Our Carbon/Kevlar racing bike features a frame of extremely light composite material which is stiffer than steel for incredibly quick response. We offer racing bikes constructed of T 7000 aluminum, lighter yet just as strong as chro-moly. Our mountain bikes are built of oversize tubing for superior strength and rigidity.

ONLY THE MOST ADVANCED COMPONENTS

Nishiki uses only the finest, most technically-advanced components available such as Suntour Accushift indexing, Sugino Carbon Fiber brake levers, Shimano SIS Indexing, aerodynamic detailing, Shimano Biopace cranksets, Nitto pursuit stem and handlebars, chainstay-mounted mountain brakes, Nishiki-designed chro-moly mountain bike handlebars and stem, and Dia-Compe heavy-duty brake cables.

SETTING THE PACE VERSUS KEEPING THE PACE

New technologies often bring with them new challenges. Nishiki is a leader in

NISHIKI EXCLUSIVE

- Aluminum T 7000 Handmade frame
- Aerodynamic detailing
- Sun Tour Accushift indexing
- Look competition pedals

When I sat down to lay out the line of 1987 bikes, I was absolutely determined that we would have the very latest components available. If it was new, if it was hot, it was definitely going to be on our Nishiki bicycles. Nobody, absolutely nobody has better components than we do.

Bob Margevicius—Product Manager, Nishiki/Former World Class Rider

The striking Nishiki Fusion is a superb example of the very latest in racing bicycle technology. The frame is made of strong, lightweight T 7000 aluminum tubing, hand filed and hand finished. Its unique design places the rider in the most aerodynamically-efficient position possible. Aerodynamic han-

dlebars, brakes and brake levers reduce drag. Carbon fiber is used in the chainwheel and brake levers to reduce weight. And Suntour Superbe Pro Accushift indexing components deliver sure, positive shifting. The result is a time trial bike that gives you every advantage.

FUSION

I know it sounds odd, but the thing I like best about the Nisbiki is that I never know it's there. By that I mean that it's so well balanced, so smooth that it just seems to disappear under you. You never have to fight it.

Eric Seesemann—Road Racer

- Tange #1 double butted CR-MO frame w/aerodynamic detailing
- Shimano Santé SIS indexing with Shimano Biopace crankset
- CyclePro Linear ultra-light 220gr smooth tread tires
- Araya 32 hole super hard anodized high performance, 700C wheels
- Look competition pedals

TRI-A EQUIPÉ

The Tri-A Equipé is designed and built for the serious competitor. The frame is constructed of tough, durable Tange #1 double butted chro-moly tubing. Attention to detail includes investment cast seat lug and brake bridge. Aerodynamics refinements include

internal cable routing, new Shimano aero brake levers and aero fork crown. The Tri-A Equipé features premium Shimano Santé components, while the standard Tri-A is equipped with high-quality Shimano 600EX components.

NISHIKI EXCLUSIVE

- Tange #1 double butted CR-MO large diameter frame
- Aerodynamic detailing
- Suntour Cyclone 7000 Accushift indexing
- Araya 32 hole super hard anodized high performance 700C wheels
- CyclePro Linear ultra-light 220gr smooth tread tires

INTERNATIONAL - Bicycle Of The Year Award - BICYCLE GUIDE

I work with great engineering and fantastic craftsmanship every day. It's gotten so I just can't bring myself to accept anything less. That's why my Nishiki bikes blow me away. All the little details. The people that built my bikes knew what they were doing, and cared. I should know, I own three Nishiki's.

Greg Watson - Porsche Technician/Triathlete

The Nishiki International features a unique frame that is 30% stiffer than conventional designs for outstanding response and handling as well as highly-efficient energy transfer. The secret lies in the larger diameter Tange #2 double butted chro-moly tubing

which is both internally brazed and heliarced to the lug. An exclusive stress ring adds strength without weight. Suntour Accushift indexing derailleurs provide smooth, positive gear selection. The International is suited to both competition or serious road riding.

INTERNATIONAL

You're concentrating like you never have before. You've fallen into a comfortable rhythm; 100 revolutions a minute, no more, no less. There's a clock inside your head ticking off the seconds, a relentless conscience that refuses to let you relax, even for a moment. The pain has come and gone, replaced by a dull ache and the realization you do have the strength to go all the way. NISHIKI RACING BIKES—every bit as good as you are.

'I can tell you why Nisbiki bicycles are the best in the world in one word...value. Our quality, components and performance are as good or better than anyone's, yet our bikes consistently cost less. Our Nisbiki Altron 7000 is a good example. To find an aluminum bicycle anywhere near as good, you'd have to pay \$500 or \$600 more.'

Sid Dunofsky—President, West Coast Cycle

NISHIKI EXCLUSIVE

- Aluminum T 7000 handmade frame
- Aerodynamic detailing
- Suntour Sprint 9000 Accusift indexing
- Araya 32 hole 319gr super hard anodized high performance 700C wheels
- Cycle Pro Linear ultra-light 220gr smooth tread tires

ALTRON 7000

The Altron 7000 is, without question, one of the finest aluminum bicycles in the world. The frame is handcrafted of premium T 7000 aluminum, lighter and more than three times stronger than chro-moly. Dropouts and shift lever bosses are reinforced through patented processes for unsurpassed durability. The

joints are hand-filed and buffed to a flawless finish. Items such as the precision-cast rear brake bridge and tapered seat stays show uncommon attention to detail. And premier components such as Suntour Sprint Accu-shift indexing maintain the Altron 7000's high level of sophistication.

- Tange #2 double butted CR-MO equilateral pursuit style frame
- Aerodynamic detailing with pursuit handlebars and stem
- Shimano 105 SIS indexing with Shimano 105 Biopace crankset
- Araya 32 hole super hard anodized high performance wheels
- CyclePro Linear ultra-light 220gr smooth tread tires

I really like Nishiki frames. They're lightweight, but also very stiff so the response is quick, absolutely immediate. I've also found Nishiki frames can take a lot of punishment without any problems. These are the kinds of things I look for in a racing bike and the Nishiki has them all.

Janet Mamon—Time Trials and Triathlete

One look at the Linear and you know that this is a no-nonsense speed machine. The equilateral pursuit-style frame design places the rider into an aerodynamically-efficient tuck. The premium Tange #2 chromoly frame is lightweight, yet extremely stiff for excellent handling response and efficient

energy transfer. Handlebar width and crank arm length are coordinated to the frame size for ideal rider fit and improved comfort. Premium quality Shimano 105 SIS components underline the serious intent of this world class bicycle.

LINEAR

I bet I've put 5,000 miles on my Nishiki in the last few months... really hard miles 'cause I'm pretty tough on the bike. Yet I've never had a problem, nothing ever breaks. The thing has really got to be built well, otherwise I would have destroyed it a long time ago.

Vance Lorwin—Aerobics Instructor/Triathlete

- Tange #2 double butted CR-MO frame and fork
- Aerodynamic detailing with Dia-Compe super response brakes
- Suntour A-5000 Accushift indexing
- Araya hard finish high performance 700C wheels
- CyclePro Discovery 310gr siped tires

PRESTIGE

Fast, comfortable and attractive, the Nishiki Prestige is the ideal dual-purpose bike. It is sophisticated and responsive enough for racing, and an excellent choice for general all-around riding as well. The Prestige starts with a precision frame of premium Tange #2 double butted chro-moly tubing highlighted

by an investment cast brake bridge and pencil-style seat stays. The responsive geometry and lightweight alloy components such as Suntour Accushift indexing make the Prestige an excellent all-around performance machine.

- Tange #2 double butted CR-MO touring frame
- Suntour A-5000 Accusift indexing with Sugino bio-kinetic crankset
- Araya 16-A hard finish heavy duty touring wheels
- Cycle Pro Discovery 27 x 1 1/4 siped skinside touring tires
- Kusuki Randonneur handlebars with cast alloy stem

The Cresta GT is designed, built and equipped for the knowledgeable touring rider. The frame and fork are made of premium Tange double butted chro-moly tubing. The touring geometry and long wheelbase soak up road shock for a smooth, comfortable ride. High-

quality alloy components reduce weight, while a 40 hole rear wheel handles heavy touring loads. A rack is standard equipment, as is a full complement of braze-ons including 3 sets of water bottle fittings, cable guides and pump peg.

CRESTA GT

The traffic is light, the breeze feels wonderful, and the breakfast at that diner a few miles back was out of this world. You only meant to go a few miles, but on a day like this, you just can't seem to make yourself stop and turn around. So far you've discovered an almost complete Model A Ford in a field and a winery you never knew existed. You stood on the pedals and raced a freight train down a hill into a lush green valley, and fed the apples you brought to an old grey horse in a coral by the side of the road. Nishiki—we don't let the technology get in the way of the fun.

'I guess it's only natural that the first thing that impressed me about my Nishiki was the way it looked. Not just the colors, although they're great, but all the nice little touches ... the way the cables are run, the finish, those kinds of things. And the components are great.'

Greg Burne—Designer/Touring and Triathlete

- Tange Infinity double butted CR-MO Japanese made frame
- Aerodynamic detailing with Shimano SLR linear response brakes
- Shimano L525 light action SIS indexing
- Araya bard finish high performance 700C wheels
- Cycle Pro Discovery 310gr siped tires

OLYMPIC 12

The Nishiki Olympic 12 is a high quality Japanese bicycle without the high price. In fact, the Olympic 12 offers the performance and sophistication of bikes costing many times more. The hand-crafted frame is made of Premium Tange double butted chro-moly tubing, hand finished and hand painted. Frame fea-

tures include ultra-light pencil-style seat stays, forged dropouts and straight chainstays for maximum strength and rigidity. Premier quality components include Shimano SLR linear response brakes, Shimano SIS gearing and a high-performance Sugino low-profile crankset.

- CR-MO double butted performance design frame
- Sugino A-3000 low profile cast alloy crankset
- Araya SP-20 quick release alloy 27 inch wheels
- Dia-Compe A-3000 alloy side pull brakes

The Custom Sport is a versatile bike that's perfect for weekend riding or light touring. The Custom Sport features the best of Japanese componentry and construction. It's built on a durable frame of double butted

chromo-moly tubing and outfitted with premier alloy components for smooth performance and reliability. The Custom Sport features Suntour's Accushift indexing for virtually error-free shifting.

CUSTOM SPORT

I think the Nishiki is the most comfortable bike I've ever ridden. Everything just seemed to fit me really well, almost like the bike was custom made for me.

Pia Anderson—Model/Recreational Rider

- CR-MO fully lugged performance design frame
- Shimano L522 light action SIS indexing
- Sugino cast alloy crankset
- Araya SP-20 quick release alloy 27 inch wheels
- Dia-Compe alloy side pull brakes

SPORT

Not everyone wants or needs a racing bicycle. If you ride just for the fun of it, you want a bike that's comfortable, agile and reliable. In other words, a Nishiki Sport. From its lightweight chro-moly frame to its premier components, the Sport is the ideal weekend bike. Features such as the positive shifting Shi-

mano SIS indexing system Dia-Compe side pull brakes, and Araya quick release wheels make riding smooth and effortless. And because the Sport requires a minimum of maintenance, you'll spend your time having all the fun you bought your bike for in the first place.

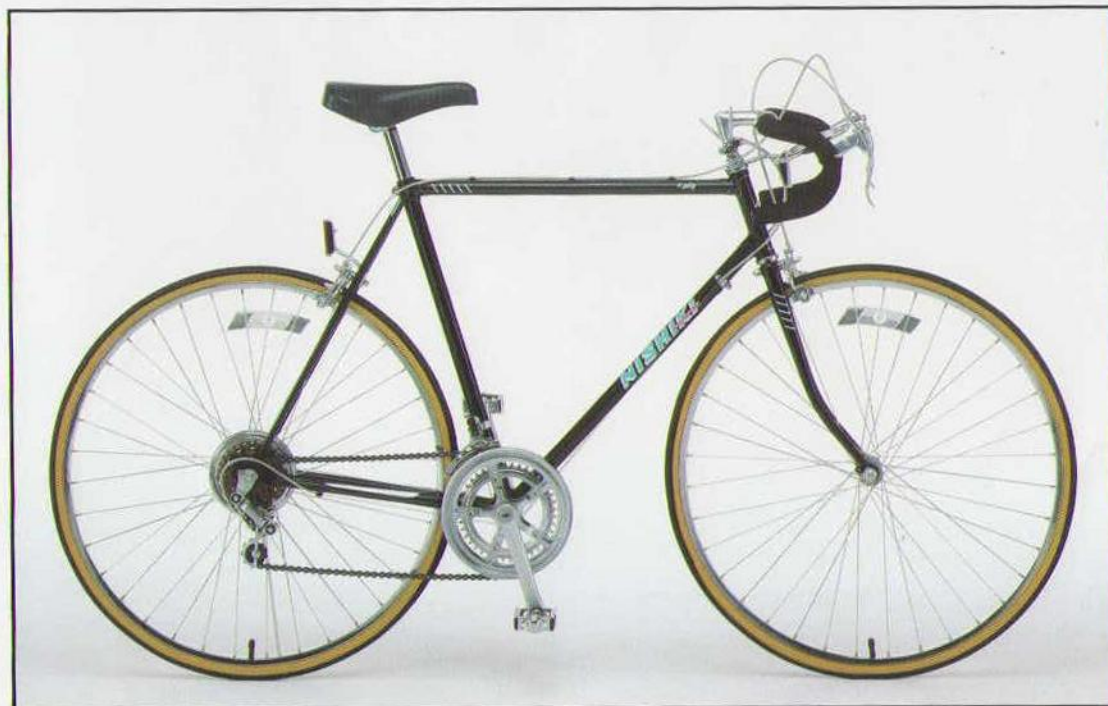

The Century is a recreational bike that's long on fun and value. It features premium alloy components from top manufacturers such as Dia-Compe, Suntour, Sugino and CyclePro. The Century is comfortable, responsive and requires a minimum of maintenance. It offers positive proof that quality and value can go hand in hand.

CENTURY

The great-looking Nishiki Rally is an outstanding 10-speed and an outstanding price. Highlights include premium alloy components from Japan, a durable, fully-lugged frame, gumwall touring tires, a full complement of braze-ons, and a racing saddle.

RALLY

The view is breathtaking, and so was the ride up. The solitude is curiously reassuring. The thought of the ride down, invigorating. It's hard not to imagine yourself as the first to enjoy the seemingly unending panorama that stretches before you. And even if you're not the first, you're one of the very few, and that's reason enough for the climb. NISHIKI—suitable equipment for adventures of the body and the mind.

Why Nishiki really gives me an advantage on fast downhill sections. It's responsive and agile, yet very stable. In fact, it seems like the faster I go, the more stable the bike becomes.

Gary Newkirk—Mountain Bike Racer

- Tange #2 double butted CR-MO large diameter mountain frame
- Shimano Deore XT SIS indexing with Shimano Biopace crankset
- Araya RM-20 super hard anodized quick release wheels
- CyclePro Pinnacle 26 x 1.95 mountain tires
- Nishiki design CR-MO handlebars and stem

PINNACLE

The rugged Pinnacle is Nishiki's ultimate, no-compromise mountain bike. The frame, fork, stem and handlebars are made of premium Tange chro-moly tubing for the perfect balance of lightweight and outstanding durability. Design elements such as straight chainstays and a scalloped and beveled seat

collar enhance the bike's overall strength and ruggedness. Alloy components further reduce weight and include the sophisticated Shimano Deore-XT SIS indexing system and an energy-efficient Shimano Biopace crankset. The Pinnacle can take you anywhere you want to go, and back.

- Tange ATB double butted CR-MO large diameter mountain frame
- Suntour XC-7000 Accushift indexing with Sugino bio-kinetic crankset
- Araya RM-20 hard finish quick release wheels
- CyclePro Pinnacle 26 x 1.95 Mountain tires
- Dia-Compe mountain selection brakes

The thing that really impresses me about my Nishiki mountain bike is the way it stands up to punishment. I'm a pretty big guy, 6'2" and 190 pounds, so when I land, the bike really takes a jolt. The Nishiki handles it without any problems.

Scott Griffiths—Advertising Agency President/Mountain Bike Rider

Equally adept at dodging rocks or potholes, the Nishiki Ariel is the perfect off-road bike. The large diameter chro-moly frame stands up to trail riding or steep descents. The straight chainstay design improves both strength and rigidity while providing clearance for the fattest ATB tires. The Dia-Compe

cantilever front/center pull chainstay mount-rear brake combination delivers positive, controlled stops, while the Suntour Accushift indexing System simplifies gear changing. Comfortable, responsive and rugged, the Ariel is handcrafted in Japan to be the perfect bike for work or for play.

ARIEL

- CR-MO double butted large diameter mountain frame and fork
- Shimano New Deore SIS indexing with Shimano Biopace crankset
- Araya 7-S hard finish mountain wheels
- Nishiki design CR-MO handlebars and stem
- Nishiki 26 x 1.95 mountain tires

CASCADE

The Nishiki Cascade is a true off-road bike that balances technical sophistication with outstanding durability. The frame is made of oversize double butted chro-moly tubing and features a unicrown fork, straight chainstays, and an aggressive geometry for optimum agility. Other highlights include heavy-duty

braided brake cables, slotted cable stops, and a full complement of braze-ons. The powerful front cantilever/rear chainstay mount Shimano U-brake deliver sure, controlled stops. Shimano SIS indexing ensures positive shifts while the Shimano Biopace crankset puts your energy to work efficiently.

- CR-MO large diameter mountain frame and fork
- Shimano light action alloy SIS indexing
- Nisbiki design forged alloy stem and handlebars
- Weinmann high polish alloy 26 x 1.95 wheels with quick release front

The Colorado is a value-packed all-terrain bike with impressive credentials. From its oversize chro-moly frame and fork to its long list of alloy components, the Colorado is ready to take on the rough stuff. Technical

highlights include the Shimano SIS shifting system, Shimano alloy cantilever brakes, Sugino sealed mechanism crankset and a quick-release alloy front hub.

COLORADO

- CR-MO large diameter mountain frame
- Suntour A-3000 Accushift indexing
- Sugino cast alloy low profile 18 speed crankset
- Weinmann high polish alloy 26 x 1.95 wheels with quick release front

BACKROADS

Nishiki's Backroads is an all-purpose bike equally at home on city streets or country roads. Its features a full chro-moly frame and is equipped with components from the world's premier manufacturers including Dia-

Compe, Suntour, Sugino and CyclePro. Highlights include a quick release front hub and Suntour Accushift indexing. The Backroads is available in a wide range of colors and in sizes for the whole family.

- Nisbiki bi-ten large diameter mountain frame and fork
- Shimano light action shifting
- Sugino cast alloy low profile 15 speed crankset
- Weinmann high polish alloy 26 x 1.5 wheels with quick release front

The Pueblo is an outstanding value in a great looking, fully-equipped all purpose bike. It features a frame of oversize tubing highlighted by fastback-style seat stays, premium

alloy components, beartrap-style pedals, alloy wheels and a quick release front hub. Available in men's, women's and children's sizes.

PUEBLO

BLAZER

If you're looking for a recreational bicycle that's high in quality but low in price, the Blazer is the bike for you. It's built on a rugged mountain style frame with fastback style seat stays. It offers lots of features normally not found on bikes at this price including braze-on cable guides and water bottle fittings, premium Japanese components and 26 X 1.95 gumside tires. Maximum fun for a minimum investment.

HILL RAZER

Specially sized and equipped, the Hill Razer is the perfect introduction to all-terrain riding. It features a heavy-duty mountain frame, unicrown fork, chromed sealed mechanism headset, alloy brakes, a one-piece crankset, and Nylon Beartrap-type pedals. The Hill Razer can stand up to anything the streets, the hills, or your kids can dish out.

SPECIFICATIONS

***RIPTIDE &
PACIFIC 6***

Cruisin' is smooth and easy on a Nishiki Pacific 6 or Riptide. Both feature wide cruiser tire, spring seat and cushion grips for outstanding comfort. Designer colors and eye-catching graphics make these two bikes stand out in a crowd.

***CHILDREN'S
BICYCLES***

The only difference between Nishiki adult bicycles and children's bicycles is size. The quality, the precision, the attention to detail is always the same. Shown below are the Blossom, Lil' Blossom, Star, Cupcake, and Comet.

NISHIKI LIMITED LIFETIME WARRANTY*

Nishiki® warrants the replacement of any original part due to defect in material and/or workmanship of this Nishiki bicycle. This warranty shall continue in full force and effect for the duration of the original ownership following the date of purchase. Such purchase to be documented by original sales slip or other proof of purchase by such owner.

Nishiki will replace without charge any original part that is determined by Nishiki to be defective under the terms of this warranty. However, transportation and dealer labor charges are not covered hereunder.

Claims under this warranty must be made through an authorized Nishiki bicycle dealer who must also install the replacement part. To locate an authorized Nishiki dealer, write to Nishiki, 717 E. Artesia Blvd., P.O. Box 6224, Carson, CA 90749-6224 or call, (213) 515-1514.

Failure due to accident, abuse, neglect, normal wear, improper assembly, improper fit, maintenance by other than an authorized Nishiki dealer or use of parts inconsistent with the use originally intended for the bicycle as sold, are not covered by this warranty.

There are no other warranties or guarantees expressed or implied made by Nishiki on this bicycle.

The sole and exclusive liability of Nishiki and/or any of its authorized dealers, affiliates or agents pursuant to this warranty shall be for the repair or replacement of the defective part incidental or consequential damages are expressly excluded hereunder.

NOTICE: The user assumes the risk of any personal injuries, damage to or failure of the bicycle and any other losses if Nishiki bicycles are used in any competitive event, including bicycle racing, dirt biking or similar activities or training for such competitive activities or events.

This bicycle is not manufactured, marketed, designed or intended to be altered for use at any time in stunt riding or any similar activity nor is it intended to be used with motors or any power driven apparatus. Nishiki, its authorized, affiliates or agents shall not be liable under this warranty nor under any state or federal law or common law or otherwise for any damage or failure, including personal injury, resulting from such use and/or alteration. This warranty gives you specific legal rights, and you may also have other rights which may vary from state to state.

* Nishiki Carbon/Kevlar carries 2 year Limited Warranty.
