TORKER

BMX Racing

Torker BMX in '99 - world domination with Matt Hadan as the head tyrant. This years BMX line is extremely powerful.

Don't even think about looking over at 'em unless you enjoy 50 lashes. Ok, we will let you take one peek before we crush you into the ground. That's enough, no more looking, if you like what you see go down to the bike shop on the corner & get one yourself, you know too much - We must break you now...

Matt Hadan controlling the wheel like a team captain.

TR5.5 Speed costs money, how fast do you want to go? That old saying doesn't apply when you're talking about the top of the line Torker 5.5. 3-piece tubular chromoly cranks, sealed bearing Torker hubs and a Pro XL sized frame don't come cheap. Matt Hadan doesn't mind not being able to use the company helicopter anymore, Helicopter fuel costs alot, the TR5.5 doesn't.

TR5.7 This bike is all about old school. Check out the assless only cruiser that'll hold up to the brutal punishment of Clarence Perry.

The front end of the TR5.7, throw in Torker's exclusive Twin Top tubes and you've got the Earthquake demands the best, so we robbed all the parts off the TR5.5 to create a bike that's off the Richter scale.

TR5.3 Where's the beef? The TR5.3 is plenty beefy, a proven 7005 aluminum frame, Torker 81g

Beef cranks, and a fork that'll stick it out even when that 20 foot set of doubles is 2 feet longer than your test.

TR5.1 It's Sunday, so it must be race day, and you don't want to look like the squids that don't make it out of the 11x semi. The TR5.1 will set you apart from the rest of the pack and give you what it takes to pull away from them in the main, too.

TR4.5 It's been almost 20 years since a mini Torker has ripped up the track the way the

TR4.5 is gonna. Jason Jensen would be jealous if he was still racing, maybe Jabberjaw Jr. will be the next unkie-biting superstar.

TR2.0 If you're tired of tearin' up cheap bikes that your mom buys you at the department doesn't ask questions. It's got a threadless headset, alloy platform pedals with chromoly axles

and race proven angles.

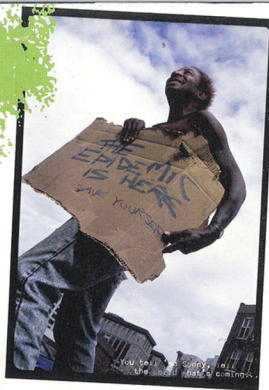

V-type brakes and Torker's exclusive Twin Top Tube. Rule the streets with the TR1.8!

TR1.8 Just getting into dirt? Check out the new TR1.8. It's got alloy rims

Trail Biker

What's the time? It's time to get ill...

The new Terker trail bikes are sick to the bone. Are you starting to get the shakes? Take one of these & call us in the morning...

Epidemic The best of the best, that was our philosophy when we designed this bike. We started with a full chromoly frame & fork, added Terker 3 piece tubular chromoly crankset, sealed Terker hubs with 16mm axles, Chrome triple wall rims with stainless spokes, a Dia-Compe 990 U-brake and CNC'd Welgo pedals. This is one ultimate street/trail bike. Yea we're sick, but it's the Epidemic and we've been infected.

Plague This is the bike that's going to wipe out the competition. Compared to the Terker, it's the perfect mix of 7-gauge ready state and a frame that's

The first time you see the Plague at the local trails, you'll agree this bike is highly overbuilt. The Plague is spreading, hurry up, get one before it gets you.

Virus This is the only Virus you'll ever want to catch. Maybe if it didn't have 16mm

axles, a U-brake or Chromoly cranks you'd be able to right it off with some antibiotics. But this Virus has mutated and it's going to be a tough one to shake. Vaccinations available, see your local Terker Dealer.

At the right time, we designed the Wizard to help you pull all of these

Freestyle

your ability, we think it's just because you don't have the right bike. The Torker Wizard supernatural tricks your gym teacher doesn't think possible & your physics teacher just can't understand. Hey, there's always Junior college to learn Calculus, again.

Jester Just take a look at the sick-o sized down tube on the Jester & you'll know Torker either, 48 spoked alloy rims with a radial laced front wheel, an Odyssey Gyro XL detangler and

serious about strength, we won't let it round. When we say "it's not just a little alloy axle" will make you the trick god that all the neighborhood gromets pray to.

Frames

Hidden
snap-in
gates.

Pro Standard "Hiders ready-watch the Light", Right outta the gate the All American Torker Pro Standard is ready to rip up the track. Built of 100% 6061 T-6 Aluminum Alloy with Torker's proven Twin Top Tube design & lightning quick geometry, the Pro Std. is always in front of the pack.

GEOMETRY

Top Tube 21" Head Angle 75°
Seat Angle 70° Chainstay 15.3"
Wheelbase 37.7"

Pro XL This is the "Usual" personal ride, Hidden ain't no small guy so we made this bike extra large & plenty tough. With it's Old School Gussets and Twin Top Tubes this frame easily has the strongest front end of any aluminum bike ever made.

GEOMETRY

Top Tube 21.5" Head Angle 75°
Seat Angle 70° Chainstay 15.3"
Wheelbase 38.25"

Pro Cruiser They don't call him the "Earthquake" for nothin'. Clarence Perry has been rockin' the cruiser class longer than anybody and we made the Pro Cruiser in America just for him. Grab one of these at your local dealer and hold on!

GEOMETRY

Top Tube 21.9" Head Angle 73.5°
Seat Angle 69° Chainstay 16.1"
Wheelbase 39.25"
