Dawes,

a lifetime cycling experience

Dawes – a thoroughly modern cycling dynasty. We use our expertise to provide the best cycling experience for you!

Dawes has been making quality bikes since the turn of the century and is **carrying on that proud tradition** in an innovative and responsible fashion today and into the future. We make no apologies about being purists at Dawes for it is our stated aim to provide you with the best possible cycling experience. We provide the broadest selection of bikes in the UK, so that you know that the bike you choose will really suit your needs and requirements.

Innovation

in the pure sense of the word

Why does the modern day bike look much like its ancestors? Not for lack of trying that's for sure – but time and again core values such as strength, reliability and quality come up trumps. You'll have seen many trendy "innovations" that have disappeared, found wanting in the "customer delight" stakes. At Dawes we avoid any developments that reek of "a flash in the pan". Many of our bikes are innovative in the true sense of the word – made to experience the pure joy of human powered transport and **built to last a lifetime.**

Design, quality & balance

make the perfect bike for you

A commitment to enduring quality is what sets a Dawes apart

Most importantly a Dawes is **designed by cyclists for cyclists.** We only select quality branded items – a testament to our commitment to durability, performance and safety. We won't sell you a "toy", that flatters to deceive. Our flashy parts really work and provide genuine performance. Remember if a bike is designed to go fast it also needs brakes to stop you fast and a frame that can take the strain. **On a Dawes bike you'll know that your equipment won't let you down.**

Bicycles made by people who love bikes for people who love to ride 'em. Our people take *pride & care* in the bikes they allow you to ride. A whirlwind tour of what it takes to become a Dawes Bike.

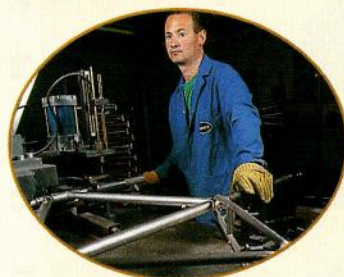

Chris from our Product Development team designs the bikes to our exacting standards and then test the design to see if they'll last... for life!

All our parts come from top quality suppliers, it's Chris's job to ensure that they meet our stringent requirements... if they don't, it's not a Dawes!

Handbuilt still means something at Dawes. Some of our bikes are still built by hand by expert craftsmen, like Mark, who's skills would not be amiss in a bespoke environment.

The bike will need to run true, so Brian makes sure that each frame is properly aligned.

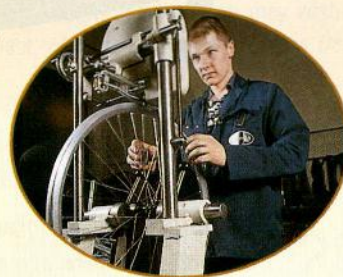

A multi-million pound investment means that Dawes has state-of-the-art equipment so that Peter can give each Dawes its resplendent coat.

Under the watchful eye of Barbara, each Dawes frame is provided with its ultra-tough Damage Limitation polyester finish.

Louise ensures the wheels are laced up properly and tightly to produce a wheel that's up to the high standards set by Dawes.

Wheel building remains an art not a science. Experience and personal attention makes the difference, Wayne ensures all the wheels are true.

John puts the finishing touches to a mountain bike which has in excess of 200 parts fitted! It requires skill, concentration and organisation to get the bike fit to be a Dawes.

In case anyone thinks of slacking off, Nick is there to do a rigorous check on the quality of the bike. This report is fed back regularly to improve our standards.

On their way at last. Chris and Robin ensure that no harm comes to your bikes on their way to you.

Our dealers are an extended part of Dawes. Their expertise and advice gives you peace of mind. Here Gordon puts the finishing touch on a Dawes, ready for you, ready for the road... ready for life!

DAWES *for life*

How to choose your ideal bike

Buying a bike is a surprisingly complex choice of different features which allows the knowledgeable consumers to get exactly what they need. Your Dawes specialist cycle dealer will be delighted to help you, but to allow you to think through what you might want, here are some tips to consider in the comfort of your home.

Dawes provides a range of bikes to suit all your needs.

Here's an overview of how they fit together. Go ahead, plot your own desired cycling profile on the following chart.

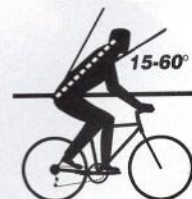

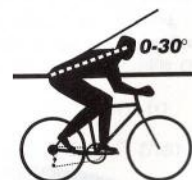

Cycling Styles

At Dawes we distinguish between three different styles of cycling. There are many more, but for ease of discussion, we will stick with these.

RACE/PERFORMANCE Angle of upper body will typically be between $0-30^\circ$ - the real mean racing position. This flat riding position provides you with that low, aerodynamic riding position for real power and speed (*Race/ top end ATB's*).

TOUR/LEISURE The upper body angle of $15-60^\circ$ is a similar position to the above but with that little bit of in-built comfort and ease of use to make it more suitable for all-round usage. (*Middle range ATB's/Discovery/Tour*)

STREET/LEISURE Not the sort of position you would expect on a top quality Dawes Road, Racing or Mountain bike, but you will find that the $60-90^\circ$ seated position will ensure comfort and ease of use if you need to sit in the saddle for any length of time. (*Street/City*)

A Dawes bike should fit you like a glove

The ideal riding position is influenced by a number of factors:

- a) The top tube length is possibly the single most important factor in designing the riding position.

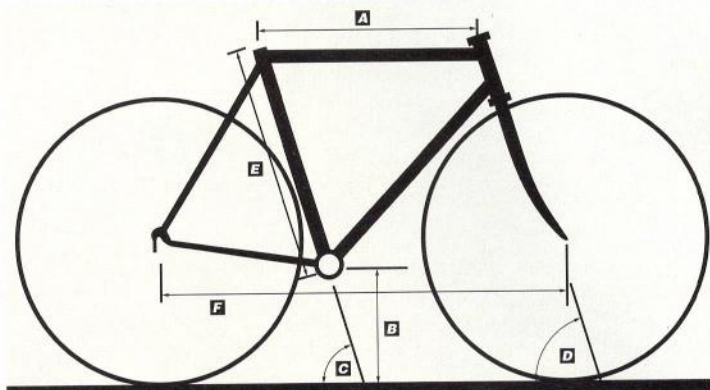

- i.e. Short top tube for a more upright position, longer for a more aggressive riding position.

- b) The height of the bottom bracket (BB) influences the centre of gravity, which defines the stability of your ride.

- i.e. The high BB height on ATB's gives more manoeuvrability and responsiveness. Whilst the lower BB height of the Street and City bikes gives added stability to a fully laden bike.

- c+d) The angle of the seat tube will determine the degree of control, and the position of the weight of the rider.

- i.e. The head angle is chosen for optimum balance between quickness and stability of the steering. The seat tube angle determines the riders position on the bicycle and the different pedalling styles. i.e. the more upright for aggressive racing, the more sloped for more comfort.

- e) The size of the bike you choose is determined by the length of seat tube measured from the centre of the BB and the top of the seat tube

- The seat tube length is influenced by the riders inside leg measurement (the distance from the crotch to the ground).

- f) The wheel base is the distance measured between the wheel hubs.

- i.e. Short wheel base for faster cornering and longer for more comfort over long distance.

A simple guide!

Choosing the right bike is the most important part of your cycling experience. Be honest where will you use your bike? What type of journeys will you make? Will you ride

competitively or just for fun? Simply tick the relevant activities you may wish to pursue and add up the ticks to give you a guide to which bike range will suit you best. (Ask your specialist Dawes Dealer for expert advice!)

All road performance to chew up the tarmac! Just because it's got mudguards and a rack doesn't mean that the Dawes Street series doesn't mean business.

Top quality frames and components means that a Dawes Street is ready for some serious global cycling.

street bikes

Designed for performance – for serious tourists and novices

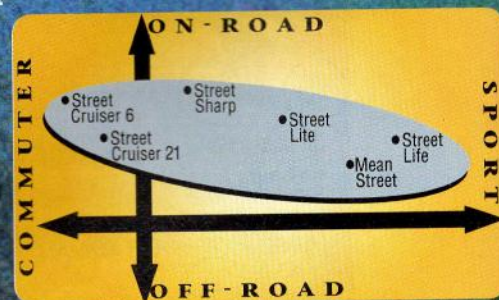

A modern-day Dawes Streetbike bears no comparison to the heavyweight all-steel clunkers of yesteryear.

Innovation has taken off in bicycle land-if you don't believe us-take a look at the latest full suspension Dawes Mean Street.

Superb comfort as standard

Comfortable frame designs mean that chronic backache should be a thing of the past. The **low-slung frames** give easy access for ladies and safe handling in traffic. To ensure that the bike fits you exactly we have made the **adjustable handlebar stem** a standard feature on all mid-range and top end machines. **Unisex comfort saddles** provide a soft ride and for ultimate cruising comfort a full suspension ride is as cushy as it gets!

So if you're looking for a bike that is easy to ride and supremely comfortable, where 'performance' means less effort for longer, a Dawes Street bike will suit you to a tee!

Meanstreet RRP £849.⁹⁹

Change your view on a Mean Street

A unique concept, the Mean Street provides a tough, hard-wearing machine that will ride like the proverbial 'comfy chair'. A **full suspension concept** using **Marzocchi** front and rear units and powered by the **Sachs 3x7 derailleur/hub gear system** is the basis for a superb bike. Value for money? We apologise but there's nothing to compare it to!

Colour: Steel

Streetlite

RRP £499.⁹⁹

A lightweight ready for heavy action

The superb ladies and gents 7005- heat treated T6 aluminium frame allied to the performance of the Shimano Alivio 21-speed gears is a real plus when you crave adventure. Tough Nokia tyres and Rodi Tempest box-section rims means the Lite is no softie either. The Street Lite comes fully equipped to fulfil its versatile role in your lifestyle

Colour: Titanium

£10

Buy a Dawes Street Life and we will donate £10 to the National Trust

Streetlife

RRP £299.⁹⁹

A quality best seller

Using a cromoly frame with elliptical tubes for rigid performance and full 21-speed Shimano Acera-X gears the Street Life is Dawes personified.

An ideal holiday/weekend machine that's versatile enough for use around town too. The Kalloy adjustable handlebar stem and the Dawes Comfort saddle provide you with that little extra comfort you'd expect from Dawes.

Colour: Cornflower Blue

THE NATIONAL TRUST

AND DAWES CYCLES

The National Trust is delighted to say that Dawes Cycles has agreed to support our conservation work in the coming year. **For every Dawes Street Life cycle sold, £10 will go to help the National Trust protect this nation's countryside, stately homes and coastline.**

The National Trust for England, Wales and Northern Ireland was founded in 1895 and is now one of Europe's leading conservation charities, with over 2.4 million members nationwide. Each year over 50 million people visit National Trust properties, from some of Britain's **finest stately homes** to areas of **outstanding beauty**.

Although renowned for its care of the nation's heritage, the National Trust also protects over 550 miles of coastline and over 580,000 acres of countryside in England, Wales and Northern Ireland. **The National Trust welcomes cyclists on its land and encourages cycling** both as an activity and as a means of transport, recognising both the benefits to health and that

responsible use causes negligible damage to the environment.

Many National Trust properties now have cycle tracks and some properties, such as Clumber Park in the Sherwood Forest, have **cycle hire facilities and designated cycle trails**. Cycling to and around the National Trust's countryside properties, is an ideal way of seeing Britain's cultural and natural heritage in an **enjoyable and healthy** way.

You can help the National Trust protect these beautiful places for future generations by becoming a member, by making a donation or by buying a Dawes Street Life Cycle. By contributing to the National Trust you will be helping to safeguard the best of British Landscapes, countryside and historic buildings forever.

If you would like further information about the National Trust, please write, enclosing a SAE to: **The National Trust, PO Box 39, Bromley, Kent BR1 3XL or telephone 0181 315 1111.**

Streetsharp

RRP £249.⁹⁹

Cycling with an edge

Adjustable Kalloy handlebar stem, Dawes Comfort saddle, full Shimano Altus 21-speed performance and full cromoly elliptical lightweight rigid frame makes the Street Sharp a real performer. The tough quality wheel package and full utility equipment gives you the performance you need.

Colour: Steel

Kalloy adjustable handlebar stem

Dawes Damage Limitation paint finish

RRP £199.⁹⁹

StreetCruiser21

A quality best-seller for life!

A tough frame finished with branded components from such respected stalwarts as **Shimano** and **Alesa** will provide peace of mind for those starting on their lifelong cycling adventure. The **Dawes Damage Limitation paint finish** will maintain its looks well after most others have faded. The Cruiser has all you need for great weekend trip and 21 gears to speed you on your way!

Colour: Marrantie Red

RRP £189.⁹⁹

StreetCruiser6

A classic throw-about with a tough exterior

A tough younger sister to the Street Cruiser 21, the 6 has easy shifting performance, a low step-over frame making it the ideal bike about town. Details like **EZ-Fire shifters**, **mudguards**, **rack**, and **propstand** makes the Cruiser 6 unbeatable value-for-money.

The **Dawes Damage Limitation paint finish** will maintain its looks well after most others have faded.

enjoy a Dawes City Vision bike on
your journeys around town.

city bikes

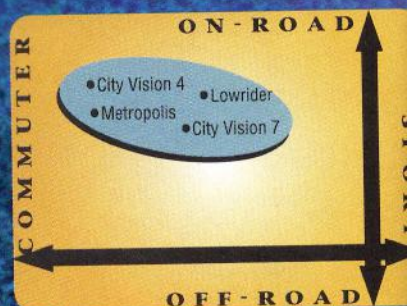

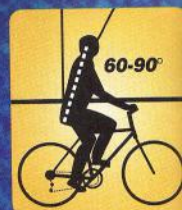

A bike that will get you noticed – and keep you safe!

The latest addition to the comprehensive Dawes range. The City Vision is an eye-catching range of bikes that is all soft curves and comfy angles. The City Visions allow you to cycle safely through the nation's tangled urban jungle with better all-round traffic visibility due to the upright and stable riding position. The innovative loopy frames and the stunning colours will mean you'll be noticed in traffic. Great for your image and great for safety!

Reliability needn't be dull

The City Vision range are designed to be as reliable and as easy to use as possible. The Visions are equipped with *Shimano's much lauded Nexus hub gear range*. Not only do they provide a superb range of gears to get you over most hills, they also provide excellent and reliable shifting performance (*no grinding of metal and slipped chains*) and above all else, it's all done inside the hub.

This is cycling but not as we know it? No sweat, no mud, no grease!

Kalloy adjustable handlebar stem

Nexus 7 Revoshift for easy twist-shifting

Nexus 7 speed internal hub gear and rear brake

Cityvision7

RRP £359.⁹⁹

Utility with an edge

The **Shimano Nexus 7** system has been making waves in the UK for several years and is an ideal city solution, providing reliability, low maintenance and a wide range of gear ratios to suit most styles of riding. The City Vision 7 is fully equipped for the rigours of the city and with the **adjustable handlebar stem** can be adjusted to fit your exact needs.

Colour: Night Violet

Cityvision4

RRP £269.⁹⁹

Superb quality at unbeatable prices

The **Shimano Nexus 4** system provides reliability, low maintenance and a wide range of gear ratios for the rigours of the city. And with the **Shimano Nexus rear hub roller brake** has all the stopping power you need for those busy junctions. The **adjustable handlebar stem** can be adjusted to fit your exact needs. The electric blue finish will attract admiring glances for years to come thanks to the **Dawes Damage Limitation paint finish**.

Designed to go where you want to –

The Dawes Discovery series is designed to provide speed and agility where it counts – namely on the road – and strength and traction where it matters – offroad

discovery bikes

The thinking cyclists dream

A frame based around the mountain bike heritage provides great agility for coping with difficult terrain, tough climbs and speedy descents. The 700 C wheels provide extra height for a safer riding position in town. Discovery bikes are fitted with *hybrid-specific* tyres with smooth riding surface for minimum on-road rolling resistance and lateral profile for traction on loose off-road trails.

You don't have to be sore to enjoy a Discovery ride

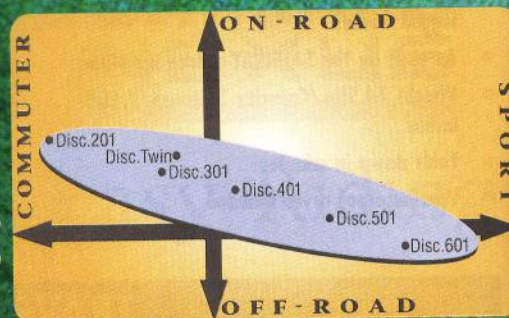

Regardless of how many hours in the saddle you've had, that bit of comfort will always add to the pleasure. For this reason Dawes have added several comfort features for your pleasure.

- The *ITM Trafficflex handlebar stem* will just take the vibrations out of those bumpy rides leaving your arms refreshed to tackle the trail.
- The *Kalloy 252 Suspension seat post* will remove the sting of those unexpected bumps.
- The *RST 801 Suspension forks* will provide you with serious suspension for those looking for the offroad side of life.

Make the choice for a Dawes Discovery

- ◆ Performance: Discovery 601
- ◆ Enthusiast: Discovery 401, Discovery 501
- ◆ Recreational: Discovery 201, Discovery 301

If you're looking for real tour and trail performance one of our Dawes Discovery series will be the ideal bike for you.

Discovery 601 RRP £499⁹⁹

A tough, all-rounder with a 'soft' heart

A top 7005-T6 aluminium frame with the rigid Advanced Torsional Profile design for lightweight performance powered by the Shimano STX-RC 24-gear drive train makes the 601 a genuine road warrior. Hence the power of the Dia-Compe V-action braking system. The RST 801 Suspension forks deliver the rider refreshed and exhilarated at journey's end

Colour: Electric Blue

Discovery 501

RRP £399.⁹⁹

Top performance with a cushion in it's tail

A top **cromoly** frame with elliptical tubing for performance powered by the **Shimano STX 21-speed** drive train. The **Vredestein Spider** tyres and **Saccon V-action** braking system finish a serious action bike package. Because we know that you can't resist taking this machine to the limits we've spoilt you with the **Kalloy 252 Suspension seat post** and the **ITM Trafficflex suspension handlebar stem**.

Colour: Green Titanium

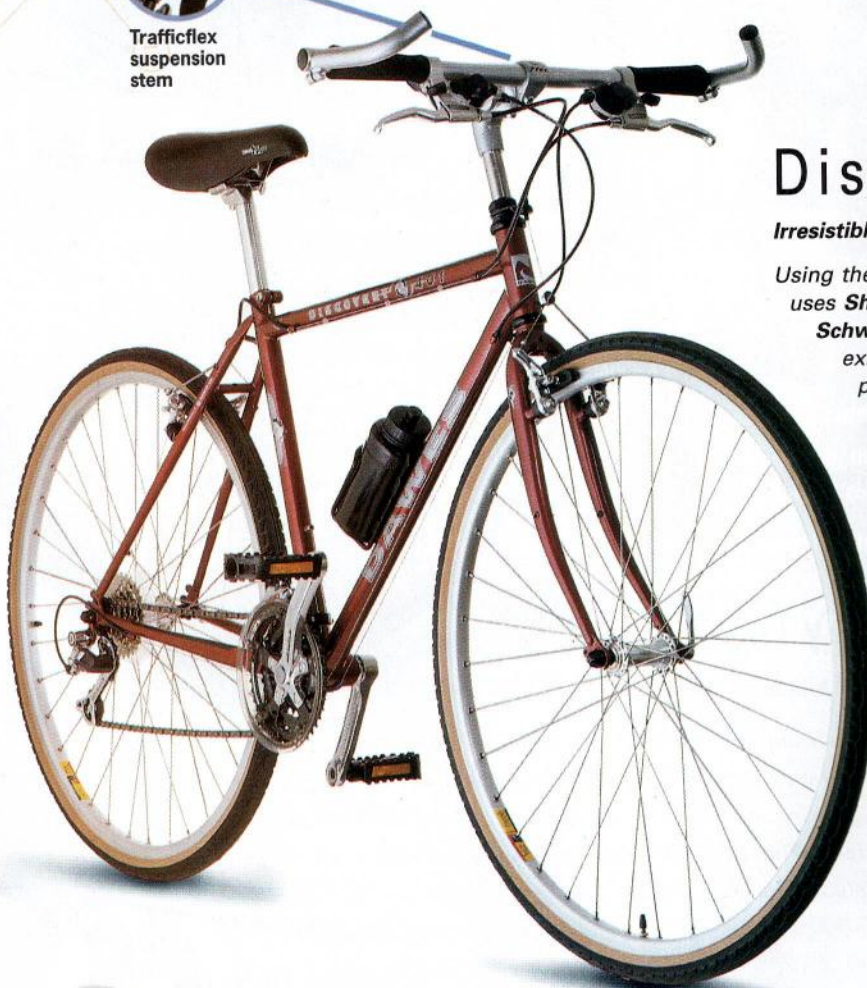

Kalloy Suspension seat post

Trafficflex suspension stem

Trafficflex suspension stem

Discovery 401

RRP £299.⁹⁹

Irresistible fun on a bike going places

Using the same **cromoly** frame as the 501, the 401 uses **Shimano's Alivio 21-speed** drive train and **Schwalbe Country Cruiser** tyres to provide an exhilarating on-road and off road performance. A full complement of **Shimano** components allied to the **ITM Trafficflex stem** makes the 401 a joy to ride in all conditions.

Colour: Marranti Red

Discovery 301 RRP £249.⁹⁹

For rugged city and trail riding

Using a **cromoly** oversized frame and **Acera-X 21 speed** power the 301 is responsive and fun to ride. A full set of **Shimano brakes and gears** means that you get the durability and quality performance you'd expect from a Dawes with the attention to detail that makes the difference! Also available in ladies versions.

Colour: Steel

Dawes comfort saddle

Dawes Damage Limitation paint finish

Discovery 201 RRP £199.⁹⁹

City born and bred yearning for open spaces

Using a **cromoly** oversized frame fit for a bike twice the price, the 201 is a great looker. The standard (for Dawes anyway!) **Damage Limitation paint finish** will maintain its classic looks well after most have faded and rusted away. Top quality **Shimano** gears, brakes and all-alloy rims and hubs means it's not just the looks that will last and last! Also available in ladies versions.

Colour: Titanium

The Mountain Bike has really challenged traditional designs and ideas about bikes, and our new 1998 range shows that Dawes has risen to the challenge to provide fun, excitement and performance

mountain bikes

Fun, excitement and performance merged with safety in mind

If you're serious about the fun you want by hitting the off-road trails hard, you're going to need a sporty bike, that gives you the peace of mind you need. So point your Dawes at a slope and really go for it. Any compromise on frame strength, braking power or wheel strength could result in a bruising experience for your body and your ego!

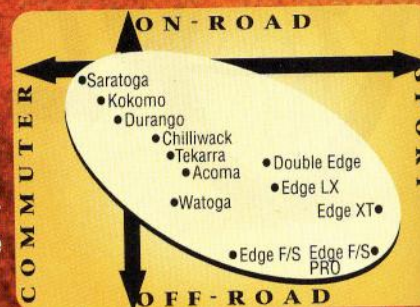

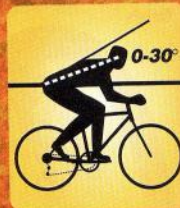

Seriously for innovations

The frame with its long top tube ensures a relaxed riding position that gives greater control over rough terrain, hill climbing agility and downhill confidence. The raised bottom bracket ensures plenty of clearance to stop you snagging on the undergrowth. Dawes use a variety of materials and designs to provide you with the strength and rigidity you need to respond to the trail.

Something for everyone

- ◆ Recreational/off-road: Saratoga, Kokomo, Durango
- ◆ Enthusiast/off-road: Chilliwack, Tekarra, Acoma, Watoga
- ◆ Performance/off-road: Edge LX, Edge F/S, Edge XT Team, Edge F/S Pro

If it's an adrenaline buzz you're looking for from your two-wheeled friend, then a Dawes mountain bike is the right place to look.

Edge/s pro

RRP £1499.⁹⁹

A "totally hammerable" bike

The Edge Full Suspension has been turning heads in Europe and the UK for the past year, and the quality of the 7020:T6 aluminium frame with its **fully active system** design remains second to none. Modified with **RST Hi5 downhill forks** and **Shimano V-brakes** to provide you with a bike ready for battle.

Colour: Flame Red

DAWES *for life*

EdgeXTteam

RRP £999.⁹⁹

Make space in your trophy cabinet-the newly diminished XT team!

The Edge XT has been seen on the UK MTB circuit for several years now and has been diminished (in weight) by the new polished Easton Aluminium frame! The full 24 speed Shimano XT componentry remains and the RST Mozo Pro Forks ensure that the XT Team is raring to go for another season of no-holds barred competition at a price that's hard to beat!

Colour: Polished Aluminium

Shimano XT V-brake and "snake-stays"

Easton Elite double butted tubing

RST rear shock unit

EdgeFS

RRP £849.⁹⁹

Full Suspension fun at your kind of price

The Edge F/S makes full suspension fun and thrills available to the masses of keen enthusiasts. The top 7005 Aluminium frame with its active rear suspension matched with the RST 381 forks provides inches of travel giving all the performance you'd expect from a Dawes and all the fun you can handle!

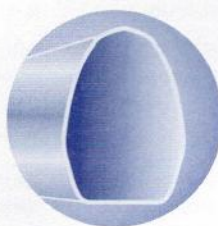

The Shimano STX 21 speed gears mean it will be as versatile as anything available in the market at incredible value for money.

Colour: Electric Blue

Technical Highlights & Detailed Information

Dawes has been developing bikes that are a joy to ride for over 70 years, and we have been at the front of developments. On the following pages you will find all the technical information you need to ensure that you get exactly what you want. Some highlights from our range are included below:

Advanced Torsional Profile (ATP) frames are designed to increase the rotational resistance a frame needs to increase rigidity. This ensures that a higher percentage of power is transferred direct to the rear wheel for greater speed. Featured in MTB, Discovery and Race bikes

Adjustable handle-bar stems - we are each unique so to ensure that perfect fit, Dawes fit an adjustable stem so that you can put the final touch to the most comfortable riding position. Also adjusts for different riding styles (climbing versus flat for example). Fitted on Dawes Street bikes.

Snake stays are standard on all MTB's - the pronounced clearance around the wheels means that all the mud, gunge and other debris in the tyres won't create a shuddering unplanned halt - and counters brake induced flex of the seat stays.

Ergo-handlebars are all the rage in cycle-mad Europe. The ability to adjust your grip to the exact riding conditions instantaneously adds to the versatility of your bike as well as the comfort of your ride. Fitted on our Touring range.

V-action brakes are the latest development in brake land. The swing-arm effect means that there is more direct and powerful application of the brake pads to the wheel rim. These brakes are very powerful enabling very quick stops. Fitted on MTB, Discovery and Tandem bikes.

Brake modulator - a clever idea to modulate the braking power to provide a smoother braking performance when required in conjunction with the reassuring power of V-action brakes. Fitted on our Discovery range.

Damage Limitation Paint

Every Dawes bike now comes with a revolutionary new paint system called **Damage Limitation** that allows Dawes to provide an **unmatched quality of paint finish** on **all** our bikes.

This remarkable process provides a finish that is twice as thick and several times more durable than the paintwork on a typical motor car, offering exceptional resistance to chips, scratches and corrosion.

Polyester powder lacquer: 80-100 microns deep tribo-charged application for even coverage, stoved at 175°C; highly scratch resistant

Under-lacquer graphics: specially developed to withstand stoving temperatures of 175°C, for better resistance to everyday wear and tear

Polyester anti-chip powder primer: 80-100 microns thick; with exceptional adhesion for superb chip resistance

Tubing shot blasted for good 'key'

Wet paint colour coat: 15-25 microns thick, for a full lustre, deeper colour than that achievable with powder colour coats

Chemical pre-treatment: alkaline degreasant & phosphate rust inhibitor

VREDESTEIN
BICYCLE TYRES

lightrunning
durable
comfortable

The
Vredestein
Spider
the tyre for
road-
hogs

Spider

Perfect all-round tyre for cycling routes on or off the road. Special tread with low-resistance centre and solid-grip edging blocks. Extremely longlasting and super-low rolling resistance. With PRS anti-puncture system.

The Trekking cycle tyres are tyres you can rely on. The tyres use the same technology as the top-of-the-range race tyres and offer low rolling resistance, good durability and excellent puncture resistance.

**All trekkingtyres with
anti-puncture system**

Almost all Vredestein tyres are puncture-resistant thanks to a tough layer of specially-designed rubber. The protective section is

further enhanced with Vredestein's PRS anti-puncture system. This strengthens the addition of newly-developed rubber compounds, greatly reducing the likelihood of any puncture.

Vredestein. Being sure.

EdgeLX

RRP £499.⁹⁹

Yellow devil on wheels!

It's not only the paint job on this mean machine that is addictive. The innovative torsional control frame with its 7005 aluminium oversized tubing provides an incredibly light and responsive ride. The Shimano LX 24 speed gearing is the epitome of accurate and reliable shifting. In short an entry level competition bike with an inside track to the podium.

Colour: Racing Yellow

"ATP" profile down tube

Watoga

RRP £399.⁹⁹

Mean and moody (and a lot of fun!)

The 4130 Cromoly Frame set with its "Advanced Torsional Profile" down tube and rigidity gives maximum strength with minimum weight. Geared up with Shimano's impressive STX/Alivio 21 speed componentry, along with the tough RST 281 suspension forks the Watoga's ready to be thrashed to within inches of its alloy hubs!

Dia-compe A-Head system

Colour: Green Titanium

"ATP" profile down tube

Acoma

RRP £349.⁹⁹

24 gears of action

Using the Watoga's innovative lightweight frame design this all-action bike has the easy shifting performance of the acclaimed **Sachs Wavey shifters** allied with the superb full **Centera 24 speed gears**. Finished off with the racy **Expedia saddle** and **Velociraptor** tyres, the Acoma is ready for take-off! Now you know why we had to provide the impressive **Dia-Compe V-action** braking power as standard!

Colour: British Racing Green

Sachs "Centera" rear derailleur

Sachs "Wavey" shifter

Tekarra

RRP £299.⁹⁹

As much fun as you can handle & then some!

The Tekarra's playful exterior hides a tiger wanting to get out. The full **Cromoly 4130 frameset** with **Snake stays** and **ATP downtube** (see Watoga) means that this is serious kit and the **Shimano Alivio 21-speed gears** are acknowledged as class performers. This package plus all the classy trimmings gives you real power at a surprising price.

Colour: Orange

Mavic 138 box section eyeleted alloy rims

Chilliwack

RRP £249.⁹⁹

A wolf in wolf's clothing

The sleek, racy look of the Chilliwack is backed up by every inch of its high performance full **4130 Cromoly frame** (same as Watoga) with a **A-head set** (ideal if you want to stick some suspension forks on), the **Shimano Acera-X 21-speed gears** with the 'EZ-fire' shifters. The **Saccon V-action brakes** and the tough **Alesa alloy wheel rims** means that the Chilliwack can take the heat and then ask for more!

Colour: Titanium

Durango

RRP £199.⁹⁹

As tough as old nails with speed on its mind!

The steely look of the Durango is reflected in the top quality package to ensure a quality ride built to take the strain that the **21-speed Shimano Altus groupset** invites. The alloy **Alesa wheel rims**, **quick release** (easy to transport) **front and rear alloy** (no rust) **RM40 hubs** on top of the **ovalised Cromoly frame** with **Snake stays** for mud clearance and less brake induced flex means that you can ride the Durango hard.

Colour: Steel

Kokomo

Young, fun and tough

Based on the Durango's **tough cromoly ovalised frame** with the simple twist-shifting pleasure of **Gripshift**. The Kokomo offers as much fun as the canary yellow paint finish promises. Its **Alesa alloy wheels** keeping revolving weight down, and **Shimano Components** will provide the strength and reliability you want. Available in gents, ladies and youths.

RRP £179.⁹⁹

Colour: Canary Yellow

"Snake" stays for more clearance and less flex

Saratoga

RRP £159.⁹⁹

A class act

This bike has all the hallmarks of Dawes quality with a **Cromoly ovalised frame** for extra rigidity (see Durango), with the **Dawes Damage Limitation** paint system, and using top branded components including the new **Shimano shifters** you can be assured of Dawes quality at very un-Dawes like prices. Available in gents ladies and youths.

Colour: Cornflower Blue

Dawes Damage Limitation paint finish

Dawes Supports The National Cycle Network

The National Cycle Network is a visionary Millennium project to revolutionise cycling in the UK by creating 6,500 miles of safe, high quality and signposted routes for cyclists by the year 2005.

The National Cycle Network routes are designed to be:

- useful for local people
- attractive to novices
- memorable for visitors.

The creation of the National Cycle Network is being co-ordinated by Sustrans, the civil engineering charity.

Q Who benefits from the National Cycle Network?

A Just about everybody - here's how ...

Health The British Medical Association strongly recommends cycling and walking on health grounds. Plus, less car travel means we all breathe cleaner air - a win-win situation!

Heritage Urban and rural conservation are being boosted - countless historic landmarks such as canals, old railways and viaducts are being given a new lease of life.

Look out for this badge!

All Dawes bikes carry this logo to indicate that we support the Network financially.

NATIONAL
cycle network

Community Traffic-free routes are already creating friendlier communities - it's hard to stop for a chat in a car!

Wildlife The network will open up superb wildlife corridors, helping conservation and education, especially in towns.

Volunteering Volunteering is not only great fun, it also brings all sorts of people together in shared, positive projects.

Sculpture All over the country, fresh, intriguing milepost sculptures are brightening people's lives along our routes!

Safety Especially for children - the whole of the National Network will be designed to be safe for an unsupervised 12-year-old, and the traffic-free routes for even younger children.

Millennium Celebration The Network will be the most extensive nationwide project for the Millennium - something really worth celebrating!

Green Tourism The Network will be a national asset, increasing prosperity through tourism in a sustainable way. Thousands of jobs are being created, in such areas as construction, leisure and retail.

Fundraising The Network will provide attractive, safe, fun routes for such community and fundraising events as sponsored walks and treasure hunts.

Access Careful network design will open up a whole new world to those, for instance, with wheelchairs or pushchairs to consider.

A MILLENNIUM PROJECT
SUPPORTED BY FUNDS
FROM THE NATIONAL LOTTERY

For many of you cycling will always remain the same... touring the beautiful English countryside astride a quality handbuilt British bike using the best and lightest equipment on the archetypal touring machine... a Dawes!

touring bikes

Bespoke quality at mass market prices

Dawes continue to dominate this marketplace with our strong quality ethos and skilled craftsmen and women who provide ultra-strong, lightweight precision frames using the best Reynolds frame materials available. With a lifetime guarantee, a Dawes frame really is tough to beat.

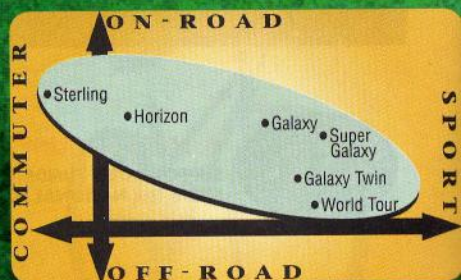

Traditional but not stuck in the mud

We pride ourselves on the respect we have earned as the quality people in cycling and we will always strive to enhance that reputation. We aim to continuously improve the quality of the cycling experience that we provide. New ideas and investments such as the **ergonomic handlebars** for all-round handling capability and **investment cast lugs** for extra strong joints means that Dawes is innovating to make your experience the best there is.

Something for everyone

At Dawes we believe a quality cycle is for life! That means you need a bike that suits your needs precisely. Trying to cater for cycling needs as diverse as the individuals who ride our bikes we have developed a range of bikes to suit different styles and budgets. We are inflexible only in our commitment to quality and your enjoyment.

- ◆ Experienced/Connoisseur: Super Galaxy, Galaxy Tour
- ◆ Advanced/Aspirational: World Tour, Horizon
- ◆ Enthusiast: Sterling

Supergalaxy RRP £799⁹⁹

The Dawes flagship

*It's hard to believe but the Super Galaxy has been tweaked into top shape for the 1998 season. Its **Reynolds 531 Super Tourist frameset** is powered by the highly respected **Shimano LX front and rear gears** aided by the **T.A. Zephyr crankset** for added speed on the road. Leather Brooks saddle, Shimano bar-end shifters and full touring racks, bottles, etc. make the Super Galaxy a tourist's dream machine.*

Colour: British Racing Green

Galaxy

RRP £599.⁹⁹

The ever popular Dawes tourer

The Galaxy maintains its unequalled reputation for quality, durability and performance. The strong, light and versatile **Reynolds 531 Super Tourist frameset** has been upgraded with **Shimano STX-RC 24-speed** drivetrain with bar-end shifters to really put it in the Super League. You'd expect top quality components on a Dawes and the Galaxy doesn't disappoint.

Colour: Steel

ITM Trafficflex suspension stem

Worldtour

RRP £499.⁹⁹

Change your perspectives

This can't be a touring bike. It is, but it just looks at life a bit differently. The **multi-position ergo-alloy handlebars** with the **ITM Trafficflex suspension stem** change the cycling experience. Trekking specific **Vredestein Spider** tyres means that the World Tour is also ready for some trails in far-off places. **Shimano STX** gears and front and rear racks means that the World Tour really can go the distance.

Colour: Montreal Blue

Horizon

RRP £499.⁹⁹

The young upstart with a point to prove

The Horizon shares the **Reynolds 531 Super Tourist Frameset** with the older Galaxy brothers and is a great investment in cycling pleasure. The **Shimano Alivio 21-speed** drivetrain alongside the host of quality components provides real performance at an affordable price.

Colour: Marranti Red

Kalloy adjustable stem

Sterling

RRP £399.⁹⁹

Quality for the enthusiast

The **Reynolds 525 double-buttet** (fat where it needs to be and thin where it can be) cromoly frameset is a really dependable platform on which to build your touring passion. The **multi-position ergo-alloy handlebars** coupled with an adjustable stem, allows the keen enthusiast to find the ideal riding position to suit experience, fitness and riding conditions.

Colour: Night Violet

Some people need to feel the speed!
As MTBs lose some of their novelty, many
real fitness fans are seeking out the
unadulterated pleasure of taking a
machine built for speed onto the road and
giving it some!

r a c e b i k e s

You don't forget your first love

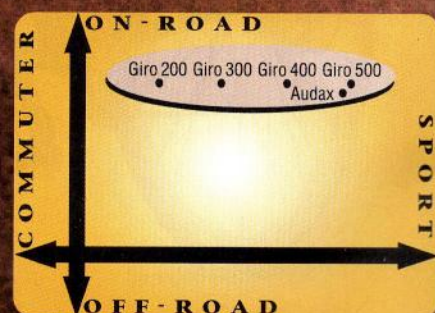

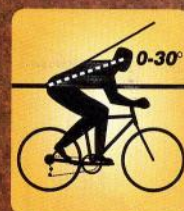

Dawes will always be fondly remembered for its history of road racing in the UK. That heritage and knowledge is still with the company, and it's great to see a renaissance in road racing occurring. The thrill of speed and the lasting satisfaction of a genuine test of strength and endurance will always maintain its appeal.

A Dawes road bike is built on top quality race frames designed in Europe with quality components and a shiny, sleek uniform to speed you on your way

Choose Dawes for choice

We know how important it is to get things just right (just ask our suppliers) and we want to give you the choice, so the 1998 range of Race bikes has been expanded with new frames and all with "straight blade" forks for fast accurate steering so in the Dawes range you'll find the right balance between performance, control and handling for a price that suits you.

Giro400

RRP £399.⁹⁹

Red...ORANGE...Go!!!

Designed to give you the feel of a top competition bike the Giro 400 is a great bike for those who are serious about their fun and their fitness. **STI shifters** and **RX100 14 speed gears** give you real power and speed on a quality lightweight **cromoly** frame.

Colour: Orange

STI shifters for finger-tip control

Giro300

RRP £299.⁹⁹

Electrifying fun

Its elegant and responsive **elliptical frameset** for extra rigidity (read more speed), makes the 300 exhilarating to ride. Not only will you get the expected sprinkling of top quality **Shimano** components but with the **Dawes Damage Limitation paint finish**, its electric look will stay with you, unlike the competition.

Colour: Electric Blue

Dawes Damage
Limitation paint
finish

Giro200

RRP £229.⁹⁹

Versatile fun on a shoestring

A new entry for Dawes. The 200 frame is built from the same **lightweight elliptical frameset** as the Competition Giro 400. A quality component package provides reliable and sturdy performance for a great enthusiast's bike. The **Dawes Damage Limitation paint finish** provides the 200 with the durability you've come to expect!

Colour: Titanium

Straight bladed
forks for responsive
and positive
steering

Whether you're into off road, winding lanes or seeing the world on 2 wheels, some of us just like to have company! Over 50 years of experience tells us that you're going to love it together on a Dawes tandem!

t a n d e m b i k e s

Handbuilt quality – for fun

A Dawes tandem is acknowledged by the industry as being a quality bike at unbeatable prices. They are designed for life. They are tough, durable machines that will bring a serious smile to your face.

Variety for the family

Not only can you choose from our Mountain Bike, Discovery or Galaxy models to get the right machine for you and yours, also we cater for a broad range of sizes and we do a special ladyback version to ensure that any differences in size don't disturb the teamwork and harmony of a great tandem pairing.

With the fitment of a "Kiddie Crank" any tandem can be adapted to provide your kids with a great experience with Mum or Dad.

*Kiddie cranks
are great fun
and easy to fit.*

Double edge RRP £999.99

Hard Hitting Fun

The Double Edge is an unapologetic appeal to the mad kid inside you! A robust **Reynolds 525 double-buttressed cromoly frame** with quality **Shimano STX-RC 24 gears** and super strong **Alesa box-section rims** as well as the **Shimano V-brakes** (for that all important stopping power), are ready for all the punishment you can give it.

Colour: Flame Red

GalaxyTwin

RRP £1299.⁹⁹

An institution for two

Dawes have been building and improving the tandems for years and are still committed to providing you with the best 2x2 machine around. The quality **531 fillet/lugged brazed frame** and a whole collection of top quality Shimano and tandem specific components go to make this a superb investment in fun. It is details like the drag-brake that makes a Dawes a Dawes. Take it for a test ride to get addicted!

Colour: Marranti Red

Powerful
Saccon
V-action
brakes

RRP £849.⁹⁹

DiscoveryTwin

Family entertainment that Disney would envy

Built on the robust, versatile **Reynolds 525 tubeset** the Discovery Twin is a well-equipped family runabout with the potential to do a lot more if your partner wants it. The **Shimano Alivio 21-speed gears** provide great performance and durability. The **Saccon V-action brakes** will ensure that you can go for it until you really have to stop! A family treat that's ready to ride at a remarkably affordable price.

Colour: Steel

Metropolis

RRP £429.⁹⁹

A fold-away beauty

On trains, in your car boot, on your boat this Aluminium beauty will provide "no fuss" performance. With its **easy Nexus 4 internal hub gears** and **no grease belt drive**.

Colour: Polished Aluminium

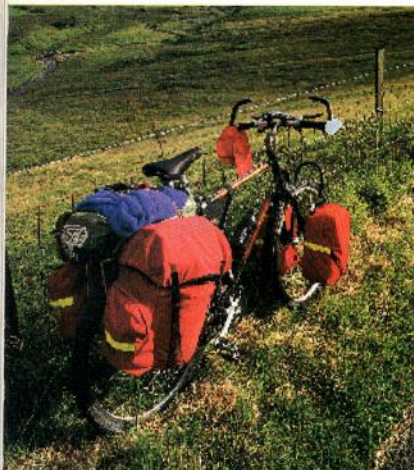

Low Rider

RRP £799

Cruise in comfort at speed

This eye-catching concept is the ultimate comfort ride. **Fully adjustable frame** to fit everyone and powered by easy to use **Nexus 7 hub gears**, the Low Rider will certainly catch admiring glances.

FREEDOM BIKE PACKING PANNIERS

Freedom Bike packing is a small Westcountry firm who for the past 18 years have specialised in high quality cycle luggage. In independent tests in cycling magazines, these handcrafted bags are often chosen as the benchmark against which others are compared. All manufactured in the U.K. they offer the rare combination of traditional quality with modern design features. The Snap-Lock system used on the Explorer range secures bags onto the carrier with a convenient revolving lock mechanism which can be detached instantly. Alternatively the standard system of robust hooks with shock cord tensioners, provide a more traditional fixing. Explorer bags are made from 1000 denier Cordura nylon and come with a five year guarantee which is upgraded to LIFETIME simply by returning a registration card. The Voyager bags are guaranteed for one year.

Freedom offer a repair service and full spares back-up on all their bags, whatever their age.

All Explorer bags are available in black or red.

Voyager bags are only available in navy blue.

FREEDOM EXPLORER TRUNK

16 litre padded bag with easy-access pockets which attaches with velcro to the top of rear racks. Includes integral shoulder strap and rear light pocket.

FREEDOM EXPLORER REAR PANNIERS

As Explorer rear panniers SL, but with a traditional steel hook and shockcord fixing system. Velcro straps are provided to give additional security on rough terrain.

FREEDOM EXPLORER LIMPETS

Unique front pannier design with integral support system which does not require a rack. Bags are detachable for security and cleaning. Fits almost all dropouts, including suspension forks. 26 litre capacity.

FREEDOM EXPLORER SL REAR PANNIERS

Constructed for the highest performance specifications. Spacious 50 litre (per pair) main compartments are secured by drawstring closure and deep elasticated hoods. Large rear pocket and Snap-Lock mounting to carriers.

FREEDOM EXPLORER HANDLEBAR BAG

Large 14 litre capacity barbag with well stiffened main compartment with two internal pockets, small front pocket and map pocket. Supplied with steel support and shoulder strap.

FREEDOM EXPLORER MIDI PANNIERS

Versatile 26 litre (per pair) bags in a 'universal' design to fit front, lowrider or rear racks. Traditional fixing.

FREEDOM EXPLORER COMMUTER BAGS

Versatile commuter bags which accept A4 files and have zipped front pockets. Supplied with Snap-Lock fitting system to attach in seconds to most rear racks. Panniers zip together for easy portability off the bike. The right hand bag has a transparent rear pocket for a light. 32 litre capacity.

FREEDOM VOYAGER PANNIERS

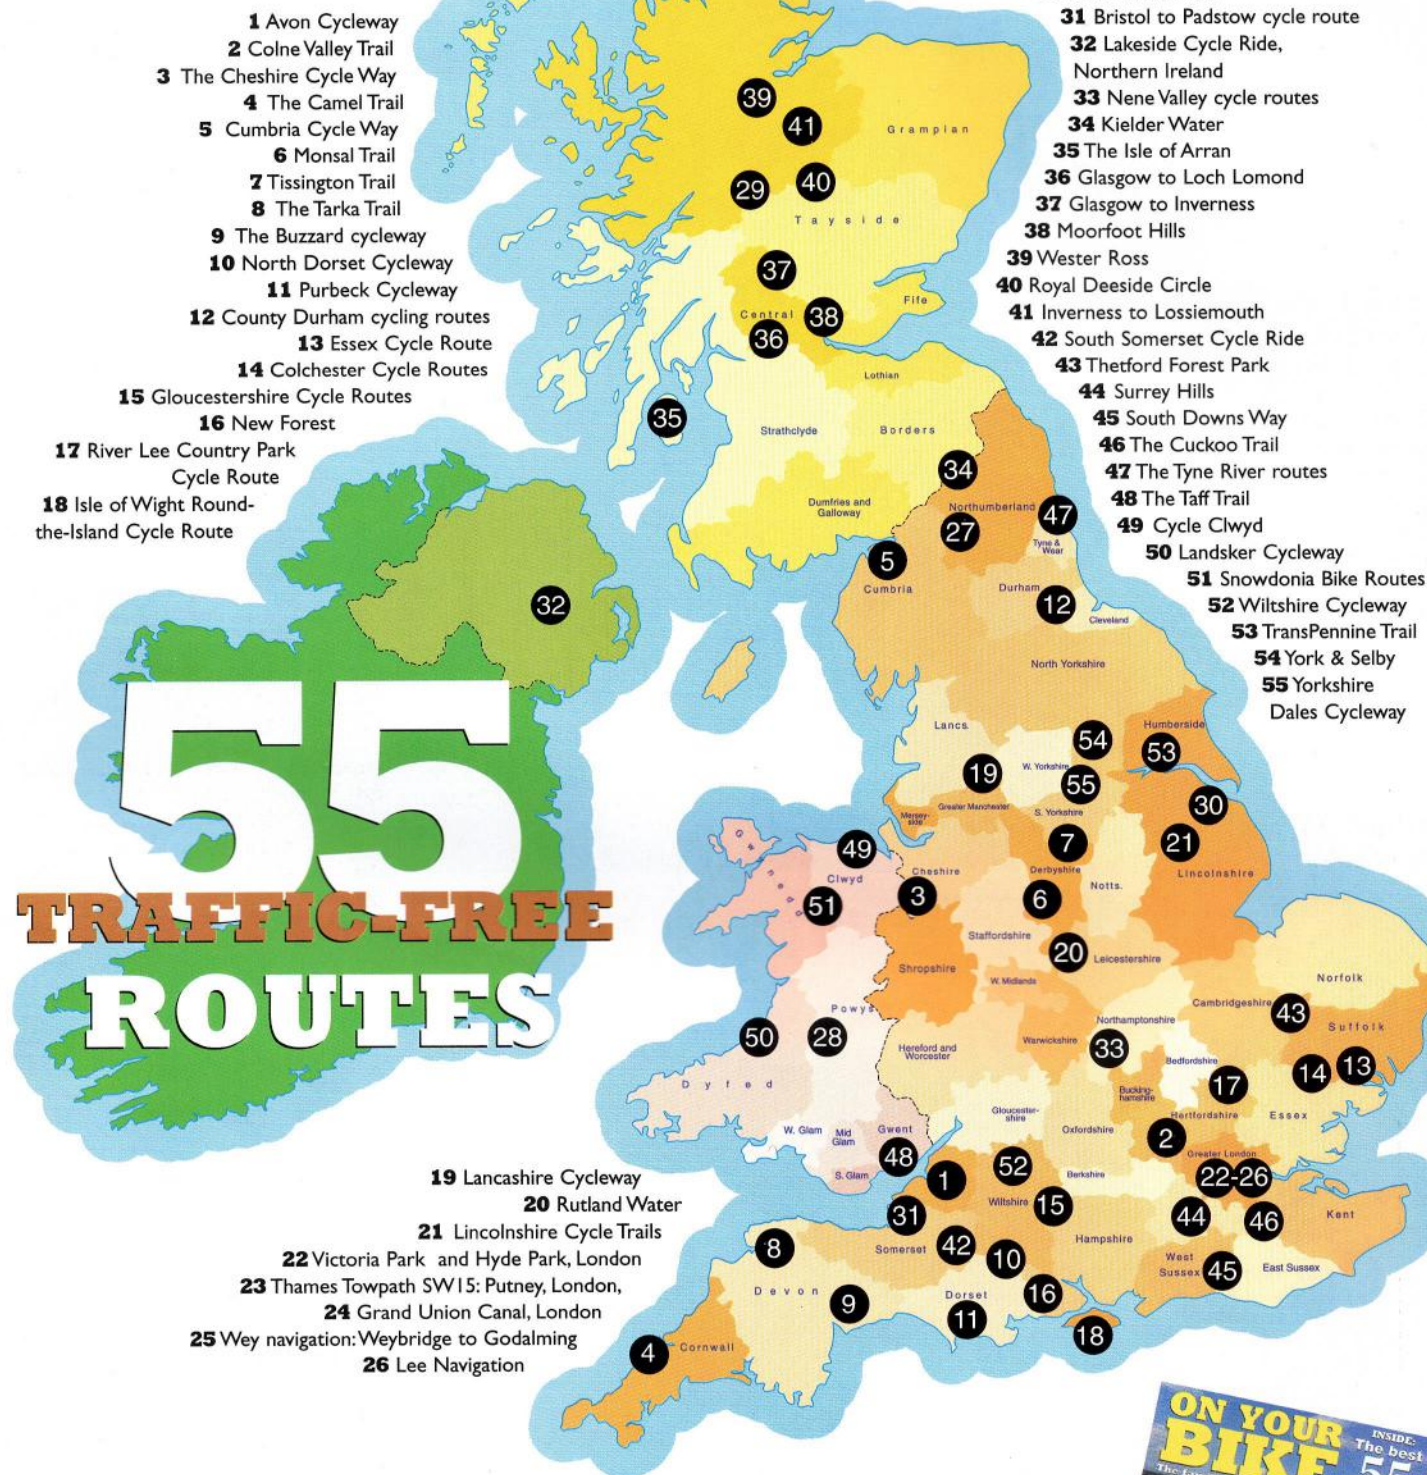

More economical but durable load carriers made from 70z Nylon, available in two sizes. Standard attachment systems to fit any rack. 38 litre Rear. 26 litre Universal. Only available in navy blue.

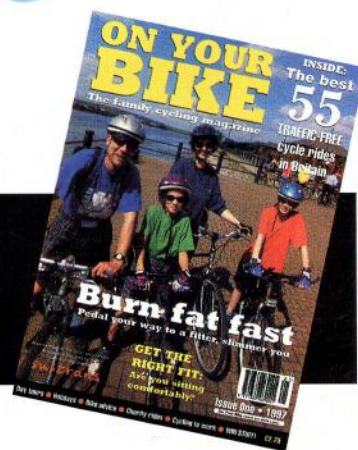

Type	Pair/ Single	Material	Capacity	Fixing System
Explorer Rear Panniers	Pair	Cordura	50L	STD (Steel hooks/shock cord)

Trunk (Rack Top)	Single	Cordura	16L	Velcro

You've got your Dawes bike... ...go out and enjoy it

Note: some of the following routes are not so much traffic-free as traffic-lite. However, the number of cyclists on country lanes discourages drivers.

**"On Your Bike" is available in all
good bike shops and newsagents**

For the cycle dealer, cycling is not just a business, it's a way of life. We are in a unique position to experience the products that we sell, and we sell the products of our experience. In all our cycle mileage and workshop hours we have become intimately acquainted with the mechanical details of this complex machine; and we know firsthand what it means to have a comfortable bike! The benefits of our experience; *Your comfort, Your safety, Your enjoyment.* That's why Dawes recommends that you go to your local independent cycle specialist.

(Andy Shrimpton, independent cycle dealer, Cycle Heaven)
