NUVIAN WHEELSET

Our Nuvian wheelset competes with the most expensive wheels on the market at a fraction of the price. It features a standard Aerohead rim on the front and the Aerohead O/C rim in the rear. Its comes standard with black rims, black Velocity sealed bearing hubs, black double butted stainless steel spokes and silver brass nipples. We offer a 24 spoke radial laced front and 28 spoke rear for 650c and 32 spoke rear for 700c. Both are built 3 cross. All of our road wheelsets are either Shimano or Campagnolo compatible. Though this is our standard setup, we do have other colors and drillings available.

650c

24 spoke radial laced front

28 spoke O/C rear 3 cross

*Other drillings available

WEIGHT

Front - 734g

Rear - 972g

700c

24 spoke radial laced front

32 spoke O/C rear, 3 cross

*Other drillings and colors available.

WEIGHT

Front - 774g

Rear - 1012g

HELIOS WHEELSET

New for this year is our Helios wheelset. The Helios features the Aerohead and Aerohead O/C rims, but uses new lightweight hub and upgraded spokes. The Ti Grey Velocity sealed bearing hubs are laced to black Sapim CX-Ray bladed spokes and silver alloy nipples to create the ultimate performance wheelset. The Helios comes with a 24 spoke radial laced front and a 28 spoke 3 cross rear and is either Shimano or Campagnolo compatible. We think it looks best with our Ti Grey rims, but we do have other colors available.

700c

24 spoke radial laced front

28 spoke O/C rear, 3 cross

*Other colors available

WEIGHT

Front - 650g

Rear - 870g

DEEP V WHEELSET

If you need one wheelset to do it all, then the Deep V is the one. The aerodynamic deep section design, also gives it great strength and reliability. This wheel can handle training, racing, commuting and touring all in the same day. Our standard setup comes with a black Deep V rim, laced with black 14g stainless steel spokes, silver brass nipples and our black Velocity sealed bearing hubs. The Deep V comes with 32 spokes in the front and rear in both 650c and 700c, but we do have other drillings available. Either Shimano or Campagnolo compatible.

DYAD WHEELSET

The Dyad is listed in this catalog under 29'er disc wheels, tandem wheels and touring wheels, but it can also be built as a standard road wheelset. This versatile rim can be built into the perfect road wheelset that balances weight and strength. Our standard setup features the Dyad rim, Velocity sealed bearing hubs, 14g stainless steel spokes and brass nipples. We offer a 32 spoke front and rear, laced 3 cross. The rear wheel can be built with either 130 or 135mm spaced hubs. Either Shimano or Campagnolo compatible (130mm spaced only)

700c

32 spoke 3 cross front and rear

Black or Silver rims

*130 or 135mm spaced sealed cartridge bearing hubs

*Other drillings available

WEIGHT

Front – 828g

Rear – 1088g

dyad

FUSION WHEELSET

The Fusion wheelset is for those that need something more robust than the Nuvian, but not as heavy duty as the Deep V. Though lighter than the Deep V, the Fusion retains those strength and durability characteristics. The Fusions are built with black 14g spokes and black sealed cartridge bearing hub laced to a black Fusion rim. Either Shimano or Campagnolo compatible.

32 spoke front and rear, 3 cross
*Other drillings available.

WEIGHT

Front – 808g
Rear – 1078g

FUSION

SPARTACUS WHEELSET

The Spartacus wheels are built using the time tested Deep V rim, 14g stainless steel spokes, brass nipples and our Velocity sealed bearing hubs. The spokes, hubs and rims are all silver. Available in both 650c and 700c, the Spartacus is a great wheelset for racing or everyday riding. Either Shimano or Campagnolo compatible.

SPARTACUS

SPARTACUS PRO WHEELSET

The Spartacus Pro is the deluxe version of the original Spartacus. The Pro also uses the Deep V rim, but this one has a sleek black anodized finish. It features our black Velocity sealed bearing hubs, black 14g stainless steel spokes and silver brass spoke nipples. Available in both 650c and 700c. The Spartacus Pro can be upgraded to either black double butted spokes or Sapim CX-Ray black bladed spokes.

URIEL

TRACK WHEELSET

Our track wheels are second to none. Our track hubs accept a fixed gear on one side and a freewheel on the other, and come with the lock ring provided. We offer a variety of options in our track wheel line, but each wheel is built with black 14g stainless steel spokes, and silver brass nipples laced to our 32 hole track hubs. Everything else is up to you. Our track wheels come standard with non-machined rims. Deep V track wheels are available in a full array of colors, with or without a machined brake surface.

AEROHEAD	Black NONmsw
AERO	Black NONmsw or Silver NONmsw
FUSION	Black only NONmsw
DEEP V	Full range of colors NONmsw

Wheels can be built using a rim with a machined sidewall for an additional charge.

Track

TANDEM DISC WHEELSET

New to the lineup is our Tandem Disc wheelset. This set features a 40 spoke disc front and 40 spoke disc rear. The rear hubs are available with 140 or 145mm spacing to fit your needs. Built with 14g stainless steel spokes and laced in a 4 cross pattern, this set will provide the strength and reliability you can count on. The Tandem Disc wheelset is available in a few different sizes and a few different rims, giving you the greatest versatility in creating your ideal wheelset.

DYAD WHEELSET

Weather your trips lead you around the county or the country, the Dyad is the best wheelset available. Using the Dyad rim, this wheelset is strong and durable without adding weight to your already loaded bike. It features 14g stainless steel spokes, brass nipples and sealed bearing hubs that are available in 130mm or 135mm spacing. Our standard setup comes in all black with 32 spokes in the front and 32 spoke in the rear. If you'd rather, we have other colors and other drillings available.

REPLACEMENT WHEELS

Our repair wheels are simply the best available. These moderately priced wheels are given the same attention as our higher priced wheels. They are hand built with silver 14g stainless steel spokes, silver brass nipples and easily serviceable ball and cone hubs. The Glider is available in 700c and is ideal for hybrid bikes. The Twin Hollow comes in either 700c or 27" to satisfy either need. Our 26" Triple V will get your mountain bike rolling again. All wheels are made from the same 6000 series aluminum as our other race proven rims. Each wheel is available in a 36 spoke front and rear. The rear wheels are available with a standard 8/9 speed or a thread on freewheel hub. They are also available in either 130mm spacing or 135mm spacing.

VXC WHEELSET

The VXC wheelset is a superb, lightweight cross country pair of wheels. We use our Velocity sealed bearing disc hubs, black stainless steel double butted spokes and black brass nipples. This wheelset is compatible with disc brakes only, due to the design of the rim. It cannot be used with rim brakes. Our standard setup has a 32 spoke front and rear and uses a black rim to create a stealth like wheelset, but we do have some other colors and drillings available.

32 spoke front and rear
*Other colors and drillings available

WEIGHT

Front – 882g

VXC DISC

THRACIAN WHEELSET

The Thracian was designed specifically for recumbents that use 406mm (20 x 1.5) front wheels and 559mm (26 x 1.5) rear wheels. This wheelset is part of the Spartacus series and offers a lightweight paired spoke design. It comes standard with black 14g stainless steel spokes, silver brass nipples, black Velocity sealed bearing hubs all laced to a specially made Aeroheat rim. The rear spacing for the Thracian is 135mm.

20 spoke front / 24 spoke rear

WEIGHT

Front – 564g

Rear – 1038g

AEROHEAT

THRACIAN DISC WHEELSET

All the features and benefits of the standard Thracian set, but in a disc specific version. The Thracian Disc wheelset uses our Velocity sealed bearing disc hubs, black 14g stainless steel spokes, silver brass nipples, and a non-machined version of the specially drilled Aeroheat rim. 24 spoke 406mm (20 x 1.5) front wheel and 24 spoke 559 (26 x 1.5) rear wheel. Thracian Disc rear wheels are 135mm spacing.

24 spoke front / 24 spoke rear

WEIGHT

Front – 648g

24" (520) Rear (20 spoke) – 820g

650c Front (20 spoke) – 708g

650c Rear (24 spoke) – 892g

700c Front (20 spoke) – 788g

700c Rear (24 spoke) – 948g

- 650c and 700c are available in 130mm (either Shimano or Campagnolo)
- 650c and 700c are available in a 135mm spaced option

FUSION

WHEEL BUILDING

A WORD ABOUT WHEEL BUILDING

All Velocity wheels are hand built to meet our exacting standards. That's right, no machines here, just our expert wheelbuilding staff. Each wheel is hand tensioned and trued just for you. Due to the variety of options when building a wheel, such as spoke count and lacing pattern, we had to choose one for our standard setup. If for any reason, you would like something different, we are happy to build it for you.

CUSTOM BUILT WHEELS

Since Velocity hand builds every wheel, we can make the adjustments you need. Want a 2 cross front wheel instead? No problem. Do you prefer double butted spokes instead of straight gauge? No problem. We can custom build just about anything. If we have the hub, and the rim, we can build it. We can also build the wheel with your existing hub if you'd like. In some cases additional charges may apply to the wheel price. Please contact your local Velocity dealer for details.

27", 700C, 650C, 650B

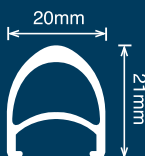

AERO

The original Velocity rim. It has stood the test of time and continues to be a popular choice year after year. Its rounded profile gives it a unique look while offering strength and dependability.

Colors: Black, Silver, Celeste (all non-machined)

Drillings: 32, 36

700c
Bead seat diameter 622
Weight 480g
ERD = 596

AERO

AEROHEAD

One of our favorite and most popular road rims. It's also one of our lightest. If you're looking for a racing or training rim, this is the one for you. It's stiff for sprinting and light for climbing.

700c
Bead seat diameter 622
Weight 405g
ERD = 602

AEROHEAD

AEROHEAD OC

The Aerohead O/C has all the same characteristics as the standard Aerohead but is offset in design. This creates a more uniform spoke tension between the drive and non-drive side of the wheel resulting in greater strength and reliability. Match it with a standard Aerohead rim in the front and you have the perfect wheelset.

650c

Colors: Black machined

Drillings: 24, 28, 32

700c

Non-machined: Black and Silver

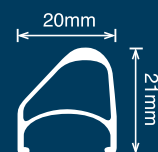

Machined: Black, Silver, White, E. Red, Yellow, E. Blue, Purple, Gold, Lime Green, Ti Grey, Pink, Celeste

16" (349)
Bead seat diameter 349
Weight 272g
ERD = 325

AEROHEAT AT

VELOPLUGS

The Veloplug is an amazing new invention, international patents pending. **Why wrap your complete rim with a roll of heavy cloth tape when for less than half the weight you can use the Veloplug.**

Incredible blow out strength and takes well over 400psi. Tires start to fail long before the Veloplug.

Tire mounting is easier with the Veloplug. Rim strips take up a lot of space making tires more difficult to mount. With the sleek and slippery Veloplug, a difficult to mount tire becomes easy.

Spoke replacement is simplified as there is no need to remove a sticky strip. Just pop out the Veloplug over the offending spoke and pop it back in when repairs are complete. They can be used over and over.

The Veloplug fits any rim with a nominal 8mm web hole. This covers most of the Velocity range as well as many 'Brand X' rims.

Sold in packets of 72 for retail sales or in bulk packs of 1000 for shop use.

VELOCAGE

Our exclusive Snap Clamp system helps prevent bent cages and holds bottles securely in place. The unique system allows for adjustability, letting you position the Velocage exactly where you want it. Ideal for both road and off-road applications.

The Velocage carries small or large bottles. Manufactured from 6mm 6201-T8 aluminum, it weighs only 53g.

Anodized Colors:

Silver, Purple, Gold, Ti Grey, Spangled Silver, Red, Blue, Green

Powder Coated Colors:

Black, White, E. Red, Yellow, E. Blue, Orange, Lime Green, Brown, SID Blue, Celeste

WATER BOTTLES

750ml Water Bottles leakproof lid.

Available in a range of colors.

Proudly manufactured in Australia.

WHEEL BAGS

Velocity now offers wheel bags! Ideal for storing extra wheels or for protecting them when traveling. The double wheel bag features two separate zippered compartments. Each compartment is lined to keep grease and dirt off the bag itself. Reinforced center wall patches help keep hubs protected. A small zippered pouch is included to hold skewers, a spare tube or other small items. The wheel bag has two carry handles that Velcro together, and a detachable shoulder strap for carrying.
