

MOUNTAIN BIKES '91

SCOTT USA®

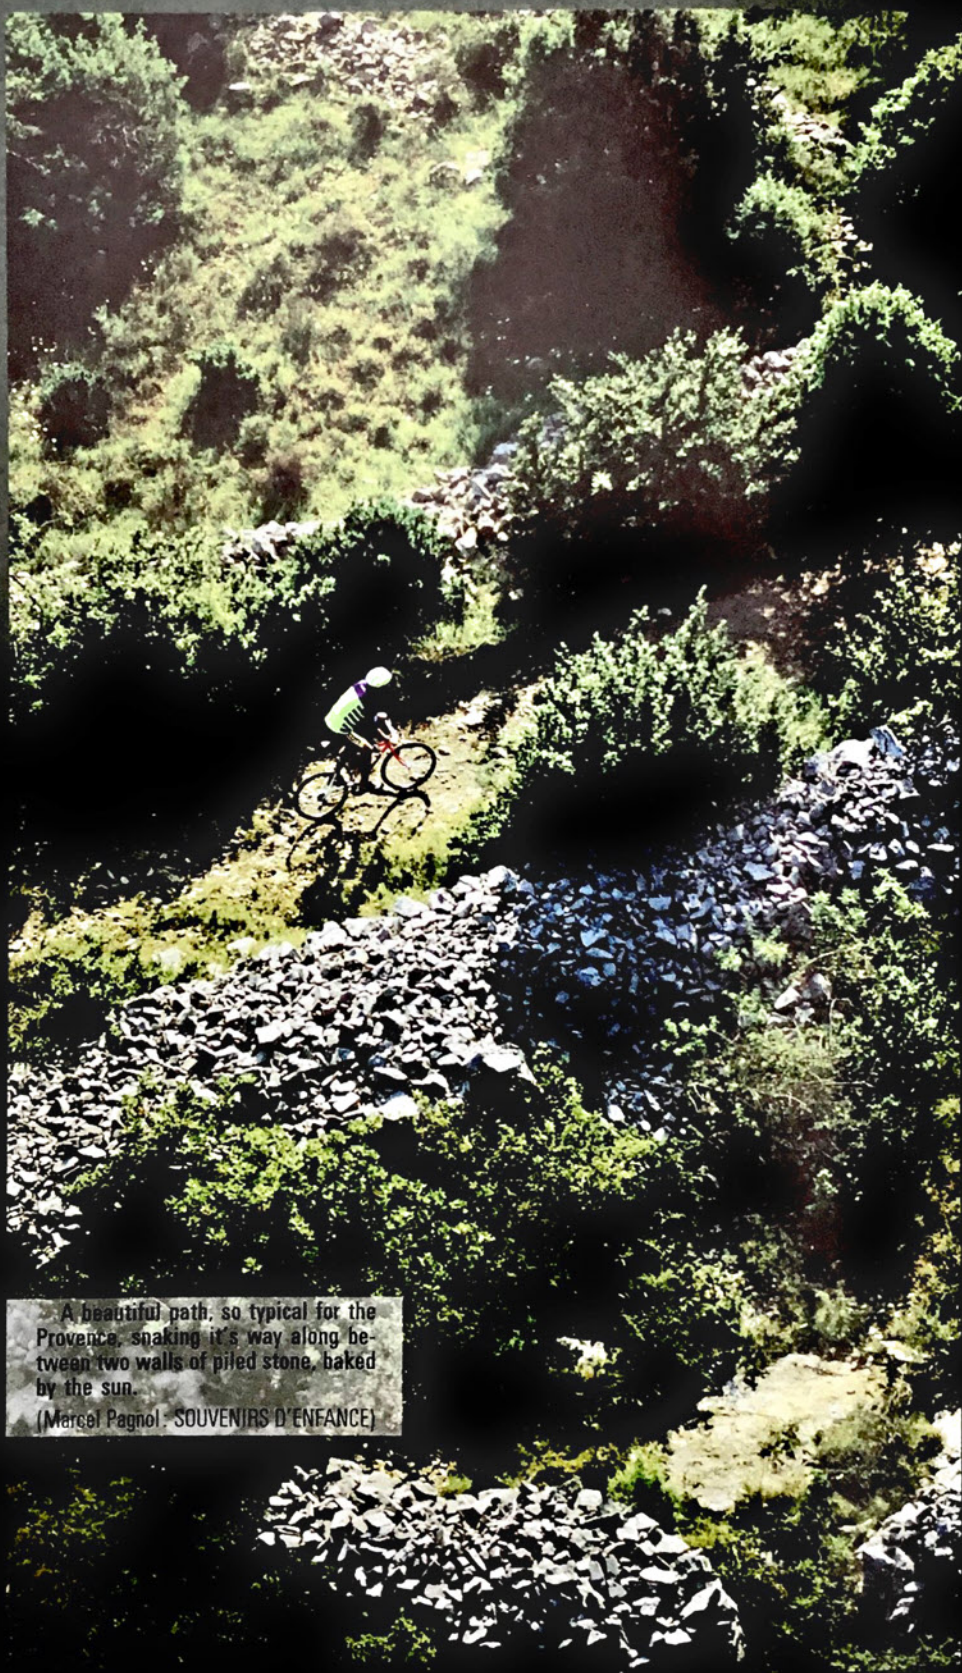

Those who build 1st class mountain bikes depend on three basic things. First, the right ideas. The specialized teams of engineers and designers at **Scott** are underway daily to find the solutions for the perfect bike. Second, finding the right partners. Racing enthusiasts that couple their desire to develop the newest technical innovations and to put them to use in the hardest competition. These are definitely the best testing grounds to find the answers for the better bike. Third, the knowhow. Years of experience coupled with unconventional achievements right up to the series production stage.

The way to success allows no room for compromise!

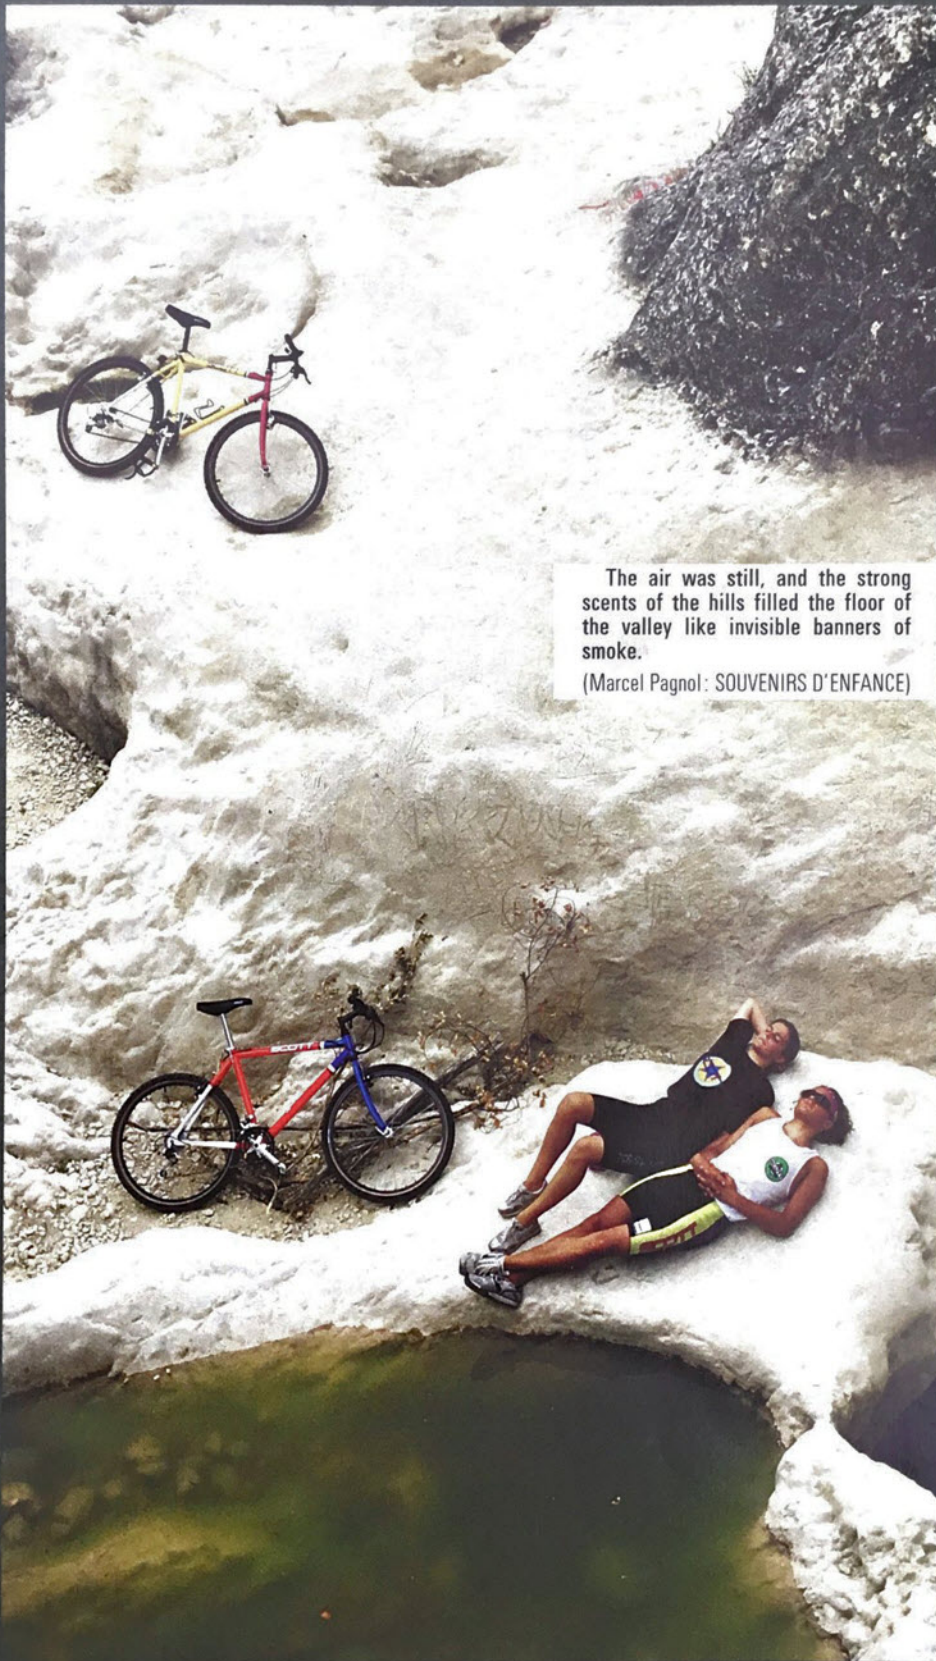

Scott — Mountain Bikes or superlatives.

A beautiful path, so typical for the
Provence, snaking it's way along be-
tween two walls of piled stone, baked
by the sun.

(Marcel Pagnol : SOUVENIRS D'ENFANCE)

The air was still, and the strong
scents of the hills filled the floor of
the valley like invisible banners of
smoke.

(Marcel Pagnol: SOUVENIRS D'ENFANCE)

As far as the eye could see, not a
village, a farmhouse or even a shed.
(Marcel Pagnol: SOUVENIRS D'ENFANCE)

JUNIOR

A bike made for little "Big Adventurers": Robust, solid, ready for anything.

Comp JR. The mountain bike for kids. 20" wheels with Shimano 6-speed. Cantilever brakes, fenders and rack. All it needs to make the young bikers eyes light up.

Come on! The whole world is waiting for explorers.

Team JR. 24" wheels. Shimano TY20, with 18 speeds. Cross tires, Alu rims for good braking. All the dreams the junior adventurer had, came true!

MOUNTAIN BIKES '91

ADVENTURE

Live the freedom of wide open spaces. A mountain bike and away we go!

Peak. Cromoly tubing, Shimano 200-GS with STI Rapid Fire, Biopace, 21-speed. Everything you need: Fenders, rack, **Scott** grips, **Scott** tires, 2 color versions to choose from.

Lady Sawtooth. The engineers at **Scott** have without compromise designed this frame to meet the specific needs of the ladies. The result is: Adventure pure for ladies. Technical specifications same as Sawtooth.

Sawtooth. 4130 Cromoly tubing, Shimano 300 LX STI, 21-speed, SRP (**Scott Racing Products**) chainstays. All frame sizes have an individual geometry. 2 color versions to choose from.

SCOTT USA®

SPORTS

The mountain bikes from the Scott Sports Series:
The interplay between the will to win, elegance
and perfect technique.

Montana. Cromoly tubing, Shimano 500 LX STI,
Hyperglide, 21-speed, Avocet saddle, Oversize Headset,
SRP forks. 2 color versions to choose from.

Montana Sportswoman. The women's bike with a
short sloping toptube combines the advantages of a
ladies bike with those of a Sport-bike. For sporting
ladies that want to know!

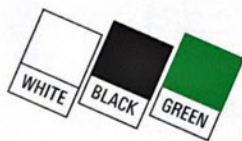

MOUNTAIN BIKES '91

SPORTS

A new day, a new destination: "The mountain".
Your material: Your bike from Scott. (No boulders
big enough that you can't move them.)

Boulder. Tange double butted tubing. Round chain-
rings, 21-speed, Avocet Racing saddle, Oversize Head-
set and more. 2 color versions to choose from.

High, higher, way up there. Welcome on the top.

Windriver. Tange Infinity double butted tubing. Shi-
mano Deore DX, STI, Lite stem, Ritchey tires, Araya
rims, Avocet saddle. 2 color versions to choose from.

SCOTT USA®

ALUMINUM

Heart thumping, breathe deep. Okay? Let's go!

Superlite. Oversize alu-frame, Shimano DX. Scott forks, **Scott** Racing saddle, Ritchey tires, Ukai rims. All of a sudden everything got really easy!

The day that everything fit: condition, the course and the bike.

Super America. Showa 7000 tubing, Shimano XT, Avocet leather saddle, Ritchey tires, Mavic rims, DT spokes. No more limits!

Concentration, the final adjustments and the last check – everything's perfect.

Super Evolution. High-Tech packed with the latest design developments. Supersize-Alu-frame, with revolutionary ECS-geometry. Shimano Deore XT, Ritchey tires, Mavic rims, DT spokes. Super Evolution – the future today!

MOUNTAIN BIKES '91

RACING

Start! So explosive the body,
so total this mountain bike.

Pro Racing. Columbus MAX OR
tubing. Shimano Deore XT, Alloy
lite stem and bars, Kevlar tires,
anodized Mavic rims, DT spokes.
Leather saddle.
Pro Racing – for winners only!

SCOTT USA®

The pulsing rythm of downtown, you feel it on your skin with your city bike, the most versatile of all vehicles.

XC Town. Shimano 200 GS, Biopace, Hyperglide and 21-speed, fenders and rack.

All aboard please! The fascination of all the high-ways and by-ways. What a way to see the world.

XC Fun. Lightweight frame, Shimano 500 LX with STI, 21-speed, 700×35 C tires and Araya rims. Complete with fenders and rack.

Hair flowing in the wind on the way to the finish line. Arrived with a great time!

XC Lady. The same as XC Town except that the frame was built for Lady use. XC LADY for the chic and more!

TECHNICAL CLOTHING- SPORTSWEAR

The secret of bike clothing. We had just seen them for a short moment and knew we couldn't do without them. They're exciting, functional and top styled. Words alone don't say enough. (The sportswear from **Scott**.) It's probably easier if you get on your bike and go to see your **Scott**-dealer. He'll have a catalog for you that will let you in on the secrets of this exceptional line of bike clothing. Sportswear from **Scott** — the haute-couture for all bikers.

SPECIFICATIONS

The frame, the basis of success

Many different factors are involved in the development of frames, the backbone of all bikes. A combination of first class materials, scientific knowledge of ergonomics and bio-mechanics plus a well researched design.

Frames from Scott for utmost functionality

Developing the perfect frame we set the goals as a combination of not only the size of the rider but also consider the range of use.

The different uses and topographical differences make considerably different demands on a frame.

A bike for the Racing Series must be very flexible but also stay very stable and maneuverable at high speeds. A Sport-bike requires along with stability, maneuverability and maximum ground clearance. An adventure bike must stay safe and easy to maneuver in the tightest places and under the hardest conditions. To reach these goals Scott is building all frames using the principals of **Variable Angle Semi Slopings**. This allows us to build frames that don't just function well on the test rides but for a lifetime of optimal handling and comfort.

Individual frame measurements

An example of frame geometry: 71°/73° can be the perfect specifications for a 19" racing bike but would be worthless for a 16" adventure bike. This is why Scott builds all frames with new geometries for all riders sizes and uses. First we start with a complete spectrum of frame sizes. These combined with the seat-post angle set at a correct ergonomic position with the knee and hip, the length and height of the top tube to insure the correct position of the upperbody. This now enables us to find the optimal steering position. Scott frames have a margin from 3° to 4° for the seat-posts and 8.5 cm for the top tube — these are Top Standards!

The Semi Sloping Design

The highly developed and newly reworked and upgraded **Semi Sloping Design** with the semi sloping top tube will be found on all Scott frames of the '91 series. It brings the mountain bike a maximum of balance and safety at a minimum of weight. A dynamic of sophisticated appeal.

The Super Slope Design

The **Super Slope Design** with a shorter and steeper sloping top tube is designed to meet the specific needs of the ladies.

ACCESSORIES

Perfection is found in details. Ride to your next **Scott**-dealer and see for yourself. There you'll find the special **Scott**-accessories catalog and the whole line on sale. Check their function and design. We at **Scott** think you may agree when we say: "the little or even unseen details can make the difference to the triumphant."

In a natural semicircle there rose
before me an immeasurable landscape
right up to the sky.
(Marcel Pagnol: SOUVENIRS D'ENFANCE)
