

NORCO

1 9 8 8

Deore XT Bio-Pace II cranks for a smooth, efficient pedaling motion.

Nitto full chro-moly roller stem and flat bar combination.

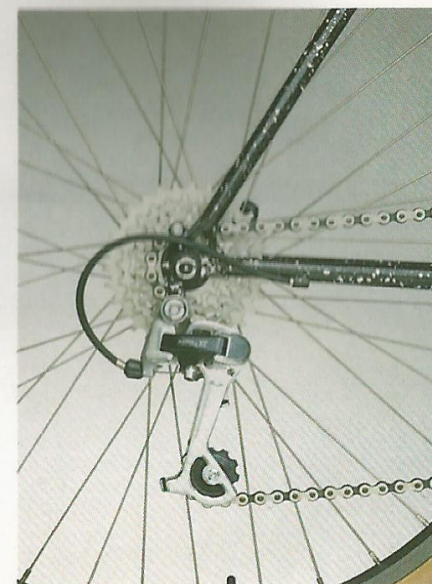

At Norco we believe the first step in designing a bicycle is to assess and understand the needs and desires of its intended user. By following these simple guidelines, we achieve our ultimate goal . . . Customer Satisfaction.

The focal point of every Norco bicycle is the frame. Each frame is individually designed; frame angles, materials and cosmetics combine to produce the best possible finished product.

In our quest for perfection we utilize the latest technology from the world's leading component manufacturers. Both Shimano and Suntour have further refined their index gearing (SIS and Accushift) for 1988 to ensure flawless shifting response.

Perfection doesn't stop with frame and component selection. The cosmetics of each bike are meticulously fine tuned to reflect contemporary market preferences. Many of our high-end bikes receive up to six separate paint and clear coats which assure you of a distinctive, durable finish. We offer dazzling two and three tone fades, wild splatters, and subtle one and two tone finishes. In short, we have something for everyone.

So no matter what model you choose, you can be confident you are getting the best value in style, function, and dependability. After all . . . our future depends on the pleasure you find in riding our bicycles, and, on that, we are not prepared to compromise. Why should you?

Deore XT SIS mountain derailleur with quick release hubs.

Araya RM-20 super hard rims combined with Panaracer Fattrax tires.

Tange full chro-moly double butted mountain frame.

Full Deore XT SIS drive train.

The Rampage has set a standard to which all others can only aspire. It combines a super durable Tange full chro-moly frame with the most innovative components available today. Features of note include: Nitto chro-moly roller stem with a new SR flat bar, full Shimano Deore XT groupo for flawless shifting, Araya RM 20 super hardened rims with Panaracer super grippy Fattrax tires. Shimano Deore XT braking system utilizing a rear U-brake for unequaled stopping response. Please consult your spec sheet for a detailed component listing.

SIS 

RAMPAGE

There are no compromises here, only the finest frame materials and components were used to create this off-road masterpiece. Rampage . . . The Ultimate in mountain bike performance.

The New Super Sasquatch boasts a Tange full chromoly frame and features the new Shimano Exage mountain groupo. The Exage brake and shift levers are combined with a fully adjustable bracket. The powerful rear U-brake combined with front cantilevers will give you outstanding stopping performance. The front changer utilizes a triple index system for faster more accurate chain ring shifts. Other stock features include: Araya alloy rims, Panaracer Fattrax tires, and the new SR pulley stem and handlebar combo.

SIS

EXAGE
mountain

Tange full chro-moly mountain frame.

New SR pulley stem with a flat racing style handlebar.

New Shimano M450 SIS equipment including rear U-brake.

SUPER SASQUATCH

If you're still searching for the perfect off-road bicycle, let us suggest the 1988 Super Sasquatch. We're confident it will meet and exceed your toughest requirements.

New Vetta anatomically designed saddle.

Ishiwata chro-moly mountain frame (three main tubes).

Shimano M350 SIS groupo featuring a new triple Bio-Pace crank.

Equipped with the new Shimano Exage Trail components the 1988 Pinnacle will provide outstanding performance on or off the road. The new front and rear index changers offer unequaled shifting accuracy. Other features of note include: 26" light alloy rims, deluxe skinwall tires, and a Vetta anatomic saddle. Smooth action braking response is aided by the new SR pulley stem. The extra long foam grips offer all the shock absorption required for off-road riding. Available in an assortment of *HOT* new colour combinations.

PINNACLE

Designed with state of the art features and styling the 1988 Pinnacle rides circles around the competition.

The Bigfoot features a durable chro-moly frame (three main tubes), and utilizes a new sloping top-tube design. Other top features to look for include: dependable Shimano light-action index shifters, full chro-moly fork, rear U-brake mounted under the chainstays, deluxe SR triple crank with contrasting black and white trim, sealed mechanism hubs (quick-release front), and a new chro-moly roller stem and bar combination. Ask for one at your local Norco dealer!

Tri-moly mountain frame with sloping top-tube.

New full chro-moly roller stem with flat bar.

New SR triple crank with black rings.

BIGFOOT

Your search has finally ended! The 1988 Bigfoot is the answer to all your off-road riding needs at a price that won't leave you gasping for air.

*Araya L/A rims with
sealed mechanism hubs.*

*Sloping top tube frame design
with hot two-tone fades.*

*Shimano light action
SIS transmission.*

Available in an assortment of wild colours, the Kokanee is bound to be a crowd pleaser. It incorporates the same frame design as our Bigfoot model and also features the Shimano light action index gearing system. Additional stock components include: Chro-moly roller stem with mid-rise bar (for a more upright comfortable ride), new SR crank featuring the oval tech system, Araya alloy rims, and a dependable cantilever braking system. Available in three popular sizes.

SIS 

KOKANEE

New to the Norco line the 1988 Kokanee combines an innovative new frame design with today's latest high-tech components.

The mens and ladies Bushpilot offers affordable performance. Both come in an assortment of dazzling two-tone colour combinations. These durable Hi-tensile frames will provide years of dependable service. The SR crankset features the oval tech system, and comes with a built in chainguard. Both models come stock with sealed mechanism hubs and light alloy rims. The Shimano index system provides 18 trouble free gears and the cantilever brake gives you all the stopping power you'll need.

BUSHPILOT

Attractive styling and a full compliment of quality components puts the mens and ladies Bushpilots in a class of their own.

The 1988 Mountaineer line should leave you with only one question...Which one? Are you looking for the convenience of index shifting, or are light alloy wheels your highest priority. Whichever model you choose, we're confident it will provide years of dependable cycling pleasure. Common features include: cantilever brakes, sealed mechanism hubs, Shimano 18-speed drive train, and a comfortable high rise handlebar and stem combo. Please note the Ladies model is available in regular only.

MOUNTAINEER/SL/SIS

The 1988 Mountaineers give new meaning to the phrase "something for everyone". Available in three popular variations: 1) Mountaineer Regular 2) Mountaineer SL with alloy wheels, or 3) Mountaineer SIS with index gearing.

These attractive bicycles evolved from the mountain bike trend and are available in an assortment of colours, and come stock with matching fenders.

The well cushioned anatomic saddle combined with a high-rise handlebar and stem provide a comfortable up-right riding position. Additional virtues include: Sealed mechanism hubs, Shimano 12-speed drive train, light alloy sidepull brakes and smooth rolling 26 x 1.5 tires.

NOTE: Girls model not shown.

ALPINE EXPRESS

The new Alpine Express unites comfort, style, and function and is available in a mens, ladies, or girls model.

These popular junior mountain bikes are comprised of durable Hi-tensile tubing and are available in a wide range of two-tone colour combinations. Both models feature Shimano gearing and comfortable anatomic saddles. The girls model uses a mid-rise handlebar and stem combo while the Micro uses a mini bullmoose style bar for smaller riders. The girls mountaineer features L/A cantilever brakes and 24" mini mountain wheels. Perfect for active children and teens.

MICRO MOUNTAINEER/ MINI GIRLS

The Micro and Mini Girls Mountaineer follow a proven design and offer younger mountain bike enthusiasts style and function second to none.

These rugged Junior Mountain bikes come stock with the same quality components found on our adult bikes. Features common to both models include: Hi-tensile frames, light alloy cantilever brakes, Shimano shifters and changers, and durable 24 x 2.0 on/off road tires. The Jammer offers 18-speeds and the mini offers a 12-speed system. Both models utilize a steel cotterless crank with built in chainguards. The Jammer also comes complete with light alloy wheels.

MINI BOYS MOUNTAINEER/JAMMER

Scaled down versions of our adult Mountaineers the Micro Boys and Jammer offer all the features demanded by the younger mountain bike market.

*Wide 26 x 2.125 tires for
a stable, cushioned ride.*

*Durable cantilever style frame
with matching fenders*

*No nonsense Shimano
6-speed drive train.*

The traditional one speed cruiser modified to provide six wide ratio gears. This beauty boasts the same great characteristics associated with our one speed cruisers. High rise cushioned handlebars, wide spring cushioned saddle, and matching painted fenders are all standard features on the Santa Cruz 6-Speed. For the ultimate in comfort and stability choose the Santa Cruz 6-Speed.

SANTA CRUZ 6-SPEED

If comfort, stability, and simplicity are three of your main cycling requirements then look no further. The 1988 Santa Cruz 6-Speed offers all the above and much, much more. See one soon!

FRAME INFORMATION

Outlined below is a brief description of the key characteristics affecting a bicycle's performance. Each model is specifically designed to meet the needs of its intended user.

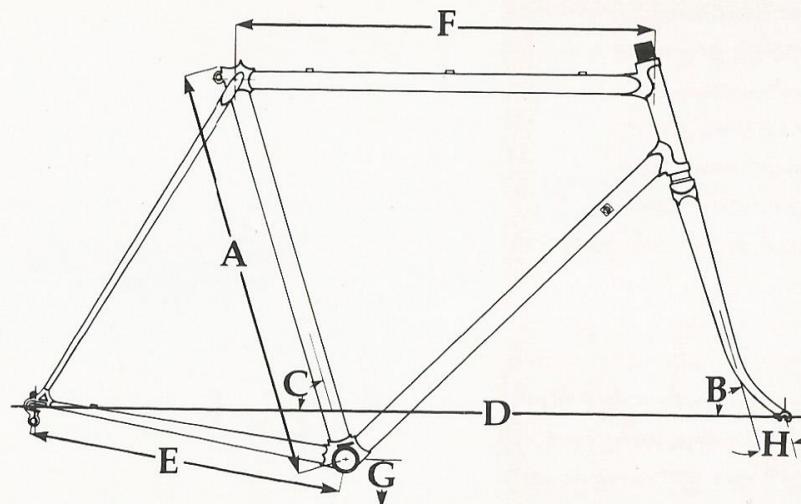

The **seat tube** length determines the size of each frame. It ultimately determines the fit of the bike, as it governs the height of the top tube from the ground.

The **head tube** angle and **seat tube** angle contribute to the control and responsiveness of the bicycle. Low angles generally produce a very smooth stable ride (especially at higher speeds). Steep angles generally produce a very responsive, agile bike capable of more technical riding (eg. twisting trails, or high performance road riding).

The **wheel base** and **chainstay length** also affect the handling of the bicycle. Generally, a long wheel base or long chainstays produce a stable ride in addition to providing some road shock absorption. A short wheel base contributes to a more agile responsive feel.

Bottom bracket height governs the center of gravity of the bicycle and determines overall ground clearance.

For a more detailed discussion of frame characteristics, please consult your local Norco dealer.

The Eurosport was introduced last year, and received rave reviews from across Canada. The 1988 model offers the same great performance and continues to be recognized as an outstanding value. State of the art features include: Shimano 105 groupo including Bio-Pace cranks, and the smooth action SLR braking system, light weight Araya SS-45 black rims with Panaracer 700C slick tires, and a Vetta mundial racing saddle. Please consult the spec sheet for a more detailed component listing.

SIS 

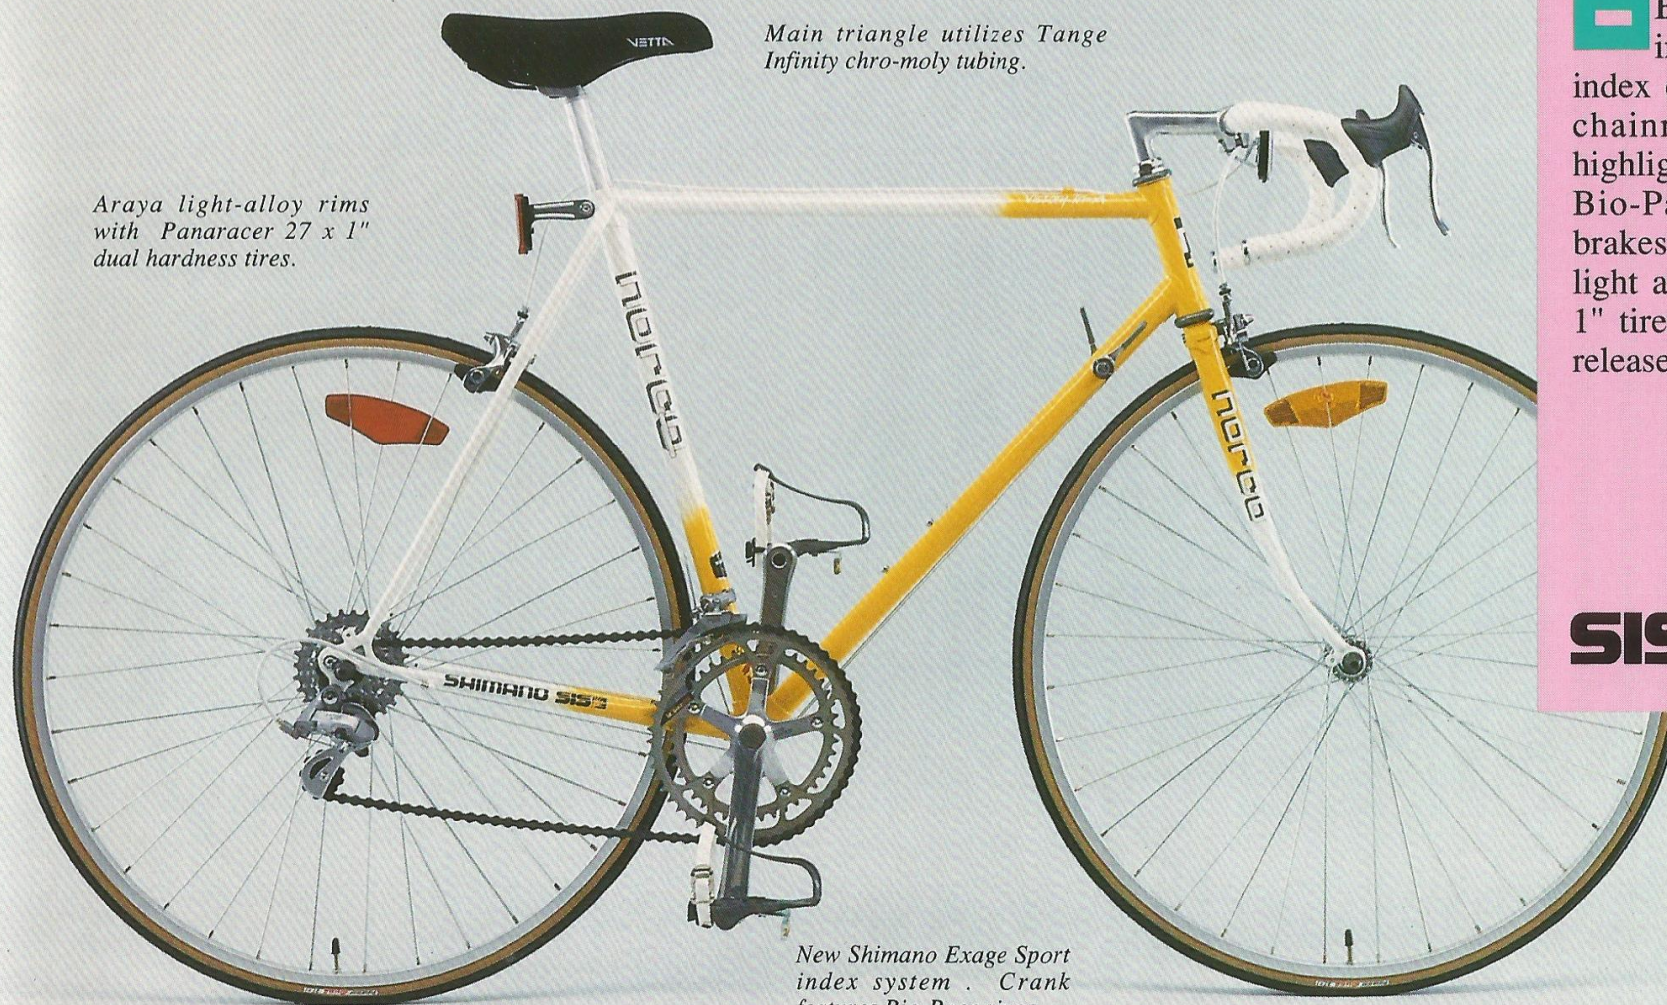

Tight, responsive, Tange trimoly racing frame. Lightweight and extremely durable.

State of the art Shimano 105 braking system.

Shimano 105 crankset with Bio-Pace rings.

EUROSPORT TRI-A

Experience the 1988 Eurosport Tri-A, we're confident you won't find a better equipped, better handling bike anywhere. A must see!

*Araya light-alloy rims
with Panaracer 27 x 1"
dual hardness tires.*

*Main triangle utilizes Tange
Infinity chro-moly tubing.*

*New Shimano Exage Sport
index system . Crank
features Bio-Pace rings.*

The all new Victory Tri-A is one of the hottest looking best performing bikes in this price range. The new Exage Sport equipment includes a switchable front index changer for more positive chainring shifts. Additional highlights include: the Shimano Bio-Pace system, Exage SLR brakes with Aero levers, Araya light alloy rims, Panaracer 27 x 1" tires, and small flange quick release hubs. Check it out!

SIS 

VICTORY TRI-A

This attractive tri-moly racing bicycle features Shimano's new Exage Sport index equipment. Available in a dazzling array of hot new colours.

This innovative frame design is gaining wide acceptance throughout the cycling industry. The 20" model utilizes a standard 700C wheel configuration.

The two smaller sizes utilize the compact frame design with a 24" front fork and shorter top-tube to facilitate a better fit for smaller riders. Other features of note include: Shimano A350 index group, Araya light alloy rims, and Dia-Compe deluxe brakes with compact Aero design levers.

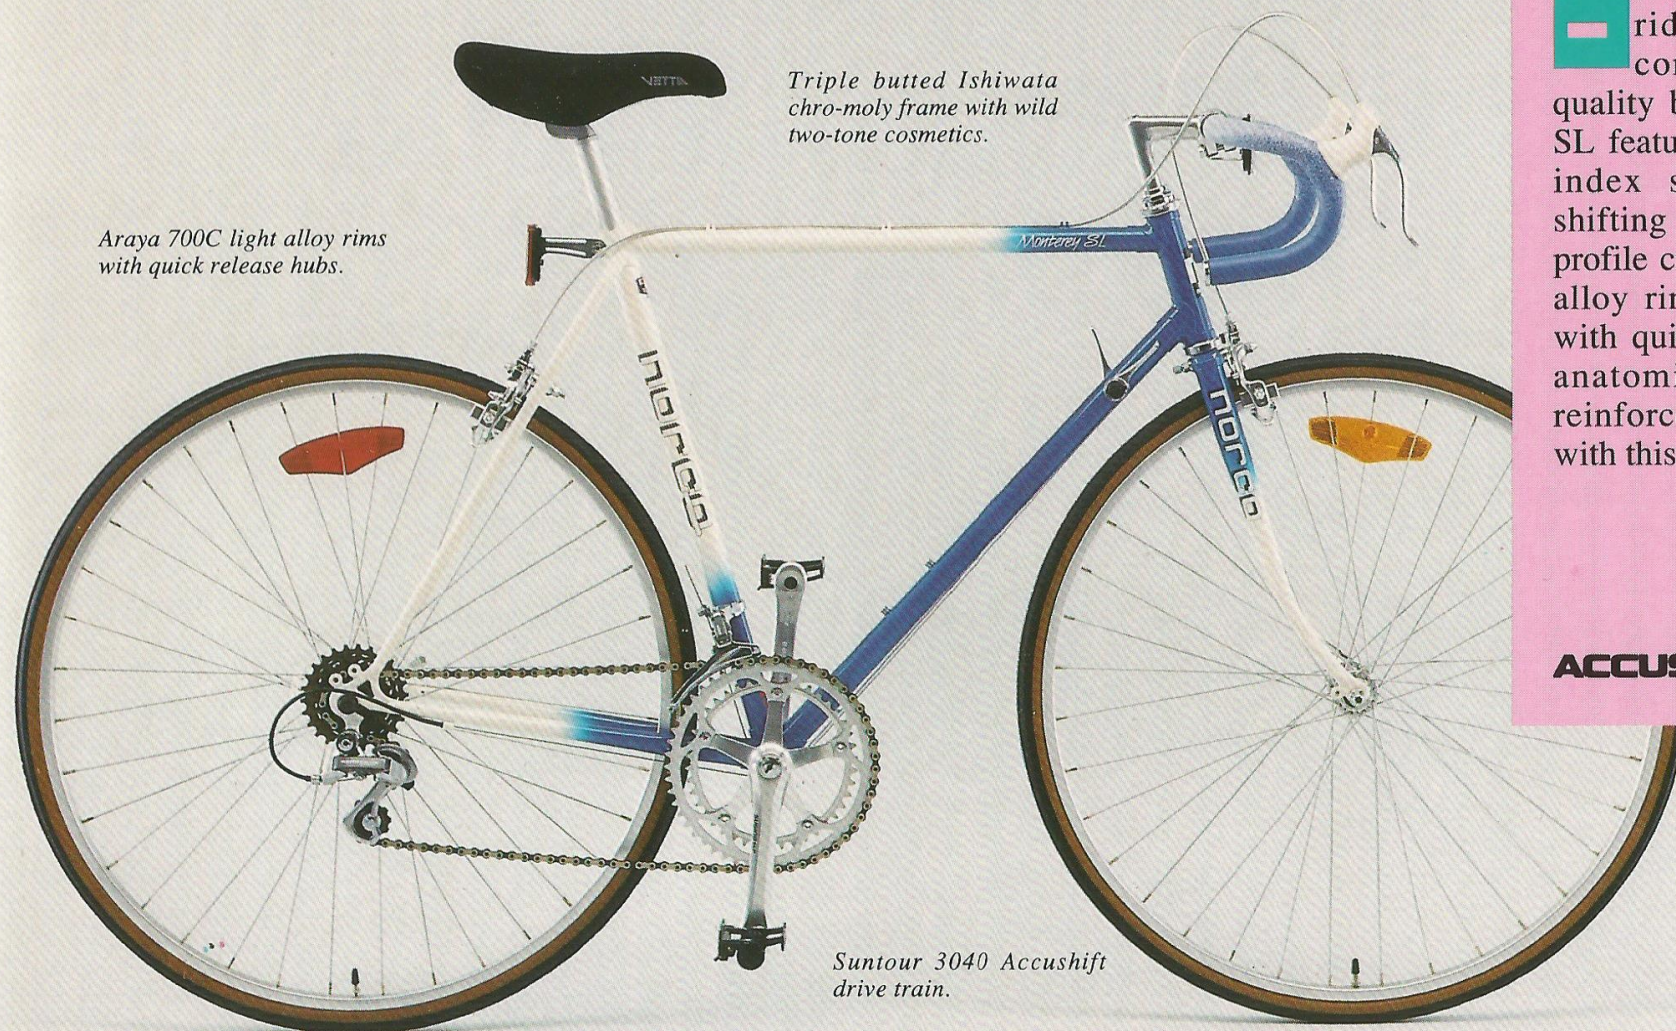

Compact chro-moly frame with a 24" front wheel.

Dia-Compe compact Aero levers incorporating the new BRS system.

New Shimano index shifting front derailleur.

LADYSPORT

Finally a compact bicycle designed specifically to fit smaller adult cyclists. Equipped with Shimano M350 index components.

*Araya 700C light alloy rims
with quick release hubs.*

*Triple butted Ishiwata
chromo-moly frame with wild
two-tone cosmetics.*

*Suntour 3040 Accushift
drive train.*

Precision built from Ishiwata chromo-moly tubing (three main tubes). Ideal for the sport/recreational riders looking for a competitively priced quality bicycle. The Monterey SL features Suntour's new 3040 index shifters for flawless shifting response. Sugino low profile cranks, Araya 700C light alloy rims, Dia-Compe brakes with quick release, and a Vetta anatomic saddle combine to reinforce the value associated with this bike.

ACCUSHIFT

MONTEREY SL

Back by popular demand the 1988 Monterey SL combines a durable chromo-moly frame with the most innovative index equipment available.

The new Norco GT comes standard with a complete assortment of touring related braze-ons. The front fork is equipped with low rider rack fittings, and the rear stays have extra eyelets to accommodate rear rack and fenders. The frame (three main tubes) and fork are constructed from full chro-moly to provide a durable light weight frame. 18 speed wide ratio gearing is supplied by Shimano light action index equipment. Brakes are Dia-Compe cantilevers (touring model).

SIS 

Tri-moly touring frame with a full compliment of rack braze-ons.

Chro-moly front fork with low rider rack braze-ons.

32-42-52T 175mm touring cranks.

NORCO GT

If dependability and durability are important to you then take a look at the 1988 Norco GT. It employs all the features requested by today's touring cyclists.

Araya light alloy rims with quick release front hub.

Tri-moly frame available in a wide range of sizes (19-27").

SR light alloy double cranks with 42-52T steel rings.

This tri-moly sport bike is available in a wide range of colours and sizes. It comes equipped with the following quality components: Shimano light action SIS gearing, SR alloy crankset, light alloy caliper brakes with quick release, light weight Araya rims, and a quick release front hub for transportation and storage convenience. See one soon at your local Norco dealer.
NOTE: Also, available in a 27" frame size for taller than average riders.

SIS 

MONTEREY

This sleek two-tone beauty offers the sport/recreational rider affordable performance. Ask for it at your local Norco dealer.

These durable hi-tensile frames are ideal for commuting or sport riding use. They feature: dependable Shimano gearing, cotterless steel crankset with chainguard, light alloy side pull brakes, and foam covered handlebars for extra road shock absorption. Brake levers include removable safety levers. Wheels are made with quality light alloy rims and small flange steel hubs. Available in two-tone colour combination.

BERETTA

These quality packed 12-speeds offer the recreational rider both value and function. Available in mens or ladies frame styles.

NOMAD

The mens and ladies Nomads provide dependable cycling pleasure at an affordable price. Available in an assortment of attractive colours and sizes.

The 1988 Nomads are ideal for recreational cyclists looking for a competitively priced quality bicycle. Features of note include: 27 x 1-1/4" steel wheels, quality gumwall tires, Shimano gearing for trouble free shifting, and light alloy caliper brakes with safety levers. Handlebars come with 4-piece foam grips for a well cushioned comfortable ride. Consult your local Norco dealer for further information.

LIMITED LIFETIME WARRANTY

NORCO PRODUCTS LTD. (hereinafter called NORCO) warrants the replacement or repair of any original part due to defect in material and/or workmanship for the period of one year from date of purchase. Such purchase must be documented by original sales slip or other proof of purchase by such owner. This warranty shall continue in full force and effect for the first year of the original ownership following the date of purchase.

NORCO at its sole discretion, will replace or repair without charge, any original part that is determined by **NORCO** to be defective under the terms of this warranty. However, transportation and dealer labour charges are not covered hereunder.

Failure due to accident, abuse, neglect, normal wear, stunt riding, commercial use, dirt riding, improper

assembly, improper fit, maintenance by any other than an authorized **NORCO** dealer, or use of parts inconsistent with the use originally intended for the bicycle as sold are not covered by this warranty.

This warranty does not apply when the bicycle is used in any competitive event, or when used for training for such competitive events.

Due to the nature of the sport, mountain biking may induce accelerated wear on the frame and components when used for off-road purposes, and the resulting wear will not be considered warranty.

There are no other warranties or guarantees, expressed or implied, made by **NORCO** of this bicycle. The exclusive liability of **NORCO** and/or any of its authorized dealers, affiliates or agents pursuant to this

warranty shall be for the replacement or repair of the defective part, and incidental or consequential damages are expressly excluded hereunder.

LIMITED LIFETIME FRAME WARRANTY:
Due to superior quality control and design, **NORCO** warrants the frame against defects in materials and/or workmanship, pursuant to the terms and conditions outlined above, for the duration of the original ownership following the date of purchase.

NOTICE: In no event shall **NORCO**, its agents or dealers be liable to the purchasers of its bicycles, or to third parties for any incidental damage, consequential damage, or personal injury, due to its use.

NOTE: All warranty inquiries should be made through an authorized **NORCO** dealer.

NOTE: Specifications are subject to change without notice. Actual colours may differ from pictures shown. To arrive at approximate weight comparisons a standard 21" frame has been used on all models where applicable. Due to the dangers inherent with the sport of cycling **NORCO PRODUCTS LTD.** urges the consumers and dealers using our bicycles (and equipment) to wear, and use proper safety equipment (including certified helmet, reflective clothing, bicycle reflectors, gloves, and other appropriate safety gear) during any riding session.
