

Cannondale

catalog 1981

"It has been said that the United States was built with a frontier spirit. Pushing westward, the pioneers took their shelter and food from the wilderness. Though the earth was not always kind in its giving, it was infinitely abundant in its resources — or so it seemed. But as the population grew, people began to learn that the limits of the earth's generosity are to be honored, rather than conquered and depleted.

Residents of an increasingly urbanized world seek refuge and recreation in the wilderness. As more people discovering the joys of the natural environment put more pressure on the very resources they seek to preserve, they realize their responsibility to treat the earth gently.

The conscientious outdoor enthusiast chooses quality equipment for minimum-impact camping. The comfort and security provided by quality gear frees the camper to learn from the beauty and serenity of the wilderness. Superior materials, design and craftsmanship make Cannondale equipment the perfect complement to the outdoor experience."

*Edward C. Murphy
Executive Director
Outdoor Discovery, Inc.*

There is a special spirit at Cannondale. It is a feeling of energy, a free exchange of ideas, and a genuine pulling together to make our products the best you can buy anywhere. We are proud to be a part of the "self propelled" recreation industry. Therefore, fulfilling your needs is important to us.

Our product technology continues to expand thanks to an aggressive and innovative Research and Development department. Improvements made from intensive usage and testing over the years will satisfy the most avid bicyclist, skier, camper, or backpacker. Yet, in these inflationary times, we continually try to maintain a careful balance between design and cost to meet our goal of affordable excellence.

Care-crafting and pride in workmanship are the silent ingredients in all of our products. The one hundred plus men and women in our manufacturing facility in Bedford, Pennsylvania, and our corporate headquarters in Stamford, Connecticut, are family, not only through their relationship to Cannondale, but to each other as husbands, wives, sons, daughters, or friends.

We design and manufacture everything found throughout these pages. We are proud of the contribution "made in America" makes to our economy —the dollars kept at home, the jobs for hardworking capable men and women, as well as the keenly shared belief that "made in America" stands for both product integrity and a tradition of service to our customers.

For those of you who have experienced the challenge and peace of the good life in the great outdoors, we welcome you to rekindle fond memories in the scene above. Also, for old friends of Cannondale as well as our future customers, we welcome you into the pages of our 1981 catalog for a look at an alternative lifestyle whose time has come again.

"... the most weatherproof & windproof tent I've ever used."

Cliff Jacobson

A tent - your temporary home in the wilderness - must satisfy several prime requirements. At the very least it must offer you security and reasonable comfort in whatever environment you choose to settle. The Cannondale tents have been designed to satisfy a scale of requirements ranging from a summertime lakeside encampment to a quick pitch in Arctic temperatures and winds that make every minute count. The engineering and design of the Cannondale tents have evolved over a period of 10 years of usage in all conditions, from professional expeditions to recreational camping. Industry ratings have confirmed our belief that we now make one of the finest tents available.

Features which have won us praise and enthusiastic customers are:

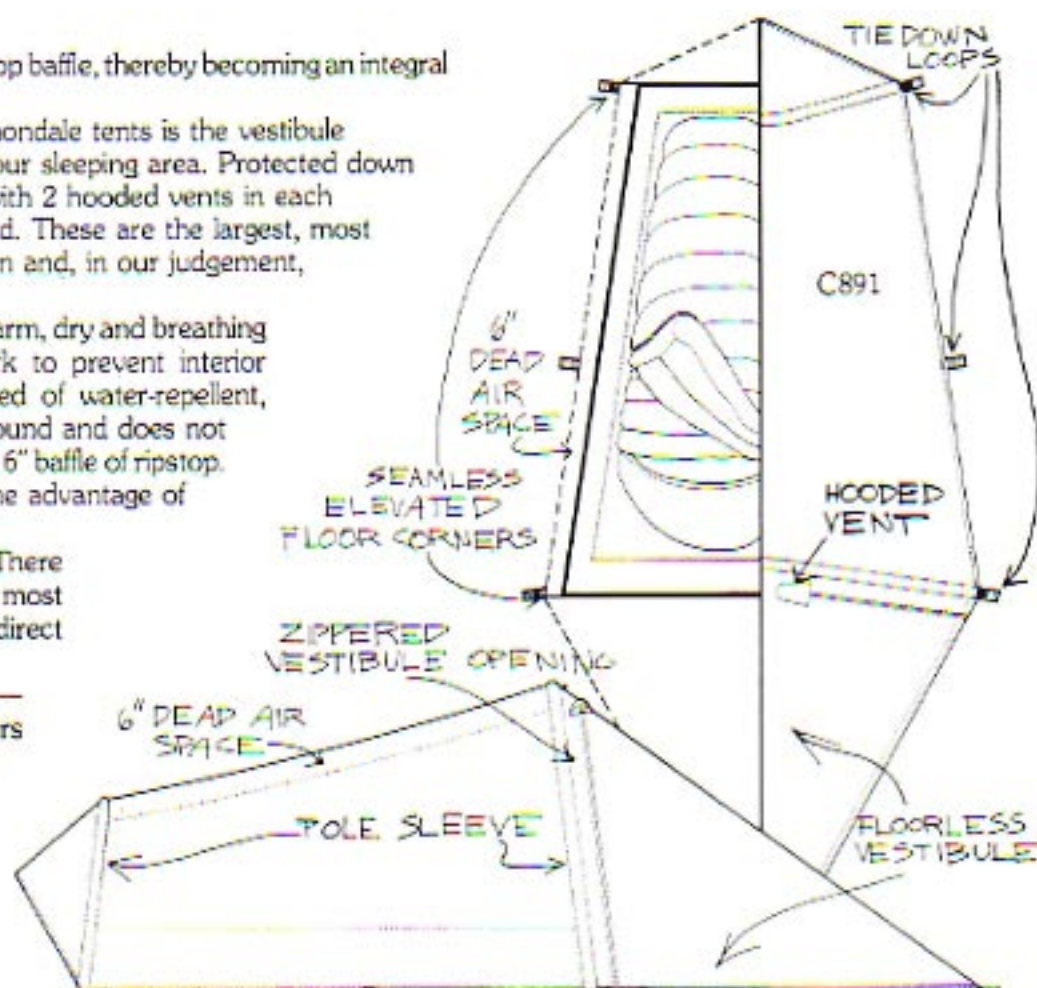

- **Ease of set-up** - with only 2 pole sections and 2 stakes (4 more stakes are provided for the tie down loops to give additional security in high winds.)
- **Integral fly** - The outer wall or fly, is joined to the inner wall by a 6" ripstop baffle, thereby becoming an integral part of the tent and eliminating double staking and set-up time.
- **The Vestibules** - One of the most highly rated features of the Cannondale tents is the vestibule which allows you to shed and store wet or dirty gear before entering your sleeping area. Protected down to the ground on all sides, each vestibule has two zippered entrances with 2 hooded vents in each peak. In fair weather the vestibule flaps may be unzipped, rolled and tied. These are the largest, most practical and best protected vestibules of any lightweight tent we've seen and, in our judgement, essential for true wilderness comfort.
- **Thermos bottle design** - employs principles of physics to keep you warm, dry and breathing fresh air. Figure A demonstrates the principles of insulation at work to prevent interior condensation. The integral "fly" and interior wall are both constructed of water-repellent, breathable, ripstop nylon. The integral fly extends all the way to the ground and does not touch the inner canopy at any point but is joined to it along the ends by a 6" baffle of ripstop. The resultant dead air forms a highly effective insulation barrier with the advantage of adding neither weight nor bulk.
- **Coated bath tub floor** extends 12" up the tents inner walls all around. There are no perimeter seams at ground level... and the floor corners - the area most vulnerable to seepage - are elevated to prevent them from coming in direct contact with water.
- **Tightly woven mesh screens** zip into the outside of the storm doors - (unlike most tents where the screens are on the inside). One set of zippers drops both the screen and the door while another drops only the door, thus ventilation can be controlled from within the sleeping area without unzipping the screen. This feature also allows entry and exit without readjustment of the desired ventilation.
- **Aerodynamic tent shape** - ensures stability, tautness, and a quiet nights sleep. Tested in severe winds, flapping is minimal - due in part to the smooth arched ridgeline and catenary cut of each piece which ensures an even tautness throughout.

Figure A

Integral fly of high density, lightly coated, breathable, rip stop nylon in combination with breathable inner wall, form waterproof system.

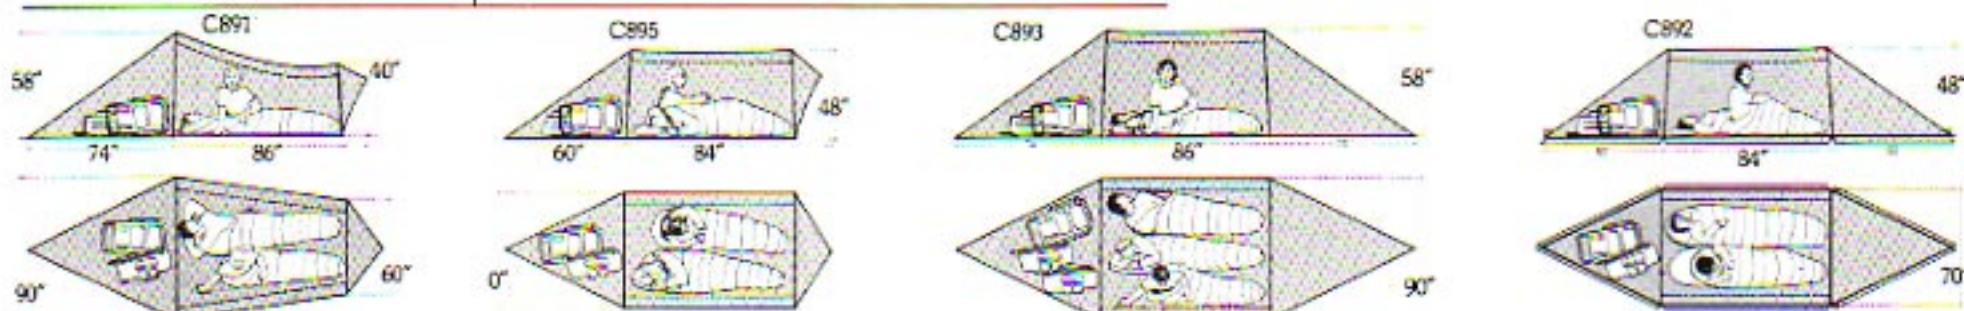

Dead air space acts as an insulation barrier between the cold outside air and the warm moist inside air, thus preventing condensation.

Waterproof tent floor.

cannondale
made in America

C891 Wabash... generous 2-person... stuffed weight is 8 lbs. 12 oz... stuffed size is 24" x 6" diameter... additional front ridge height... combination of spacious comfort and light weight... recommended for extended treks and cycle touring... year-round capability.

"A hailstorm in Utah did not affect our Cannondale tent. It kept us warm and dry! Fellow campers stopped by our campsite to get a closer look at our unique tent. We had quite a "sales pitch" — after all, it was our home for 6 months."

Angela Cardinale
Nancy Smock
Interlaken, New Jersey

"Last spring, during a bike tour, our club camped in the mountains. A wind came up that was so strong it resembled a freak hurricane. I was using my Wabash and some other club members had Susquehannas. When the storm was over the only tents left were the Cannondale tents!"

Anita Hopkins
Phoenix, Arizona

C895 Susquehanna... generous 2-person... stuffed weight is 7 lbs. 2 oz... stuffed size is 24" x 6" diameter... lightest weight of our 4 variations... excellent for bicycle touring... year-round capability.

"We travel hard and fast, often making and breaking camp in the dark — and not always on the most ideal sites. Therefore we place a high priority on a tent that can be assembled quickly and requires a minimum amount of staking. For that reason we are interested in acquiring 2 Susquehanna models and 1 Wabash."

Uerlen Kruger & Steven Landick
The Ultimate Canoe Challenge

"Since obtaining my Susquehanna tent four years ago, I've really put it to the test. To date, there hasn't been a single failure of seams, zippers, or otherwise."

Cliff Jacobson
Former Equipment Reviewer
Backpacker Magazine

C893 Aroostook... generous 3-person... stuffed weight is 11 lbs. 4oz... stuffed size is 24" x 7½" diameter... year-round capability.

"I am writing to you about your Aroostook tent... Let me say that many features were the best I have ever found. The vestibules are invaluable — We stored tons of gear underneath, and found them really handy for getting out of dirty boots and wet rain gear. The tent seemed absolutely rainproof (we sealed the seams), even in driving downpours."

Christopher Nagle
Department of Anthropology
Smithsonian Institute

"I recently obtained an Aroostook tent from ABC Sports Store LTD in Toronto and am writing this letter instead of filling out your warranty card, which is not big enough for a good reply..."

Chris Wade
Ontario, Canada

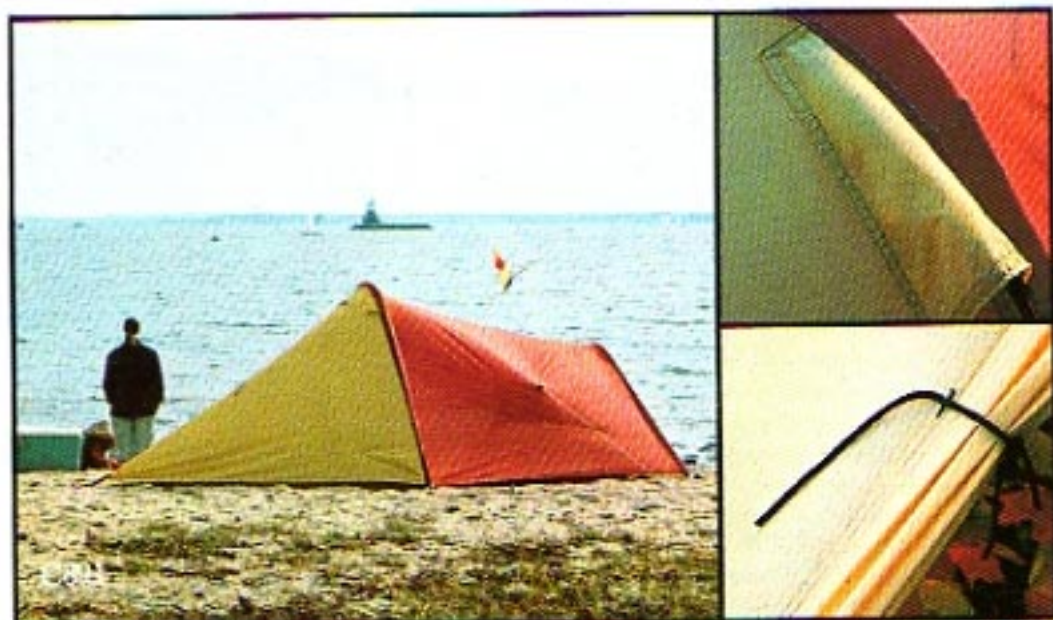

C892 Lackawanna... generous 2-person... stuffed weight is 8 lbs. 15 oz... stuffed size is 24" x 6" diameter... for high altitude, winter use... snow flaps around entire perimeter... high wind spill performance... no frost liner necessary... allow 4 to 5 months for delivery.

"Our four person team is embarking upon another survival expedition — this time into the primitive wilderness of Greenland. We believe the Lackawanna will suit our purposes perfectly."

Randall Martin
Wilderness Expedition

"Over many years we have used more brands and designs of equipment than we care to remember. We are particularly fussy about the strength and durability of the tent. Your tent (the Lackawanna) aced them all."

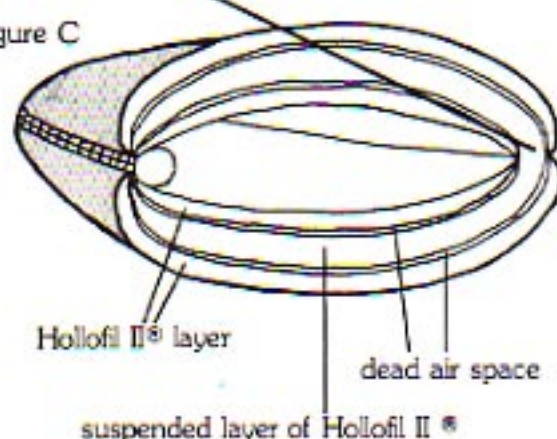

Crew Members of
Baffin Island Expedition

What sandwich construction means:

A suspended layer of Hollofil II® acts like a draft tube at the side seam for maximum thermal efficiency.

Figure C

real sleeping comfort from Cannondale

Your body produces the heat necessary for your comfort and the well designed bag allows you to retain that comfort level in the particular climate for which it is chosen. When selecting a bag, temperature ratings can be confusing and, all too often, a person will buy a bag that provides more warmth than necessary for its intended use. Cannondale makes 3 specific models of bags, the specifications of which are listed in Figure B. When using the chart, bear in mind as well the below variables. We have found our sleeping bag temperature ratings to be very conservative.

Our three bags all have Cannondale's care-crafting and unique features in common as exemplified by — **The Design** — Our bags are modified mummies designed to contour to your body for best heat efficiency with less bulk and weight.

The Material — The outer shells are 1.9 oz ripstop nylon while inner shells are a softer, more comfortable high count nylon taffeta. These fabrics are water-repellent as well as breathable.

The Filling — Hollofil II is the insulating filling we chose for our bags. Unlike down, Hollofil II keeps you warm even when wet and will not shift or clump up. Unlike the more conventional solid polyesters, Hollofil II is a hollow fiber with 8% more bulk per unit of weight. This means more dead air space, more loft and more insulating value. (See page 10 for a further description of the nature of Hollofil II.)

The Construction — The differential cut of the inner and outer shells coupled with our innovative triple layer "sandwich" construction gives our bags uniform loft throughout, the resultant elimination of coldspots has won us many words of thanks. (See figure C.)

Special Features • Large offset draft tubes which circle the entire bag and continue beyond the snag proof zippers to form full-circumference collars which easily draw snug around your neck, securing from within by a cord lock. • All bags have a hood, which can be drawn up around your head. • A two way separating zipper system allows you to ventilate from the bottom as well as the top. • Right and left zippered bags can be zippered together to form a double sleeper. 2 sizes (Reg. and Long)

When selecting your bag — **REMEMBER** the comfort of your bag is determined by several variables:

- Metabolism rate (varies widely with individuals)
- Type and amount of food consumed
- General state of health
- Weather conditions
- Type of shelter and ground pad used
- Kind and amount of clothing worn while sleeping
- Sleeping bag construction

(S804 and S805) Our 25° Blue Ridge Sleeping Bag is ideal for bicycle touring and warm weather camping. Its extreme lightweight allows it to compact into an 8" x 11" stuffsack.

Colors: Blue, Green, or Rust.

Insulation:

**Dacron®
Hollofil® II**
Sleeping bags for sleeping polyester comfort.

(S806 and S807) Our 5° F **Chesapeake** Sleeping Bag is our most popular. It is an excellent three season bag and can be extended for extreme cold weather use by the addition of a good ground pad and wearing warm clothing. For increased heat retention, the draft tube (which extends across the top of the bag to form a full circumferential collar) is another feature of this bag.
Colors: Blue, Green, or Rust.

(S808 and S809) Our - 20°F **Great Northern** Sleeping Bag is ideally suited for winter use. It has a generously filled, carefully contoured full circumferential collar and hood, which draw in snugly around your head and is secured with a cordlock from within.
Colors: Blue, Green, or Rust.

"the Great Northern sleeping bags are not only very warm, but, for all of their loft, are very light in weight. The circumferential draft collars are really worth their weight in gold. As far as roominess goes, I am 6'2" and every night I slept with my boots and 3 cameras stuffed into the bottom of the bag. They never interfered with my sleep."

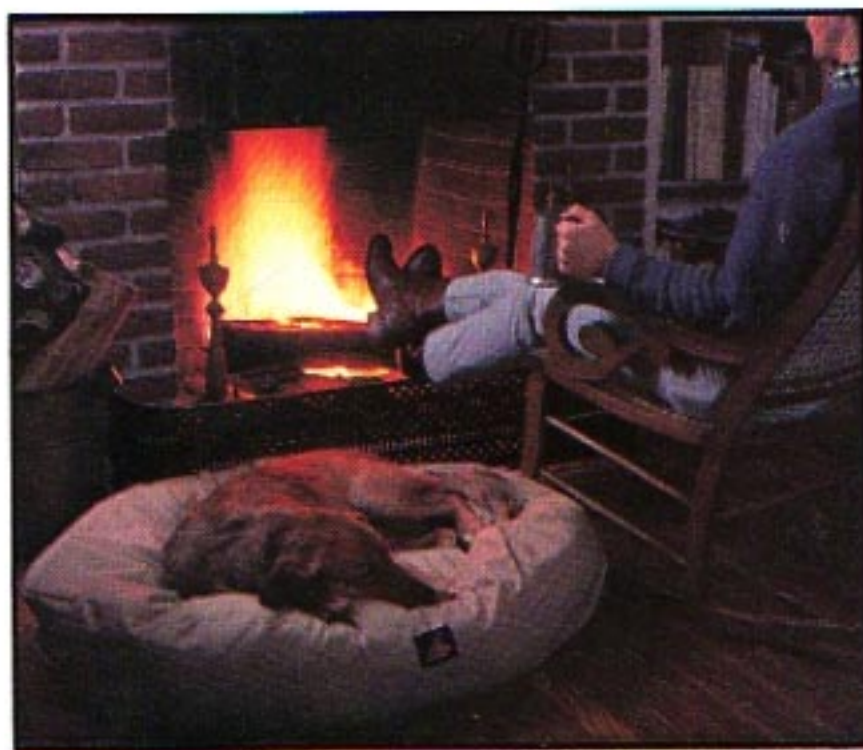

Barry Nelson
Geneva Spur Limited
Vienna, Virginia

Portions of a letter following Mr. Nelson's leading an arctic expedition of five members.

S808 and S809

Each of our fine bags comes with a urethane-coated nylon stuff sack ((A004)). This sturdy stuff sack has a stitched in top weather flap, drawstring and cordlock closure. It has a rugged web bottom handle. It measures 8" x 23" (Blue Ridge 8" x 11"). If you wish to purchase additional stuffsacks in other sizes, they come as follows:
C901 (4" x 11")
C902 (7½" x 14")
C903 (8" x 18½")
Colors as available.

S806 and S807

Doggy Bag™

The ultimate in comfort — dogs love it! The cover is made of our tightly woven 80/20 cloth, which is highly resistant to moisture. The tight weave also means that hair will remain on the surface for easy vacuuming. The filling is dacron Hollofil II®, which is non-allergenic and retains its fluffy characteristics even when repeatedly crushed. The cover has a zipper to allow removal of the filling for easy machine washing & drying.
Available in two sizes: (D001) 45" Large, or (D002) 35" Medium.
Colors: Camel, Nut Brown, Rust, or Green (as available).

The insulated jackets and vests we make combine the highest quality components wilderness research has developed. We use 80/20 cloth because it is a unique, integral blend of polyester and cotton. These fibers have been "preblended" before they are woven. This process allows a weave that is so tight that it can actually hold water! Also due to the weave, 80/20 cloth is extremely wind and water resistant. Yet, at the same time, it has a handsome appearance and feels soft to the touch. It also washes and dries with ease.

We choose the best fiber insulations modern science has to offer — Hollofil II® and Sontique*, engineered by DuPont. Please turn to page 10 to learn more about these remarkable battings... The finishing details we select, like zippers from YKK, complete our attention to construction and design.

908 Our Adirondack vest is designed to be comfortable and practical. It is fashioned with an 80/20 cloth outer shell and contrasting soft taffeta lining. It is insulated with a generous layer of Dacron Hollofil II and is quilted front and back in a chevron pattern. It features a full length YKK front zipper, draft flap with snaps, deep well-angled handwarmer pockets, and D rings at the side seams for attaching gloves, keys, or ski tickets. A real extra is the zippered slash vest pocket for loose change, glasses, etc. When closed, the elastic back fits snugly to the waist for more warmth. This vest, shown here with our **916** wind shirt (see page 14), mixes and matches with several of our styles for additional comfort or just plain good looks.

Colors: Navy contrasted with Camel, Camel contrasted with Navy, Green contrasted with Camel, or (female sizing only) Red contrasted with Camel.

Styled for men and women, all these rugged and warm Cannondale Vests and Parkas are built to last.

909 This simplified version of the Adirondack vest is handsomely styled with one color soft nylon taffeta inside and out. It too has a generous layer of Dacron Hollofil II for insulation and quilting stitched in a chevron pattern front and back. The front closure has heavy duty Cannondale snaps. The elastic waist back provides both good fit and freedom from drafts. This vest, because of its lightweight and softness, is ideal for indoor wear to take the edge off 65° thermostat settings.

Colors: Navy, Camel, or Green.

916

*DuPont certification mark.

910 Our very popular Appalachian parka is constructed with an outer shell of our famous, tightly woven, highly wind and water resistant 80/20 cloth and a contrasting soft nylon taffeta as the lining. The insulation is Hollofil II by DuPont. Designed with set in sleeves, this coat includes an elastic drawstring with cord locks at the waist, a two way separating YKK zipper covered by a snap-down draft flap, a zippered breast pocket, generous handwarmer pockets with snapped cargo fronts, adjustable velcro cuffs, and an optional detachable hood. For polar bear-like warmth against winter's cold this jacket is unequalled. Colors: Navy contrasted with Camel. Camel contrasted with Navy, Green contrasted with Camel, or (female sizing only) Red contrasted with Camel.

911 This Dacron Hollofil II insulated detachable hood is made of the same materials and in the same colors as the 910 parka. It has a snap and drawstring closure. Sizes are Small (S) and Large (L). (In Red, size Small only.)

910

For size chart please page 14.

915 Our beautifully detailed ski jacket has a practical side too... its waist length makes it comfortable when driving. The outer shell is tailored in our famous 80/20 cloth, while the lining is soft nylon taffeta in a contrasting color. It is insulated with a generous layer of Dacron Hollofil II and is quilted throughout in a chevron pattern. The insulated handwarmer pockets are set deep for extra protection. Other features include set-in knit cuffs, D rings at the side seams

for gloves or lift tickets, a roomy breast pocket, a full length YKK zipper, and a draft flap with heavy duty snaps.

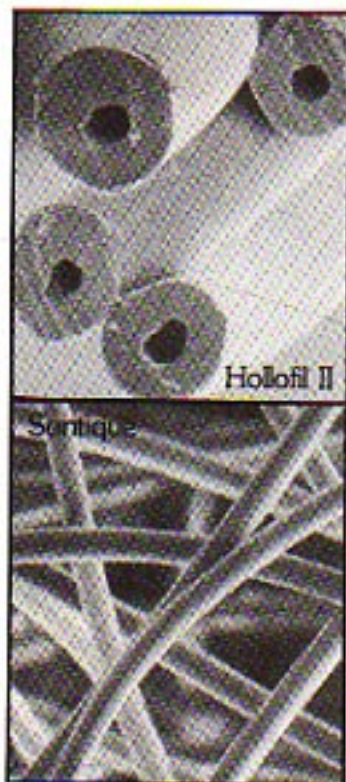

Colors: Navy contrasted with Camel or Camel contrasted with Navy.

915

Insulation:
**Dacron®
Hollofil® II**
warmth for
cold weather

The fiber insulations we choose are the best modern science has to offer.

Cannondale is very particular about what goes into the manufacturing of our products. Everything has to be the best. We want our fabrics to be rugged, our zippers and snaps to work under stress, our seams to hold, our colors to be exact, and, of course, our insulations must provide maximum warmth. This is why we use insulations engineered by DuPont. Hollofil II® and Sontique® are the best fiber insulations modern science has to offer and here's why:

Hollofil II is a revolutionary approach to creating more dead air space (see illustration). There is a hollow core running through each and every fiber. The same process that makes the hole possible also causes the circumference of each fiber to be increased substantially. These facts (hollow core and greater circumference per fiber) combine to create a batting that traps more "dead air" between and around the fibers, has 8½% more loft per unit weight, and weighs less than any other conventional polyester fill. We choose Hollofil II over down as insulation for some very practical reasons — First, it costs you less to keep warm with Hollofil II. Second, you can easily wash and dry your garments. Third, if a puncture or tear should occur, no filling leaks out. Fourth, Hollofil II keeps right on insulating even when wet.

Sontique is a new styling insulation. It is a thin fill that is exactly equal in performance to any other fill on the market and in some ways even better.

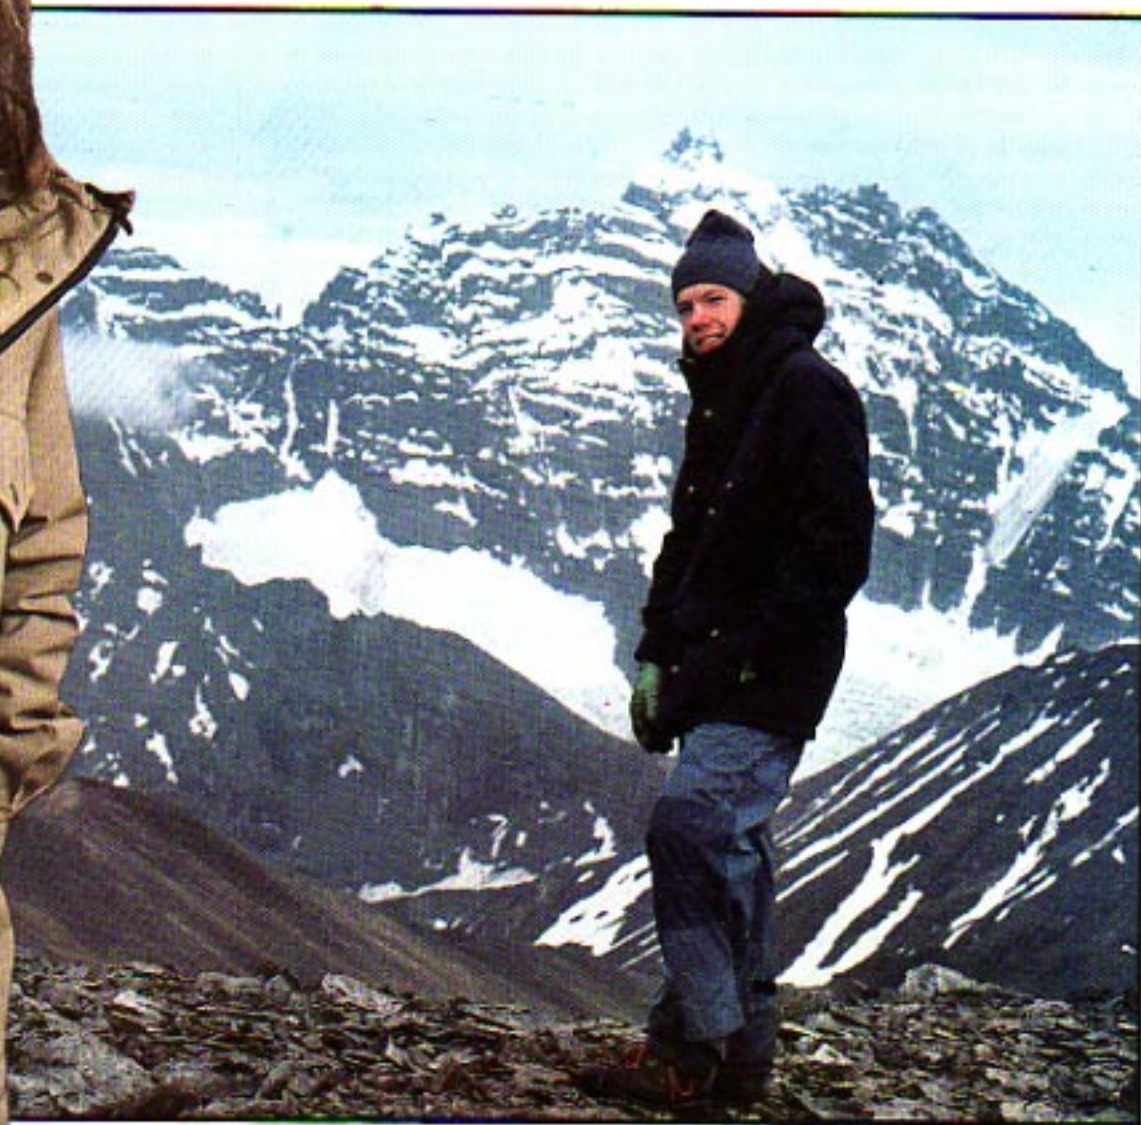

All thin fill insulations are designed to accommodate fashionable function. When energy output increases through active sports a styling insulation may be all you need. For these times, Sontique gives you an edge over other thin fills... First, Sontique has greater fiber surface area (much like Hollofil II), thus retaining more "bound air". Second, it drapes beautifully. Third, it can be washed and/or dry cleaned. Fourth, inch for inch, no other fiber insulation keeps you warmer.

a parka that goes everywhere

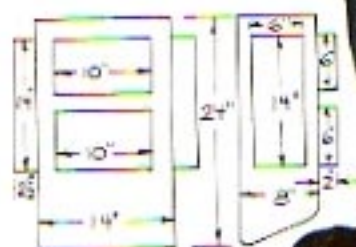

(912) Just right for three season use, this exceptionally well styled mountain parka features insulation of Sontique® (see above). Our famous tightly woven 80/20 cloth makes up the outer shell and hood lining. Soft nylon taffeta fully lines the body and sleeves. Raglan sleeves and an adjustable elastic drawstring at the waist assure proper fit. This fine parka features a 2-way separating YKK zipper with draft flap and snaps, four snapped cargo pockets with two roomy insulated handwarmer sections, and adjustable velcro cuffs. The overall design and workmanship that make it ideal for wilderness use also mean long life in general use.

Colors: Navy with Camel accents, Camel with Navy accents, or Green with Camel accents.

912

*DuPont certification mark.

C882

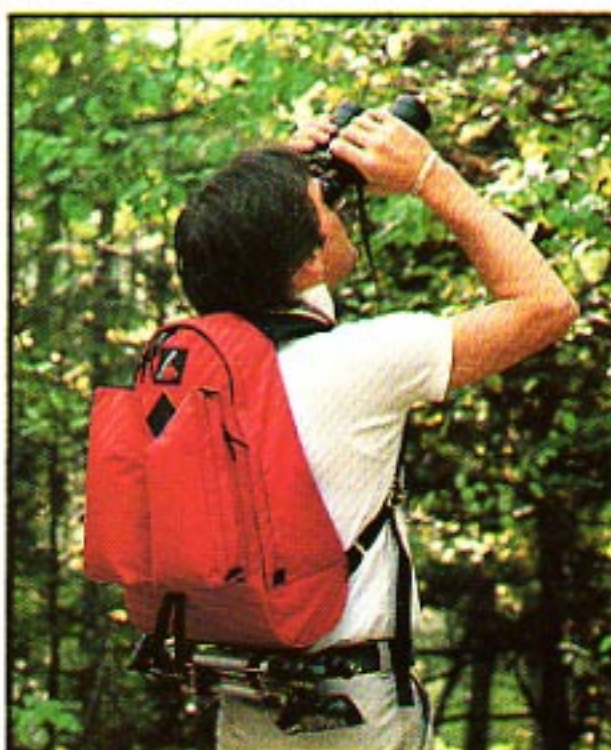

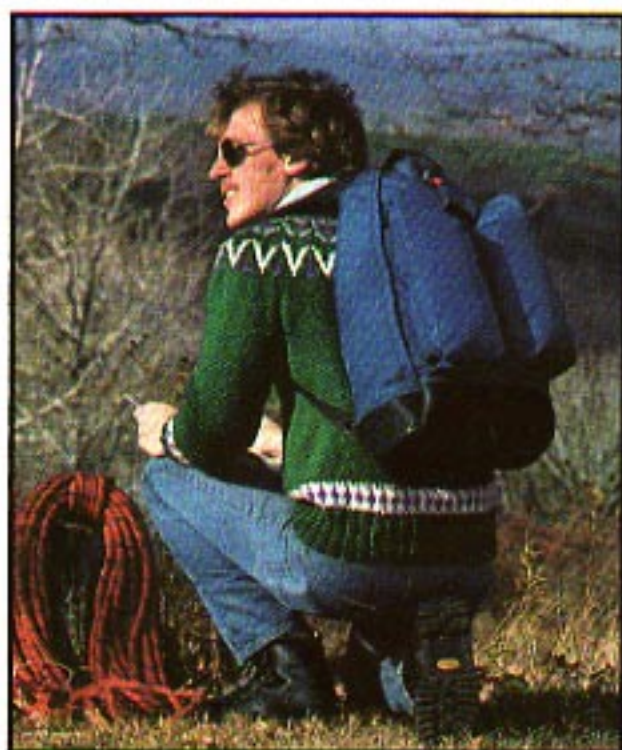

the Winan's Camel It's One Tough Customer

(882) Our Winan's Camel Pack is a hybrid. It has a combination internal/external frame support system. This hand bent tubular aluminum alloy frame is chosen for its high strength and light weight. It is anatomically shaped for proper fit. The frame forms two platforms, above and below the pack, for carrying additional gear such as a tent, sleeping bag, etc. Each platform has two captive, but removable, 40" tie down straps.

This internal/external design allows the pack to ride closer to your back, which means less foot pounds of leverage against your spine and less side to side sway. Our pack has excellent capacity while being more maneuverable than conventional frame packs. Our wrap around suspension system, together with the contour padded waistbelt, allows most of the weight to settle on your hips, and displaces the balance of the weight over more shoulder area. Pressure points, common to most other backpacks are substantially reduced. The sternum strap allows you to pull the shoulder pads closer to the center of your chest. Arm movement and load stability are maximized and underarm chafe is diminished. Convenience is inherent in the design. The full front-opening panel gives immediate access to all sections of the main compartment without removing any gear from the top platform. The contour foam padded waistbelt, which has left and right adjustment ability, features our quick release aluminum alloy buckle. A pouch pocket, suitable for gorp, pen knife, camera, etc., snaps to either left or right of this waistbelt.

This extremely rugged pack is made with urethane-coated, heavy duty nylon Cordura fabric. We use double stitching on all primary load bearing seams and there are numerous bartacks and leather reinforcements at stress points. Zippers are chosen for their durability and there are lace loops through all pulls for easy gloved operation. A zippered pocket is suspended from the frame at the top of the main compartment, keeping heavy items high and secure, yet easily flattened out of the way if desired. Two long external side pockets zip vertically and are double bartacked to the pack at their corners, allowing long items such as skis or fishing rods to slide through and be lashed to the leather patches above and below each pocket. There are two horizontally zippered external pockets attached to the front of the pack. All zippered openings have pull tabs and oversized rain flaps. Two compressor straps cross the front of the pack and prevent load shifting and zipper stress. A web ice axe loop is stitched beneath one of the two 6-slot leather patches on the front. Approx. capacity 3000 cu. ins.

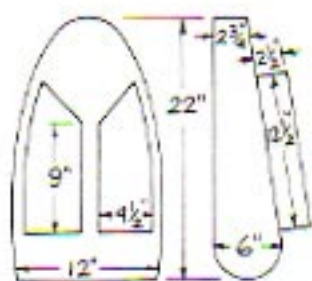

Cannondale technology gained from frame pack research gives these softpacks an edge over the competition. These softpacks are ideal for bicycling, ski touring, rock climbing, and day hiking, as well as for use around campus. Each softpack has our patented polyfoam liner, which protects your back from being jabbed by hard objects carried in the pack. The exclusive liner also cushions and quiets pack contents, helps spread the load weight evenly, (thus relieving stress on stitching) and prevents

wear and abrasion on the inside of the pack fabric. Access to pack contents is made easy by double pull tabs on wrap-around nylon coil zippers. Each pull tab features a generous lace loop for easy gloved operation. All zipper openings are protected from the weather by oversized rain flaps. All strap connections are durable, reinforced with bartack stitching and each pack provides the extra convenience of a nylon web haul/hang loop at the top.

super softpacks that are rugged and practical

(C857) **Trackwalker** is built with urethane-coated nylon Cordura and reinforced across the entire bottom with top grain cowhide. It features adjustable padded shoulder straps, an adjustable sternum strap, 2 generous vertically zippered exterior pockets, 2 leather tie-down patches on the bottom and one on the face, a stitched-in, covered polyfoam liner, and D rings for attaching the waistbelt (A002). You can lash objects, like an ice ax, between the vertical pockets without interfering with access to them. Colors: Black, Red, or Blue. weight: 1 lb. 4 ozs.

(C859) **Dispatcher** is a top value. It is constructed to the same standards as the Trackwalker in urethane-coated nylon Cordura and includes vertically zippered exterior pockets, 2 leather tie down patches on the bottom and one on the face, adjustable foam padded shoulder straps, an adjustable sternum strap, a removable polyfoam liner, and D rings for attaching the waistbelt (A002). Anything from tennis rackets to axes can be lashed between the pockets without hindering access. Colors: Black, Red, or Blue. weight: 16 ozs.

Approx. capacity: 1250 cu. ins.

Approx. capacity:
950 cu. ins.

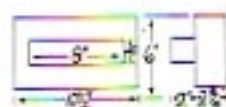

C857

C859

C848

(C848) 19" min. 50" max. waist measure

Our fannypacks have a large main compartment and one small outside pocket. The main compartment has a sewn-in covered foam pad to protect your back, as well as two bartacked interior elastic straps for securing fragile items (cameras, lenses, ski wax, etc.) The zipper pulls have lace loops for easy zipper operation. The web waistbelt features our quick release buckle. The fabric is urethane-coated, nylon Cordura with leather appointments.

Colors: Blue, Red, and Green.

C847

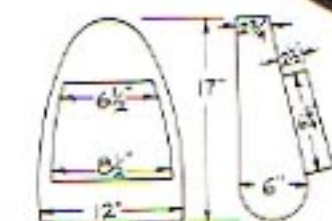

C847 24" min. 52" max. waist measure

Optional waistbelt A002

Optional sternum strap A008

(C849) **Stack**, our most basic softpack, is made of urethane-coated nylon pack cloth. It features adjustable web shoulder straps, a removable polyfoam liner, a zippered flat stash pocket, and attachments for an optional sternum strap (A008). Its ample capacity and ultra light weight makes the **Stack** an ideal utility/bookpack.

Colors: Blue, Red, or Green. weight: 12 ozs.

Approx. capacity: 850 cu. ins.

Approx. capacity:
750 cu. ins.

C854

C849

(C854) **Hobo**, a very versatile pack, is made of urethane-coated nylon pack cloth and features adjustable foam padded shoulder straps, removable polyfoam liner, a large 3 dimensional zippered exterior pocket, D rings for attaching the waistbelt (A002), and attachments for the optional adjustable sternum strap (A008). The generous capacity makes this an excellent pack whether traveling by foot or by plane.

Colors: Blue, Red, or Green. weight: 13 ozs.

All of these rugged bags are constructed of 100% cotton duck and are lined with urethane-coated nylon. The strong web handles are reinforced with bartacks at all stress points. The nylon coil zippers have generous lace loops through the pulls for ease of operation. All of the hardware is brass and each bag comes with a small urethane-coated stuff sack for personal articles or dirty laundry. These bags are generous in capacity and yet very convenient as carry-ons for airlines because they fit under the seat.

Colors: Camel with Navy (as shown), lining is Navy.

C100 The small duffel is a uniquely adaptable bag. It is as ideal for everyday use as it is for travel. It has a separate zippered compartment in one end and a generous stash pocket on the side. It comes with an adjustable shoulder strap (as shown). It measures 17 $\frac{1}{4}$ " x 9".

C101 The medium duffel is an ideal traveling companion because of its excellent capacity and many generous separate compartments. There is a zippered pocket at one end. On the side there is a combination of another zippered pocket and a separate stash pocket to hold anything you need close at hand. It comes with an adjustable shoulder strap. It measures 23 $\frac{1}{4}$ " x 10 $\frac{3}{4}$ ".

C102 Our weekender suitcase packs neatly because of its generous styling. It features a wrap-around zipper with double pulls for ease of access. There are 3 interior pocket compartments for organization of smaller items and a large exterior pocket. It measures 19" x 11" x 6".

This size chart also applies to our insulated clothing found on pages 8 and 9. All of our clothing is styled and sized for men and women.

SIZE CHART		MALE	FEMALE
P	is extra small	30-32	4-6
S	is small	34-36	8-10
M	is medium	38-40	12-14
L	is large	42-44	16-18
X	is extra large	46-48	

For a first look at any of our fine products, be sure to visit your Authorized Cannondale Dealer. You can buy from these qualified experts with confidence.

(916) Our lightweight wind shirt is stylish and simple. It is ideal for any time of year. The cloth is our durable 80/20 and features a partial front contrasting YKK zipper, contrasting knit cuffs, collar and waistband, and a large "kangaroo" styled handwarmer pocket behind the front zippered cargo section. Designed with raglan sleeves to allow maximum maneuverability. This shell is ideal for achieving the layered look, — which besides being "in style", is also energy efficient. (see page 8).

Colors: Navy with camel accents & Camel with Navy accents.

four season all purpose overwear

These handsome shell jackets from Cannondale are made with the same care and attention to detail that our other products are noted for. They are styled in our famous tightly woven 80% nylon/20% cotton cloth, which repels wind and water and has excellent abrasion resistance. All stress points are either bartacked or double stitched. The overall design and workmanship ensure that these jackets will withstand the rigors of the most active outdoor enthusiasts. All are sized for both male and female.

914 This handsomely designed shell pullover is lightweight and very versatile. It is ideal for almost any sport. Fashioned in our 80/20 cloth, it features a contoured hood with drawstring closure, a partial front contrasting YKK zipper, contrasting knit cuffs and waistband, and a large "kangaroo" handwarmer pocket behind the front zippered cargo section. This model, like our **916**, layers handsomely with our vests on page 8.
Colors: Navy with Camel accents & Camel with Navy accents.

914

Gaiters

Essential gear for many cross country skiers, climbers, and hikers. Our Gaiters are made in both a high version (**C905-15"**) and a low version (**C904-7"**). Contoured for proper fit, they have sewn-in elastic ankle bands, freeze resistant nylon coil zippers up the back, speed lace hooks, and nylon cord sole ties. The fabric is our breathable water resistant 80/20 cloth. These fine gaiters are also ideal for youngsters walking to school - They go on over any shoe and are no fuss substitutes for snow pants! Both versions are available in Navy & Camel.

C904
C905

913 Our most popular shell jacket is beautifully tailored. Constructed in 80/20 cloth, this jacket has many extras. The contoured hood has a drawstring closure and is fully lined in a contrasting color. Other features include gusseted cargo pockets in front of handwarmer pockets, adjustable velcro cuff closures, a full length YKK zipper, and a generous draft flap with snaps. Styled for men, it hugs the waist with an elastic back. Styled for women, it finishes at the upper hip with a wrap around hem and an adjustable drawstring.

Colors: Navy with
Camel accents
& Camel with
Navy accents.

913

more from Cannondale

T200

(T200) These quality knit **T SHIRTS** are made of 100% cotton. The fabric is preshrunk to assure continuous fit. The sleeves are lengthened to provide generous upperarm coverage for biking, climbing, and other active sports. Colors: Navy with red and white (as shown), and Bottle Green with red and white. Sizes: Small, Medium, Large, and Extra Large.

(B025) Our Hogger Cap has a sturdy, long bill for shade and is made of 100% cotton in a blue and white pinstripe, with the Cannondale logo patch. Sizes: Small (6 $\frac{1}{4}$), Medium (7), Large (7 $\frac{1}{4}$), and Extra Large (7 $\frac{1}{2}$).

B025

C917

DRYGOODS™
Ltd

(C917) Dry Goods™ coated nylon Rain Poncho is designed to keep a bicyclist safe and dry. Its versatile design, however, can take it anywhere from walking the dog to watching a football game. The contoured hood is designed to accommodate a bike helmet, with the addition of a buckle-adjusted web strap to take up the slack when the helmet is not in use. Drawstrings with cordlocks pull the hood snugly around the face. The visor is stiffened to prevent it from interfering with vision. Leg and thumb straps enable the bicyclist to hold the Poncho securely while riding. Two rear Reflexite® reflectors in addition to the brilliant yellow color of the poncho provides high visibility. The ponchos generous size assures that you will stay dry. Sizes: Medium and Large. Color: Yellow.

WARRANTY

Our products are carefully designed and tested to insure maximum performance. We're proud of our efforts and guarantee our equipment to be free of defects in both materials and workmanship. Any **CANNONDALE** product found to have a manufacturing defect will be repaired or replaced, at our option, without charge.

made in America

A bicycle is a highly efficient means of transportation. We design accessories to increase your bike's versatility and enhance its efficiency. Our years of extensive research and development have led to many innovations, which not only improve function, but also provide a margin of safety for the rider.

Our polyfoam liners, a Cannondale first, are incorporated into each handlebar and seat pack. They maintain the pack's shape while cushioning the contents and spreading the load weight evenly, relieving stress on stitching, and preventing wear and abrasion on the inside of the pack fabric. Our coated, lightweight metal, cantilevered frames support each handlebar pack at the top of each side. They are unobtrusive, extremely strong, and light in weight.

All packs are made of waterproof heavy duty Cordura

or Nylon Pack Cloth. Construction is precise with double stitching and generous bartacking throughout. Other standard features include: nylon coil zippers with easy to grasp lace loops through the zipper pulls, nylon web pull tabs for easy zipper operation, oversized rain flaps, safety reflectors, vibrationproof aircraft fasteners, and specially designed hardware for easy attachment and removal from the bike. All packs can be conveniently carried when off the bike by means of web handles and/or adjustable shoulder straps.

Building the highest quality components into every Cannondale bike pack and our attention to design refinements have made these fine accessories the very best you can buy.

For a first hand look at any of our bags, visit your Authorized Cannondale Dealer.

the optimum touring systems

... in Cordura®

Cannondale has selected urethane-coated Cordura® nylon because:

- it is highly waterproof
- it has high resistance to abrasion
- it has tremendous tear strength
- it will not rot or mildew

This specially engineered fabric is used throughout in the construction of our larger capacity bicycle bags and panniers. We are certain that you will find these fine products to be extremely rugged, completely efficient, and very eye catching. All styles in Cordura are shown on pages 28 and 29 and are available in Spider Black, Quicksilver Silver, Moonshadow Blue, or Red Alert Red.

spiderbags™

"In my more than 12,000 miles of self-contained bicycle touring, including a trip across the United States in 1976, I have used virtually every bicycle touring innovation devised.

I am most impressed with the unique support system and design incorporated in Cannondale's rear panniers. At first I felt the polypropylene framework would be a hinderance. Instead I found it to be very lightweight and very strong. It prevents the panniers from bending into the spokes - an important safety feature - and there is a surprising large amount of interior space.

What I found particularly pleasing is the new front zipper design. Since my tent and sleeping bag are tied down on top of the rear rack covering the top of the panniers, the side zipper access is much more convenient than a top-opening design bag. Because of the Cannondale design, I do not have to unload the tent and sleeping bag each time I need to open the panniers.

... more

As a photographer I carry at least eight to ten pounds of camera equipment in my handlebar bag. I have traveled over some very rough roads, including gravel, with my camera gear in my Cannondale handlebar bag, and the combination of the spring support handlebar bracket and shock cords, road vibration has not damaged a single piece of camera equipment."

Anita Notdurft-Hopkins
Board of Directors
League of American Wheelmen

colors and components

(B041) Overland Panniers — The finest large capacity touring panniers made are meticulously constructed of urethane-coated, heavy-duty nylon **Cordura**, the most durable, abrasion-resistant, lightweight material available. Cannondale's exclusive injection-molded, 3 dimensional interior support frame is made from an extra tough nylon resin which, having been tested beneath the wheels of a car, is virtually indestructible. These outstanding panniers also feature large, double-zippered, front opening main compartments with four zippered exterior pockets for organizing your gear. Off your bike the packs may be easily snapped together and carried by sturdy nylon web handles, or attached to our adjustable shoulder strap. There are twin red safety reflectors at the rear, and bartacks and/or double stitch reinforcements at all stress points. All zippers are nylon coil with web pull tabs. All necessary mounting hardware is included.

COLORS: Black, Silver, Blue, or Red. weight per set: 3 lbs. 8 ozs.

Approx. capacity: 2500 cu. in. per set.

(B043) Switchers Front/Rear Panniers are the newest addition to our touring line. They are constructed of urethane-coated nylon Cordura with our patented 3 dimensional extra tough, nylon resin internal support frame. They have one large main zippered compartment with a zippered exterior flat pocket for extra maps, etc. These panniers are named for their versatility — as they can be used on a front or a rear rack. Each pack has one white and one red safety reflector for maximum visibility whether selecting front or rear use. The packs may be snapped together when off the bike and carried by an adjustable shoulder strap. All necessary mounting hardware is included.

COLORS: Black, Silver, Blue or Red. weight: 2 lbs. 9 ozs.

Approx. capacity: 1420 cu. ins. per set.

(B037) The Trestle Handlebar Pack is a multi-compartmented, long distance touring handlebar pack. Constructed of urethane-coated nylon Cordura it's components include a large capacity main compartment with bottle holder and self pocket, 3 zippered exterior pockets (front, top and rear), 2 flat stash pockets on the sides, leather-reinforced frame support channels, a zippered, snap-on map case and an adjustable shoulder strap for carrying the bag away from the bike.

COLORS: Black, Silver, Blue or Red. weight: 1 lb. 5 ozs.

Approx. capacity: 675 cu. in.

Specify "Drop" or "Upright" handlebar support frame when ordering.

(B031) The Signal Seat Pack is both rugged and spacious. Constructed of urethane-coated nylon Cordura, it features lightweight, cam-lock, molded nylon buckles and straps that fasten quickly to saddle eyelets or to underseat wire stays, and a wrap around double-pull zipper opening for easy access to contents. **COLORS:** Black, Silver, Blue or Red. weight: 8 ozs.

Approx. capacity: 300 cu. in.

(B046) The Rackpack has an extremely generous carrying capacity. It is made of urethane-coated nylon Cordura and has our famous polyfoam liner to maintain it's shape. This single compartment pack attaches quickly and securely to the top of a carrier rack with adjustable length velcro straps. It features double-pull zippers for full opening and easy access to contents. There is a web handle at the back for convenient carrying when pack is off the bike.

COLORS: Black, Silver, Blue, or Red. weight: 9 ozs.

Approx. capacity: 400 cu. in.

(B026) The Cannondale Tire Sock/Utility Bag is the best available anywhere. Made from tough urethane-coated nylon Cordura, its unusual stability is attributable to a mounting system that secures the bag under the saddle and eliminates sway by wrapping a velcro strap around the corner of the top tube and the seat tube. This large capacity bag will hold two tires, tools or other gear. Its three distinct zippered compartments allow you to sort your gear, prevent items from being crushed and kept within easy reach. The wrap-around zipper on the main compartment provides for easy access. Your legs will not hit the bag even on narrow racing saddles.

Colors: Black, Silver, Blue or Red. weight: 3 ozs.

the optimum touring systems

... in Nylon Pack Cloth

Cannondale has selected urethane-coated Nylon Pack Cloth because:

- it is tightly woven
- it is waterproof
- it is lightweight
- it is very durable

Our mid-capacity components constructed of this quality nylon pack cloth fabric will more than stand up to the rigors of cross country touring. Because these bags are "built tough to take it", they offer real value. All available styles in nylon pack cloth are shown on pages 32 and 33.

"The return of the serious bicyclist to the American transportation scene has taken a few new turns. For example, the words 'alternative transportation' now apply to the bicycle commuter, who uses a bike to 'drive' back and forth to work each day, even during winter months. Often commuting through some fairly dense city traffic, the hardy bikees of New York City, for instance, dexterously weave their way through the stilled traffic jams of the Big Apple's busy streets.

You too can enjoy the many benefits of bicycle commuting, which include serene good health, more energy at the end of the day than you used to have at the beginning, and dollars saved in fares, or fuel (it costs 25 cents a mile to drive these days any way you slice it).

Longer bicycle trips, for the sheer out-of-doors fun of it, are more popular these days than ever. Alone or in groups, with a club such as the League of American Wheelmen, the Sierra Club or the American Youth Hostel (AYH), cyclists are taking to the highways and byways of America in ever increasing numbers. It's a beautiful country and this is one fantastic way to see it... Do go cycle touring and camping; you'll love the great outdoors, the feeling you can make it on your own, and the solitude of just you and your wheels.

Let's talk about equipment for a minute... I found Cannondale touring systems to possess, to a high degree, all three of the most desired characteristics of this type of equipment: Quick and Easy Attachability, Stability, and Durability. These are really terrific bicycle bags and panniers... Well worth the money!

"Being a backpacker and a cyclist, I have recommended Cannondale equipment on many of my expeditions. After much use & experience with the importance of quality equipment, I feel Cannondale is of the finest quality and workmanship."

Robert Richard
Nashua, New Hampshire

more components

(B040) Whistles panniers are the best medium capacity touring panniers you can buy anywhere. They are ruggedly built of urethane-coated pack cloth with a 3 dimensional rugged nylon internal support frame. Other features include large, double-zippered front-opening main compartments with one large zippered exterior pocket, precise bartacks and/or double stitch reinforcements at all stress points, and twin red safety reflectors. The packs can be snapped together for carrying when off of the bike. There are also D rings for attaching the adjustable shoulder strap. All zippers are nylon coil with web pulltabs. All necessary mounting hardware is included.

Colors: Blue, Red, or Yellow. weight per set: 2 lbs. 14 ozs.
Approx. capacity: 2000 cu. in. per set.

(B042) Shuttles panniers are the newest addition to our touring line. They are constructed of urethane-coated nylon pack cloth with our patented 3 dimensional rugged nylon internal support frame. They have one large main zippered compartment with a zippered exterior flat pocket for extra maps, etc. These panniers are named for their versatility — as they can be used on a front or a rear rack. Each pack has one white and one red safety reflector for maximum visibility whether selecting front or rear use. The packs may be snapped together when off of the bike and carried by an adjustable shoulder strap. All necessary mounting hardware is included.

Colors: Blue, Red, or Yellow. weight per set: 2 lbs. 9 ozs.
Approx. capacity: 1420 cu. ins. per set.

(B027) Chugger handlebar pack has one zippered exterior pocket on top. It is made of urethane-coated nylon pack cloth and features our famous polyfoam liner, a Cordura stash pocket on each side with leather reinforced support frame channels, a zippered snap-on map case, and a detachable shoulder strap for carrying the pack when off of the bike. All necessary hardware for mounting is included. Specify "Drop" or "Upright" handlebar support frame.

Colors: Blue, Red, or Yellow. weight: 15 ozs.
Approx. capacity: 525 cu. ins.

(B017) Casey handlebar pack for touring or around town is made from urethane-coated nylon pack cloth. It has one large main compartment with polyfoam liner, a snap-on zippered map case, and reinforced "D" rings for use with adjustable shoulder strap. Specify "Drop" or "Upright" handlebar support frame. All necessary hardware for mounting is included.

Colors: Blue, Red, or Yellow. weight: 13 ozs.
Approx. capacity: 420 cu. in.

(B020) Roundhouse handlebar pack is a new version of an old favorite. This urethane-coated nylon single compartment pack constantly maintains its shape with our famous polyfoam liner. Specify "Drop" or "Upright" handlebar frame. Colors: Blue, Red, or Yellow. weight: 8 ozs.
Approx. capacity: 230 cu. ins.

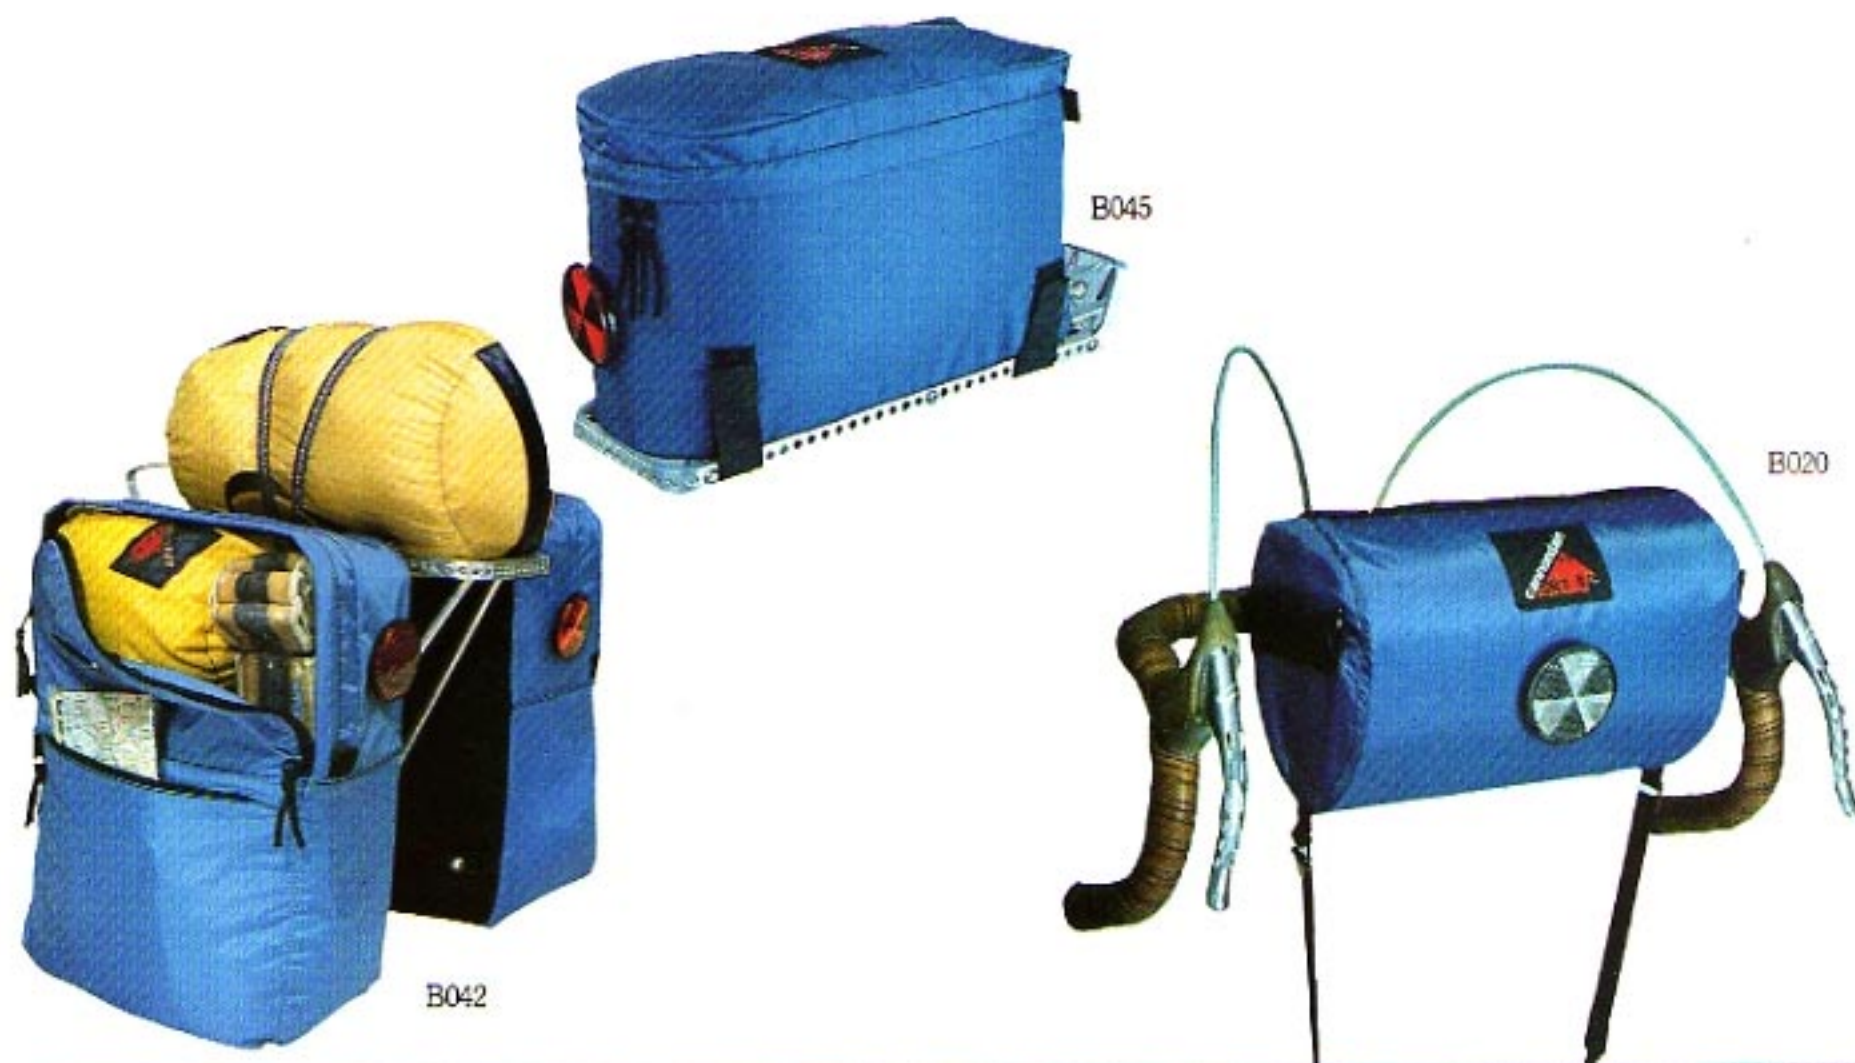

(B045) The Rackpack has an extremely generous carrying capacity. It is made of urethane-coated nylon pack cloth and has our famous polyfoam liner to maintain its shape. This single compartment pack attaches quickly and securely to the top of a rear carrier rack with adjustable length velcro straps. It features double-pull zippers for full opening and easy access to contents. There is a web handle at the back for convenient carrying when pack is off the bike. Colors: Blue, Red, or Yellow. weight: 9 ozs.
Approx. capacity: 400 cu. ins.

(B021) Toot seat pack, made of urethane-coated nylon pack cloth, fastens quickly to saddle eyelets with lightweight, cam-lock, molded nylon buckle and strap assemblies. Colors: Blue, Red or Yellow.
Approx. capacity: 215 cu. ins.

weight: 6 ozs.

B021

HANDLEBAR BAGS

B037

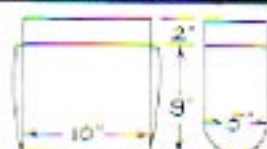

The detailed main compartment of the B037 features a bottle pocket, a full width stash pocket, and elastic dividers. The stash pocket can be used for sunglasses, wallet, or extra maps. The elastic dividers are ideal for securing cameras, lenses, etc. This exceptionally well designed handlebar bag makes a great camera bag or overnight bag when traveling.

(B037) Trestle Handlebar Bag

- Urethane-coated nylon Cordura
- Zippered, detailed main compartment w/ double pulls
- External front, top and back zippered pockets
- Snap-on zippered map case
- Leather frame channels
- Cordura side stash pocket
- Velcro safety frame fastener
- White safety reflector
- Adjustable shoulder strap
- Adjustable tab buckle shock cords
- Patented polyfoam liner
- Capacity: Approx. 675 cu. in.
- Coated lightweight metal cantilevered frame
- Colors: Black, Silver, Blue or Red

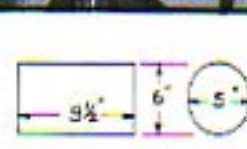

(B027) Chugger Handlebar Bag

- Urethane-coated Nylon Pack Cloth
- Zippered main compartment w/ double zipper pulls
- External top zippered pocket
- Snap-on zippered map case
- Leather frame channels
- Cordura side stash pocket
- Velcro safety frame fastener
- White safety reflector
- Adjustable shoulder strap
- Adjustable tab buckle shock cords
- Patented polyfoam liner
- Capacity: Approx. 525 cu. in.
- Coated lightweight metal cantilevered frame
- Colors: Blue, Red or Yellow

(B017) The Casey Handlebar Bag

- Urethane-coated Nylon Pack Cloth
- Zippered main compartment w/ double pulls
- Snap-on zippered map case
- Nylon web frame channel
- Velcro safety frame fastener
- White safety reflector
- Adjustable shoulder strap
- Adjustable tab buckle shock cords
- Patented polyfoam liner
- Capacity: Approx. 420 cu. in.
- Coated lightweight metal cantilevered frame
- Colors: Blue, Red or Yellow

(B020) Roundhouse Handlebar Bag

- Urethane-coated Nylon Pack Cloth
- Zippered main compartment w/ single zipper pulls
- Nylon web frame channels
- Velcro safety frame fastener
- White safety reflector
- Nylon web hand carrier
- Adjustable tab buckle shock cords
- Patented polyfoam liner
- Capacity: Approx. 230 cu. in.
- Coated lightweight metal cantilevered frame
- Colors: Blue, Red or Yellow

(B026) The Cannondale Tire Sock/Utility Bag is the best available. Why? **Uncanny Stability** — a mounting system that holds the bag under the saddle and eliminates sway by wrapping a velcro strap around the corner of the top tube and the seat tube. **Large Capacity** — holds two tires, tools, or other gear. **Compartments** — three distinct zippered compartments allow you to sort your gear, prevent tubes of glue from being crushed, keep small items within reach. **Easy Access** — wrap around zipper on main compartment. **Durable** — made of abrasion resistant urethane-coated Cordura fabric. **Leg Clearance** — the bag will not hit your legs, even on narrow racing saddles.

Colors: Black, Silver, Blue, or Red.
weight: 3 ozs.

SEAT/RACK PACKS

(B031) The Signal Seat Pack

- Urethane-coated nylon Cordura
- Cam-lock molded nylon buckle seat fastener
- Wrap around double-pull zipper
- Strap & buckle fasteners swivel to accommodate saddle wires
- Red safety reflector
- Generous zipper rain flap
- Capacity: approx. 300 cu. in.
- Colors: Black, Silver, Blue or Red

made in America

The Rackpack

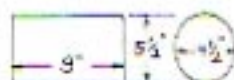

(B045) Nylon and (B046) Cordura

- Urethane-coated nylon pack cloth
- Polyfoam liner
- Single main compartment
- Double-pull wrap around zipper
- Adjustable-length velcro rack fasteners
- Nylon web handle for off-bike carrying
- Nylon Colors: Blue, Red or Yellow
- Cordura Colors: Black, Silver, Blue, or Red
- Approx. capacity: 400 cu. in.

(B021) The Toot Seat Pack

- Urethane-coated nylon pack cloth
- Cam-lock molded nylon buckle seat fastener
- Straight-line single pull zipper
- Red safety reflector
- Generous zipper rain flap
- Capacity: approx. 215 cu. in.
- Colors: Red, Blue or Yellow

PRESS RELEASE

Cannondale Corporation has designed a highly advanced nylon resin interior support frame for all pannier models (B041, B040, B043, and B042). Foster® Nylon #1722 is the material used. It combines exceptionally high impact strength with excellent cold temperature resistance. The lightweight frame consolidates the load and provides for even distribution and complete stabilization. Product life is substantially improved by the resulting reduction of load stress on seams and zippers.

as reported in
Modern Plastics Magazine

patent pending

PANNIERS

(B041) Overlands Rear Panniers

Features of this set are:

- 3 dimensional nylon #1722 internal support frames
- Heavy-duty urethane-coated nylon/Cordura fabric
- Adjustable shoulder strap
- Velcro snap locking system with nylon web handles
- Red rear safety reflectors
- Zippered main compartment with double zipper pulls
- 8 external zippered pockets
- Capacity — 2500 cu. in. per set
- Available: Black, Silver, Blue or Red

(B040) Whistles Rear Panniers

Features of this set are:

- 3 dimensional nylon # 1722 internal support frames
- Rugged urethane-coated nylon pack cloth
- Adjustable shoulder strap
- Velcro snap locking system with nylon web handles
- Red rear safety reflectors
- Zippered main compartment with double zipper pulls
- 2 external zippered pockets
- Capacity — 2000 cu. in. per set
- Available: Blue, Red or Yellow

(B042) Shuttles Front/Rear Panniers

Features of this set are:

- 3 dimensional nylon # 1722 internal support frames
- Rugged urethane-coated nylon pack cloth
- Adjustable shoulder strap
- Velcro snap locking system with nylon web handles
- Red and white safety reflectors
- Zippered main compartment with double zipper pulls
- 2 external zippered slash pockets
- Capacity — 1420 cu. ins. per set
- Available: Blue, Red or Yellow

(B043) Switchers Front/Rear Panniers

Features of this set are:

- 3 dimensional nylon #1722 internal support frames
- Heavy-duty urethane-coated nylon Cordura fabric
- Adjustable shoulder strap
- Velcro snap locking system with nylon web handles
- Red and white safety reflectors
- Zippered main compartment with double zipper pulls
- 2 external zippered slash pockets
- Capacity — 1420 cu. ins. per set
- Available: Black, Silver, Blue or Red

TOP FLIGHT ACCESSORIES

from Cannondale

(BR80) Front Carrier Rack and (BR81) Rear Carrier Rack.

Finally — fully adjustable racks with four point connection for maximum strength and stability. Our special clamps give you the convenience of adjustability and the strength of a seat stay mounted rack. Dependable strength and tremendous lateral stiffness come from an extruded aluminum alloy deck, bend-free legs, and proper triangulation. This rack is designed to handle heavy loads and high mileage. The rack is entirely mechanically assembled with vibration proof stainless steel fasteners. This feature facilitates repairs in situations that would strand cyclists with welded racks. We include a special flexible Reflexite® reflector — positioned to allow full use of the deck. We also include stainless steel pannier hooks, non-marring seat stay clamps and an allen wrench. Our front rack shares the fine characteristics of the rear rack. It is easier to install than most front racks not requiring removal of the wheel. Weight: Approx. 15 oz.

Be sure to see these fine gloves — they really are the BEST!

The Cannondale cycling gloves are entirely handmade in the mountains of Pennsylvania, unlike most cycling gloves which are manufactured abroad. The 100% cotton back is hand crocheted to our precise patterns to assure an incredibly great fit — no gaps at all. We combine top quality supple glove leather with carefully designed padding to give you a fine fit and all day comfort. Our wrist closures are integral with the glove, trimmed in soft durable leather, and have long lasting velcro fasteners. Our gloves have fewer seams, higher quality construction, better materials, and are made in America.

Sizing is determined by measurement in inches of your right hand around the knuckles with hand flat. Do not include thumb.

P 6-6½
S 7-7½
M 8-8½
L 9-9½
X 10-10½

made in America

INNOVATIVE. UNIQUE.

BH20

(BH20) The Cannondale water bottle is like no other. It is safer and more convenient than any water bottle you have ever used. Don't fight a cage or align a dovetail! Simply place the velcro loop covered bottle on the velcro hook covered base. Vibration improves the grip. The loop covering allows placement in virtually any orientation. To remove the bottle, just pick it up. It is so easy to use, you are free to concentrate on riding. The bottle is large, holding 24 oz., has an exceptionally wide mouth, allowing you to mix powdered drinks or add ice, and has a drinking spout designed to be easily opened and closed with your mouth. The base is injection molded Dupont Zytel 105, a tough weatherproof material which will not mar your bicycle. Installation is simple, requiring a single screw. The necessary wrench is included. Weight: 3 ozs.

Mount only on the down tube.

Passengers

Remember the magic of flying down the sidewalk seated in your "little red wagon?" With the Bugger, your child's memories will have the safety and riding comfort the "little red wagon" lacked. The waist/shoulder combination straps with child resistant buckles will comfortably secure one or two small children. Traveling with children should be a visual learning experience for them as well as for you. Kids love the out-of-doors. Explore it with them...

"The children enjoy it immensely and we are very relaxed as we feel the Bugger is so much safer than the previous child carrier we had."

Laurie Hedlund
Ranier, MN

Errands

Trail your Bugger through your daily round of errands. Four bags of groceries fit neatly into the Bugger along with various other items. Save car wear and gas while increasing your own energy level. When not in use, the Bugger stores upright against the wall — out of the way.

Outings

Pile onto your bikes and pedal to the beach or park. The Bugger's generous carrying capacity allows you to take a five course picnic right along with you wherever you go. The combination of good fun, good food and good exercise is unbeatable.

Ecology

Set an example by hauling your cans and newspapers for recycling. Not only are you performing your civic duty, but you are also conserving fuel and reducing pollution.

Projects

Riding your bike to the garden center will give you a chance to view all the landscape designs you never noticed at 55 mph. By the time you reach your destination you may have solved most of your own landscaping problems. Make the weekend project a real "do it yourself" event.

"I think you have a real fine line of products. I especially like my Bugger which I've had for 6 years."

John G. Daly
Chicago, IL

Camping

Try packing your cumbersome gear in the Bugger and see how easy it is to trail everywhere your bike can go with no significant drag and no loss of maneuverability.

Basic Transportation that saves you money

"I have used the Cannondale Bugger, and can report it works just fine. On a trip with friends we take turns pulling the trailer, since it's quickly detached and re-attached to another bike... we have better access to camping gear, lots of room to stow groceries for the evening cook-out and breakfast the next morning. The trailer is real handy around the campsite to haul wood, water from the always too distant pump, and making friends with other campers by giving their kids a joyride around the camp. If you have children of your own along, the trailer is, of course, an absolute 'must'."

Eugene A. Sloane, Author
The All New Complete Book of Bicycling
1981, Simon & Schuster

the ULTIMATE mpg machine™

ma·chine(me-shen)n. I.a. Any system formed and connected to alter, transmit and direct applied forces to accomplish a specific objective.

In the 70's, Cannondale Corporation designed the Bugger to do just that: To make use of you and your bicycle's locomotion to transport almost anything you wished at the same time. The Bugger of the 70's was a hit with all who knew and used it. A child seat was added to secure and carry even more precious cargo. Throughout the last decade, design changes were tested and implemented until...

NOW... The all new Bugger® of the 80's!

The Bugger of the 80's is a beautiful 'state of the art' piece of equipment. Design improvements have allowed increased capacity while improving maneuverability. A steel axle held by two aluminum alloy supports holds two 20" wheels with pneumatic tires and sealed ball bearings. The tubular steel tongue melds beautifully with the chassis and clears most carrier racks. Also included is our new patented safety hitch. See below for details. Sporting a polyethylene chassis with an aerodynamic, elongated shape and a low center of gravity, the Bugger of the 80's is sleek and streamlined, both in appearance and ease of use, as should be any "top of the line" high-tech machine.

The recommended load limitation is 80 lbs. The height of the passenger(s) should not exceed 40".

This unique innovation has earned the right to be called "the ULTIMATE mpg Machine."

Cannondale's "Ultimate mpg machine" is in tune with this decade of style, energy-efficiency and self-sufficiency. It is also in tune with traditional values now being regenerated; the conservation of our natural resources, concern for our own physical and mental health, the return to nature, and the reaffirmation of the family.

Cannondale's "Ultimate mpg machine" is for today. It is classy to look at and pleasurable to use while being sensible and functional. As you move into the 80's ahead of the rest... let the "Ultimate mpg machine" trail close behind you...

"I am writing this to tell you how pleased my wife and I are with your new "Bugger"... upon seeing one of your ads we decided to order this neat looking contraption through our local bike dealer. I was delighted to find that your workmanship and quality were excellent. The hitching apparatus to the bike seat post works smoothly and switches from bike to bike in a matter of seconds... we are impressed with how much more stable we feel carrying the two children this way... and how comfortable they appear to be riding... it still allows for a late afternoon nap."

Gary L. Brown, M.D.
Mt. Vernon, WA

(B003) Bugger® — "the ULTIMATE mpg machine"

(A018) The optional Tonneau Cover not only adds a striking dimension of color, but its taut fit assures that the contents will remain clean and dry. It is constructed of urethane-coated nylon pack cloth with a strip of heavy duty elastic stitched around the circumference to assure proper fit. Two Reflexite® reflectors are stitched on for added visibility. Colors: Blue, Red or Yellow.

(A010) The Patented Safety Hitch, made of molded polypropylene and stainless steel attaches quickly and securely to any size bicycle seat post without tools. The design, construction and materials used dampen road shock and insure worry-free maneuverability and load safety. A steel toggle latch (resembling a ski boot buckle) secures the hitch. This exceptional innovation may be ordered separately for installation on any previous model Bugger.
