Get your pleasure out of

Kingpin

Hinge Model KP500BH

This amazing cycle goes where others can't: in a car boot, in a cupboard, on a boat — wherever space is limited. Folds and unfolds in seconds. The immensely strong hinge is genuine forged steel and should not be confused with cheap, unreliable pressed hinges. Finish: Brown or Green.

KP 18

Popular junior version suitable for boys and girls from seven to eleven years. Single speed but with most of the adult version's built-in features. Colours as specification chart.

Kingpin

Model KP 500C

This is the ultimate in small wheel unisex cycles. With its superior designed frame and various light alloy components, it stands head and shoulders above the rest. Among its many outstanding features are ball bearings throughout, easily adjustable, finger-operated handlebar and seat positions, and 500A comfort tyres for added ease and mobility. Available in several different versions (see price list). Colours as specification chart.

Flair

Models 23G - Gentlemen's. 23L - Lady's.

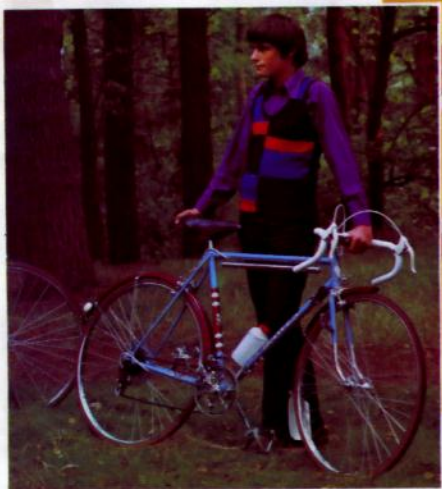

Semi-tourist lightweight for the man or woman who enjoys cycling as a leisure activity. Alternative choice of gearing (3 or 5 speed Gentleman's, 3 speed Lady's).

Double Five

Model 27/10

Fully equipped 10 speed model with superior specification.

Flambeau

Model 26

This sleek machine with its many built-in features, is the ultimate for the purist.

Red Feather

Model 18

A genuine miniature brazed up frame, offering to the youngster the complete sports specification of the adult counterpart.

Fleur

◀ Model 25

A sporty machine for the fairer sex. Available in two choices of frame design and handlebars, Maes dropped or raised allrounder. Conventional frame (as illustrated) or twin lateral of continental design with straight, small diameter tubes from head to rear dropout giving a frame almost as rigid as a man's version.

Galaxy

Model 30/10 ▶

Basically designed for touring; includes many quality features with Reynolds '531' tubing.

Star Celeste

Model 24S ▶

For the more discerning rider who welcomes the functional duo capacity braking system.

Streak

Model 22

Mirage

Model 28/10

Streak

Trendy sports machine for the teenager. Super impact colours, featured with virtually indestructible lightweight mudguards. Chainwheel and rear wheel discs give added protection.

Mirage

A lightweight Reynolds '531' frame especially designed for the club rider. Incorporates high quality alloy components.

Chevron

For the enthusiast, available in four frame sizes and colours. Additional options of 10 speed gears, Weinmann centrepull brakes, or alloy allrounder bend.

Chevron

Model 20

Dawes Cycles Ltd., founded in 1926, is a family business now under third generation management.

We are an independent company, specialising exclusively in the manufacture of high quality, lightweight cycles.

Our aim is to design and manufacture a product that is modern, attractive and which incorporates a variety of superior components for the discerning customer who requires a bicycle which offers that important bit extra.

TRADE DESCRIPTIONS ACT AND SPECIFICATIONS

Dawes Cycles Ltd. operate a policy of continually trying to improve standards and quality. This may cause slight changes to the specifications printed above. Your Dealer will be able to explain any variations that may have occurred between time of printing and date of sale.

AND WHEN YOU'VE BOUGHT THAT NEW BICYCLE — WHY NOT JOIN THE CYCLISTS' ASSOCIATION? The CTC will protect you on the road, insure you, obtain compensation if you are involved in an accident, and offer expert advice to help you increase your 'out-of-Dawes' pleasure.

WRITE FOR MEMBERSHIP DETAILS to CTC, 69 Meadrow, Godalming, Surrey.

FRAME MATERIALS

All frame and fork materials used in the construction of our cycles are of high carbon British Steel tubing conforming to British Standard Specifications, with tapered and domed stays and fork blades. All hand-built and brazed, fittings bronze welded. Lugs of highest grade, feature cut for lightness and brazing strength. Hand filed and polished before rust proofing with I.C.I. phosphating process. Every frame is finished with at least three coats of enamel and laquer, hard stoved for maximum durability and richness of colour.
