

NORCO[®] 1990

M O U N T A I N B I K E S

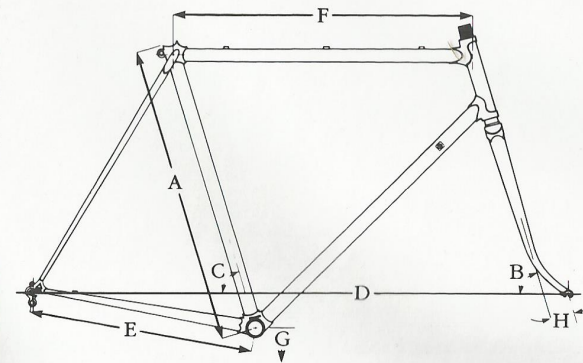

FRAME INFORMATION

F Frame Information

Outlined below is a brief description of the key characteristics affecting a bicycle's performance. Each model is specifically designed to meet the needs of its intended user.

The *seat tube* length determines the size of each frame. It ultimately determines the fit of the bike, as it governs the height of the top tube from the ground. • The *head tube* angle and *seat tube* angle contribute to the control and responsiveness of the bicycle. Low angles generally produce a very smooth stable ride (especially at higher speeds). Steep angles generally produce a very responsive, agile bike capable of more technical riding (eg. twisting trails, or high performance road riding). • The *wheel base* and *chainstay length* also affect the handling of the bicycle. Generally, a long wheel base or long chainstay produces a stable ride in addition to providing some road shock absorption. A short wheel base contributes to a more agile responsive feel. • *Bottom bracket* height governs the centre of gravity of the bicycle and determines overall ground clearance.

For a more detailed discussion of frame characteristics, consult your local Norco dealer.

Shimano low mount, rapid fire STI thumbshifters. Deluxe chromoly Tioga T-Bone stem.

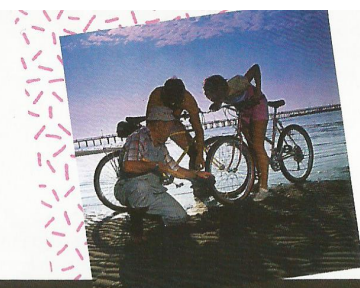

New raised chainstay frame design produces agile handling and eliminates the nuisance of chain suck.

Premium quality Tange Prestige tubing. Shock diffusing Vetta Gel saddle.

The 1990 Norco mountain bike line represents our commitment to excellence.

- Each model is meticulously fine tuned to achieve the optimum blend of frame materials, geometry, components and cosmetics.
- We utilize the latest innovations in component development from Shimano and Suntour, the world's foremost parts manufacturers.
- Shimano's "Rapid Fire" STI low mounted thumbshifters and Suntour's "X-Press" levers provide unequalled shifting response. Shimano's system incorporates a "Push Only" mechanism which is faster and easier to operate, and always returns to the same position under your thumb.
- We are pleased to announce that the revolutionary Hyperglide shifting system is available on all Shimano equipped models. Hyperglide freewheels utilize computer designed tooth shapes and sprocket relationships which result in flawless shifting performance even when operated under load. In addition, Hyperglide technology has been incorporated into front chainrings (known as Superglide) to aid front shifting performance.
- Our dynamic new colours and graphics cover both ends of the spectrum. We offer conservative yet distinctive one-tones, and a wild assortment of dayglows, splashes and splatters.
- Visit your local Norco dealer soon and check out the complete 1990 line.

Premium
performance for
off-road fanatics.

The focal point of this race prepped thoroughbred is the lightweight, ultra tough Tange Prestige chro-moly main triangle. A super durable Tange chro-moly fork with oversize blades, full chro-moly stays and a distinctive high gloss finish make this bike tough to beat.

Shimano Deore XT 21-speed STI Hyperglide equipped with powerful, easy maintenance front and rear SLR cantilever brakes.

Also includes a full complement of Tioga parts and accessories including:

Prestige II handlebar, T-Bone stem, Bio-Grips, and aggressive Farmer John Cousin tires.

RAMPAGE PRESTIGE

Responds effortlessly to rider and terrain demands. Built to withstand the punishment of off-road riding, the Rampage frame is manufactured in Japan using Tange MTB double butted chro-moly tubing, Shimano Deore XT components including 21-speed STI push button gearing, SLR brakes, Super-glide chainrings, and Hyper-glide cogs for improved shifting under load. Utilizes comfortable Vetta Gel saddle.

RAMPAGE

SASQUATCH

Challenge seeker. Equipped with Suntour XCD components, this Japanese manufactured Tange full chro-moly bicycle is built to last. The XCD group features the new 21-speed push button X-Press shifters, Accushift Plus chainrings for improved shifting performance, and reliable BR5 brakes. Also note the deluxe black chro-moly seat post, lightweight Araya RX-7 rims, and Panaracer ground biting Khartoum tires.

TUKTOYAKTUK

Hi-tech lightweight T-7000 aluminum.

Redesigned for 1990, the Tuktoyaktuk main triangle and rear stays are comprised of high grade TIG welded T-7000 aluminum. The chromo-moly front fork features oversize "Uni-trak" straight blades. Components used are a selection of Shimano Exage 500 and Exage 400 equipment. The brake and shifter combination features 21-speed STI push button thumbshifters for feather touch control. SLR cantilevers, Superglide Bio-Pace chainrings, Hyperglide cogs, Ritchey Force stem, Araya RX-7 rims, and rugged Ritchey Quad tires are all standard features.

PINNACLE

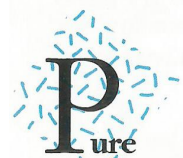

Exciting design, meticulous craftsmanship.

The 1990 Pinnacle takes advantage of an innovative raised chainstay frame design which delivers superb handling characteristics and eliminates the nuisance of chain suck. The Tange chro-moly "Unit-trak" straight blade fork provides agile, precise

response. Features of note include:

Shimano Exage 500 STI push button 21-speed shifters, SLR brakes with powerful seat-stay mounted U-brake (with booster), Hyperglide rear cogs, Superglide front chainrings, Ritchey Force stem, Ritchey grips, chro-moly seat post, Araya VP-20 rims, and paddle style skinwall off-road tires.

BIGFOOT

Pure
performance,
pure pleasure.

The chro-moly (3 main tubes) Bigfoot frame takes advantage of a mono trak rear mono stay design which effectively stiffens the rear end, producing a very responsive ride. The Bigfoot is outfitted with Shimano Exage 500 21-speed STI push button shifters and Exage 300 derailleurs, Superglide cranks, and linear response brakes. The Hyperglide freewheel cogs dramatically improve shifting performance in a variety of conditions and terrain. Additional highlights include a comfortable lycra covered gel saddle, Ritchey Force stem, lightweight Araya VP-20 rims, and multi-purpose skinwall tires.

KOKANEE

Performance and value tailored to your needs.

The Kokanee features a rugged sloping frame design with an oversize chro-moly downtube for additional strength. Component highlights includes: Shimano 21-speed STI push button shift levers, a powerful Exage 500 seat-stay mounted rear U-brake (with booster), Bio-Pace Superglide front cranks for improved chainring shifting response, and Hyperglide freewheel cogs. A sleek chro-moly stem, durable light alloy Araya rims, tough chro-moly seatpost, and multi-purpose mountain tires represent additional key highlights on the 1990 Kokanee.

BUSH PILOT

Hi-tech features and function at an unbeatable price.

Available in a men's or ladies' model, the Bush Pilots are packed with top-notch components. Note the durable sloping top-tube frame design with reinforced seat-collar, "Uni-trak" straight blade fork, and spell-binding new paint and graphic combinations. Additional merits include: Shimano Exage 200 21-speed SIS thumbshifters with Hyperglide freewheel cogs and smooth shifting Superglide front chainrings, dependable light action Shimano linear response brakes, comfortable textured mountain saddle, lightweight Araya rims, and grippy on/off road tires.

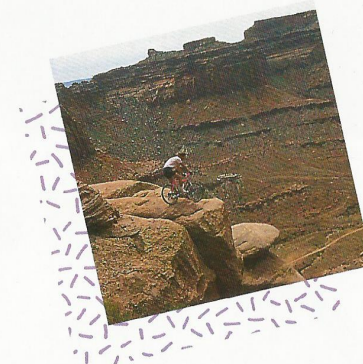

Crisp shifting
21-speed Hyperglide
equipped.

The heart of the Mountaineer SL is its rugged hi-tensile frame and sleek long radius Uni-crown fork. The Hyperglide rear cogs increase shifting response and the low profile cantilever brakes assure you of reliable stopping power. Other key highlights include: a flat racing style handlebar, quality lightweight alloy rims and hubs, and a selection of dazzling new colours.

MOUNTAINEER SL

MOUNTAINEER

Practical price,
dependable design.

The Mountaineer is available in a men's or ladies' model, and boasts a sturdy hi-tensile frame and Uni-Crown fork. Hassle free shifting performance is provided by Shimano 18-speed SIS shifters, and Hyperglide freewheel cogs. Responsive cantilever brakes with three finger levers, comfortable mid-rise handlebars, and soft touch Kraton grips represent additional key highlights.

Second to none.

This durable 24" wheel mountain bike delivers performance features previously unavailable to this age group. Tough, light-weight Araya alloy rims with dual purpose tires, powerful rear U-brake with front cantilevers, and comfortable padded saddle are only a few of the Jammer's many features. The 18-speed Shimano Hyperglide gearing, and durable hi-tensile frame will provide years of trouble free enjoyment.

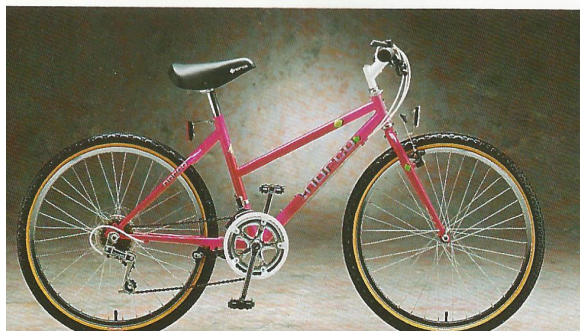

JAMMER

MINI MOUNTAINEER

Rugged, dependable junior mountain bikes for boys and girls.

Eye catching cosmetics and top quality features make the minis a natural choice for younger cycling enthusiasts. Shimano 12-speed Hyperglide equipped. Sturdy hi-tensile frame with sloping toptube, sleek rear mono stay, and beefy straight blade fork. Reliable braking control provided by the combination of front cantilevers, and a chainstay mounted rear U-brake.

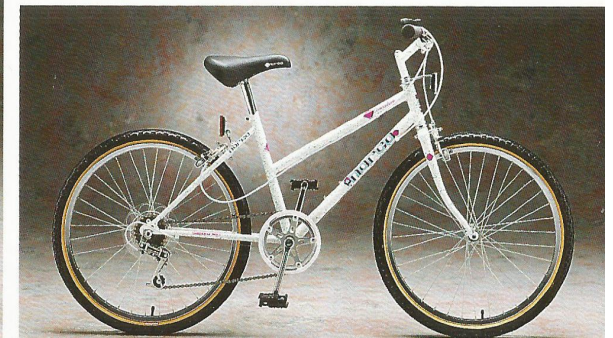

CHEROKEE

Trouble free enjoyment for value conscious cyclists. The men's Cherokee utilizes a crisp, responsive 12-speed Hyperglide drivetrain, easy handling mid-rise handlebars, dependable alloy side-pull brakes with full length levers and versatile on/off road mountain tires. Available in an array of bright new colours.

CHEROKEE

Stylish, practical bicycles ideal for recreational use. In addition to the men's Cherokee we offer a ladies' and 24" wheel girl's model. Attractive colours, hassle free components, and an affordable price make these bikes truly unique. The full size ladies' model features 12-speed Hyperglide gearing, responsive side-pull brakes, and mid-rise handlebars. The girl's model shares many of the above features but is equipped with easy to use 6-speed Hyperglide gearing.

A natural choice for younger mountain bikers.

A quality Hi-tensile junior mountain bike available in a boy's or girl's model.

Features include easy shifting Shimano 6-speed Hyperglide index gearing, safe and reliable light alloy side-pull brakes, double circular chainguard, comfortable padded saddle, rugged chrome plated rims, and multi purpose gumwall tires. The hot new colours and graphic combinations are bound to be a hit.

MICRO MOUNTAINEER

Multi-purpose, value packed fun.

Designed for road and light off-road use, the Hybrid Pro offers true versatility. This strong lugged chro-moly frame (3 main tubes) and fork assures you of lasting quality. 700 C alloy wheels and high volume 37 C tires smooth out the pot-holes. Riding comfort is enhanced by a lycra gel saddle. Suitable for touring, the Hybrid Pro comes stock with fender, rack, water bottle, and low rider braze-ons. Powered by Shimano 18-speed Hyperglide components.

WARRANTY

LIMITED LIFETIME WARRANTY

NORCO PRODUCTS LTD. (hereinafter called NORCO) warrants the replacement or repair of any original part due to defect in material and/or workmanship for the period of one year from date of purchase. Such purchase must be documented by original sales slip or other proof of purchase by original owner. This warranty shall continue in full force and effect for the first year of the original ownership following the date of purchase. • **NORCO** at its sole discretion, will replace or repair without charge, any original part that is determined by **NORCO** to be defective under the terms of this warranty. However, transportation and dealer labour charges are not covered hereunder. • Failure due to accident, abuse, neglect, normal wear, stunt riding, commercial use, rental use, dirt riding, improper assembly, improper fit, maintenance and/or assembly by any other than an authorized **NORCO** dealer, or use of parts inconsistent with the use originally intended for the bicycle as sold are not covered by this warranty. • This warranty does not apply when the bicycle is used in any competitive event, or when used for training for such competitive events. • Due to the nature of the sport, mountain biking may induce accelerated wear on the frame and components when used for off-road purposes, and the resulting wear will not be considered warranty. • There are no other warranties or guarantees, expressed or implied, made by **NORCO** of this bicycle. The exclusive liability of **NORCO** and/or any of its authorized dealers, affiliates or agents pursuant to this warranty shall be for the replacement or repair of the defective part, and incidental or consequential damages are expressly excluded hereunder.

LIMITED LIFETIME FRAME WARRANTY: Due to superior quality control and design, **NORCO** warrants the frame against defects in materials and/or workmanship, pursuant to the terms and conditions outlined above, for the duration of the original ownership following the date of purchase.

NOTES:

- Front fork is not considered part of the frame and the limited lifetime frame warranty does not apply.
- In no event shall **NORCO**, its agents or dealers be liable to the purchasers of its bicycles, or to third parties for any incidental damage, consequential damage, or personal injury, due to its use.
- All warranty inquiries should be made through an authorized **NORCO**, **NISHIKI**, or **FIORI** dealer.
- Day Glow paints will fade more rapidly than regular colours when exposed to ultra-violet light. Due to properties inherent in day-glow paint pigments, colour fading will not be covered by this warranty.
- Specifications are subject to change without notice. Actual colours may differ from pictures shown. Weights are approximate.
- Due to the dangers inherent with the sport of cycling **NORCO PRODUCTS LTD.** urges the consumers and dealers using our bicycles (and equipment) to wear, and use proper safety equipment (including certified helmet, reflective clothing, bicycle reflectors, gloves, front cantilever cross-over cable safety hanger, and other appropriate safety gear) during any riding session.
- All **NORCO**, **NISHIKI** and **FIORI** bicycles (excluding 12" and 16" sidewalk bikes) are supplied with C.P.S.C. approved reflectors.

YOUR AUTHORIZED NORCO DEALER

PHOTOGRAPHY ENTHUSIASTS

We would like to see your photographs in our brochures and welcome any cycling oriented pictures depicting products distributed by Norco. Please send photographs to our Vancouver address (shown below) attention: Advertising Department. In the event your print (& negative), 35 mm slide, or transparency is selected, you will receive \$200 (retail value) of NORCO products. Photographs not selected will be returned.
