NINETEEN NINETY SEVEN

BACKGROUND TO DAWES

In a world that so often seems too heavily influenced by the novelty of new-for-new's-sake, Dawes are proud to build bikes that reflect the true practical qualities of the bicycle, for riders who like to ride above the hype.

The bicycle is a social catalyst. It reflects mobility, recreation, fun, function and, perhaps above all, change. As the 20th century draws towards the 21st we celebrate the coming of age with a re-emergence of the bicycle. The growth of Sustrans and the National Cycle Network are reflections of and outlets for the growing popularity of the bicycle. Now is the time to buy a new bike.

At Dawes, we've been building bikes for sixty five years. We prosper because we celebrate the bicycle as one of the most valuable additions to human culture this century. We've taken on board all the trends that have improved the bicycle. We recognise a need for different bikes for different purposes: for convenient, fast and environmentally friendly transport, for personal status, for recreation, for fun or for sport. You name it, off road or on, we have the perfect bike for it.

Our major emphasis is on 'built for life' quality. Attention to detail is second to none, so our steel frames offer lifetime guarantees. There's a place for robots and there's a place for people. Our designers and our builders choose the hands-on approach. They spend their weekends in the saddle, cruising the lanes, pushing the limits and checking out the opposition. They test new frames, component designs and materials to sort out the wheat from the chaff, then they spend their working weeks putting the theory into practice. Dawes bikes are at the leading edge because our designers have their fingers on the pulse, and it's a pulse that reflects a healthy heart. Our 'Dawes for Life' commitment reflects an absolute confidence in both our bikes and their beneficial effect on the health and lifestyle of customers.

BIKE CHOICE

The first question you should ask yourself when you're looking to buy a bike is "What sort of riding do I want to do?"

If you're not sure whether your preferred territory is dirt or tarmac, a **MOUNTAIN BIKE (page 3)** or a **HYBRID (page 17)** are your options. Our MTBs are built to take you over extreme terrain. Our Hybrids can take a fair few knocks too. They're designed using all the tricks from the MTB scene, and a few more besides. They're in perfect harmony with the rigours of modern town and trail biking, they can cut a quick line through traffic but they're equally at home on occasional off road forays and long tours. And check out the Metropolis folder and the Low Rider recumbent. Who said Dawes only cater for traditionalists?

For the perfectionists, the riders who already know exactly what sort of terrain they want to ride, Dawes continue to further develop the world renowned **TOURING (page 12)** and **ROAD BIKE (page 24)** ranges. In the brave new worlds of MTB thrills and urban autogeddon, the traditional cyclist has never been better catered for. A Dawes bike is a Dawes for life.

DAWES *for life*

MOUNTAINBIKES

The advent of the Mountain Bike has really challenged traditional bike designs.

MTBs are built with thicker gauge frame tubesets and chunkier componentry than race or hybrid bikes. The geometry is generally more relaxed than on hybrids or road bikes. This ensures superb handling over rough terrain, hill climbing agility, downhill confidence and more pedal clearance for avoiding obstacles. Top tubes are much lower than on road bikes, for increased body clearance during tricky manoeuvres, and the wheelbase is longer for increased stability.

Fat tyres, the most distinctive feature of the MTB, offer excellent traction and shock absorption over rough terrain. If your terrain choices are less demanding, the 26in MTB wheel size can offer a great choice of compromise. But if your terrain is more road biased, you'd be better off looking at our Hybrids.

DAWES *for Life*

Topping off Dawes MTB range, the race ready **EDGE SERIES** bikes feature the superb 7005 T6 aluminium frame (Tandem is Reynolds 501). The XT equipped Team Issue machine is a real top dog off road racer, but the frame remains the same down to the super-competitive Edge STX. On such a fine frame, upgrades are a sound investment.

EDGEFS

The ultimate in full suspension technology

- 7005 T6 aluminium frame
- Fully active rear suspension
- Shimano XT gear system
- Magura Hydraulic brakes
- Rockshox Indy XC fork
- Colour: Team Issue Yellow

DAWES RACING TEAM

Dawes Technical Manager Chris Hearn is a man who takes his job very seriously. When he tests the durability of the Dawes ATB range he does it in the heat of competition on some of the toughest courses in the country.

Along with fellow Dawes team members Mark James and Richard Allaway, Vince Potter and Judith Shakeshaft, Chris Hearn can vouch for the Dawes reputation for ultimate performance under stress.

EDGEXT(Team)

Team issue race machine

- 7005 T6 aluminium frame, with replaceable gear hanger
- Pace suspension fork
- Shimano XT 24 speed STI gear system for the ultimate in precision shifting in the very worst conditions
- 'V' brakes for total control on the steepest decent
- Colour: Team Issue Yellow
- Frame sizes: Gents 43, 48, 53cm

ACOMA

- Double Butted Cro-Moly frame saves weight and improves handling
- Unicrown Cro-Moly fork
- Full Shimano Alivio 21 speed STI index gear system, Alivio is the ultimate mid range gear system for 1997
- Race light Sella Italia Expedita saddle
- Alloy quick release wheels
- Colour: Gunmetal
- Frame sizes: Gents 41, 46, 51, 54cm

DOUBLE TROUBLE

When cousins Martin Hainsworth and Chris Woodhouse discovered the delights of off road cycling they were in one mind as to their ideal machine - The Dawes Double Edge Tandem!

"The Tandem is twice the fun and twice as rewarding as long as you both share the effort," they both agree.

Up in their native rural Yorkshire community the lads are always favourites on their local charity cycle ride - especially when they've got The Blues Brothers blaring out "I need you! you! you!" from the ghetto blaster attached to the rear rack.

TEKARRA

- Shimano Alivio/Acera X 21 speed STI index gear system for superior performance
- Ultra light Cro-moly frame
- Cro-Moly fat taper forks for maximum directional control
- Ritchey Z-Max tyres
- Alloy quick release wheels
- Colour: Night Violet
- Frame sizes: Gents 41, 46, 51, 54cm

Fun to ride, with easy to operate 5 speed Shimano index gear system and alloy wheels, the Misty is an ideal entry into cycling for Girls aged between 6 and 9 years of age.

- Frame Size: 30cm x 20" wheel

NATIONAL CYCLE NETWORK

Buy a bicycle with this symbol and support the National Cycle Network.

Each time a bicycle is sold which carries the National Cycle Network symbol, a contribution is made to help construct the Network. This initiative was started by the Bicycle Association, the official trade organisation for the UK bicycle industry.

The National Cycle Network consists of over 7,000 miles of continuous safe, traffic-free or traffic-calmed routes, which will be completed by 2005. The route will pass through all Britain's main towns and cities, within two miles of 20 million people.

Away from the traffic and noise the National Cycle Network has 50% of its length on country lanes and 50% currently off road, taking in disused railway lines, tow paths and riverside routes. Most importantly, the aim is to create a network that would be safe for an unaccompanied 12 year old to use with absolute confidence.

TOURING_{BIKES}

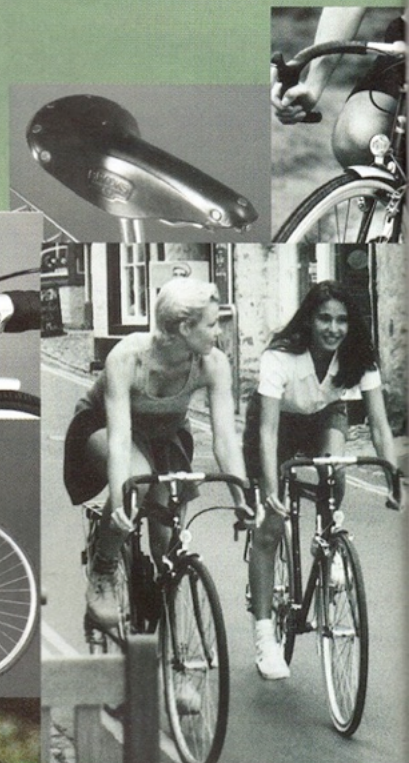

A Dawes touring bike is the classic enthusiast's all-rounder.

We have always been recognised as market leaders. A Dawes touring bike will give you a lifetime of cycling pleasure. It'll serve you well regardless of whether you want to explore the world, escape for a weekend, cut through traffic on the way to work or fetch the shopping. Touring bikes are designed to travel long distances and carry luggage. Inevitably, they also double up as excellent commuting cycles.

Our frames are built from durable Reynolds 531 & 501 tubing, emphasising high strength and rigidity for fully laden riding. Impressive stability, comfort and control are dialed into the geometry.

Touring bike componentry is robust and durable. Mudguards and pannier racks are fitted. The cantilever brakes provide fast effective stopping when the bike is fully laden. The wheels boast heavy duty rims and wide section tyres with loads of grip to cope with a variety of surfaces. The gears are simple to operate but wide in range to allow steady, energy efficient pedalling in both flat and hilly surroundings.

DAWES *for Life*

SUPER GALAXY

13 TOURING BIKES

- New upgraded Reynolds 531 ST frame with investment cast lugs for additional strength and durability
- Shimano 24 speed LX index gear system includes Hyperglide and Superglide for rapid assured gear changes under the most demanding conditions
- Unique Dawes rack system for maximum luggage capacity
- Brooks saddle
- Dia Compe brakes for positive controlled stopping power
- Colour: Black
- Frame sizes: Gents 49, 53, 57, 59, 64cm

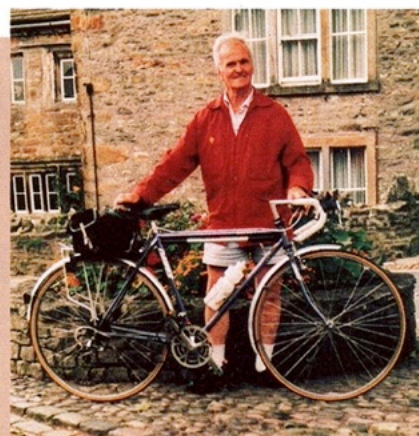

'HARRY' RINGER 66 YEARS IN THE SADDLE

When Dawes Marketing Team were photographing the new Dawes' range high up in the Yorkshire Dales a voice piped up jokingly, "D'you want to photograph me?"

Harry Ringer still sprightly at the venerable age of 81 was enjoying a cycling touring holiday with his pal Tony Barclay, both on Dawes Galaxies.

Harry said "I joined the Hainault Road Club in 1938 and I've had the cycling bug ever since. The Dawes is the best bike I've ever had"

Praise indeed from a man who could still ride 100 miles in 5 hours at the age of 61!

GALAXY

- Shimano RSX 21 speed gear system with handlebar end gear shifters for all round performance
- New upgraded Reynolds 531 ST frame with investment cast lugs
- Dawes custom rear rack
- Alloy wheels featuring Mavic 221 rims for additional strength
- Vetta Litegel saddle for long distance touring comfort
- Colour: British Racing Green
- Frame sizes: Gents 49, 53, 57, 59, 64cm

HORIZON

Top of the line upgraded Reynolds 531 ST frame with investment cast lugs combined with classic Shimano Alivio components make this a fantastic new option within the Dawes touring range

- Alloy quick release wheels for rapid road side repairs
- Vetta Litegel saddle
- Colour: Meteor Blue
- Frame sizes: Gents 49, 53, 57, 59, 62cm

STERLING

With all the features you would expect from a Dawes touring cycle, the Sterling makes a great alternative for the less ambitious tourist

- High quality Reynolds 501 hand brazed frame with full touring braze ons
- Shimano Alivio/ Acera 21 speed index gear system
- Alloy quick release wheels
- Vetta Litegel saddle
- Colour: Cherry Red
- Frame sizes:

- 40 hole alloy tandem wheel combination
- Vetta Comfort saddle
- Alloy rack
- Colour: Black
- Frame sizes: 53-48, 58-54, 58-48cm

FRAME BUILDING

THE FRAME

The reason why every Dawes bike feels so alive when you're on the move can be attributed to over 60 years of evolving frame technology. We've harnessed our expertise to market leading products and under the supervision of our in house development team, we provide a range of frames best suited to your style of riding - on or off road.

FRAME MATERIALS

The tubing we choose is specifically designed for cycling use, most of which is supplied by such renowned names as Reynolds and Fuji - forming the basis of our 'Dawes for life' policy.

PAINTING

When you see a Dawes frame in the flesh you'll appreciate the quality of the paint finishes. A tough, scratch proof powder polyester lacquer ensures that the finish on each Dawes frame looks good and lasts.

ADVENTURE ACCESSORIES

freedom

BIKEPACKING

FREEDOM BIKE PACKING PANNIERS

Freedom Bike packing is a small Westcountry firm who for the past 18 years have specialised in high quality cycle luggage. In independent tests in cycling magazines, these handcrafted bags are often chosen as the benchmark against which others are compared. Manufactured in the U.K., they offer the rare combination of traditional quality with modern design features. The Snap-Lock system used on the Explorer range secures bags onto the carrier with a convenient revolving lock mechanism which can be detached instantly. Alternatively the standard system of robust hooks with shock cord tensioners, provide a more traditional fixing. Explorer bags are made from 1000 denier Cordura nylon and come with a five year guarantee which is upgraded to LIFETIME simply by returning a registration card. The Voyager bags are guaranteed for one year.

Freedom offer a repair service and full spares back-up on all their bags, whatever their age.

All Explorer bags are available in black or red.

Voyager bags are only available in navy blue.

FREEDOM EXPLORER TRUNK

16 litre padded bag with easy-access pockets which attaches with velcro to the top of rear racks. Includes integral shoulder strap and rear light pocket.

FREEDOM EXPLORER SL REAR PANNIERS

Constructed for the highest performance specifications. Spacious 50 litre (per pair) main compartments are secured by drawstring closure and deep elasticated hoods. Large rear pocket and Snap-Lock mounting to carriers.

FREEDOM EXPLORER HANDLEBAR BAG

Large 14 litre capacity barbag with well stiffened main compartment with two internal pockets, small front pocket and map pocket. Supplied with steel support and shoulder strap.

FREEDOM EXPLORER REAR PANNIERS

As Explorer rear panniers SL, but with a traditional steel hook and shockcord fixing system. Velcro straps are provided to give additional security on rough terrain.

FREEDOM EXPLORER LIMPETS

Unique front pannier design with integral support system which does not require a rack. Bags are detachable for security and cleaning. Fits almost all dropouts, including suspension forks. 26 litre capacity.

FREEDOM EXPLORER MIDL PANNIERS

Versatile 26 litre (per pair) bags in a 'universal' design to fit front, lowrider or rear racks. Traditional fixing.

FREEDOM EXPLORER COMMUTER BAGS

Versatile commuter bags which accept A4 files and have zipped front pockets. Supplied with Snap-Lock fitting system to attach in seconds to most rear racks. Panniers zip together for easy portability off the bike. The right hand bag has a transparent rear pocket for a light. 32 litre capacity.

FREEDOM VOYAGER PANNIERS

More economical but durable load carriers made from 7oz Nylon, available in two sizes. Standard attachment systems to fit any rack. 38 litre Rear. 26 litre Universal. Only available in navy blue.

HYBRID

Ride in Town or on the Trail with one of the ultimate range of traffic beaters.

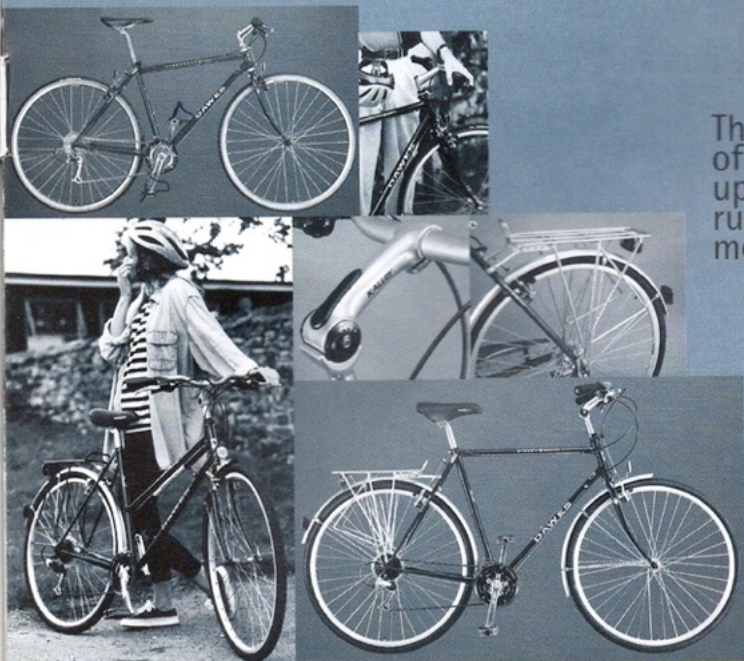

STREET and DISCOVERY

These bikes unite the light-weight manoeuvrability of the road bike with the fingertip control and upright riding style of the mountain bike. They're the rugged versatile fun and fitness machines of the modern world.

With the Hybrid Street and Discovery range, Dawes have crossed the barriers between road and off road use, combining the comfort and appeal of the MTB with the fast lightweight efficiency of the touring bike.

These bikes are ideal for those who want a practical town and family machine, for commuting, fitness riding or occasional off road ventures.

DAWES *for Life*

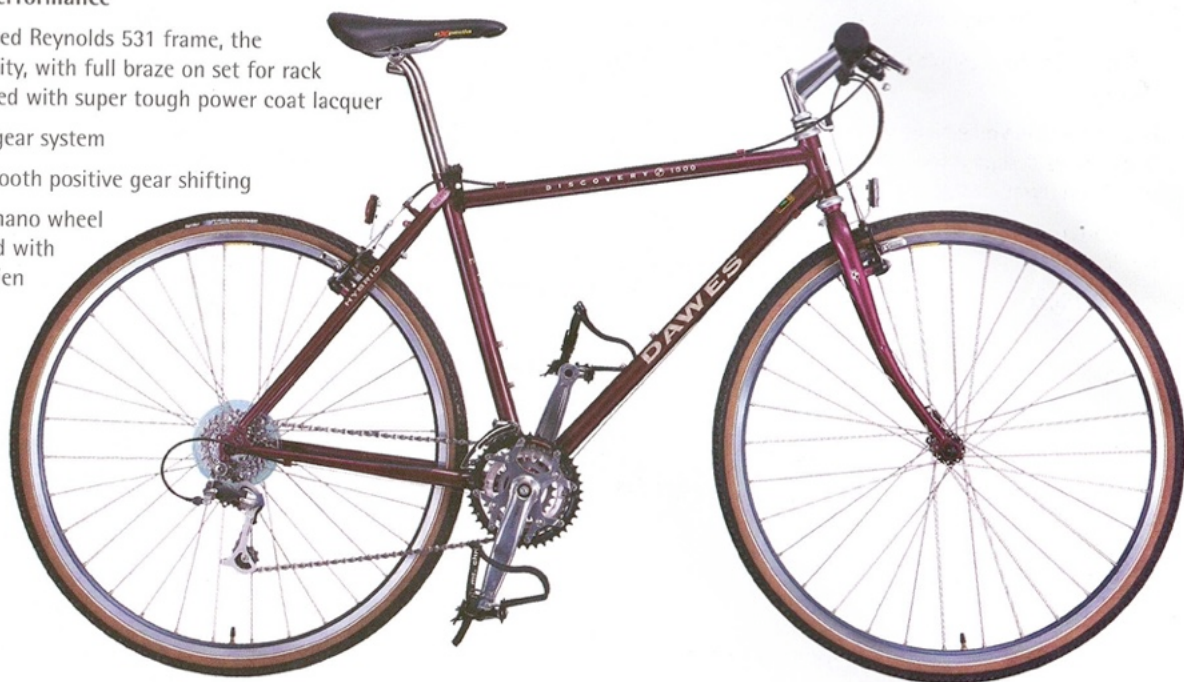

More sport orientated than our Street range, **DISCOVERY** bikes will suit the more adventurous fitness and trail rider.

DISCOVERY1000

The foremost handbuilt hybrid cycle, built to provide years of unrivalled service and performance

- Classic hand fillet brazed Reynolds 531 frame, the ultimate in frame quality, with full braze on set for rack and mudguards, finished with super tough power coat lacquer
- Shimano XT 24 speed gear system
- Grip shift X-ray for smooth positive gear shifting
- Top quality Mavic/Shimano wheel package, complimented with hybrid specific Vredestien Spider tyres and DT spokes, provides lightweight strength and control
- Colour: Dark Plum
- Frame sizes: 43, 48, 53, 58cm

DISCOVERY801

- Classic hand fillet brazed Reynolds 531 frame, the ultimate in frame quality, with full braze on set for rack and mudguards
- Shimano STX 21 speed STI gear system for smooth positive gear shifting
- Top quality Mavic/Shimano wheel package, complimented with hybrid specific Vredestien Spider tyres, provides lightweight strength and control
- Colour: Meteor Blue
- Frame sizes: 43, 48, 53, 58cm

- Fuji Cro-moly, oval section frame for rigidity and performance
- High quality Shimano STX/Alivio 21 speed gear system
- Gripshift 400 for positive gear change
- Hybrid specific Vredestien Spider tyres designed for speed and durability
- Comfortable Vetta Gelflex saddle
- Colour: Night Violet
- Frame sizes: 43, 48, 53, 58cm

DAWES CARD

As a way of making the Dawes Cycling experience more accessible to a wider audience, we have introduced the Dawes Card.

In a nutshell, the Card, which is underwritten by Clydesdale Finance, part of Next Plc, enables customers to gain an instant credit facility to fund the purchase of their chosen Dawes model. Once an agreed limit has been established any 'remaining' credit can be used to finance other purchases. Ask your dealer now for details.

DISCOVERY301

- Shimano 21 speed index gear system for responsive control
- Gripshift MRX 100 for positive, secure gear change

DEALER SERVICE

A look at the number of variations and frame designs within the Dawes range provides an insight into the close attention to detail that has become the brands' hallmark.

Which size suits you and your riding style is something with which your dealer will be happy to assist you with. He will achieve a 'personal fit', to create the optimum riding position for power, performance and comfort. Whether you're road racing, looking forward to getting off the beaten track, or just cruising the highways and byways, be sure to use your Dawes dealer's experience, it's all part of the service.

Take your time over your choice, a comfortable riding position is not only essential for obtaining the maximum enjoyment of your Dawes, it's also a major contribution to your safety and the safety of other road users.

Orientated more towards road use, the Dawes **STREET** range boasts a more upright ride posture and the practical convenience of **mudguards** and **racks**. Height-adjustable stems also emphasise a much more casual approach that will suit those who can be put off by the racy imagery of other machines. Robust wheels and tyres mean that Street bikes are equally confident on trips down canal paths, forest trails and other light off road forays.

21 HYBRID - DISCOVERY - STREET

BRIDGE CYCLE HIRE

In 1983, when Nigel Wiggett set up Bridge Cycles in Cornwall, he recognised that his profitability depended almost entirely on the reliability and longevity of his fleet of cycles.

"Dawes was the obvious brand to aspire to although we recognised that the investment at the start would be considerable"

Happily the decision was to prove a wise one.

Nigel's fleet now extends to 350 cycles and the expansion looks set to continue.

STREETLIFE

ROAD BIKES

Our road bikes have a distinguished pedigree. We can boast of race winning performance at the highest level. Designed for speed, these lightweight machines are built with Fuji and Reynolds tubing, with classic race bred frame geometry ensuring the best in speed and handling. In both competition and training, a Dawes road bike can give you the edge.

Speed will always be the essence of race bike design. The steep frame angles, shallow fork rake and short wheel base ensure fast acceleration and super-responsive steering. Instant comfort is slightly compromised by skinny high pressure tyres, tight lightweight wheels and minimalist componentry but, when speed is of the essence, the essence has to be a thoroughbred. Dawes road bikes are uncompromising in their approach. If getting fit, triathlon or road racing are your goals, a Dawes road bike will take you as far as you want to go.

DAWES *for Life*

GIRO500

- Shimano RX100 14 speed STI gear system for positive gear change and braking at your finger tips
- Shimano RX100 dual pivot brakes for the best in performance braking
- Lightweight Fuji Cro-moly/Hi-ten frame
- Omega Vantage chainset
- Alloy sport profile quick release wheels
- Colour: Ocean Blue
- Frame sizes: 50, 54, 56, 58, 62cm

THE DAWES LONGEST DAY

There is no tougher test of endurance than the Iron Man Triathlon. That's why Dawes chose to sponsor the event which started off at Gailey Reservoir, Cannock.

Superfit athletes first swam a gruelling 2.4 miles in icy open water. Next came a punishing 112 mile ride over undulating terrain and finally competitors dismounted and ran a full marathon!

A test for any man - or woman! The winner was 30 year old Martin Foster in a time of 8 hours 45 minutes and 6 seconds. He manages to fit his training programme around a 50 hour working week as a chartered surveyor.

GIRO400

- Shimano RX100/A400 14 speed index gear system provides accuracy at the flick of a finger
- Lightweight Fuji Cro-moly/Hi-ten frame
- Sella Italia Expedia saddle
- Saccon dual pivot brakes for precise, powerful braking
- Alloy sport profile quick release wheels
- Colour: Dark Plum
- Frame sizes: 50, 54, 56, 58, 62cm

GIRO300

- Fuji Cro-moly/Hi-ten elliptical frame provides rigidity
- Shimano A300 14 speed index gear system
- Saccon dual pivot brakes for precise, powerful braking
- Alloy sport profile quick release wheels
- Colour: Autumn Red
- Frame sizes: 50, 54, 56, 58, 62cm

TALL ORDER FOR DAWES

As one of the biggest and fittest men in the world of international rugby, Martin Bayfield needs to stay at the peak of physical fitness. Cycling is a favoured pursuit for its non weight bearing cardio vascular benefits. But at over 6'10" and twenty stone, Martin makes serious demand of his bikes.

Staying fit is part of the job and any bike of his is going to have to put up with some serious punishment! making Dawes a natural choice.

AUDAX GIRO

Designed as a fast sports tourer

- Reynolds 531 frame with mudguard and rack braze ons
- Shimano RSX wide range 21 speed STI gear system for positive gear change and braking at your finger tips
- Shimano RX 100 dual pivot brakes for the best in performance braking

LOW RIDER

With its low-slung design, and completely natural seating position, this bike is extremely convenient and comfortable to use. Which makes the Low Rider very suitable for use not only as a sporty leisure bike, but also as a comfortable commuter bike to cover the daily miles as pleasantly as possible. The Low Rider is also an open invitation for anyone looking for a novel cycling experience!

- Shimano Nexus 7 speed hub
- Front roller brake
- Full lighting system
- Integral frame lock
- Comfortable, relaxed seating position
- Fully enclosed chain guard
- Rack and mudguards

DAWES TO THE RESCUE

When the maroons are launched to summon the lifeboat crew in the northern seaside town of New Brighton, one of the first to respond to the call is former Coxwain Tony Clare.

"I get on my Dawes Galaxy and with my head over the front wheel I certainly get some speed up"

Tony also cycles a sixteen mile round trip to his work as a Princes Youth Trust leader, probably 350 days a year whatever the weather.

"Build quality is a prerequisite - any bike of mine has to work damned hard for its living"

Dawes Cycles Ltd. has a policy of continuous improvement, and reserves the right to change specifications without notice. All Dawes bicycles are manufactured to conform to BS 6102 parts 1, 2, & 3. Dawes offer a full warranty on all products - ask your dealer for details.

Designed and produced by THEM (0113 234 2224).
