

UNIVEGA

With UNIVEGA all-terrain bicycles, the fun doesn't have to end when the pavement does.

Until recently, you could buy basically two types of bicycles.

Lightweight, thin-tire, multi-speeds.

Or heavy, balloon-tire "clunkers."

The lightweights were fast and sophisticated, making them ideal for high speed touring or sport riding on smooth, paved surfaces. But they certainly weren't designed for off-the-road rough terrain.

The clunkers were as solid and indestructible as an anvil. But they could be almost as heavy. And just about as much fun to handle.

Now, Univega offers you the best of both worlds by taking the best features of both lightweight bicycles and balloon-tire models, and factoring in the latest in high technology design and components. The result is really a whole new category of bicycles: the all-terrain and leisure bikes.

Bikes as tough as all outdoors.

Univega builds all-terrain bikes to go anywhere. So wherever you take them, they can take it.

We start with the latest frame geometry, materials and construction techniques and build frames that are light and resilient, but still bullet-proof. And we fit them with aggressive fat tires built to take on everything from a wilderness trail to the asphalt jungle of potholes, curbs and train tracks. We complement and balance the whole package with high technology components that combine strength with agility.

The end products are bikes that stop at nothing to give you a great time.

No one builds more varieties of excitement than Univega.

Univega has built its reputation by building bicycles for every need and budget.

And our all-terrain and leisure models are no exception.

We offer everything from a sleeker, more agile update of the old time, All-American, single-speed bicycle to a pull-out-all-the-stops state-of-the-art, all-terrain brute that eats up the countryside for breakfast. Plus several models in between.

So just figure out whether you're more inclined to just cruise around town in style and comfort, or whether you want to ride where other bikes fear to tread. And select the all-terrain or leisure model that best fits your needs and your budget.

Then go for it!

UNIVEGA

Alpina Ultima

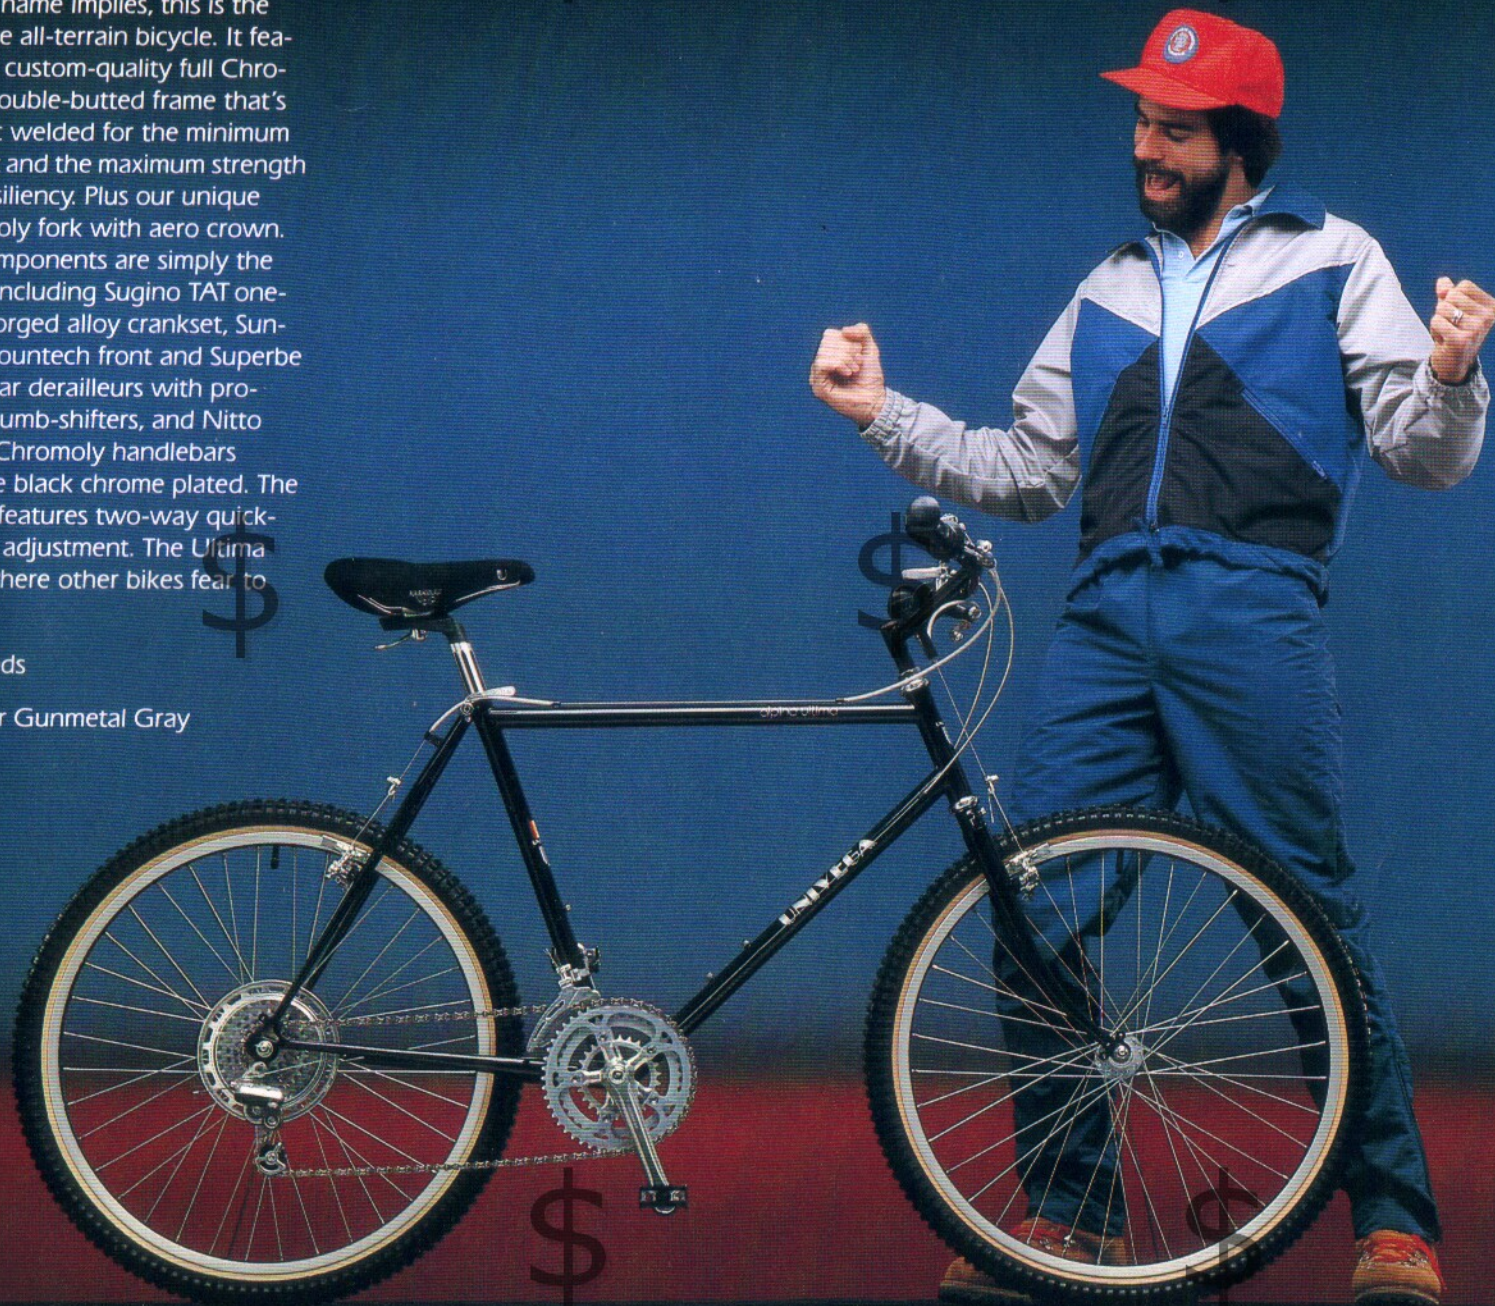

UNIVEGA®

ALL-TERRAIN BICYCLE

As the name implies, this is the ultimate all-terrain bicycle. It features a custom-quality full Chromoly double-butted frame that's heli-arc welded for the minimum weight and the maximum strength and resiliency. Plus our unique Chromoly fork with aero crown. The components are simply the finest, including Sugino TAT one-piece forged alloy crankset, Sun-tour Mountech front and Superbe Tech rear derailleurs with pro-type thumb-shifters, and Nitto B-902 Chromoly handlebars that are black chrome plated. The saddle features two-way quick-release adjustment. The Ultima goes where other bikes fear to tread.

18 Speeds

Black or Gunmetal Gray

\$ UNIVEGA \$

\$ **Alpina Pro** \$

ALL-TERRAIN BICYCLE

If you don't let anything get in the way of your fun, this is the bike for you. It features a strong, resilient, lightweight frame with Chromoly double-butted main tubes welded together by a special heli-arc method. Plus our unique Chromoly front fork with aero crown. The components are just as "all-out." Sugino Prod Max-6 crankset, Araya two-tone, silver and black anodized light alloy rims and Suntour light alloy hubs with sealed bearings. The stopping power of Dia-Compe Mountain Bike cantilever brakes and two-way quick-release adjustable saddle. This Pro can take on anything you have the guts for.

18 Speeds

Burgundy or Gunmetal Gray

Alpina Sport

UNIVEGA

ALL-TERRAIN BICYCLE

This is the all-purpose, go-anywhere bike that puts the fun back into getting there. Features a fully-lugged Chromoly frame for lightweight plus strength. The components are equally serious. Like the Sugino Prod Max-6 crankset, the Araya light alloy rims and Sunshine Gyro-Master light alloy hubs. This one is equally at home on the range, on a mountain trail, or cruising the city streets.

18 Speeds

Racing Blue or Brown Sand

Land Rover Ten

UNIVEGA

ALL-TERRAIN AND LEISURE BICYCLE

Here is the perfect bicycle for cruising the streets like you owned them. But it also has the stuff to handle an occasional jaunt off the beaten path. It has the lightweight strength of a frame with Chromoly maintubes. And the flexibility of 10 speeds. Components like a Sugino crank-set, alloy rims and hubs. This is the city bike that's not out of place in the country.

10 Speeds

Blue or Burgundy

Land Rover Five—Land Rover One UNIVEGA

LEISURE BICYCLES

Land Rover Five is the ultimate bicycle for cruising the city streets in style and comfort. It has the fat

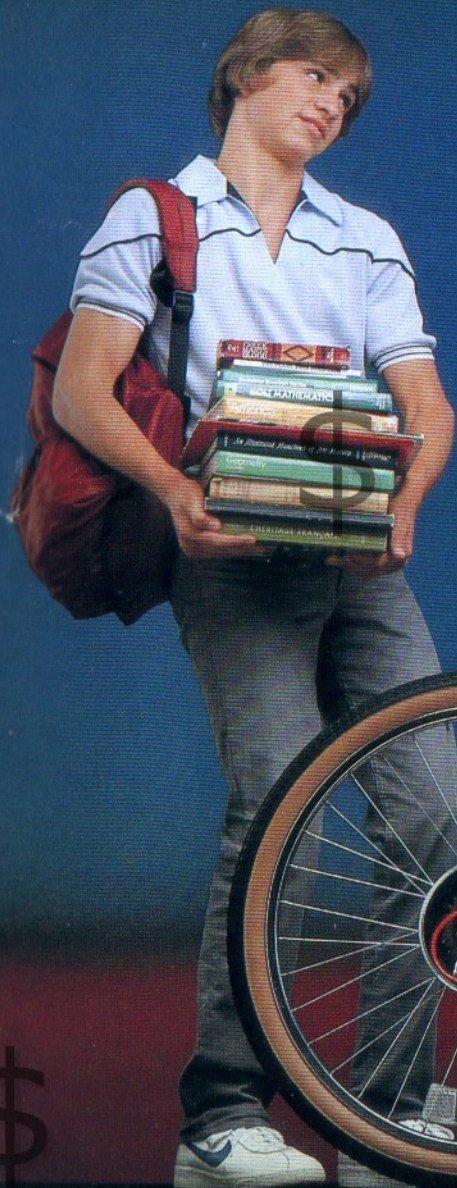

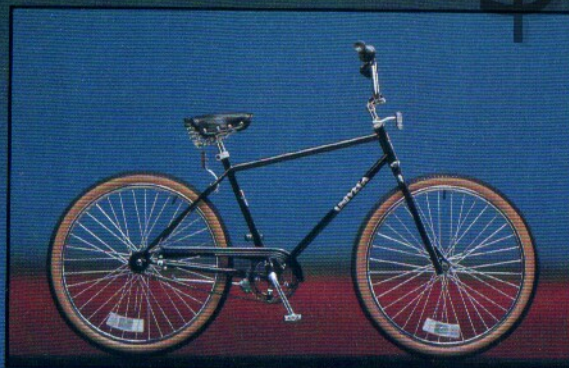

tires to take on grates and curbs like nothing, and five speeds so you can cruise through all kinds of situations with no sweat.

5 Speeds—Black, Red or Chrome

Land Rover One captures all the ruggedness and fun of the old balloon-tire single speeds. But it takes advantage of the very latest technology.

Single Speed Coaster Brake

Black, Blue or Red
