

BASSO

Winner of the 1972 World Championships in Gap, Switzerland, Marino Basso is well qualified in the art of frame design. Marino and his brothers, Renato and Alcide, started their own factory in 1977 at Vincenza, Italy near the Campagnolo factory and now offer you the best of their racing and design experience.

FRAMES

All Basso Gap framesets are constructed with Columbus SL tubing throughout and use Campagnolo forkends. Cinelli cast bottom bracket shell and specially cast lugs, bridges and fork crowns are all standard. All fittings, including front derailleur, are brazed on. Basso framesets are available in a choice of Ferrari Red, Italian Blue or Champagne. Chromed chainstays, fork crowns and dropouts are also standard. Each frameset is inspected, the threads are cleaned and the bottom bracket and headset surfaces are faced before shipping. All framesets come with forkend adjusting screws and seatpost bolts. Sizes measured from center to center are available from 48-62cm.

BICYCLE

The Basso Gap bicycle consists of the Basso frameset equipped with a selection of Campagnolo Nuovo Record and Super Record components pantographed with the 3B logo of the three Basso brothers.

SPECIFICATIONS BASSO MOOR 'GAP'
