Few things in the world can be classified as the finest. The Peugeot Carbon Fiber frameset is one. Consider its proven elements: Bador bonding of Vitus Aluminum lugs to Peugeot's own Carbon Fiber tubing. Consider the results: a precise combination of silky ride and quick-as-thought handling that has won races for the Peugeot European racing team, the Peugeot Winning Club women's team, and triathlete Mark Allen.

What makes a perfect bicycle? Quality, road feel, precision, and value. Take the Peugeot PX, for example. Italy's finest tubing—Columbus SLX—hand-brazed, and outfitted with a complete Mavic ensemble to achieve a quick, responsive bicycle ready to tackle any challenge, from a grueling training run to an all-out sprint.

TRIATHLON

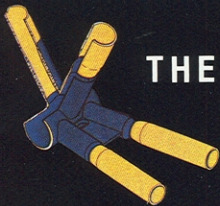

21.7 lbs

Last year's introduction of this bike was a pure expression of Peugeot's imaginative mind. For this year, the bike has received an indexed-shifting package from Shimano, and a full Shimano gruppo to complement the Vitus 980 frame and fork. Consider also the Mavic rims, Michelin bald tires and hot two-tone colors, and you've got a winner.

64cm	72" 30'	73" 30'	39 1/4"	59.7cm

THE PEUGEOT / PECHINEY PROCESS

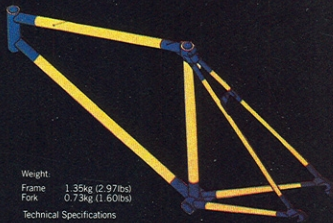

The assembly of the frame is performed with a special, patented technique that fits the tubes into the lugs without the use of any bonding process such as welding or glue. Some other manufacturers use oversize tubing with a welding process which compensates for the loss of strength but adds to the weight. The Peugeot frame uses standard size tubing of 28mm, thus the weight of our frame is exceptionally low.

The Finish

An anodic oxidation process protects the tubes, thus ensuring a long-term protection as well as a high quality finish.

Conclusion

Peugeot has met its goal of offering to the cycling public a range of competitive aluminum bicycles that heretofore were available only to the professional. They are competitive, not only for their technical performance, but for their price as well.

GALAXIE

19.8 lbs

When Peugeot decided to make an aluminum-frame bicycle, we wanted it to reflect the construction of all of our bikes: high quality, light weight, excellent performance for the dollar. We did it! The Galaxie introduces to the bicycling world a tube-joining technology developed by the French aerospace industry. It also makes use of the state-of-the-art indexed-shifting ensemble from Shimano. East meets West in this bike, and the results will soar.

INTERNAL BRAZING

Lightweight bicycle frames are usually brazed. The low heat brazing technique preserves the mechanical properties of the tubing, and therefore provides the best possible compromise regarding weight and strength.

Cycles Peugeot's lead in the technological field increased after the development of a brazing process for lugless frames with seams that are virtually inseparable. Unlike other manufacturers who simply press cut their tubes, Peugeot uses a special milling machine to miter the ends of the tubing to exact tolerances. Finally, after the tubing is prepared, it is fitted precisely on a jig and INTERNALLY BRAZED. This process allows the tubing to be strongly joined without requiring the added support and weight of lugs. The result is a bicycle with a clean finish, superior strength, and an incredibly low weight.

VENTOUX

PH501

22.8 lbs

When the Ventoux was introduced, it was a truly competitive bike in handling, road-feel, looks, and value. At less than 23 pounds, and offering sealed bottom bracket, headset and hubs, a stronglight crank, Michelin tires, and Reynolds 501 tubing, the Ventoux will continue in 1987 what it started in 1985.

HLE TUBING

HLE is Peugeot's exclusive alloy tubing. It is a "micro alloyed steel" which is composed of Manganese, Niobium, Aluminum, Carbon and Titanium, which offers a lighter, yet stronger frame. These elements are commonly used in the production of aeronautical steel. The introduction of these elements results in a steel with dramatically improved mechanical properties when compared with more conventional steel.

The strength to weight ratio of HLE tubing is far superior to that of conventional tubing. Using this tubing enables Peugeot to save more than seven ounces in the weight of the frame. The HLE tubing, when used with our patented internal brazing system, gives Peugeot a frame which is at the top of its class in performance and reliability.

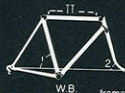

S P O R T

TOURMALET PH10LE

24.5 lbs

The short wheelbase of a racing frame, an indexed-shifting package, HLE alloy frame, sealed headset, hubs and bottom bracket. What more could one ask from an entry-level racing bike? How about weight less than 25 pounds, toe-clips, black anodized rims and Michelin tires? See you at the finish line...and on the open road.

Crank

ALPINE EXPRESS 30.5 lbs

It was only a matter of time before the number one European ten speed manufacturer began to build a mountain bike for the American market. The Alpine Express has arrived. The bike uses Reynolds 501 over-sized tubing, and all the right components from Europe and the Orient. Shimano "New" Deore brakes, crank and derailleur, and sealed headset and bottom bracket from Tange are joined with a Sedistraveler chain, Maillard sealed hubs, Rigida rims, and Michelin tires for excellent performance.

CANYON EXPRESS 29.0 lbs

The legend of the Canyon Express continues with this full chromoly double butted ATB. Shimano "New" Deore equipment, Biopace crank and a full complement of braze-ons help to make this bike a sure-fire winner in 1987.

Brake

U S E X P R E S S 31.0 lbs

A versatile ATB for the recreational rider. Shimano AT50 cantilever brakes, alloy rims, and an alloy crankset are components that are generally found on a much more expensive ATB.

C R U I S I N G

PIPELINE 1 31.9 lbs

The Peugeot Pipeline 1 has been a very popular, classy way to get around town and the beach. This year we introduce our new air-brushed color combinations, an eye-catching, elegant, and lightweight bike for men and women. Our frame geometry, combined with a wide saddle and foam handlebars provides easy riding, comfort, and recreation – what leisure!

PIPELINE 5 32.9 lbs

Peugeot's Pipeline 5 is yet another version of our Pipeline 1. It's a five speed built for longer range and greater stopping power, with the same advantages as the Pipeline 1: new air-brushed colors to entice the eyes, and models for both men and women. It's not just another cruiser, it's definitely the cruiser to have.

SPECIAL PURPOSE

P 2 0

32.0 lbs

The perfect bike for apartment dwellers, the P20 is foldable for easy storage, with three speeds for easy riding. Quick release adjustments on the seat post and handlebar allow the P20 to accomodate everyone.

EXERCISER

Exercising will become comfortably rewarding on our newly designed Peugeot Exerciser. The extra-wide padded saddle and foam handlebar grips contribute to a very enjoyable unit. Handlebar and seat adjustments are made easily with our convenient quick release mechanisms, and our digital timer complements the easy-to-read speedometer and odometer.

C 4 6

25.0 lbs

The junior version of our sporty ten speed bicycle is complete with components comparable to those found on our adult touring models. The C46 (boys) and M46 (girls) both come with twenty-four inch wheels. The junior racing style handlebars have foam grips for comfort, and the alloy side-pull brakes are equipped with extension levers for convenience. What a bike for your young adult to begin to reach new horizons.

CP16

23.1 lbs

Your child's first bike should be as safe, durable and dependable as your own. For safety, the convertible CP16 has a removable top tube and training wheels, and a coaster brake to help the first-time rider gain confidence. For durability, there are bearings in the headset, bottom brackets, crank, pedals and hubs. Pneumatic tires and twenty-eight spoke wheels give that "adult bike" feel. This is sure to be a bike handed down from the first child to the last.

CP20

25.9 lbs

Two-tone graphics, quality construction and traditional styling make this the perfect bicycle for the young lady who wants to pedal in style. Pneumatic tires, thirty-six spoke wheels, full bearing construction and a chainguard will appeal to the rider's parents because of their practicality.

RANGER EXPRESS

31.2 lbs

Now you can share the mountains with your child. The Ranger Express is built with the same philosophy as Peugeot's adult all terrain bicycles. Its five speed gearing system, derailleur guard, and side-pull brakes offer safety, versatility, and reliability for your young rider. The rugged Ranger Express will keep your mini mountain climber at your side.

TRICYCLES

Fun and fantasy describe the trio of tricycles from Peugeot. European styling, for the first-time sidewalk tourist, with their fully welded frames, completes our family of bicycles. These trikes are built to the same European standards as the rest of our Peugeot line.

LIMITED LIFETIME WARRANTY

Subject to the Conditions and Limitations set forth below, Cycles Peugeot U.S.A., Inc. "C.P.U.S.A." 555 Gotham Parkway, Carlstadt, NJ 07072, warrants to the original owner thereof every new Peugeot bicycle, including all parts and accessories (except tires, tubes, light bulbs, and lenses) furnished with it as original equipment by the factory, supplied by C.P.U.S.A. and purchased from an Authorized Peugeot Bicycle Dealer to be free from defects in materials or workmanship under normal use for so long as it is owned by the owner.

Cycles Peugeot U.S.A., Inc will repair or replace any part covered by the above warranty which becomes defective, malfunctions, or otherwise fails to conform with the warranty at no charge for parts. In order to obtain warranty service, the bicycle, together with the bill of sale or other dated proof-of-purchase document identifying the bicycle frame number, must be presented to an Authorized Peugeot Bicycle Dealer in the United States. Transportation costs and Dealer's labor charges are not covered by the warranty. The names and addresses of Authorized Peugeot Bicycle Dealers are listed in telephone directories or may be obtained by writing to Cycles Peugeot U.S.A., Inc. IMPORTANT: In order to validate this warranty, the Warranty Registration Card must be completed and returned to C.P.U.S.A.

This warranty does not cover normal wear, defects, malfunctions or failures which are a result of misuse (including stunt riding, bicycle motocross, dirt biking, or similar activities), neglect, abuse, alteration, modification or accident.

All implied warranties, including the warranties of merchantability and fitness for a particular purpose shall be limited in duration to the period of time set for the above. C.P.U.S.A. shall not be responsible for incidental or consequential damages, so the above limitation or exclusion may not apply to you. This warranty gives you specific legal rights which vary from state to state. This is the only warranty applicable to Peugeot bicycles; C.P.U.S.A. neither assumes nor authorizes anyone to assume for it any other express warranty.
