

MONTAGUE®

Performance + Portability

www.MontagueBikes.com

ON-THE-FLY MOBILITY OPTIONS.

By creating some of the most versatile bikes anywhere, we give you the split-second ability to choose just how you want to move. This means you don't have to decide between driving or riding your bike to work - it means you now have the freedom to do both. Stuck in a traffic jam or a crowded train on a beautiful day? Pull out your Montague® and ride the rest of the way in. The choice is yours.

www.MontagueBikes.com

PERFORMANCE + PORTABILITY

Performance. All Montague bikes are designed to ride as well as, if not better than, comparable non-folding bikes. During the design process, we focus on perfecting ride quality, handling, and comfort. We believe you shouldn't have to sacrifice any of these crucial components even if the bike does fold to fit in the trunk of a Mini Cooper®.

Portability. All Montague bikes go from full size to completely folded in under 20 seconds. Sound convenient? Simply pop the front wheel off and open the frame quick release to fold the bike - no tools, no complicated instructions. This isn't about origami, it's about folding your bike in a flash to catch the bus or train.

TECHNOLOGY. INNOVATION. PASSION.

A guiding principle of innovation and a passion for cycling at its purest form is at the heart of every one of our bikes. Each Montague frame is built around our patented F.I.T.™ system. This design eliminates the need to break the frame in order to fold the bike. Not only does this make folding easier, but it makes our bikes the strongest folding bikes on the market.

"You forget that you are in the saddle of a bike that can be stored in a closet."
-Mountain Bike Action Magazine

PAVEMENT

FIT™ With the speed of a road bike, the versatility of a hybrid, and Montague's legendary folding design, the FIT was created to provide the highest performance road ride of any foldable bike available, bar none.

- 30-speeds, Shimano Tiagra
- Carbon Fork
- FSA Crankset
- Sizes: M (19"), L (21")

NAVIGATOR® Like your morning coffee and paper, the Navigator is a commuter's necessity. Fast like a road bike and built for the commute, the Navigator rides like the wind and folds to stow under your desk or on the train.

- 27-speeds, Shimano Sora
- Octagon Handlebar Height Adjuster
- Quick Release Front & Rear Mudguards
- Cargo Rack
- Sizes: M (19"), L (21")

PAVEMENT

BOSTON™ 8

The BOSTON 8 combines sleek design with the convenience of an 8-speed internal hub.

Just like its single speed counterpart, it's perfect for urban riding and can easily be stowed away until your next ride.

- Shimano Nexus 8-Speed Internal Hub
- Puncture Resistant Tires
- Quick Release Front & Rear Mud Guards
- Sizes: S (17"), M (19"), L (21")

BOSTON™

The BOSTON brings back the basics as the first 700c single speed folding bike. Stripping away the complexities of urban life, this bike leaves you face-to-face with the open streets.

- Lightweight Single Speed
- Flip Flop Rear Hub for Fixed Gear Riding
- Puncture Resistant Tires
- Sizes: M (19"), L (21")

PAVEMENT

CROSSTOWN™

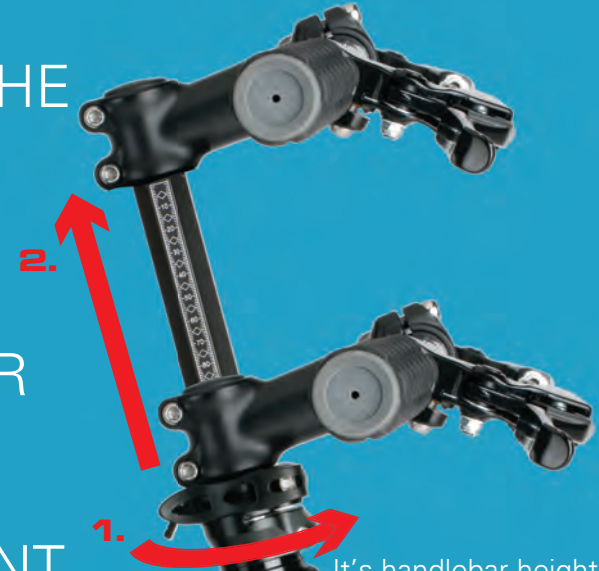

Just fold and go. The ever classic do-it-all bike. Whether you're riding for health and fitness, or just to get around town, the Crosstown's comfortable, ergonomic riding style has you covered.

- 7-speeds, SRAM X-3
- Octagon Handlebar Height Adjuster
- Comfort Saddle
- Sizes: S (17"), M (19"), L (21")

OCTAGON™
STEERING SYSTEMS

EASY, ON THE
FLY, TOOL
FREE
HANDLEBAR
HEIGHT
ADJUSTMENT

It's handlebar height adjustment with a quick release. Standard equipment on the Crosstown and Navigator, the Octagon quick-release handlebar height adjuster is also available at your favorite local bike shop as an aftermarket component.

MOUNTAIN

SWISSBIKE X90

The SwissBike X90 is an aggressive 30-speed hardtail that can dominate rugged single track with the best of them. With a stiff frame and a snappy ride, the X90 beckons to the avid rider who demands both performance and portability.

- 30-speeds, SRAM X-0
- Rock Shox Sektor RL Fork
- Hydraulic Disc Brakes
- Suspension Seatpost
- Sizes: M (18"), L (20")

SWISSBIKE X70

The SwissBike X70 is a rugged 30-speed mountain bike. Sharing the same solid frame design as the X90, the X70 is built for after-work rides on your favorite trails and full-on weekend excursions in the mountains.

- 30-speeds, Shimano SLX
- SR Suspension Fork w/ Lockout & Adjustment
- Micro Adjust Disc Brakes
- Sizes: M (18"), L (20")

MOUNTAIN

PARATROOPER® PRO

Take your off-road riding to the next level with the Paratrooper Pro. With plenty of gears for climbing and 100mm of travel in the front shocks to absorb the bumps of off-road trails, you'll be ready to tackle the toughest terrain.

- 27-speeds, Shimano SLX
- Front Suspension with Speed Lock-Out
- Disc Brakes
- Sizes: M (18"), L (20")

PARATROOPER®

A classic from Montague, the

Paratrooper is tough, rugged, and ready for anything. Designed to drop from the sky and land prepared for action, the Paratrooper can conquer any terrain, and fold to stash in your trunk for the ride home.

- 24-speeds, Shimano Deore
- Front Suspension
- Disc Brakes
- Sizes: M (18"), L (20")

MOUNTAIN

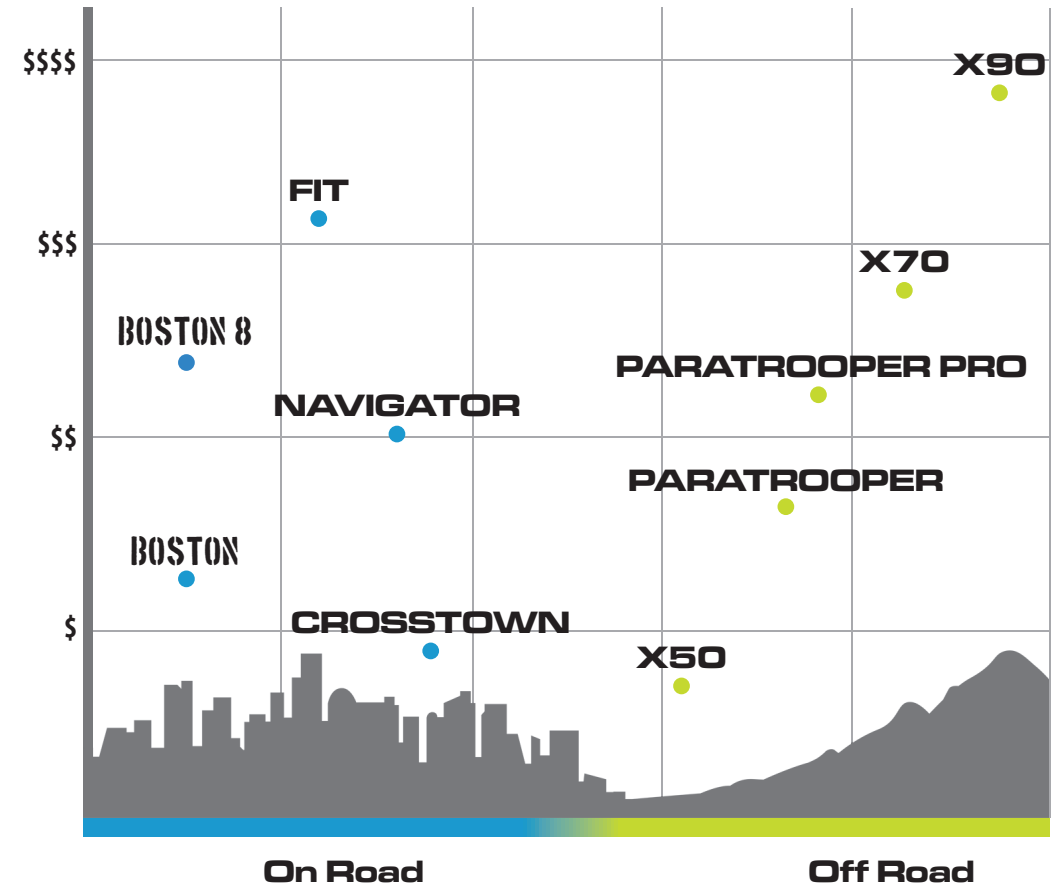

CHOOSE YOUR BIKE

SWISSBIKE X50

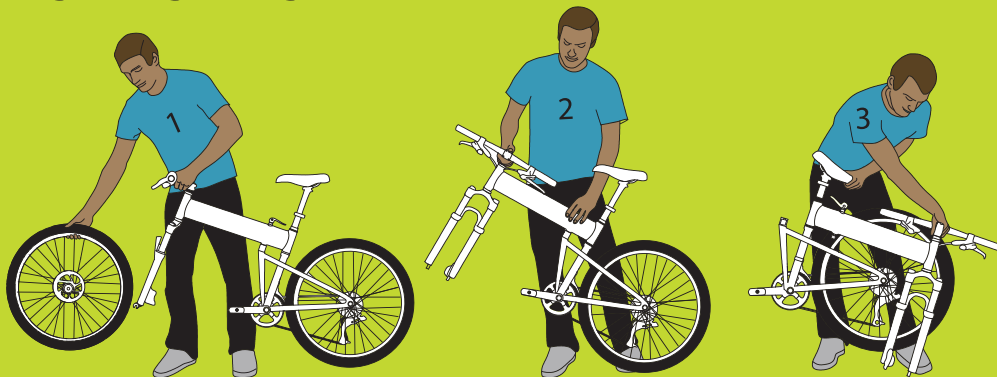

Like all Montague bikes, the SwissBike X50 is designed

to fold and fit anywhere. With front suspension and all terrain tires, the X50 makes for the perfect light trail bike or rugged commuter.

- 18-speeds, Shimano
- Front Suspension
- Adjustable Quill Stem
- Sizes: S (16"), M (18"), L (20")
