

A full-page photograph of a male cyclist in a red, white, and blue jersey and black shorts, riding a Schwinn bicycle on a paved path through a wooded area. The cyclist is in a dynamic, forward-leaning position, looking towards the camera. The background is filled with out-of-focus trees and foliage, creating a sense of motion and a natural setting. The lighting is bright, suggesting a sunny day.

SCHWINN®

*Lightweight
Bicycles
1983*

FROM EDWARD R. SCHWINN, Jr.
PRESIDENT
SCHWINN BICYCLE COMPANY

For over 85 years, Schwinn has offered quality bicycles meeting the highest standards of design and engineering. The 1983 line of Lightweight models is in keeping with and advancing that family tradition on every bicycle carrying the SCHWINN name to assure you quality, dependability and value.

All Schwinn bicycles are designed and built with you, the rider, in mind. Consult your Schwinn Dealer. Let his experience and knowledge assist you in your selection. Here are some of the features to look for among Schwinn's Lightweight bicycles:

- **Functional Design** - Each bicycle is engineered for uncompromised performance in a particular cycling activity.
 - **Lightweight Frames** - Chrome-moly tubing, a special alloy developed for the aerospace industry, is used by Schwinn to minimize weight without sacrificing strength.
 - **Aluminum alloy** further reduces a bicycle's weight by replacing steel in the rims and componentry while again retaining relative strength.
- NOTE: LOSS MUST BE POLISHED PRIOR TO PLAYING*
